Now, I have a few questions about the Republican Party's nomination process. As you may know, in order to win the Republican Party's nomination for president, a candidate must win the support of a majority of the delegates to the Party's national convention, which will be held in July. If no candidate wins a majority of delegates through the primary and caucus process, as reflected in the first round of voting at the convention, delegates will have additional rounds of voting until a single candidate wins majority support.

METHODOLOGY

A total of 1,001 adults were interviewed by telephone nationwide by live interviewers calling both landline and cell phones. Among the entire sample, 31% described themselves as Democrats, 26% described themselves as Republicans, and 43% described themselves as independents or members of another party.

All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect national Census figures for gender, race, age, education, region of country, and telephone usage.

Crosstabs on the following pages only include results for subgroups with enough unweighted cases to produce a sampling error of +/- 8.5 percentage points or less. Some subgroups represent too small a share of the national population to produce crosstabs with an acceptable sampling error. Interviews were conducted among these subgroups, but results for groups with a sampling error larger than +/-8.5 percentage points are not displayed and instead are denoted with "NA".

Question 27

As you may know, Sen. Ted Cruz, who is running for the Republican nomination for president, has selected Carly Fiorina as his vice presidential running mate. Does having Carly Fiorina as his running mate make you more likely to vote for Ted Cruz in November if he were to win his partys nomination, less likely, or will it not have much effect on your vote?
