HEADLINE	11/29 Gatak Trojan targets healthcare
SOURCE	http://www.infosecurity-magazine.com/news/gatak-trojan-turns-to-healthcare/
GIST	<p>The group behind the Gatak Trojan (Trojan.Gatak) has turned to healthcare as its key target.</p> <p>Gatak is known for infecting its victims through websites promising product licensing keys for pirated software, and in the past, the insurance sector was also heavily targeted by the group. Gatak victims are infected using websites offering product key generators or “keygens” for pirated software. The malware is bundled with the product key and, if the victim is tricked into downloading and opening one of these files, the malware is surreptitiously installed on the computer.</p> <p>According to Symantec, the majority of Gatak infections (62%) occur on enterprise computers, and of the top 20 most affected organizations (organizations with the most infected computers), 40% were in the healthcare sector.</p> <p>“Little is known about the group behind Gatak, although the corporate nature of its targets, along with the absence of zero-day vulnerabilities or advanced malware modules suggest that it may be cybercriminal in nature; however, there are also capabilities within the malware for more traditional espionage operations,” Symantec noted.</p> <p>“It is unclear how Gatak is profiting from its attacks. One possibility is data theft, with the attackers selling personally identifiable information and other stolen data on the cyber-underground. This could explain the attackers’ heavy focus on the healthcare sector, with healthcare records usually selling for more than other personal information.”</p> <p>It could also be that the healthcare sector may simply be the most susceptible to these kinds of attacks.</p>

HEADLINE	11/29 Spammers bombard iCloud users
SOURCE	http://www.infosecurity-magazine.com/news/spammers-bombard-icloud-users-new/

GIST	<p>Government-backed awareness raising organization, Get Safe Online, has issued new guidance for users bombarded with iCloud calendar and photos sharing spam.</p> <p>The irritation has become particularly pronounced of late over the Black Friday shopping weekend, according to multiple reports.</p> <p>Spammers have apparently been bypassing email altogether to send requests out <i>en masse</i> to users for calendar events or to view/share photos.</p> <p>Unfortunately, if you have already experienced this kind of activity, it means the spammers have obtained your iCloud-linked email, one way or the other.</p> <p>Get Safe Online urged users not to reply.</p> <p>“If you respond, or even choose to decline, the spammer is informed that your account is active and will continue to send the spam, possibly in greater volumes. There is an additional possibility that your account details will be sold to others, multiplying the problem,” it warned.</p>

HEADLINE	11/28 Europol targets sites selling fake brands
SOURCE	http://www.securityweek.com/europol-closes-4500-websites-peddling-fake-brands
GIST	<p>In a massive crackdown, police and law enforcement agencies across Europe have seized more than 4,500 website domains trading in counterfeit goods, often via social networks, officials said on Monday.</p> <p>The operation came as Europol, Europe's police agency, unveiled its newest campaign dubbed "Don't F***(AKE) Up" to stop scam websites selling fake brand names online.</p> <p>"The internet has become an essential channel for e-commerce. Its instant global reach and anonymity make it possible to sell nearly anything to anyone at any time," Europol said.</p> <p>"Counterfeiters know it and are increasingly exploiting the unlimited opportunities" the internet offers. But Europol warned that "despite these products looking like a bargain, they can pose serious risks to the health and safety of buyers."</p> <p>In the crackdown, agencies from 27 countries mostly in Europe but including from the US and Canada, joined forces to shut down over 4,500 websites.</p> <p>They were selling everything from "luxury goods, sportswear, spare parts, electronics, pharmaceuticals, toiletries and other fake products," Europol said in a statement, without saying how long the crackdown took.</p>

HEADLINE	11/29 German ISP confirms malware attacks
SOURCE	http://www.securityweek.com/german-isp-confirms-malware-attacks-caused-disruptions
GIST	<p>German telecommunications giant Deutsche Telekom has confirmed that more than 900,000 of its 20 million fixed-line network customers experienced Internet disruptions due to malware attacks on their routers.</p> <p>In a press statement released on Monday, Deutsche Telekom said malicious actors had been trying to infect routers with malware, but the attempts failed, which led to 4-5 percent of devices crashing and preventing owners from going online.</p> <p>Since the malware only resides in the router's memory, customers have been advised to reboot their devices in order to clean the infection. Deutsche Telekom has also released a firmware update that should prevent infections on its Speedport routers.</p> <p>Germany's Federal Office for Information Security (BSI) reported that some government networks protected by the organization were also targeted in attacks. These attacks were mitigated by the existing protection mechanisms, the BSI said.</p> <p>Attacks have been observed in several countries. Researchers determined that a piece of malware based on Mirai, whose source code was leaked recently, has been using port 7547 to hijack routers and modems.</p>

HEADLINE	11/28 Cybercriminals use YouTube for support
SOURCE	https://www.scmagazine.com/youtubers-sell-phishing-kits-in-plain-view/article/575214/
GIST	<p>Cyber-criminals have been using YouTube as a combined technical support desk and malware distribution channel.</p> <p>Researchers from Proofpoint uncovered bad guys posting 'how to' videos showing prospective purchasers of their phishing kits how to set them up and get going.</p> <p>If that wasn't bad enough, the comments section underneath contained the working download links for the phishing templates and kits.</p> <p>Proofpoint says "many of the video samples we found on YouTube have been posted for months, suggesting that YouTube does not have an automated mechanism for detection and removal of these types of videos and links."</p>

	<p>Which mean they remain a free and dead easy-to-use method for the authors of phishing kits and templates to advertise, demonstrate, and distribute their wares. And, at the same time, adds to the pool of lowlifes putting your business at risk of getting caught up in a credentials heist.</p> <p>The researchers went on to perform a simple search for 'paypal scama' and it returned more than 100,000 results.</p> <p>It wasn't all good news for those in the market for an illegal get a bit better off than you were before in a shortish time promotion; the sellers had included a backdoor in their kits that sent any scammed credentials straight to them.</p> <p>While the use of these backdoors is nothing new, the Proofpoint researchers reckon they hadn't seen YouTube being used as a malware advertising, support and distribution channel like this before.</p>

HEADLINE	11/28 Cyber Monday alert: risk from insiders
SOURCE	https://www.scmagazine.com/cyber-monday-alert-risk-from-insiders/article/575365/
GIST	Just in time for the biggest online shopping day of the year, Cyber Monday, a new study was released that examines cyber risks online retailers face from their employees, whether permanent or contracted.

The "[2016 Pre-Holiday Retail Cyber Risk Report](#)," the second annual retail risk report from Bay Dynamics, a New York-based specialist in cyber risk predictive analytics, found that cybersecurity is no longer viewed as a "seasonal" priority. More than half (56 percent) of those queried for the study said they do not feel more pressure during this hectic time to secure their organizations. The implication is that the pressure is year-round, the study found.

For the study, conducted in October 2016 by Osterman Research, nearly 150 IT and security professionals managing the cyber risk and security programs at retail organizations were asked what information their permanent, temporary and contract employees have access to and how these workers handle the information. Participants were also asked about their capabilities of observing employee behaviors and how quickly they patch vulnerabilities.

Employees are being watched more closely, the study found, particularly when compared to last year's survey results. There was a four-fold jump (from seven percent to 30 percent) over last year's findings in the number of IT and security pros who responded that their permanent employees accessed and/or sent sensitive data they should not have accessed and/or sent. At the same time, the study determined that there was a significant decrease (from 14 percent to five percent) in the number of IT and security professionals who said they were not sure if their permanent employees accessed and/or sent sensitive data they should not have accessed and/or sent.

There were positive findings regarding temporary workers. Nearly two-thirds of respondents (64 percent) said temporary workers at their companies are not given accounts, indicating they also don't have access to sensitive information. Of the 36 percent of IT pros who do provide accounts for their temp workers, the study found they are doing a better job at monitoring those workers, with only 12 percent of respondents saying they have little to no visibility into what their temp employees are accessing on the enterprise network.

