BEFORE THE ENVIRONMENTAL QUALITY COMMISSION 1 OF THE STATE OF OREGON 2 **MUTUAL AGREEMENT** IN THE MATTER OF: AND FINAL ORDER 3 BULLSEYE GLASS CO. No. AQ/V-NWR-16-088 an Oregon corporation. 4 WHEREAS: 5 1. Bullseye Glass Co. (Bullseye) owns and operates a glass manufacturing facility at 3722 SE 21st Avenue, Portland, Oregon (the Facility). 6 2. The Oregon Department of Environmental Quality (DEQ) regulates sources of air 7 pollution to ensure protection of public health and the environment. 8 3. DEQ and Bullseye each seek regulatory and operational clarity, compliance with law, and certainty with respect to the operations of Bullseye's glass manufacture operations in 9 Portland, Oregon. It is in the best interests of both DEQ and Bullseye to enter into this Mutual 10 Agreement and Final Order (MAO) to further those common goals. 4. Prior to May 19, 2016, DEQ and Bullseye had sought to secure these objectives 11 through negotiation for a Mutual Agreement and Final Order. To that end, on May 4, 2016, 12 DEQ sent to Bullseye a discussion draft of a proposed MAO. The agreement specified terms 13 under which Bullseye could continue to operate its business, within new limitations, including by operation of furnaces that had no pollution control equipment attached to them. On May 19, 14 2016, Bullseye returned a revised draft MAO to DEQ and asked DEQ to accept the draft... 15 5. On May 19, 2016, DEQ issued a final Cease and Desist Order to Bullseye (C&DO), effective for 10 days, and requiring Bullseye not to use any of eight specified metal 16 hazardous air pollutants (HAPs), except in a controlled furnace. Those HAPs are arsenic, 17 cadmium, chromium, cobalt, lead, manganese, nickel, and selenium. Page 1 - MUTUAL AGREEMENT AND FINAL ORDER 18 19 (Case No. AQ/V- NWR-16-088)

(Case No. AQ/V- NWR-16-088)

Page 2 - MUTUAL AGREEMENT AND FINAL ORDER

6. The C&DO was entered by DEQ in view of the following information:

A. DEQ operates an air quality monitor located at the CCLC daycare facility located at 2215 SE Gladstone Street in Portland, Oregon, across the street from, and to the south of Bullseye.

- B. Air monitoring data collected from this monitor on May 9, 2016 through May 10th, 2016, and subsequently analyzed by DEQ, registered lead at 416 nanograms per cubic meter over a 24 hour period. Neither the federal Environmental Protection Agency or the Oregon Environmental Quality Commission have adopted a source-specific daily standard for lead emissions. DEQ and OHA, agreed on a 24 hour screening value for lead emissions using accepted national values for protectiveness, and DEQ's Ambient Benchmark Concentration as guidelines. The selected 24 hour screening value is 150 nanograms of lead per cubic meter in air.
- C. DEQ reviewed operational information provided by Bullseye for the timeframe of May 9, 2016, and May 10, 2016, and DEQ confirmed that Bullseye had manufactured glass on May 9, 2016, and May 10, 2016, that contained a relatively high proportion of lead in its feedstock, and that the pollution control device connected to the furnace being used by Bullseye for that batch was not in service due to suspected malfunctions.
- D. The prevailing winds on May 9, 2016, and May 10, 2016, blew from the north/northwest as confirmed by DEQ monitoring equipment in the vicinity.
- E. DEQ consulted with the Oregon Health Authority (OHA). OHA and DEQ, on the same day they received and evaluated the results of the testing of air samples taken on May 9, 2016, and May 10, 2016, recommended the Governor issue the C&DO. She acted on the same day.

7. Prior to the expiration of the first C&DO, DEQ consulted with OHA. OHA and DEQ recommended to the Governor that she order DEQ to enter an order renewing the C&DO. The Governor directed DEQ to do so, and on May 27, 2016, DEQ renewed the C&DO, effective May 29, 2016, for an additional ten-day period, until June 8, 2016.

