DAPL SITREP 193

March 24, 2016

John Porter
Chief Security Officer
[redacted]

INFORMATION CONTAINED IN THIS REPORT IS PROPRIETARY AND SENSITIVE.

DO NOT RELEASE OUTSIDE OF AUTHORIZED AND APPROVED RECIPIENTS.

The Highlights

The fencing crew's attention to detail is slacking as valve sites inspected today in SD today were unacceptable. Loose fencing allows outsiders to pull the bottom up and scoot under the fence, also the barbed wire was too loose to be effective. Much like Afghanistan and Iraq, the "Fighting Season" will soon be here with the coming warming temperatures.

.

The Details

1. NORTH DAKOTA

A. Intel Update

1) As news of the damaged valve sites continues to spread the likelihood of further attacks also increases due to the successful delay of DAPL being completely operational. Since the articles also discuss the tactics used, we can expect copycat attacks in the future.
2) Some protesters may be hesitant to vandalize the valve sites since protesters are aware the FBI is investigating the vandalism. Protesters have also expressed concern the attacks on the valves may be labeled terrorist attacks and fear he consequences of being charged as a terrorist. Though some protesters are advocating against the attacks, it could cause others to locate remote valve sites for an increased likelihood of getting away with vandalism.

B. Past 24 Hours

1) A suspicious black Nissan Altima with a lone white male driver in his 50 pulled into the approach by HDD-East and took photographs and then drove away. Law enforcement was notified.
2) Suspicious male subject was seen by DAPL security helicopter walking along the ROW near valve ND-265. Law enforcement was notified and responded. There was no damage to the site.
3) DAPL security helicopter conducted aerial patrol from valve ND-210 to ND-430. DAPL security also roved the valve sites in North Dakota.
4) Protesters continue to share articles outlining the vandalism of the valve sites in South Dakota and Iowa. The articles being shared also discuss the tactics used to vandalize the valve sites.

C. Next 24 Hours

1) Continued monitoring of Open Source information, ISR feeds, and other sources of information to provide accurate assessments of protester activities/migration which may impact DAPL operations.
2) DAPL security will continue to rove the valve sites in North Dakota, and will begin stationing incoming security guards at static posts at remote valves sites throughout the state.
3) Cleanup efforts continue

2. IOWA

A. Intel Update

1) Protesters began building a sweat lodge at Little Creek Camp. Permanent infrastructure signifies the growing legitimacy of the camp. https://www.facebook.com/IndigenousIowa/posts/1857077157913356
2) Prominent SR protesters Myron Dewey and Ed Higgins visited Little Creek Camp. Christine Nobiss remarked they were there to help develop better safety protocols and Indigenous ideologies and methodologies behind the camp. https://www.facebook.com/permalink.php?story_fbid=10104681235358759&id=14830117
3) SR protester Lolly Bee posted on FB about her positive experience at the Little Creek Camp. Bee likened the camp to SR and called for long term visitors to join who are willing to challenge the Iowa Utilities Board(IUB) and DAPL in court. https://www.facebook.com/lolly.be.7/posts/10101135033001578

B. Past 24 Hours

1) Field Managers [redacted] and [redacted] reported nothing significant in their respective AORs and continue to patrol the ROW and interact with the security force.
2) Adjusted manning in accordance with the requirements according to the new Task Order

C. Next 24 Hours

1) Continue to have the field managers patrol the ROW and guard personnel.
2) Continue to track thru social media the Little Creek Camp, Bold Iowa, and person(s) of interest in the pipeline arson.
3) Continue to adjust personnel across the state.
4) Briefed two contractors on security across the state as they will be on every site installing cameras

3. ILLINOIS

A. Intel Update

1) Activists in Illinois appear to be preparing for a summer of anti-pipeline activity, as Illinois Against DAPL shared Sacred Stone's statement of an "Anti-PIpeline Summer" listing pipelines across the country using the below activist hashtags. This was teased two days ago by a post that simply said, "#NODAPL Summer, coming to a pipeline near you. Stay tuned." The unfocused nature of the activists' list is a positive, as it offers activists in Illinois no guidance on where to concentrate their anti-pipeline activities
2) "If you were wondering what's next for water protectors... #NoKXL#NODAPL #NoBayouBridge #StopLine3 #ShutDownLine5 #NoTPPL#NoCTPL #StopSabalTrail #StopLine3 #StopKM #StopETP#StopSpectra #StopPilgrimPipeline #NoLNG #ArkansasRising #StopDiamondPipeline #NoASL #NoMarinerEast"

3) April 29 People's Climate March, hosted by Food and Water March at the James R. Thompson Center, downtown Chicago. The climate march will be held in Washington D.C., with sister marches held across the country. An emphasis of the march will be resistance to pipelines.
4) Other high-profile activists such as Joye Braun and Johnny Dangers are raising awareness of the Keystone XL Pipeline, focusing activist attention on it, and increasing expectations there will be high levels of indigenous resistance to KXL. Beyond the threat to the environment they believe KXL poses, the activists repeatedly emphasize the perceived threat to indigenous ways of life. Activist attention focused on KXL is a net positive for ETP since no new Keystone construction will occur near current ETP pipelines. https://www.facebook.com/joye.braun/videos/10155771398759057/

B. Past 24 Hours

1) Continue to support Sunoco personnel with operations as needed
2) Conduct open source monitoring of activist groups
3) Conduct inspections of the Patoka pump Station and Pipe Yard
4) Conduct inspection of IL 25 where Corrpro is to set in drill equipment

C. Next 24 Hours

1) Conduct coordination with security contractor to initiate security operations along the Illinois ROW in order to secure key infrastructure.
2) Continue to support Sunoco personnel with operations as needed
3) Conduct open source monitoring of activist groups

4. SOUTH DAKOTA

A. Intel Update

1) The advancing of the Keystone XL pipeline construction will directly impact the growth of 'resistance' camps in SD, primarily the Cheyenne River Sioux Tribe camp at the Eagle Butte, SD powwow grounds. There will likely be more camps established as the weather continues to improve. The residents of these camps, though focused on XL, will have opportunity to cause issues for DAPL sites in SD.

B. Past 24 Hours

1) Security guards, with On Point, are continually being posted at sites in SD.
2) SM Fencing installed temporary, chain link panels until permanent fencing is installed. Confirmed the paneling installation at SD 65, 80, 90, 95, 185, 190, 200, 210, 220, 230, 270, 280.
3) Confirmed the completion of SD 60, 70, 74, and 76.

C. Next 24 Hours

1) Security guards, with On Point, are continually being posted at sites in SD.
2) SM Fencing installed temporary, chain link panels until permanent fencing is installed. Confirmed the paneling installation at SD 65, 80, 90, 95, 185, 190, 200, 210, 220, 230, 270, 280.
3) Confirmed the completion of SD 60, 70, 74, and 76.