Another positive result from the study was that access to sensitive personal information is limited. A mere six percent of survey respondents said their temp workers have visibility into personally identifiable information (PII), while 13 percent said their contractors can access PII. The implication, the study reported, was that retailers are limiting access to their most sensitive information.

When comparing last year's retail cyber risk report to the study released on Monday, Ryan Stolte, co-founder and CTO at Bay Dynamics, said the data shows a significant improvement in how retail organizations are prioritizing cyber risk and security. The IT security pros responding to the survey, he said, view cybersecurity as a year-round commitment and therefore are limiting access to sensitive information for those workers who do not have their own accounts.

HEADLINE	11/28 Amazon gets real about fakes
SOURCE	https://www.bloomberg.com/news/articles/2016-11-28/amazon-gets-real-about-fakes
GIST	<p>Randy Hetrick first noticed counterfeits on Amazon.com Inc. in 2013. He had been selling his TRX Training System-- an exercise kit of suspension straps-- on the site since 2008. When he began noticing cheap imitations, he had his employees scour Amazon for more, then go through the tedious process of reporting them for removal. But new imposters would pop up right away, and by 2014, "We realized this</p>

was an epidemic," said Hetrick, who estimates phonies cost him \$100 million a year, twice his annual sales.

Amazon's Marketplace gives inventors like Hetrick exposure to hundreds of millions of shoppers without the big expense of building and promoting a website from scratch. Merchants give Amazon a commission on each sale. But a hot-selling product on Amazon encourages counterfeiters to make flimsy knockoffs with cheap materials, steal sales and damage a brand with few consequences.

Amazon has known the problem is getting worse, according to a source familiar with the matter, but for years, the company has been largely silent about the flourishing fakes. That has frustrated manufacturers and brand owners who bear the cost and responsibility of policing the site, reporting problems and hoping Amazon takes action.

Now, the world's biggest online retailer is getting serious. It has made fighting phonies a major goal for 2017, building teams in the U.S. and Europe to work with major brands on a registry to prevent fakes, according to a person familiar with the initiative, who was not authorized to speak about the matter and requested anonymity. Discussions with Major League Baseball and the National Football League about selling merchandise on Amazon hit a standstill earlier this year due to concerns about Amazon's lack of control over fakes, the person said.

"Amazon has zero tolerance for the sale of counterfeit items on our site," Amazon said in a statement. The company said it was "aggressively pursuing bad actors." In a statement, the MLB said: "It is our responsibility to provide our fans with reliable and secure marketplaces to purchase officially licensed merchandise. Given the rampant growth of online-only retailers supplying counterfeit merchandise, our policies must hold every distribution partner to that same level of commitment." The NFL declined to comment.

The new Amazon teams will encourage brands -- even those that don't sell on Amazon -- to register with the online store, the person said. Once registered, Amazon requires any marketplace merchants listing those products to prove that they have the brand's permission to sell them online. Amazon began experimenting with the registry earlier this year with Nike and other companies. The bigger push in 2017 will target thousands of large companies, including those that have been reluctant to sell on Amazon because of knock-offs.

In addition, this month Amazon teamed up with Hetrick's business to sue three people, accusing them of selling fakes on its site. It filed another similar suit the same day against an alleged counterfeit ring. Moving the battle to a courtroom is an acknowledgment that despite spending tens of millions of dollars a year and employing an army of software engineers, investigators and research scientists tasked with fighting copycats, Amazon is not winning the war against counterfeiters.

Amazon is desperately trying to bring order to the Wild West atmosphere on its marketplace, where more than 2 million independent sellers compete for the attention and money of shoppers. About half of the goods purchased on Amazon come from independent merchants, who help Amazon expand its inventory more quickly and with less upfront cost than Amazon could do on its own. It also makes the retailer and its customers more vulnerable to fakes because the simple online registration process currently in place is designed to make it easy for businesses to begin selling immediately. But that also makes it simple for counterfeiters to list fake goods, sell as many as they can before they're detected, and then vanish.

Amazon's suits targeting sellers were the first of their kind for the company, a warning to counterfeiters heading into the busy holiday shopping season when the most is at stake. It could be too little, too late.

HEADLINE	11/28 Fake shopping apps backdoor for thieves
SOURCE	http://www.cbsnews.com/news/cyber-monday-fake-shopping-apps-offer-back-door-for-thieves/
GIST	<p>There is no better time than the holidays for scammers to prey on smartphone users.</p> <p>Consumers on this Cyber Monday will fill their digital shopping carts in record numbers. Online sales today are expected to reach more than \$3 billion, and with more than 85 percent of shoppers doing their buying on smartphones, criminals are finding new ways to access people's information.</p> <p>And experts say malicious apps may be providing the back door.</p> <p>Chris Mason, from Branding Brand, a company that creates apps for major retailers, found hundreds of shopping apps -- for names like Dillard's, Payless, Christian Dior and Jimmy Choo -- that were fake.</p> <p>"If you take those apps down and you get rid of that provider, you'll find them showing up in a different form with a new name, new credentials," Mason said. "For every one you take down, there's two that come up."</p> <p>Gary Miliefsky, with cybersecurity firm Snoopwall, says it's all about criminals getting hold of your private information.</p> <p>Miliefsky says some of the counterfeit apps are so good, "they give you a complete shopping cart experience. Everything through the 'Congratulations, here's your order number, it's on its way,' and then you'll never get the goods."</p> <p>But Miliefsky points to something even more disturbing. He says super-popular emoji keyboard apps, which give you an endless supply of emoticons for every occasion, can also gain access to your contacts, text messages, possibly even passwords, and send your private information overseas.</p>

	<p>“These are all developed by employees of companies in China,” he said.</p> <p>“So what do you think that somebody in China is doing with all that information?” asked Werner.</p> <p>“Some think that the Chinese version of the NSA is using these kinds of tools to collect a lot of information on people overseas,” Miliefsky said.</p> <p>“And time will tell.”</p>

HEADLINE	11/28 Mass internet outage hits Germany
SOURCE	http://www.thelocal.de/20161128/mass-internet-outrage-hits-900000-telekom-users
GIST	<p>Around 900,000 routers across Germany were hit by the outage which started on Sunday, a company spokesman told DPA on Monday.</p> <p>The routers connect customers not only to the internet, but also to telephone and television services. The spokesman explained that the problem was not with the network itself, but rather with identifying routers upon dial-up.</p> <p>The company is now looking into evidence found by IT analysts that the connection problem may have been due to an outside attack rather than a normal system failure, Telekom said late Monday morning.</p> <p>"We have found the first indications that we were possibly victims of a hacker attack," a spokesman said.</p> <p>The company said it was introducing a new software on Monday morning that they expected would remedy the problem, after clients - including The Local - could still not connect when the day started.</p> <p>Telekom advises customers to try disconnecting their routers, waiting a while, and then plugging back in. The company reported that with the software update, resetting the router in this way had solved the problem for many customers.</p> <p>The outage affected only certain types of routers, though it is still being investigated as to which models were impacted.</p>

HEADLINE	11/29 What did OSU 'run hide fight' tweet mean?
SOURCE	http://www.usatoday.com/story/news/nation-now/2016/11/29/run-hide-fight-tweet-osu/94585170/
GIST	<p>CINCINNATI — The attack on the campus of The Ohio State University took less than five minutes. One minute later, the social media machinery accelerated to break the news, consume information, process emotion, synthesize truth from rumor and reassure loved ones.</p>

It began with a single tweet from the OSU Police Division coupled with text alerts sent to students. "Buckeye Alert: Active Shooter on campus. Run Hide Fight. Watts Hall. 19th and College," said the tweet sent at 9:56 a.m.

At 2 p.m. Monday, that tweet alone had been retweeted nearly 2,300 times.

OSU officials said Monday that one man tried to run over students with his car, then fled the vehicle swinging a butcher's knife, injuring 11 people. An OSU police officer, Fairfield, Ohio, native Alan Horujko, arrived at the scene and fatally shot the attacker, Abdul Razak Ali Artan.

