***The Washington Post/Kaiser Family Foundation  
Survey of Rural America***

**June 2017**

---

This *Washington Post*/Kaiser Family Foundation poll was conducted by telephone April 13 - May 1, 2017, among a random representative sample of 1,070 adults age 18 and older living in rural counties, 303 adults in urban countries, and 307 in other countries that were considered suburban. The results of the full survey have a margin of sampling error of plus or minus 4 percentage points. Sampling, data collection and tabulation by SSRS of Media, Pa. See Methodology appendix on page 23 for full details.

Unwtd N: Unweighted number of interviews for a given group.

Notes: (1) Table percentages may not add to 100 percent due to rounding. (2) Values less than 0.5 percent are indicated by an asterisk (\*). (3) "vol." indicates that a response was volunteered by respondent and not an explicitly offered choice. (4) Data aren't shown if the number of respondents asked a question (the unweighted N) is less than 100.

Q1. Taken all together, how would you say things are these days--would you say that you are very happy, pretty happy, or not too happy?

	Total	Rural	Suburban	Urban
Very happy	20	24	18	20
Pretty happy	54	53	54	56
Not too happy	24	22	26	23
Don't know	*	1	1	-
Refused	1	1	1	1

Q2. Do you live in the community in which you grew up, or not?

	Total	Rural	Suburban	Urban
Yes	33	42	29	30
No	67	58	71	70
Don't know	-	-	-	-
Refused	-	-	-	-

Q3. (Ask if *don't live in the community where they grew up or don't know or refused to say if they live in the community where they grew up*) How long have you lived in the community where you live now?

	Total	Rural	Suburban	Urban
Less than 1 year	8	5	8	10
1 to 5 years	29	24	27	37
6 to 10 years	17	18	19	12
11 to 20 years	21	22	22	19
21 to 30 years	13	14	13	11
31 to 40 years	6	8	6	3
41 to 50 years	6	8	4	6
More than 50 years	-	-	-	-
Don't know	1	1	-	2
Refused	-	-	-	-
Unwtd N	1092	650	223	215

Q2/Q3 Combo Table Based on total

	Total	Rural	Suburban	Urban
Yes, you live in the community in which you grew up	33	42	29	30
No, you do not live in the community in which you grew up or don't know or refused to say	67	58	71	70
Less than 1 year	5	3	6	7
1 to 5 years	20	14	19	26
6 to 10 years	11	10	13	9
11 to 20 years	14	13	16	13
21 to 30 years	8	8	9	8
31 to 40 years	4	5	5	2
41 to 50 years	4	5	3	4
More than 50 years	-	-	-	-
Don't know	1	*	-	2
Refused	-	-	-	-

Q4. What is the biggest problem facing your local community? [INTERVIEWER NOTE: IF RESPONDENT GIVES MORE THAN ONE RESPONSE, PROBE WITH: "I understand, but which of those is the biggest problem facing your local community?"] (DO NOT READ LIST)

	Total	Rural	Suburban	Urban
Jobs/unemployment	10	21	7	6
Economy (general)	5	8	4	4
Drug abuse	11	14	14	5

	Total	Rural	Suburban	Urban
H.S. Grad or Less (NET)	43	51	41	41
Less than high school	13	15	12	14
High school grad	30	36	29	27
Some college	29	30	30	27
College or Post Graduate (NET)	28	19	29	32
College grad	26	18	26	31
College grad other	2	1	3	1
Don't know/Refused	1	*	-	1

Q72. Do you or does anyone in your house own a gun, or not?

	Total	Rural	Suburban	Urban
Yes	41	56	42	27
No	58	42	56	72
Don't know	*	*	*	-
Refused	1	2	2	1

Q918. Are you of Hispanic origin or background? [IF "YES," ASK: Are you White Hispanic or Black Hispanic? IF "NO," ASK: Are you white, black, Asian or some other race?]

	Total	Rural	Suburban	Urban
White Non-Hispanic	62	76	66	44
Black Non-Hispanic	11	8	11	15
Hispanic (NET)	15	8	12	25
White- Hispanic	10	6	10	15
Black-Hispanic	1	1	-	3
Hispanic (no race given)	4	2	2	8
Asian	3	*	3	5
Other race	8	6	8	9
Don't know	*	*	-	1
Refused	1	1	1	1

Q918/Q918x Combo Table Based on total

	Total	Rural	Suburban	Urban
White Non-Hispanic	62	76	66	44
Black Non-Hispanic	11	8	11	15
Hispanic	15	8	12	25
Born in U.S.	9	5	9	14
Born outside U.S.	6	3	3	11
Asian	3	*	3	5
Other race	8	6	8	9
Don't know	*	*	-	1
Refused	1	1	1	1

Q74. How many of your close friends are of a DIFFERENT race than you--Most of them, some of them, hardly any of them, or none of them?

	Total	Rural	Suburban	Urban
Most of them	20	14	18	29
Some of them	53	49	57	49
Hardly any of them	17	22	17	15
None of them	7	14	5	5
All of them (Vol.)	1	*	1	1
Don't know	1	1	2	*
Refused	*	*	*	*

INCOME. Last year - that is in 2016 - what was your total household income before taxes, from all sources? (READ LIST. ENTER ONE ONLY) [Just stop me when I get to the right category.] [PROBE: Your best estimate is fine.]

