7 Feb 1981

## NOTES ON NSA ESP CONCERNS/GUIDELINES

1. The nature and vulnerability of targets in communications should be tested and the degree of weakness determined. (Is the target of remote viewing, for example:
  - a. The mind of the transmitting person (reader or originator).
  - b. The electrical signal transmitting the message or key.
  - c. The paper text or recording of the message or key.
2. The number of NSA persons with operating ESP capabilities should be isolated by type and quality.
  - a. Intuitive insightful gifts.
  - b. Remote viewing.
  - c. Telepathy (including mind control).
  - d. Precognition.
  - e. Clairvoyance.
  - f. Targeting detection (is there a remote viewing presence detected?).
  - g. Defensive blocking.
3. After gifted persons are isolated and tested for quality of gifts they should be tested against communications and COMSEC systems to determine what they target and how effective their intelligence gathering is.
4. Any persons with telekenetic capabilities or problems should be isolated and studied to determine:
  - a. What triggers the capability.
  - b. How it individually functions.
  - c. Likely targets.
  - d. Intensity and specific target nature of field.
  - e. Damage effects caused.
  - f. Defensive measures which are effective.
5. Cadre's of talented synergized gifted people should be formed for special problem solving tests.
6. The number of high grade talented psychics of various types should be isolated by type and their individual names and locations listed (especially in the US, Europe, China, and the Soviet Union and Bloc countries).

7. Defensive measures need to be determined, isolated, and tested. Persons with such capabilities should be identified and listed as to capability, specialty, strength, etc.
8. Consciousless or morbid people of talent must be strictly screened out of active programs because of the danger of severe mental illness and unscrupulous violation of security.
9. Testing of talented psychics should include complete physiological, psychological, and environmental profiles for normal and psychic functioning.