Facebook activated their 2-year-old "check-in" feature for the first time in Ohio and only the fifth time in the United States, giving it the vaguely novelistic title, "The Violent Incident in Columbus, Ohio." The feature automatically asks anyone in the vicinity of an event to check in to let family and friends know they are safe. Anyone with Facebook friends in the area can then view who has checked in and who hasn't.

The feature was first announced and deployed in last November in response to bombings in Nigeria later claimed by Boko Haram. It has been activated by Facebook 22 times, including Monday, covering natural disasters and attacks in 14 countries.

The first check-in deployed in the United States was in June after the shooting at Orlando's Pulse nightclub. It was also used following the shooting of police officers in Dallas, the Chelsea bombing in New York City and the train crash at Hoboken Terminal in New Jersey.

In addition to thousands of shares, the Buckeye Alert drew some criticism and confusion with the sentence "Run Hide Fight."

Those instructions come straight from the Department of Homeland Security and the phrase is a registered trademark of the City of Houston, who helped to create the national model for surviving an active shooter.

OSU created a video outlining the approach to their students and Homeland Security also has literature on the topic.

The basics: Have an escape route planned and run away from threats. Hide out of the shooters view, locking the entries to your hiding place if possible. Finally, as a last resort, fight the attacker.

HEADLINE	11/28 Online shoppers transform Cyber Monday
SOURCE	http://abcnews.go.com/Technology/wireStory/early-deals-cyber-monday-buyers-spend-43824540
GIST	<p>The Monday after Thanksgiving is still a time when millions of Americans pause to check out online deals and check off items from their gift list — but a one-day Cyber Monday frenzy appears to be going the way of the dial-up modem.</p> <p>Shoppers who have high-speed connections at home and on their phones are pouncing on deals that stores are spreading out over several days, leaving the so-called Cyber Monday online shopping bonanza in danger of losing its title as the top online sales day.</p> <p>"Because Cyber Monday is no longer about the connection, it's just another sales day that I can plan for, like a Labor Day sale or Fourth of July sale," said Gartner analyst Gene Alvarez. "I know it's coming: Does it fit into my schedule, and will I do my holiday shopping that day, Black Friday or wait to see what comes up later?"</p> <p>So instead of door-buster markdowns on a select few products, retailers are shifting to a stream of discounts and alerts during the entire week via email and social media.</p> <p>Cyber Monday still packs the biggest punch in terms of a single online shopping day — for now. As of 7:30 p.m. EST on Monday, shoppers were on track to hit a record of \$3.39 billion, up 10.2 percent from a year ago, according to a tally by Adobe Digital Insights, which tracks online retail transactions.</p>

	<p>But other days are catching up. On Black Friday, consumers spent \$3.34 billion, a 21.6 percent jump from last year, according to Adobe.</p> <p>"Because of technology, the shopping process has been deconstructed, and the consumer constructs their own flow," said Alvarez.</p>

HEADLINE	11/29 German spy chief warns of political attacks
SOURCE	http://abcnews.go.com/Technology/wireStory/german-intelligence-chief-warns-political-cyberattacks-43838310
GIST	<p>Germany's foreign intelligence chief is warning of cyberattacks aimed at political destabilization as the country prepares for an election next year, and says evidence suggests Russian involvement in hacking during the U.S. campaign.</p> <p>Bruno Kahl, who leads the Federal Intelligence Service, told Tuesday's edition of daily Sueddeutsche Zeitung that his agency knows of "cyberattacks that have no other point than causing political insecurity." He said that "Europe is in the focus of this attempted disruption, and Germany in particular."</p> <p>U.S. authorities have concluded Russia was responsible for hacking Democratic National Committee emails, which Russia denies. Kahl said he has "indications it comes from those quarters."</p> <p>He said it's technically difficult to assign blame to any "state actor" — but that "some things speak for it being at least tolerated or wished for on the part of the state."</p> <p>"The perpetrators have an interest in delegitimizing the democratic process as such — whomever that later helps," Kahl was quoted as saying. "I have the impression that the outcome of the American election isn't causing mourning in Russia so far."</p> <p>Traces left on the internet suggest that those responsible wanted to demonstrate what they can do, "and not just in the U.S. elections," he said.</p> <p>Germany's election is expected next September, and votes in the Netherlands and France are scheduled earlier in the year.</p>

HEADLINE	11/28 Twitter crackdown; some flee to Gab
SOURCE	http://www.foxnews.com/politics/2016/11/28/as-twitter-cracks-down-on-alt-right-aggrieved-members-flee-to-gab.html

GIST	<p>As Twitter, Reddit and other social media networks are cracking down on the so-called “alt-right,” some are taking matters into their own hands and migrating away from traditional forms of social media and to new ones that claim to be more welcoming to free speech.</p> <p>Twitter has been particularly strong in cracking down on alt-right voices and suspended a number of accounts, including reality TV star Tila Tequila's, after she posted a picture of her performing a Nazi salute at a conference of white nationalists in Washington DC. While Tequila has denied that she is a Nazi, her Twitter bio referred to her as an “alt-reich queen.”</p> <p>Tequila’s ban is one of the most high-profile bans since Breitbart writer and provocateur Milo Yiannopoulos was banned from the social network site in July.</p> <p>The increased censorship is not limited to Twitter. Facebook is looking at cracking down on “fake news,” which some conservatives fear could target them, while Reddit CEO Steve Huffman last week admitted that he had edited posts by Donald Trump supporters criticizing him on Trump subreddit /r/The_Donald.</p> <p>Now a new social network start up – Gab – is trying to take advantage of what they see as Silicon Valley’s biased censoring of conservative voices, by putting its focus on uncensored free speech.</p> <p>Gab, which launched in August, is still in early beta stage and so is available via invite only. But CEO Andrew Torba, who worked in Silicon Valley for five years before starting the project, says what began as a three-person startup now has 90,000 users and over 100,000 people applying to be part of the new networking site.</p>

Terror Conditions

[Top of page](#)

HEADLINE	11/29 Threat of ISIS using Latin America?
SOURCE	http://freebeacon.com/national-security/u-s-foreign-officials-meet-threat-isis-using-latin-america-finance-operations/
GIST	<p>The international community is increasingly concerned that the Islamic State and other terror groups may be exploiting weakness in Latin America to fund their terrorist activities.</p> <p>American officials and international experts met with representatives of 10 nations in Argentina last week to discuss joint efforts to prevent terrorist financing in Latin America, amid growing concern that Islamic extremist groups are operating in the region.</p>

The Regional Parliamentary Intelligence and Security Forum was organized by U.S. Rep. Robert Pittenger (R., N.C.), chairman of the congressional taskforce on terrorism and unconventional warfare, and Mariano Federici, president of Argentina's Financial Intelligence Unit.

Pittenger told the Washington Free Beacon that he has become worried about the "growing nexus" between terrorists and criminal drug lords in Latin America. Hezbollah militants have been linked to the drug trade in Latin America, and Pittenger and others worry about the possibility of ISIS and similar groups establishing funding channels in the region.

"There is a consensus, clearly, among our friends in South America that their countries could be the subject of the transfer of moneys and the origination of funding from ISIS and other terrorist groups," Pittenger said Monday. "Interest is growing. Like any terror group, terrorists will go to any means to find the funds that they need to achieve their objective."

"All of our countries in the region are on the watch for possible threats related with ISIS and particularly with the recruitment of foreign terrorist fighters," Federici told the Free Beacon in a separate conversation. "There have been some countries, particularly in the Caribbean region, where there have been fighters recruited to join the lists of ISIS."

Legislators from Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Paraguay, Peru, Uruguay, and Venezuela took part in the international forum last Monday, along with experts from the U.S. Treasury Department, global anti-money laundering agencies, and other private technology and financial firms.

