CONCERNS

I cannot recommend approval of this application until the following concerns are addressed:

1. Any ruling in this case should list the source of the water out to the Colorado River.
2. Applicant should provide reports and other documents, which support the diligence activities performed within the relevant diligence period as claimed in the application.
3. The information in the application regarding the dimensions of Sue's Four Mile Reservoirs Nos. 1 and 2 meet the definition of jurisdictional dams. Prior to constructing these dams, Applicant must submit plans and specifications for review and approval to the State Engineer's Office.

RECOMMENDATIONS

Based on the above concerns, the State and Division Engineers ask that the Applicant address the issues discussed in this consultation prior to the Court granting diligence on any water rights.
