After midnight of 20 sept 2015 two missiles fell on my house and brother house my wife Mayada , my daughter Toka , my brother Mohannad and My nephew Najeeb are immediately killed even our Dog did not survive the attack and was found dead later next day .

My sister in law a i survived the attack . my sister in law suffered serious injures to here legs , and i suffered from a broken foot and broken hip

Because of deterioration of health care in Mosul hospitals during ISIS invasion I had to travel to turkey to under go a surgery to my Hip.

This injury cost me my job with the company I was working with because they where convinced that my injury will prevent me from performing my duties as a account manger for Mosul IT Pc .

The attack leveled two houses leaving me and my sister in law home less in addition to that three cars where damaged because the attack .

The most important issue is that where are now looked at as members of ISIS this leaving us in an ocword situation in the local community and later with the authorities after the liberation of Mosul .

Emotional suffering to the survivors of the attack and our family I an describable loss of all personal belonging including all photos, legal documents became a problem later

I am now residing in Baghdad with my son Yahya and nephew Abdulla who left Mosul immediately after the invasion of ISIS .

I rest my case asking for justice after this brutal attack to our homes