HEADLINE	11/29 ISIS suspect claims Britain well protected
SOURCE	http://europe.newsweek.com/isis-suspect-paris-brussels-networks-says-britain-too-well-protected-attack-526215
GIST	<p>One of the key suspects in the Islamic State militant group's Paris and Brussels attacks has said that Britain is too difficult to target because of its "developed secret service," a British court heard on Monday.</p> <p>Mohamed Abrini was spotted with Salah Abdeslam, the only living member of the Paris attacks cell, at a gas station in France after the attacks, and he was later captured wearing a bucket hat at Brussels airport before two suicide bomb blasts.</p> <p>Abrini visited the U.K. in July 2015 to allegedly acquire money to carry out extremist acts, but he told investigators that he spent his time visiting casinos and indulging his gambling addiction, rather than scouting for potential attack targets.</p> <p>His comments, made to Belgian authorities during questioning earlier this year, were read to a jury at Kingston crown court, London, at the case of Zakaria Boufassil, a Belgian national who met Abrini in</p>

	<p>Birmingham and gave him \$3,720 on July 11 2015. Prosecutors told the court that there is “no doubt” Boufassil handed the money to Abrini to facilitate acts of extremism.</p> <p>Abrini, on the other hand, had previously said: “I am a player, a fan of casinos...It's my addiction, I play roulette, poker and the slot machines,” said the suspected member of the network that killed 130 people in Paris in November 2015 and 32 people in the Belgian capital in March.</p> <p>Abrini also claimed during questioning that Britain was never an intended target of ISIS, despite the group’s repeated threats against the country in its propaganda material.</p> <p>“There's no plan to target England as a potential site for a terrorist act. From what I know, it's France who is declared the enemy of Islamic State,” he said, according to an AFP news agency report.</p> <p>“I think England has a more developed secret service, better observation techniques etc... and it's therefore more difficult to attack,” he added.</p>

HEADLINE	11/28 Canada: fighters to Syria leveling off
SOURCE	http://www.cbc.ca/news/politics/isis-iraq-syria-terror-tourism-1.3871902
GIST	<p>The number of Canadians heading overseas to fight in Syria and Iraq appears to have levelled off, Canada's spy agency says.</p> <p>The Canadian Security Intelligence Service is not seeing the same kind of jumps in the numbers of terrorist travellers that it saw two years ago, says Brian Rumig, the service's assistant director for operations.</p> <p>"Those numbers have settled down," Rumig said during an appearance Monday at the Senate's national security and defence committee. "They have levelled off."</p> <p>However, Rumig cautioned the situation is fluid and figures fluctuate monthly.</p> <p>CSIS is aware of 180 individuals with connections to Canada who are suspected of terrorist activity abroad. Half of these individuals are believed to be in Syria and Iraq.</p> <p>The spy service also knows of approximately 60 such people who have returned to Canada.</p> <p>The figures are consistent with ones the spy service included in an August report as well as those made public in February by CSIS director Michel Coulombe.</p>

HEADLINE	11/28 Gitmo prisoner: Saudi terror rehab scam
SOURCE	http://nypost.com/2016/11/28/gitmo-prisoner-reveals-that-saudi-terrorist-rehab-center-is-a-scam/
GIST	<p>Counterterrorism experts have long suspected Saudi Arabia’s “rehabilitation” center for terrorists does a poor job of de-radicalizing jihadists. But a Saudi detainee at Guantanamo Bay now reveals it’s actually a recruiting and training factory for jihad.</p> <p>According to recently declassified documents, senior al Qaeda operative Ghassan Abdullah al-Sharbi told a Gitmo parole board that the Saudi government has been encouraging previously released prisoners to rejoin the jihad at its terrorist reform school, officially known as the Prince Mohammed bin Naif Counseling and Care Center.</p> <p>The Obama administration has praised the effectiveness of the Saudi rehab program — which uses “art therapy,” swimming, ping-pong, PlayStation and soccer to de-radicalize terrorists — and conditioned the release of dozens of Gitmo prisoners, including former Osama bin Laden bodyguards, on their enrollment in the controversial program.</p> <p>To date, 134 Saudi detainees have been transferred to the Saudi reform camps in Riyadh and Jeddah. Last year, nine Yemeni detainees were sent there, as well, and more are expected to follow over the next two months, as Obama strives to meet his campaign goal of closing Gitmo.</p> <p>Al-Sharbi dropped a bombshell on the Gitmo parole board at his hearing earlier this year, when he informed members that the Saudi kingdom was playing them for suckers. “You guys want to send me back to Saudi Arabia because you believe there is a de-radicalization program on the surface.</p> <p>True. You are 100% right, there is a strong — externally, a strong — de-radicalization program,” al-Sharbi testified. “But make no mistake, underneath there is a hidden radicalization program,” he added. “There is a very hidden strong — way stronger in magnitude — broader in financing, in all that.”</p> <p>Al-Sharbi is one of the longest serving, and most unrepentant, prisoners at Gitmo. A Saudi national with an electrical engineering degree from King Fahd University, he attended a US flight school associated with two of the 9/11 hijackers. He traveled to Afghanistan in the summer of 2001 and trained at an al Qaeda camp, building IEDs to use against allied forces.</p> <p>Al-Sharbi was captured March 28, 2002, at an al Qaeda safehouse in Faisalabad, Pakistan, with senior al Qaeda leader Abu Zubaydah. According to his US intel dossier, he told interrogators that “the US got what it deserved from the terrorist attacks on 9/11.”</p> <p>Given a chance at parole after 14 years, however, Al-Sharbi was surprisingly frank with the board.</p> <p>He explained that Riyadh is actively recruiting and training fighters to battle Iranian elements in neighboring Yemen and Syria. Saudi views Shiite-controlled Iran as a regional threat to its security.</p>

A growing body of evidence backs up his claims. Last month, for example, a Wikileaks e-mail from Hillary Clinton revealed, citing US intelligence sources, that Saudi has provided “clandestine financial and logistic support to” ISIS and other Sunni terrorist groups in the region.

Al-Sharbi said the kingdom is playing a double game.

“They will proudly tell you they will fight terrorism,” he said. “That means they will support it.” Al-Sharbi told the Gitmo board he doesn’t want to enroll in the Saudi rehab program, because he would be used to “fight under the Saudi royal cloak.”

“This is in the cause of a king. This is not a true jihad,” he said. “And I’m not going to Saudi unless I am sure they’re not gonna be using me.”

HEADLINE	11/28 Targeted killings thin ISIS top ranks
SOURCE	https://www.stripes.com/news/middle-east/targeted-killings-thin-isis-top-ranks-1.441618
GIST	<p>For a man given to fiery rhetoric and long-winded sermons, Abu Muhammad al-Adnani became oddly quiet during his last summer as the chief spokesman for the Islamic State.</p> <p>The Syrian who exhorted thousands of young Muslims to don suicide belts appeared increasingly obsessed with his own safety, U.S. officials say. He banished cellphones, shunned large meetings and avoided going outdoors in the daytime. He began sleeping in crowded tenements in a Syrian farm town called al-Bab, betting on the presence of young children to shield him from the drones prowling the skies overhead.</p> <p>But in late August, when a string of military defeats suffered by the Islamic State compelled Adnani to briefly leave his hiding place, the Americans were waiting for him.</p> <p>A joint surveillance operation by the CIA and the Pentagon tracked the 39-year-old as he left his al-Bab sanctuary and climbed into a car with a companion. They were headed north on a rural highway a few miles from town when a Hellfire missile struck the vehicle, killing both of them.</p> <p>The Aug. 30 missile strike was the culmination of a months-long mission targeting one of the Islamic State's most prominent - and, U.S. officials say, most dangerous - senior leaders. The Obama administration has said little publicly about the strike, other than to rebut Russia's claims that one its own warplanes dropped the bomb that ended Adnani's life.</p> <p>But while key operational details of the Adnani strike remain secret, U.S. officials are speaking more openly about what they describe as an increasingly successful campaign to track and kill the Islamic State's senior commanders, including Adnani, the No. 2 leader and the biggest prize so far. At least six</p>

high-level Islamic State officials have died in U.S. airstrikes in the past four months, along with dozens of deputies and brigadiers, all but erasing entire branches of the group's leadership chart.

