AJ, hope you had a great thanksgiving....can you give me a call...? 619 804 3359.

There is a software disclosure form that tech transfer needs you to sign off on....im sure you have been made available a copy of the disclosure, but I'll attach it here in case you haven't. This disclosure is simply stating facts that the software development for the PrTMS software did not occur using UCSD funds or resources, and that I wasn't hired in our department or by UCSD to be a software engineer (not part of my core related work or competency). Can you please sign this, or let me know why you are not signing it....?

In terms of the audit, I begged for direct oversight by the Dean's office of the 10M fund, and for a specific fund manager to manage the fund, and was denied by Gene Hasagawa and Brandon Rhodes. It was pushed back to our department, and I was given a one day a week Eric Lin, then eventually Stephanie, who subsequently went on maternity leave....we have done our best to account for all of the equipment. I do not believe there are any issues with the audit, but I have not seen a report. If there are issues, they will be small, and should not reflect badly on our department.

We spend about 40-50k per month for our space and staff while we wait for approval to start the trials. I started the compliance process with Dan Weissburg last November.....k