- 8. On December 26, 2007, the United States Environmental Protection Agency (EPA) promulgated the National Emission Standards for Hazardous Air Pollutants ("NESHAP") for Glass Manufacturing Area Sources in 40 Code of Federal Regulations (CFR) Part 63, subpart SSSSSS (hereinafter referred to as "6S" or "Regulation 6S"), adopted and incorporated by reference in Oregon Administrative Rule (OAR) 340-244-0220(1). Regulation 6S requires sources subject to the standard to, among other requirements, comply with prescribed emission limits, conduct emissions testing, monitor the performance of pollution control equipment, conduct recordkeeping and reporting and obtain a Title V Operating Permit. Existing sources subject to 6S were required to be in compliance with 6S by December 28, 2009, and new sources subject to 6S were required to be in compliance with 6S upon startup of the new source.
- 9. A glass manufacturing facility is subject to 6S if it is an area source of hazardous air pollutant (HAP) emissions and meets all of the following criteria:
- A. The glass manufacturing facility is a plant site that manufactures flat glass, glass containers, or pressed or blown glass by melting a mixture of raw materials, as defined in 40 CFR § 63.11459, to produce molten glass and form the molten glass into sheets, containers, or other shapes;
- B. The glass manufacturing facility is an area source of HAP emissions, which is any stationary source or group of stationary sources within a contiguous area under common control that does not have the potential to emit any single HAP at a rate of 10 tons per year or more, or a combination of HAPs at a rate of 25 tons per year or more; and Page 3 MUTUAL AGREEMENT AND FINAL ORDER

(Case No. AQ/V-NWR-16-088)

-

C. The glass manufacturing facility uses one or more continuous furnaces to produce glass that contains compounds of one or more glass manufacturing metal HAPs, as defined in 40 CFR § 63.11459, as raw materials in a glass manufacturing batch formulation.

- 10. On April 12, 2016, EPA sent DEQ a letter clarifying that, for the glass manufacturing NESHAP, the term "continuous furnace" means furnaces that are continuously heated, as are the furnaces at Bullseye's glass manufacturing facility. EPA's letter stated that its clarification was non-binding and left applicability determinations for DEQ to make. DEQ has determined that it will apply EPA's clarification for the purposes of implementing Regulation 6S. Bullseye disagrees with EPA's clarification and asserts that it is not consistent with the applicable definition of continuous furnaces.
- 11. Based upon EPA's April 12, 2016 letter, DEQ has determined that Bullseye's glass manufacturing facility is subject to 6S because it meets all of the criteria in paragraph 9, above. Bullseye denies that it was and is subject to Regulation 6S.
- 12. Regulation 6S requires that the emissions from any continuous furnace that makes glass at a rate of at least 50 tons per year or more that contains metal HAPs must be tested, meet emissions standards and be monitored, among other requirements. 40 CFR § 63.11449 through 63.11457. Regulation 6S also requires that any facility subject to 6S must obtain a Title V permit. 40 CFR § 63.11449(e).
- 13. Prior to the April 12, 2016 letter from EPA, DEQ had considered Bullseye's glass manufacturing facility to be exempt from 6S.
- 14. Based upon EPA's April 12, 2016 letter and other information that Bullseye has provided to DEQ, DEQ has concluded that Bullseye is now subject to 6S and will be operating in violation of 6S and OAR 340-244-0220(1) until Bullseye fully complies with the compliance schedule in paragraph 26 of this MAO and is issued an Oregon Title V Operating Permit in Page 4 MUTUAL AGREEMENT AND FINAL ORDER

(Case No. AQ/V-NWR-16-088)

The second

(Case No. AQ/V- NWR-16-088)

accordance with paragraph 26. Bullseye disagrees with DEQ's conclusion that it is and will be operating in violation of Regulation 6S and OAR 340-244-0220(1).

- DEQ and Bullseye recognize that the Environmental Quality Commission has the power to impose civil penalties and to issue an abatement order for violations of Oregon environmental law. Bullseye does not agree with DEQ's conclusion that Bullseye has violated 6S and Bullseye makes no admission of any such violation. With these caveats, Bullseye nevertheless voluntarily agrees to enter into this MAO in settlement of any past or future violations referred to in paragraphs 8 through 14 above. Therefore, pursuant to ORS 183.417(3)(a) and (b), DEQ and Bullseye agree to settle the violations that may have occurred prior to the date of this agreement, and to limit and resolve future violations referred to in paragraph 14 above, in advance, by this MAO.
- 16. On April 21, 2016, the Environmental Quality Commission (EQC) adopted temporary rules OAR 340-244-9000 through 9090 to address metal HAP emissions from glass manufacturing facilities in the Portland Air Quality Maintenance Area. Bullseye is subject to temporary rules OAR 340-244-9000 through 9090 as adopted and for the duration such temporary rules are effective.
- 17. This MAO is not intended to limit, in any way, DEQ's right to proceed against Bullseye in any forum in the event that there are future violations. DEQ and Bullseye agree that this MAO settles all past claimed violations described in paragraphs 8 through 14, above.