Their deaths have left the group's chieftain, Abu Bakr al-Baghdadi, increasingly isolated, deprived of his most capable lieutenants and limited in his ability to communicate with his embattled followers, U.S. officials say.

Baghdadi has not made a public appearance in more than two years and released only a single audiotape - suggesting that the Islamic State's figurehead is now in "deep, deep hiding," said Brett McGurk, the Obama administration's special envoy to the global coalition seeking to destroy Baghdadi's self-proclaimed caliphate.

"He is in deep hiding because we have eliminated nearly all of his deputies," McGurk said at a meeting of coalition partners in Berlin this month. "We had their network mapped. If you look at all of his deputies and who he was relying on, they're all gone."

The loss of senior leaders does not mean that the Islamic State is about to collapse. U.S. officials and terrorism experts caution that the group's decentralized structure and sprawling network of regional affiliates ensure that it would survive even the loss of Baghdadi himself. But they say the deaths point to the growing sophistication of a targeted killing campaign built by the CIA and Defense Department over the past two years for the purpose of flushing out individual leaders who are working hard to stay hidden.

The effort is being aided, U.S. officials say, by new technology as well as new allies, including deserters and defectors who are shedding light on how the terrorists travel and communicate. At the same time, territorial losses and military defeats are forcing the group's remaining leaders to take greater risks, traveling by car and communicating by cellphones and computers instead of couriers, the officials and analysts said.

HEADLINE	11/28 Taliban attacks stifle Afghan progress
SOURCE	http://www.washingtontimes.com/news/2016/nov/28/taliban-assaults-halt-progress-of-afghan-coalition/
GIST	<p>Afghan forces are incapable of rolling back gains made by a resurgent Taliban over the past several months without a larger U.S. military presence in the country, according to an analysis of the 15-year-old conflict.</p> <p>A rash of attacks against American, Afghan and coalition forces by Taliban insurgents and a growing number of Islamic State fighters over the past two months have left 25 U.S. and European soldiers and civilians killed or wounded across Afghanistan.</p>

The attacks prompted Afghan commanders and their U.S. counterparts to launch combat operations for the first time against the Taliban and the Islamic State group, also known as ISIS or ISIL, during the traditional winter lull in fighting.

But the move could have little effect on stemming the violence without more U.S. troops, say analysts at the nonprofit Institute for the Study of War in Washington.

Afghan forces remain “highly dependent on current levels of U.S. support to regenerate units and secure government-controlled territory,” the institute says in a November threat assessment.

“[Afghan National Security Forces] are incapable of recapturing significant swaths of Taliban-controlled territory at current levels of U.S. support,” the assessment says.

Roughly 8,400 U.S. service members remain in the country training and advising Afghan forces and providing air support for Afghan-led operations against the Taliban-held areas in the northern and southern portions of the country and Islamic State-held territory in the east.

A series of brazen bombings and attacks by the Taliban beginning in mid-October punctuated a particularly difficult fighting season. The wave of attacks prompted Afghan commanders to order a major winter counteroffensive. Dubbed Operation Shafaq Two, the offensive will focus on Taliban and Islamic State positions in 13 of Afghanistan’s 34 provinces, Stars and Stripes reported on Nov. 21.

“The aim is to continue eliminating the terrorists inside Afghanistan, targeting their supply routes, recruitment places and those areas where they gather and have hideouts,” Gen. Mohammad Radmanish, deputy spokesman for the Defense Ministry, said in a statement, according to Stars and Stripes.

HEADLINE	11/27 Iraq legalizes Iran-backed Shiite militia
SOURCE	http://www.vocativ.com/378895/iranian-backed-militias-legalized-by-iraqi-parliament/
GIST	<p>A law approved by the Iraqi parliament is stirring anger inside the country and across the Middle East. The measure, passed on Saturday, recognizes the Popular Mobilization Units, an Iran-backed Shiite militia, and will let them fight alongside the Iraqi military.</p> <p>The move has the potential to worsen sectarian rivalries: the PMUs were formed in June of 2014 to fight the Islamic State after the city of Mosul fell to the terrorist group, but they stand accused of abuses against the country’s Sunni minority. All the Shiite blocs in the Iraqi parliament voted for the bill, while lawmakers representing the Sunni minority objected, Reuters reports.</p> <p>The units, which comprise more than 110,00 fighters, are alleged by international monitoring groups to have killed and terrorized Sunni residents who live in ISIS-controlled territories as retaliation for attacks</p>

	<p>waged by the jihadist group. The militias reportedly demolished Sunni homes, stores and mosques and detained and kidnapped Sunni residents, according to a report issued by Human Rights Watch. The Islamic State adheres to a radical interpretation of a strain of Sunni Islam.</p> <p>In October, the Iraqi military began its campaign to retake Mosul, the country's second largest city that's been held for two years by ISIS. The campaign, which is currently inside the eastern portion of the city, raised concerns in Sunni-dominated countries in the region. They worry that the participation of PMU Shiite forces in the liberation of a Sunni-dominated city like Mosul could lead to further abuses.</p>

HEADLINE	11/29 IED hits Philippine president security team
SOURCE	http://www.reuters.com/article/us-philippines-militants-idUSKBN1300UX
GIST	<p>A roadside bomb in the southern Philippines on Tuesday wounded seven members of the president's security team, a day ahead of his planned visit to an area gripped by intense fighting between Islamist militants and government troops.</p> <p>Rodrigo Duterte said he would defy his advisers and still go to Butig town on Wednesday to visit wounded soldiers, despite the bombing that hit his security staff and also wounded two soldiers.</p> <p>"The truck carrying the president's advance security detail was hit by an improvised explosive device," Defence Secretary Delfin Lorenzana told reporters in Manila. "There was no firefight."</p> <p>Some 40 militants from the Maute Group, which has pledged allegiance to Islamic State, have been killed during an air-and-ground assault on an old municipal building they have occupied since Saturday, said military spokesman Colonel Edgard Arevalo.</p> <p>Twenty soldiers have been wounded in the fighting, which continued to rage on Tuesday.</p> <p>The defense secretary said he would advise the president to cancel his visit.</p> <p>"It's still not under control," Lorenzana said, adding the military was trying to validate links between local groups and Islamic State.</p>

HEADLINE	11/29 Paris: terror suspect refuses to talk
SOURCE	http://abcnews.go.com/International/wireStory/paris-attacks-suspect-abdeslam-refuses-talk-43839566
GIST	French investigators have tried and failed — again — to persuade Paris attacks suspect Salah Abdeslam to talk to anti-terrorism investigators.

	<p>Paris prosecutor's office spokeswoman Agnes Thibault-Lecuivre said Abdeslam was brought before an anti-terrorism judge Tuesday for a new interrogation effort. She said that Abdeslam refused to respond to the judge's questions.</p> <p>He didn't request a new lawyer either. Abdeslam's former lawyers stop defending him because of his ongoing refusal to speak.</p> <p>He initially said he wanted to explain his path to radicalization and his role in the November 2015 Islamic State attacks, but has since chosen to remain silent to protest 24-hour surveillance of his prison cell and his solitary confinement.</p> <p>Investigators hope he can shed light on the plot and his role in the attacks, which killed 130 people.</p>

HEADLINE	11/28 Seized papers reveal ISIS attack plans
SOURCE	http://www.foxnews.com/world/2016/11/28/seized-documents-reveal-thousands-planned-isis-attacks-around-world.html
GIST	<p>A large trove of documents seized in Syria from the Islamic State (ISIS) reveals thousands of plots to attack Europe and other parts of the world, Britain's top commander in the region has said.</p> <p>More than 10,000 documents and a huge amount of digital data were seized after the group was driven out of Manbij in northern Syria in August, according to Maj. Gen. Rupert Jones.</p>

	<p>"If we want to keep Britain safe, we need to deal with Daesh," he said, using another name for the extremist group.</p> <p>The news comes as anti-terror police have started deploying on London's streets.</p> <p>General Jones said: "External operations have been getting orchestrated to a very significant degree from within the caliphate, critically from within Raqqa and from within Manbij.</p> <p>"They were key external operations hubs. There is a huge amount of intelligence, documentation, electronic material that has been exploited there that points very directly against all sorts of nations around the world."</p>