INCOME2. (Ask if total household income before taxes in 2016 was \$100,000 or more) Is that 100 to under 150 thousand, 150 to under 200 thousand, 200 to under 250 thousand, or 250 thousand or more?

INCOME/INCOME2 Combo Table Based on total

	Total	Rural	Suburban	Urban
Under 20 thousand dollars	17	24	15	15
20 to under 35 thousand	15	16	12	17
35 to under 50 thousand	12	12	9	15
50 to under 75 thousand	17	17	19	14
75 to under 100 thousand	11	10	12	12
100 thousand or more	21	12	25	21
100 to under 150 thousand	11	7	12	12
150 to under 200 thousand	4	2	6	3
200 to under 250 thousand	2	1	3	2
250 thousand or more	3	2	3	4
100 thousand or more unspecified	1	*	1	1
Don't know	3	3	4	2
Refused	4	7	4	4

Question 75 held for future release.

## METHODOLOGICAL DETAILS

The *Washington Post*/Kaiser Family Foundation Survey Project is a partnership combining survey research and reporting to better inform the public. The Post-Kaiser *Survey of Rural America*, the 31<sup>st</sup> in this series, was conducted by telephone April 13 - May 1, 2017, among a random representative sample of 1,070 adults age 18 and older living in rural counties, 303 adults in urban counties, and 307 in other counties that were considered suburban. Interviews were administered in English and Spanish, combining random samples of both landline and cellular telephones. Sampling, data collection, weighting and tabulation were managed by SSRS in close collaboration with *The Washington Post* and Kaiser Family Foundation researchers.

Respondents' metropolitan status was operationalized using the CDC's [2013 NCHS Urban-Rural Classification Scheme for Counties](#). Respondents were asked for their county of residence (or zip code if they were unsure) and classified into one of 6 codes in the classification scheme. Those in groups 4-6 (Small Metropolitan, Micropolitan, and Noncore) were considered Rural, those in group 1 (Large Central Metropolitan) were considered Urban, and the rest (Large Fringe Metropolitan, Medium Metropolitan) were considered Suburban.

The sampling procedures were designed to oversample those living in rural areas, with minimum goals for reaching rural residents who were between the ages of 18-34; Hispanic; black residents of Southern states; and residents of the rust belt states of Iowa, Michigan, Minnesota, Ohio, Pennsylvania, and Wisconsin. Some respondents were reached by calling back those living in rural areas who had previously completed an interview on the SSRS Omnibus poll and indicated they fit one of these oversample criteria. The dual frame landline and cellular phone sample was generated by Marketing Systems Group (MSG) using random digit dial (RDD) procedures.

All respondents were screened to verify that they belonged to the correct metropolitan classification. For the landline sample, respondents were selected by asking for the youngest adult male or female currently at home based on a random rotation. If no one of that gender was available, interviewers asked to speak with the youngest adult of the opposite gender. For the cell phone sample, interviews were conducted with the adult who answered the phone.

A multi-stage weighting design was applied to ensure an accurate representation of the population of each race group, within each of the three metropolitan areas and for both the cell phone and landline frames. The first stage of weighting involved corrections for sample design, including accounting for non-response for the re-contact sample. In the second weighting stage, demographic adjustments were applied to account for systematic non-response along known population parameters. Population parameters included gender, age, race, Hispanicity, education, region, and phone status (cell phone only or reachable by landline). The rural sample was also weighting based on metropolitan subgroup (category NCHS code 4, 5, or 6). Population parameters were derived using Census-based estimates provided by Nielsen Pop-Facts through Marketing Systems Group. Estimates of phone status were derived from the SSRS Omnibus 2016-2017 data.

All sampling error margins and tests of statistical significance have been adjusted to account for the survey's design effect, which is 2.5 for results based on the full sample. The design effect is a factor representing the survey's deviation from a simple random sample, and takes into account decreases in precision due to sample design and weighting procedures. Sample sizes and margin of sampling errors for key groups are shown below; other subgroups are available by request. Note that sampling error is only one of many potential sources of error in this or any other public opinion poll.

Group	N (unweighted)	Margin of sampling error (percentage points)
Total	1686	±4
Metropolitan area		
Urban	303	±7
Suburban	307	±6.5
Rural	1070	±3.5

This questionnaire was administered with the exact questions in the exact order as appears in this document. If a question was asked of a reduced base of the sample, a parenthetical preceding the question identifies the group asked. Some questions were only asked of those in rural areas.

Since some of the demographic questions could be sensitive and due to the nature of the survey content, interviewers were given specific instructions on how to cope with respondents who refused questions, including a statement reaffirming that answers were recorded confidentially for the sole purpose of research.

*The Washington Post* and the Kaiser Family Foundation each contributed financing for the survey, and representatives of each organization worked together to develop the survey questionnaire and analyze the results. Each organization bears the sole responsibility for the work that appears under its name. The project team from the Kaiser Family Foundation included: Mollyann Brodie, Ph.D., Liz Hamel, and Bryan Wu. The project team from *The Washington Post* included: Scott Clement and Emily Guskin. Both *The Washington Post* and the Kaiser Family Foundation public opinion and survey research are charter members of the [Transparency Initiative](#) of the American Association for Public Opinion Research.
