Commentary

All figures are seasonally adjusted unless otherwise specified.

Values are only available at the national level, and are not adjusted for price changes.

In the **retail** industries, the value of electronic card spending was down 0.4 percent in August 2016, following a 0.2 percent rise in July 2016.

Five of the six retail industries had decreases, while one remained unchanged in August 2016. The biggest falls were from the hospitality industry, down \$14 million (1.5 percent), and the consumables industry, down \$8.1 million (0.5 percent).

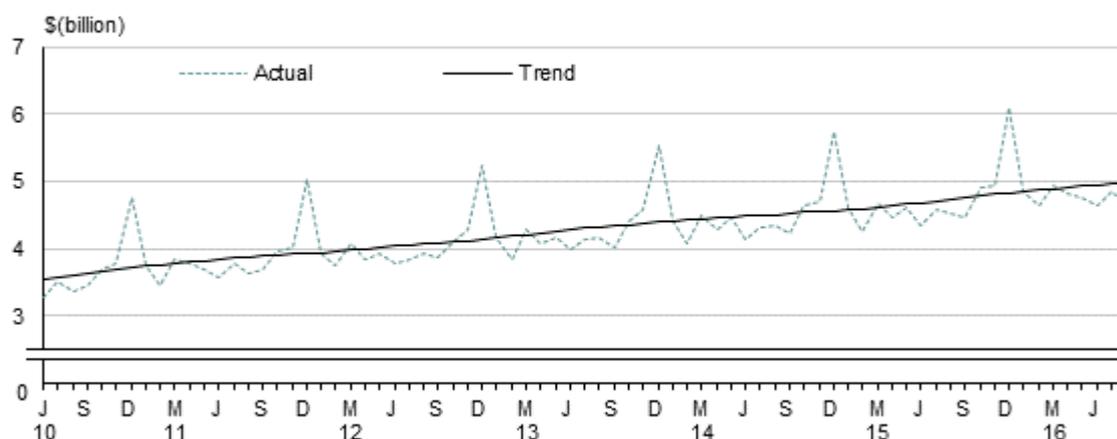

The total value of electronic card spending, including the two non-retail industries (non-retail excluding services and services), was down 0.8 percent in August. This follows a 0.3 percent rise in July 2016.

The two non-retailing industries were also down for August 2016. The non-retail (excluding services) industry was down \$29 million (2.0 percent) and the services industry was down \$4.4 million (1.7 percent).

Core retail spending (which excludes the vehicle-related industries) fell 0.6 percent in August 2016, after a 0.6 percent rise in July.

Value of electronic card retail transactions Monthly

Source: Statistics New Zealand

Trends for the total, retail, and core retail series have generally been rising since these series began in October 2002, but appear to be easing now.

In actual terms, card-holders made 131 million transactions across all industries in August 2016, with an average value of \$49. The total amount spent across all transactions was \$6.4 billion.

For more detailed data see the Excel tables in the 'Downloads' box.

Imputation of missing data

As outlined in [Electronic Card Transactions: January 2016](#), Statistics NZ has imputed for some missing data for the durables industry. As we are still unable to source this missing data, we will continue to impute for this data until a supplier is confirmed.