HEADLINE	11/28 French airstrikes killed key AQ leader?
SOURCE	http://www.foxnews.com/world/2016/11/28/key-al-qaeda-leader-believed-killed-in-french-airstrikes-over-libya.html
GIST	<p>A slippery, one-eyed Al Qaeda leader long wanted by the U.S. appears to have finally met his maker courtesy of French airstrikes over Libya, two Pentagon sources told Fox News.</p> <p>French fighter jets based on the aircraft carrier Charles de Gaulle in the Mediterranean and conducting a mission over southern Libya took out Mokhtar Belmokhtar, two U.S. defense officials told Fox News. American forces have targeted Belmokhtar twice in the past two years, only to see the senior Al Qaeda leader cheat death.</p> <p>"It looks like he is dead this time," said one official, citing a recent intelligence report.</p> <p>Neither official contacted by Fox News would say when the French airstrike occurred. The Wall Street Journal, which first reported the strike, said it took place earlier this month. Belmokhtar is the leader of Al Qaeda in the Islamic Maghreb, or AQIM.</p> <p>In January 2013, Belmokhtar led a group of Al Qaeda-affiliated terrorists who kidnapped hundreds of workers at a gas plant in Algeria, including dozens of foreigners. A four-day standoff came to an end when Algerian forces stormed the plant, killing 32 militants. Seven hostages were killed, including one American.</p> <p>Officials at the White House and the Pentagon declined to comment on the strike, and a spokesman for the French Ministry of Defense declined to comment when contacted by The Wall Street Journal.</p>

HEADLINE	11/28 Kurdish casualties climb in ISIS fight
SOURCE	http://www.foxnews.com/world/2016/11/28/kurdish-casualties-mount-in-fight-against-isis-despite-us-medical-training.html
GIST	<p>ERBIL, Iraq – The death toll and injuries incurred by the Kurdish Peshmerga are mounting in the battle against ISIS, but despite the rising number of fallen and maimed fighters, officials say it would be worse without U.S. training.</p> <p>The number of dead stands at an estimated 1,600, and thousands more have lost limbs or been burned by chemical weapons. Yet, they say training has spared many more.</p> <p>“In the early days, we would have 70 wounded soldiers coming in all at once from one battle, only a few nurses and doctors who would work three shifts without break,” Pshtiwan Aziz, manager of the Emergency Management Center in Erbil, told FoxNews.com. “But now they have had American training, many less are coming in with wounds. Just a few, even from big battles.”</p> <p>From tourniquet techniques and proper bandaging to how to position the wounded for transport, training for thousands lasted several weeks. Each training block was tailored to the needs of a specific unit, with especially focused instruction on how to handle casualties from improvised explosive devices. IEDs have caused as much as 85 percent of casualties, and coalition personnel worked extensively in the lead-up to the campaign to retake Mosul on strategies to mitigate their damage.</p> <p>Given that Kurds lack medical-evacuation helicopters and well-equipped mobile hospitals, on-the-field triage is critical. Yet, even for those who are saved, the army’s poor funding remains an obstacle. Nearly 9,500 Peshmerga fighters have been wounded in the last 2 ½ years, many of them seriously.</p>

HEADLINE	11/28 Worker emails staff; then jumps off bldg.
SOURCE	https://www.bloomberg.com/news/articles/2016-11-28/amazon-worker-jumps-off-company-building-after-e-mail-to-staff
GIST	<p>An Amazon.com Inc. employee was injured when he leaped off a building at the company’s Seattle headquarters in what police characterized as a suicide attempt.</p> <p>The man, who wasn’t identified by authorities, sent an e-mail visible to hundreds of co-workers, including Chief Executive Officer Jeff Bezos, before the incident occurred, according to a person familiar with the matter. The man survived the fall from Amazon’s 12-story Apollo building at about 8:45 a.m. local time Monday and was taken to a Seattle hospital, police said.</p>

	<p>The man had recently put in a request to transfer to a different department, but was placed on an employee improvement plan, a step that can lead to termination if performance isn't improved, said the person, who asked not to be identified discussing company personnel matters. More than 20,000 people work in multiple buildings at Amazon's headquarters.</p> <p>"Our thoughts are with our colleague as he continues to recover," Amazon said in a statement. "He's receiving some of the best care possible and we will be there to support him throughout the recovery process."</p> <p>In the e-mail, the man expressed criticism of how the company handled his transfer request, and he hinted that he might harm himself, according to the person.</p> <p>Suicide was the 10th-leading cause of death in the U.S. in 2013, with 41,149 people taking their own lives that year, for a rate of 12.6 per 100,000, according to the U.S. Centers for Disease Control and Prevention.</p>

HEADLINE	11/28 Snow in Seattle's forecast?
SOURCE	http://mynorthwest.com/474282/seattle-snow-on-forecast/
GIST	<p>The image of snow on your phone's weather forecast for next week wasn't a mistake. Snow could be on its way.</p> <p>Indeed the National Weather Service in Seattle mentioned the "S-word" for early next week — Monday and Tuesday — with snow levels dropping to 1,000 feet or lower. Additionally, forecasters say strong systems moving in this weekend could bring "stronger winds, rain, and heavy mountain snow."</p> <p>Before we can even think (or dream) of any snow, temperatures need to drop. And temps could drop to the 30s on Tuesday morning outside of urban areas if we get clear skies, according to the National Weather Service. While cold enough, forecasters say Tuesday will likely be sunny in some areas. The rain will return again before it dries out Wednesday night into Thursday.</p> <p>So will there a Seattle snow day? Or will the region be spared?</p> <p>KIRO 7 meteorologists Nick Allard and Morgan Palmer say no way. Why? Because it won't be cold enough. And even if it was, there's not enough moisture for snow.</p> <p>"The cold air coming behind the front (on Sunday) does not appear to be part of a major cold air outbreak and should only put our temps bordering on the level for snow," Palmer said.</p>

	Not to mention, a lot could change in a week's time. Let us not forget the "windstorm-that-never-was," which appeared to change in real time. Palmer said we might not even know as late as this weekend if lowland snow is likely.

HEADLINE	11/28 Morocco TV: makeup tips to hide beating
SOURCE	https://www.washingtonpost.com/news/morning-mix/wp/2016/11/28/after-the-beating-moroccan-tv-airs-makeup-tips-for-hiding-domestic-violence/
GIST	<p>The smiling woman on the daily Moroccan television show spoke to viewers as if it were any other makeup tutorial, comparing brands and hues of face foundation and demonstrating how to apply it.</p> <p>Seated next to her was a woman with what appeared to be a black eye and bruises on her cheekbones.</p> <p>"After the beating, this part is still sensitive, so don't press," the host said in Arabic as she applied makeup on the woman's face, eventually concealing the woman's bruises.</p> <p>"Make sure to use loose powder to fix the makeup so if you have to work throughout the day, the bruises don't show," she said.</p> <p>The makeup tutorial, aired Wednesday on Moroccan state television, instructed viewers how to use concealer to "camouflage the traces of violence against women," spurring outrage on social media that prompted an apology from the channel. The segment was broadcast two days before the U.N. International Day for the Elimination of Violence against Women, the Guardian reported.</p> <p>"It's a subject we shouldn't talk about, but unfortunately that's what it is," the segment's host, Lilia Mouline, said in the tutorial. "We hope that these beauty tips help you carry on with your normal life."</p> <p>Before naming the various recommended beauty brands, Mouline reminded viewers that the apparent swelling and black and blue bruises around the woman's eyes were depicted with makeup, and were not the result of real wounds. She suggested certain foundation tones for most effectively disguising a woman's unfortunate "beating."</p> <p>"Use foundation with yellow in it," she said. "If you use the white one, your red punch marks will always show."</p> <p>The video prompted shock and criticism on Twitter from viewers who saw the video as an attempt to encourage women to "conceal" abuse with makeup, instead of condemning the individuals responsible for the violence.</p>

HEADLINE	11/28 Leaning tower of San Francisco sinking
SOURCE	http://abcnews.go.com/Technology/wireStory/san-franciscos-sinking-tower-space-43831433
GIST	Engineers in San Francisco have tunneled underground to try and understand the sinking of the 58-story Millennium Tower. Now comes an analysis from space.

