1. **Data scattered to data informed:** *We must commit to a culture of data where we ask questions and have the right tools to answer those questions.*
2. **Educator dominant to learner centered:** *We must know what our learners need at all times and be responsive to those needs.*
3. **District driven with large convenings to site centered with job embedded support :** *We must cultivate agency and accountability among the practitioners around vision, strategies, ownership, and results.*
4. **Resource diffuse to resource targeted:** *We must not spread resources too thin but be targeted and disciplined about how we spend.*
5. **Top down evaluative to holistic performance management:** *We must hear from the people who work for and with an employee not just the direct supervisor.*