NOW THEREFORE, it is stipulated and agreed that:

- 18. The definition section in OAR 340-244-9010 is incorporated into this MAO and the definitions in that definition section apply to the terms of this MAO.
- 19. Except as provided in paragraph 25 below, Bullseye shall not use any of the following metal HAPs in any uncontrolled furnace at the Bullseye facility:

Α.	Arsenic

- B. Cadmium
- C. Chromium
- D. Cobalt
- E. Lead
- F. Manganese
- G. Nickel
- H. Selenium
- 20. Bullseye and DEQ agree to incorporate into this MAO by this reference, and to comply with, the provisions of temporary rule OAR 340-244-9000 through 9090, as adopted by the EQC on April 21, 2016, and amended by the EQC on May 5, 2016.
- 21. As long as this MAO remains in effect, Bullseye and DEQ agree that the provisions of temporary rule OAR 340-244-9000 through 9090 will be binding upon Bullseye, even if the temporary rule expires and is not made permanent. If the temporary rule is made permanent or permanent rules regarding metal HAPs emissions applicable to Bullseye are adopted, Bullseye and DEQ agree that the temporary rule will no longer be binding upon Bullseye as of the effective date of the permanent rule. If requirements or conditions of this MAO, or actions taken pursuant to this MAO, are more stringent than the temporary rule, Bullseye must comply with the more stringent requirements or conditions.
- 22. Not later than ten business days after the full execution of this MAO, Bullseye shall provide to DEQ:
- A. A list of all furnaces that Bullseye uses, a description of the type and capacity of the furnace, whether emissions from the furnace are currently subject to an emissions control device, and, if so, a description of the device's specifications;

 Page 6 MUTUAL AGREEMENT AND FINAL ORDER

any, of the recipes provided are claimed by Bullseye to be confidential business information (CBI);

C. A description of the management control systems, practices, and

include any of the eight metal HAPs listed in paragraph 19. Bullseye shall designate which, if

Copies of all glass-making recipes currently in use by Bullseye that

- procedures Bullseye will use to ensure it conforms to obligations relating to air emissions and potential air emissions imposed by law and this MAO on Bullseye.
- D. The full and complete results of all source tests of air emission control devices conducted by Bullseye or by a third party pursuant to a contract with Bullseye in the past 60 days, regardless of whether Bullseye or any third party believes the test results to be unreliable or invalid, and also including, without limitation, all reports for the chromium testing partially completed during any such source tests;
- E. The name, qualifications and experience of all environmental consulting firms that have provided services to Bullseye in the last 90 days relating to air emissions, as well as firms expected to provide services in the next 90 days relating to air emissions, to compliance with this MAO, or to both. This report should include a description of the services to be provided to Bullseye and the role those services have in ensuring compliance with its obligations relating to air emissions and potential air emissions imposed by law and this MAO on Bullseye;
- F. A written description for DEQ's review and approval of the procedures that Bullseye is currently implementing or will implement to routinely remove accumulated solid material from the air emissions vents and stacks that are used with uncontrolled furnaces; and
 - G. A report that includes the following information:
- 1. Plans and anticipated timelines for installing additional emission control devices on any furnaces; and Page 7 MUTUAL AGREEMENT AND FINAL ORDER

(Case No. AQ/V-NWR-16-088)

2. Plans and anticipated timelines for completing routine maintenance, as may be required, and modifications related to any emissions control devices.

- 23. Bullseye shall not install or modify any emissions control device prior to submitting a notice of intent to construct as required under OAR 340-210-0230 and receiving DEQ's approval as provided by OAR 340-210-240.
- 24. As long as this MAO remains in effect, Bullseye shall provide to DEQ, by Tuesday of each week, a summary of all aggregate metal HAPs, as described in paragraph 19, used in each furnace in the prior week, in total pounds.
- 25. Bullseye may seek authorization to use selenium, manganese, cobalt and nickel in an uncontrolled furnace. Bullseye shall not use lead, arsenic or cadmium in an uncontrolled furnace. Bullseye shall not use chromium in any furnace except as provided in temporary rule OAR 340-244-9000 through 9090. If Bullseye elects to submit a request as specified in this paragraph, DEQ agrees to negotiate in good faith with Bullseye regarding DEQ's review and approval of the request. Bullseye understands that DEQ will share with OHA information provided to DEQ by Bullseye and that DEQ will consult with OHA throughout any such negotiation. The prohibition on the use of every metal HAP in an uncontrolled furnace, set forth in paragraph 19, shall remain in effect unless that prohibition is lifted by agreement with DEQ after consultation with OHA. If DEQ approves a production level limit for use of manganese or nickel in an uncontrolled furnace under this paragraph, such approval shall be effective only until September 1, 2016, the date that the temporary rule prohibition on use of those metals in uncontrolled furnaces becomes effective. In addition, the standards for evaluation of the use of chromium set forth in the temporary rule shall also remain in effect. The process by which Bullseye may seek agreement to use cobalt, manganese, nickel and selenium in an uncontrolled furnace shall be:

Page 8 - MUTUAL AGREEMENT AND FINAL ORDER

(Case No. AQ/V- NWR-16-088)

A. Bullseye must submit a written request to DEQ. The request shall include:

- 1. A production level limit, in pounds per day, for each of the metal HAPs Bullseye proposes to use in an uncontrolled furnace;
- 2. As to each metal HAP proposed, Bullseye shall have the obligation of establishing that its proposed maximum production level, in the form of a daily usage rate in pounds per day, will result in emissions levels that are protective of human health. Information that Bullseye may use to satisfy such obligation may include, without limitation, the 24-hour screening level and DEQ Ambient Benchmark Concentration for the metal HAP, as approved by DEQ and OHA. OHA and DEQ may require Bullseye to provide other information in this evaluation; and
- 3. Bullseye reserves the right to withdraw or limit a request that it has submitted under this paragraph, at any time;
- B. DEQ, in consultation and with the confirmation of OHA, shall timely review Bullseye's request and meet with Bullseye in good faith regarding the proposed daily usage rates;
- C. Bullseye shall provide to DEQ and OHA all data and information available to Bullseye that either agency requests related to the agencies' evaluation of the proposed maximum production level; DEQ and OHA may perform an independent analysis of this information; and
- D. Upon written approval by DEQ, Bullseye may use cobalt, manganese, nickel, or selenium in an uncontrolled furnace provided that Bullseye complies with all conditions of use established by DEQ in its approval. Violation of such DEQ-approved limits or conditions will constitute a violation of this MAO. DEQ's conditions of use may include, without limitation, a provision authorizing DEQ to decrease the approved usage level if DEQ and OHA conclude a Page 9 MUTUAL AGREEMENT AND FINAL ORDER

(Case No. AQ/V-NWR-16-088)

reduction is necessary to protect public health based on the results of ongoing air monitoring data from monitors located in proximity to the facility.

- 26. Bullseye shall also:
- A. By September 1, 2016, submit a report to DEQ that contains the following:
- 1. A list of all "glass melting furnaces" (as defined in 40 CFR § 63.11459) at the Facility that will be used to produce glass on or after September 1, 2016, that contains compounds of one or more "glass manufacturing metal HAP" (as defined in 40 CFR § 63.11459), as raw materials in a glass manufacturing batch formulation;
- 2. For each glass melting furnace listed pursuant to subparagraph 26.A.1, provide the maximum annual production rate of glass in tons per year;
- 3. For each glass melting furnace listed pursuant to subparagraph 26.A.1, provide the maximum projected annual production rate of glass that contains one or more glass manufacturing metal HAP in tons per year; and
- 4. For each glass melting furnace listed pursuant to subparagraph 26.A.1, indicate whether it is or is not subject to the requirements of 6S based on 40 CFR § 63.11449. Nothing herein shall prevent Bullseye from modifying its glass melting furnaces, changing its operations or using additional furnaces to produce glass, which contains one or more of the glass manufacturing metal HAPS as raw materials, at a rate of at least 50 tons per year or more, provided Bullseye complies with the applicable provisions of regulation 6S.
- B. For each furnace identified pursuant to subparagraph 26.A.4, above, comply with the following:
- 1. By September 1, 2016, comply with the following sections of 6S for each glass melting furnace identified:

Title V Operating Permit.

27. If Bullseye violates any provision of this MAO, upon receipt of a written Penalty

Demand Notice from DEO, Bullseye agrees to pay a stipulated penalty of \$2,400 for each day of

By April 12, 2017, submit an application to DEQ for an Oregon

violation. Such stipulated penalties are in addition to any other remedies available at law or in equity to DEQ or OHA for any violation of this MAO, except that if DEQ issues a Penalty Demand Notice under this MAO it may not also assess civil penalties under Oregon

Administrative Rules, Chapter 340, Division 12, for the same acts that constituted the violation of the terms of this MAO. Such stipulated penalties are also in addition to the Governor's

authority to direct DEQ to issue a cease and desist order.

