Re: Supplemental Background Investigation of Judge Brett Kavanaugh

Dear Director Wray and Mr. Boente:

It has been five days since the United States Senate Committee on the Judiciary and the White House announced that the FBI had been directed to conduct a supplemental investigation of Judge Brett Kavanaugh to investigate credible allegations of sexual assault made by our client, Dr. Christine Blasey Ford.

On Friday evening, after a telephone conversation with Mr. Boente, we sent an email offering Dr. Ford's full cooperation, including her willingness to be interviewed by FBI agents. We have repeatedly asked you to identify the Supervisory Special Agent responsible for this investigation, so that we could contact him or her directly. We have received no response.

We also sent you a series of emails and letters in which we identified witnesses and evidence that would likely assist the FBI in its investigation into Mr. Kavanaugh's sexual assault of Dr. Ford and asked you to forward them to the supervisory agent.

Despite these efforts, we have received no response from anyone involved in this investigation, and no response to our offer for Dr. Ford to be interviewed. This afternoon, we learned of media reports that the FBI does *not* intend to interview either Dr. Ford or Judge Kavanaugh. We hope that this reporting is inaccurate. It is inconceivable that the FBI could conduct a thorough investigation of Dr. Ford's allegations without interviewing her, Judge Kavanaugh, or the witnesses we have identified in our letters to you.

We request a call with you or the Supervisory Special Agent in charge of this investigation this afternoon. We await your response.

Sincerely,

Michael R. Bromwich

Debra S. Katz