	<p>The European Space Agency has released detailed data from satellite imagery that shows the skyscraper in San Francisco's financial district is continuing to sink at a steady rate — and perhaps faster than previously known.</p> <p>The luxury high-rise that opened its doors in 2009 has been dubbed the Leaning Tower of San Francisco. It has sunk about 16 inches into landfill and is tilting several inches to the northwest.</p> <p>A dispute over the building's construction in the seismically active city has spurred numerous lawsuits involving the developer, the city and owners of its multimillion dollar apartments.</p> <p>Engineers have estimated the building is sinking at a rate of about 1-inch per year. The Sentinel-1 twin satellites show almost double that rate based on data collected from April 2015 to September 2016.</p> <p>The satellite data shows the Millennium Tower sunk 40 to 45 millimeters — or 1.6 to 1.8 inches — over a recent one-year period and almost double that amount — 70 to 75 mm (2.6 to 2.9 inches) — over its 17-month observation period, said Petar Marinkovic, founder and chief scientist of PPO Labs which analyzed the satellite's radar imagery for the ESA along with Norway-based research institute Norut.</p> <p>"What can be concluded from our data, is that the Millennium Tower is sinking at a steady rate," Marinkovic said in a telephone interview Monday from The Hague, Netherlands.</p>

HEADLINE	11/29 Great Barrier Reef record coral deaths
SOURCE	http://abcnews.go.com/Technology/wireStory/great-barrier-reef-sees-record-coral-deaths-year-43836081
GIST	<p>Warming oceans this year have caused the largest die-off of corals ever recorded on Australia's Great Barrier Reef, scientists said Tuesday.</p> <p>The worst-affected area is a 700-kilometer (400-mile) swath in the north of the World Heritage-listed 2,300-kilometer (1,400-mile) chain of reefs off Australia's northeast coast, said the Australian Research Council Centre of Excellence for Coral Reef Studies.</p> <p>The center, based at James Cook University in Queensland state, found during dive surveys in October and November that the swath north of Port Douglas had lost an average of 67 percent of its shallow-water corals in the past nine months.</p> <p>Farther south, over the vast central and southern regions that cover most of the reef, scientists found a much lower death toll.</p> <p>The central region lost 6 percent of bleached coral and the southern region only 1 percent.</p>

HEADLINE	11/29 Calif. targets cows' greenhouse impact
SOURCE	http://abcnews.go.com/Technology/wireStory/california-targets-dairy-cows-combat-global-warming-43837514
GIST	<p>California is taking its fight against global warming to the farm. The nation's leading agricultural state is now targeting greenhouse gases produced by dairy cows and other livestock.</p> <p>Despite strong opposition from farmers, Gov. Jerry Brown signed legislation in September that for the first time regulates heat-trapping gases from livestock operations and landfills.</p> <p>Cattle and other farm animals are major sources of methane, a greenhouse gas many times more potent than carbon dioxide as a heat-trapping gas. Methane is released when they belch, pass gas and make manure.</p> <p>Livestock are responsible for 14.5 percent of human-induced greenhouse gas emissions, with beef and dairy production accounting for the bulk of it, according to a 2013 United Nations report.</p> <p>Since the passage of its landmark global warming law in 2006, California has been reducing carbon emissions from cars, trucks, homes and factories, while boosting production of renewable energy.</p> <p>In the nation's largest milk-producing state, the new law requires dairies and other livestock operations to reduce methane emissions 40 percent below 2013 levels by 2030. State officials are developing the regulations, which take effect in 2024.</p> <p>But dairy farmers say the new regulations will drive up costs when they're already struggling with five years of drought, low milk prices and rising labor costs. They're also concerned about a newly signed law that will boost overtime pay for farmworkers.</p>

HEADLINE	11/29 Taiwan rescue exercise in disputed area
SOURCE	http://abcnews.go.com/International/wireStory/taiwan-holds-rescue-exercise-disputed-south-china-sea-43838822
GIST	<p>Taiwan held a search-and-rescue exercise in the South China Sea on Tuesday as part of efforts to cement its hold over a key island in the strategically vital waterbody.</p> <p>Eight vessels and three aircraft took part in the drill simulating a fire aboard a cargo ship that forced crew members to seek safety on Taiping in the Spratly island group.</p> <p>Both coast guard and navy ships participated in the exercise.</p>

	<p>While Taiwan claims all of the Spratlys, it only occupies Taiping and hasn't challenged the presence of forces from China and other nations on other islands in the group. Coast guard head Lee Chung-wei told journalists that Taiwan's sovereignty over Taiping is "undeniable," but that it wants to turn the island into a base for humanitarian relief missions in the area.</p> <p>"The purpose of this drill is to tell international society that we are keen to conduct humanitarian relief on the island. We want to maintain peace in this region and put away disputes," Lee said.</p>

HEADLINE	11/29 US students lag behind math, science
SOURCE	http://abcnews.go.com/Politics/wireStory/us-students-lag-peers-east-asia-russia-math-43838538?cid=clicksource_4380645_1_hero_headlines_headlines_hed
GIST	<p>In a globally competitive world, American students have strides to make when it comes to math and science, where they lag behind a solid block of East Asian countries as well as Russia and Kazakhstan.</p> <p>Eighth graders in the United States improved their scores in math over the last four years on the global exam. Scores for science, however, were flat. In fourth grade, scores were unchanged in the math and science tests, according to results released Tuesday.</p> <p>"The results do suggest a leveling out in the most recent cycle," said Ina Mullis, an executive director of the TIMSS & PIRLS International Study Center at Boston College, where researchers helped coordinate staff to administer the assessments. "One always prefers to see improvement, but holding ones' own is preferable to declining."</p> <p>Singapore topped the rankings, taking first place in both grades for math and science on the tests, known as the Trends in International Mathematics and Science Study, or TIMSS.</p> <p>The United States placed 10th in fourth-grade science and in eighth-grade math. In eighth-grade science, the U.S. was in 11th place. It ranked 14th for fourth-grade math, just behind Portugal and Kazakhstan.</p> <p>Globally, results from the 2015 exams showed achievement trends were up — with more countries registering increases than decreases in math and science for both grades. Gender gaps were another highlight. They have narrowed over the last 20 years, especially in science at the eighth-grade level.</p>

HEADLINE	11/28 Claim: coastal cities will be under water
SOURCE	http://www.newsmax.com/Newsfront/polar-ice-melt-sea-level/2016/11/28/id/761003/
GIST	New York City and other coastal cities will reportedly be under water within a century – inundated by flooding from a fast-melting polar ice sheet.