3.

28. If any event occurs that is beyond Bullseye's reasonable control that causes or may cause a delay or deviation in performance of the requirements of this MAO, Bullseye must promptly notify DEQ verbally of the cause of delay or deviation and its anticipated duration, the measures that have been or will be taken to prevent or minimize the delay or deviation, and the timetable by which Bullseye proposes to carry out such measures. Bullseye must confirm in writing this information within five (5) working days of the onset of the event. It is Bullseye's responsibility in the written notification to demonstrate to DEQ's satisfaction that the delay or deviation has been or will be caused by circumstances beyond the reasonable control and despite due diligence of Bullseye. If Bullseye so demonstrates, DEQ will extend times of performance of related activities under this MAO as appropriate. Circumstances or events beyond Bullseye's control include, but are not limited to, acts of nature, unforeseen strikes, work stoppages, fires, explosion, riot, sabotage, or war. Increased cost of performance or consultant's failure to provide timely reports will not be considered circumstances beyond Bullseye's reasonable control.

Page 12 - MUTUAL AGREEMENT AND FINAL ORDER

(Case No. AQ/V-NWR-16-088)

29. Regarding DEQ's conclusion that Bullseye committed the violations set forth in paragraphs 8 through 14, which are expressly settled herein, Bullseye hereby waives any and all of its rights to any and all notices, a contested case hearing, judicial review, and to service of a copy of the final order herein. DEQ reserves the right to enforce this order through appropriate administrative and judicial proceedings.

- 30. DEQ and Bullseye may amend the terms of this MAO by mutual written agreement.
- 31. Bullseye agrees that this MAO shall be binding on Bullseye and its respective successors, agents, and assigns. The undersigned representative of Bullseye certifies that he or she is fully authorized to execute and bind Bullseye to this MAO. No change in ownership or corporate or partnership status relating to the Facility will, in any way, alter Bullseye's obligation under this MAO, unless otherwise approved in writing by DEQ.
- 32. All reports, notices and other communications required under or relating to this MAO should be sent to: Dave Kauth, DEQ Northwest Region Office, 700 NE Multnomah Street, Portland, OR 97232. Alternatively, communications can be directed via email to kauth.dave@deq.state.or.us. The contact person for Bullseye is Eric Durrin. Alternatively, communications can be directed via email to ericdurrin@bulseyeglass.com.
- 33. Bullseye acknowledges that it has actual notice of the contents and requirements of this MAO and that failure to fulfill any of the requirements hereof will constitute a violation of this MAO and will subject Bullseye to payment of civil penalties.
- 34. Any stipulated civil penalty imposed pursuant to paragraph 27 is due upon written demand. Stipulated civil penalties must be paid by check or money order made payable to the "State Treasurer, State of Oregon" and sent to: Business Office, DEQ, 811 SW Sixth Avenue, Portland, Oregon 97204 (DEQ will notify Bullseye in writing of its change of address for Page 13 MUTUAL AGREEMENT AND FINAL ORDER

(Case No. AQ/V-NWR-16-088)

ĺ

19 (Case No. A

purposes of this paragraph, which is expected to occur in late 2016, not less than thirty days prior to such change, and Bullseye shall thereafter use that new address). Within twenty (20) days of receipt of a "Demand for Payment of Stipulated Civil Penalty" Notice from DEQ, Bullseye may request a hearing to contest the Demand Notice. At any such hearing, the issue will be limited to Bullseye's compliance or noncompliance with this MAO. The amount of each stipulated civil penalty for each violation and/or day of violation is established in advance by this MAO and will not be a contestable issue.

- 35. DEQ may amend the compliance schedule and conditions in this MAO upon finding that such modification is necessary because of changed circumstances or to protect public health and the environment. DEQ must provide Bullseye a minimum of thirty (30) days written notice prior to issuing an amended order modifying any compliance schedules or conditions. If Bullseye contests the amended order, the applicable procedures for conduct of contested cases in such matters will apply (ORS Chapter 183, OAR Chapter 340, Division 011 and OAR 137-003-0501 to 0700).
- 36. Provided all penalties due pursuant to paragraph 27 are paid in full and no DEQ request for information or documents remains pending, this MAO will terminate at the time DEQ issues Bullseye an Oregon Title V Operating Permit.
