

I received the public records you provided in response to our request re: classification of inmates at the jail. As you are aware, the records differ substantially from the records provided in October in that they are not broken down by cell or by gender.

I am making a follow-up request for a filtered inmate list. To simplify things for your office, I am only requesting these records at this point for the first week of May (May 1 through 7).

As an example, please see the attached. These are the records I am seeking, except for the first week of May instead of the time period on the attachment.

I'm told this report was easily and quickly generated in a matter of minutes using the following steps once for each date:

1. Go to Tiburon
2. Go to "Alphabetical List of Inmates"
3. Choose the date (One time each for May 1 through 7)
4. Filter to just show female inmates
5. Sort by "housing"
6. Print report.

This should provide you a simple way to provide us with the records we are requesting.

Don't hesitate to call if you have any questions.

Thanks,
