Steve –

See below statement from Chairman Craddick:

The agency needed to move in a different direction under the leadership of the Commissioners. I had a private conversation with the executive director regarding this matter. My conversation took place under the advisement of counsel and was compliant with all applicable law.

I will discuss my views on this matter in an upcoming open meeting where the subject of the issue has been properly posted in order to provide sufficient notice to the public.

I went about this in a way that put the Commission first and was considerate to our executive director and our employees.

I think it's unfortunate that a Commissioner has used this situation as an opportunity for political gain.
