[Redacted]

Hi [Redacted]

Thank you for the attached I'll forward to ███ in Campbeltown for him to action – I'll get him to give them a call and remind them of their responsibilities and find out their reporting procedures, also that they have taken their common seal quota, followed up with a letter.

Regards

Hi [Redacted]

Licence and cover letter for this licence are attached.

They are supposed to make every effort to recover the seal when shot but very few seem to.

Thanks

Morning [Redacted]

Just north of Carradale. No I have never heard of a recovery! I think I these instances we have contacted the responsible person and verbally reminded them of the requirements. I think that is what will be required on this occasion. We will need the details of the Company. Perhaps [Redacted] can direct us to where the licence copies are held or provide the contact details.

Morning

Seal licence breach. Don't know who this would go to.

Looking at it, have you ever seen a shooting where they have recovered the dead seal?

Hi

I hope you are safe and well, I appreciate that during this time these seal licence misdemeanours will not be actioned, but to ensure they are noted I'm continuing to send them to you.

This one is several hours outside the 48 reporting requirement.

I also note that this is a licence has only 1 site on it. We varied this licence last week to add an additional 1 harbour seal as they had already used the quota they had.   They have now (again) used all of the quota for harbour seal on this licence.
