PlayPen File Hosting is back! The old file host had issues so I've modified the image host which is located a reliable provider. You can now use the image host for images and files. Same restrictions apply as before..7z or .rar.

If you encounter errors with the updated hosting service please post here and let me know so I can fix it.

Producer's Pen is coming back later this week. I've gotten some great advice from a few producers and the admin staff is excited about the return.

After everything is running stable on the existing servers for a few days I'll probably switch to a new .onion later this week. I will post it here with at least a day or two notice to avoid problems that people had in the past trying to find the new address.

pp

Thanks for all the hard work keeping this place going.		
I've been having trouble getting in here all day, took forever just to reply to this so guess there is still some server trouble. Wish all the best in getting in fixed.

I upgraded the Token Ring to Ethernet about an hour ago and things seem to be working a bit better.

lol ethernet is just a fad, you should totally stick with token ring

It was still horribly slow for me when the "things seem to be working a bit better" message was posted (and I kept getting all these pages telling me to login), but at this particular moment it's nice and fast.

And BTW, 10Base2 FTW.

I upgraded the Token Ring to Ethernet about an hour ago and things seem to be working a bit better.

lol ethernet is just a fad, you should totally stick with token ring

Evidently it had an impact because a few hours ago loading time was 10x slower than normal. Now it's much better!

Thanks playpen: seems everything is running as it should. All my VPN's are seeing fantastic performance. Can't wait to see if the producers section generates any interest, as I have some on topic material that has never been seen anywhere.

It even seems that there is less lag on the chatroom now also, god i love playpen <3<3
Hope that everything would be back up and running smoothly again soon

Clearly PlayPen runs considerably faster and more stable now. Thanks a lot keep it up PP crew!

As well as not being able to login to the image/file host I have just noticed that if I click on an internal PP link I end up back at the login page.
If cookies are disabled it will cause this.

Thanks
Changed the network.cookie.cookieBehavior from 2 to 1 and I can log into PP Image/File Host again

Thanks for the tip :)

I upgraded the Token Ring to Ethernet about an hour ago and things seem to be working a bit better.

You should have blown the whole wad and gone for ARCnet!!! You could have a whole 252 devices on a line (Don't forget the terminating resistors!!!)

Thanks for your hard work!!!

Cheers!
