

AVONSIDE BOARDWALK

Yin Yang: Sylvia Robinson, Hannah-Rose White, Aurelia Rohrbacker and Kendall Lattin

Vision

The Avonside Boardwalk follows the Otakaro River through the Avonside former Red Zone connecting nature and urban environments together and creating links between the surrounding communities. The project includes street art at the intersections within the old neighborhood, and lighting design amongst the trees. On the other side is an urban forest, a Mahinga Kai area and wetlands to regenerate the natural habitats and restore the original landscapes. Community gardens will be planted and maintained by local school-children and members of the community, and an orchard walk and foraging trail follows the path of the river. Both areas are linked by a raised boardwalk and bridges with local cafes and shops at nodes along the way. The Avonside Boardwalk offers high vantage points to view the landscapes below on each side of the river from a different perspective.

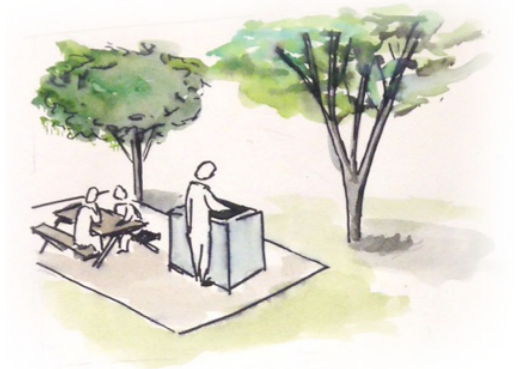

- STAGE 1 (5-10yrs)**
 - Street Artwork
 - Communal Gardens and orchard walkway
 - Native Forest and wetland restoration area for Mahinga Kai
- STAGE 2 (10-15yrs)**
 - Wetland & Native planting Restoration area
 - Low Boardwalk above wetland addressing the river at some points, with 'links' to street art intersections
- STAGE 3 (15-20yrs)**
 - Sky Boardwalk
- VEGETATION**
- Will establish over time