	<p>It is not a question of if, but when a flood of biblical proportion will make cities hugging coastlines around the world uninhabitable, Ohio State associate professor Ian Howat told The Sun.</p> <p>The West Antarctic Ice Sheet is breaking apart from the inside out, and its melt-off will cause sea level rises of up to nearly 10 feet, the U.K.-based newspaper reported.</p> <p>"It's generally accepted that it's no longer a question of whether the West Antarctic Ice Sheet will melt, it's a question of when," Howat told the newspaper. "We may see significant collapse of West Antarctica in our lifetimes."</p> <p>The pace and geography of the ice melt is significant; in 2013, a rift began forming in a valley on the Pine Island Glacier, and two years later, a 225-square-mile iceberg broke off and floated away, The Sun reported.</p>

HEADLINE	11/28 Turkey targets foster families over coup
SOURCE	http://www.bbc.com/news/world-europe-38137179
GIST	<p>The Turkish authorities are investigating foster families for suspected ties to the failed July coup. An official says it may remove children from homes if their guardians are found to be coup supporters.</p> <p>More than 125,000 people were dismissed or suspended and about 40,000 others arrested after the coup attempt.</p> <p>Last week, the European parliament voted for a temporary halt to EU membership talks with Turkey because of its "disproportionate" reaction.</p> <p>The government says its investigations are necessary to curb the influence of Fetullah Gulen, the US-based Muslim cleric accused by Ankara of orchestrating the coup.</p> <p>Mr Gulen, who lives in self-imposed exile in Pennsylvania, has condemned the coup and denies any involvement in it, but the government calls his network "Gülenist Terror Organisation" (Feto) and has vowed to continue the purges.</p> <p>Local media say around 5,000 foster families and some related institutions are being investigated.</p>

HEADLINE	11/28 'Federal Fumbles' lists govt. waste
-----------------	--

SOURCE	http://www.foxnews.com/politics/2016/11/28/okla-sen-lankford-releases-new-federal-fumbles-report-on-govt-waste.html
GIST	<p>A \$2 million study on how children don't like to eat food that's been sneezed on is one of the highlights of this year's "Federal Fumbles" – a report on government waste released Monday by Sen. James Lankford, R-Okla.</p> <p>The report, called "Federal Fumbles: 100 ways the government dropped the ball," lists \$247 billion in what it calls wasteful and inefficient federal spending, as well as offering solutions for the examples.</p> <p>"This 'Federal Fumbles' report provides specific examples of wasteful spending and unnecessary regulations that are not in the taxpayer's best interest, and shows specific solutions for how the federal government can become more efficient," he said.</p> <p>Other highlights of wasteful spending include \$500,000 for a program that texted people encouraging them not to smoke, and \$2 million in misused grants that included \$1,000 for customized Snugglies.</p> <p>The report highlighted the federal government spending almost half a million dollars on the sights, sounds, tastes and smells of the medieval period, with \$315,000 spent by the National Science Foundation to study how court rulings make people feel.</p> <p>The report also found \$1 billion was spent on hospitals and infrastructure in Palestine.</p>

HEADLINE	11/28 DoD official: 'unsafe' Iran encounter
SOURCE	http://abcnews.go.com/International/iranian-small-craft-aimed-weapon-us-navy-helicopter/story?id=43828802
GIST	<p>The crew of an Iranian small craft aimed a weapon at a U.S. Navy helicopter in the Strait of Hormuz on Saturday in an encounter a U.S. Defense Department official called "unsafe and unprofessional."</p> <p>The official, who spoke to ABC News on the condition of anonymity, said the incident occurred during the daytime hours on Saturday as the aircraft carrier U.S.S. Eisenhower was moving through the Strait of Hormuz to exit the Persian Gulf.</p> <p>The carrier detected two small boats located about nine miles away as it cruised through the narrow strait. Small craft from the Islamic Revolutionary Guard Corps Navy (IRGC-N) routinely harass American warships when they are in the Persian Gulf or in the Strait of Hormuz.</p> <p>An SH-60 Seahawk helicopter aboard the carrier was launched to get a better identification of the vessels. The helicopter was a half-mile away from the small boats when a crew member on one of the boars was spotted loading a weapon, the official said.</p>

	About five minutes later, that same weapon was trained at the helicopter at which point the helicopter turned away from the area to return to the carrier, the official noted.

HEADLINE	11/28 Woman stabbed at north Seattle hotel
SOURCE	http://www.seattletimes.com/seattle-news/crime/woman-stabbed-at-north-seattle-hotel-police-say/
GIST	<p>A 24-year-old man was arrested Monday after a woman was stabbed inside a North Seattle hotel, according to the Seattle Police Department.</p> <p>The suspect was taken into custody after police were called to the hotel near the intersection of North 130th Street and Stone Avenue North about 2:30 a.m. to investigate reports of a woman running through a hotel hallway, screaming and bleeding.</p> <p>Officers found the woman inside a hotel room with stab wounds to her neck and arms, police said. She was later taken to Harborview Medical Center with non-life-threatening injuries.</p> <p>After a short search, officers found and arrested the suspect. He was booked into King County Jail for investigation of assault, the department said.</p> <p>The investigation continues.</p>

HEADLINE	11/28 FBI phony supremacist gang nets arrest
SOURCE	https://www.splcenter.org/hatewatch/2016/11/28/fbi%E2%80%99s-phony-white-supremacy-gang-nets-arrest-vinlander
GIST	<p>Federal prosecutors in Florida are expected to ask a judge on Tuesday to detain a self-professed, violence-boasting white supremacist under indictment in a murder-for-hire plot.</p> <p>The arrest of Adrian “Skitz” Apodaca, who claims to be a founding member of the violent neo-Nazi Vinlanders Social Club, came after undercover FBI agents set up their own phony white supremacy gang and invited him to a meeting where he saw money change hands, newly filed court documents disclose.</p> <p>The investigation was launched, the FBI said in court papers, “to mitigate any potential threats posed by Apodaca and to determine whether he was engaging in criminal activities.”</p>

Since its formation in 2003, several members of the Vinlanders have been arrested for violent crimes throughout the United States. The neo-Nazi gang — embracing a racist, pagan religion known as Odinism — has a reputation for drinking, fist-fighting brawls and violent intimidation.

During the five-month FBI sting investigation, court documents allege, Apodaca made secretly recorded statements that he and other Vinlanders had “killed a lot of people” while posing as police officers and ripping off drug houses in Arizona.

Apodaca, 44, was arrested by the FBI on Oct. 28 at a motel in Valdosta, Ga., and was subsequently indicted by a grand jury in West Palm Beach, Fla., on federal charges related to murder-for hire; two charges of attempted drug possession with intent to distribute, robbery, possession of a firearm in furtherance of a crime of violence and possession of ammunition by a felon.

At Tuesday’s detention hearing before a U.S. magistrate judge in West Palm Beach, prosecutors will argue Apodaca poses a flight risk or is a danger to the community, or both, to seek his detention before trial, now set for January in Fort Lauderdale.

HEADLINE	11/28 Spokane: 85yr old abused children 60yrs
SOURCE	http://www.thenewtribune.com/news/local/crime/article117640048.html
GIST	<p>SPOKANE - Detectives believe an 85-year-old Spokane Valley man has raped and molested numerous young girls since the 1950s and was never prosecuted.</p> <p>Marvin E. Petersen was arrested last week after detectives spent months interviewing alleged victims, including a neighbor and current and former relatives, according to the Spokane County Sheriff’s Office. Court documents say the alleged victims were between 4 and 13 years old when they were abused.</p> <p>Detectives interviewed at least nine victims and witnesses, most of whom are related to Petersen. Court documents say a woman and her daughter reported Petersen to police in Eugene, Oregon, in 1969, but officers discouraged them from testifying in court, citing the victim’s “well-being.”</p> <p>Records of those allegations have since been destroyed, and Petersen has no apparent conviction history, the Sheriff’s Office said.</p> <p>Petersen now faces two counts of first-degree child rape as well as charges of child molestation and unlawful imprisonment. He’s being held in the Spokane County Jail on a \$100,000 bond.</p>

HEADLINE	11/28 Fed court rules in favor of stingray
SOURCE	https://www.scmagazine.com/stingray-use-okd-in-fed-court-with-dissent/article/575379/

GIST	<p>After a wanted man was nabbed by police who tracked him down via his cell phone, a federal appeals court has rejected his claim regarding the validity of his arrest and ruled in favor of the use of a stingray, the first time such a ruling has appeared at the federal appellate level.</p> <p>Damian Patrick was sought by Wisconsin police for a parole violation. Police in Milwaukee used a stingray – a technology which mimics a cell tower to intercept calls and data from cell phones – to locate him in 2013. While the suspect pleaded guilty to the parole violation charge, he argued against the "validity of the location-tracking warrant by contending that his person was not contraband," and thus was off limits to the investigation, according to a court document.</p> <p>While Chief Judge Diane Wood ruled against Patrick's claim, she expressed reservations about the government's refusal to divulge information about stingray technology. Citing Fourth Amendment concerns, the judge wrote, "It is time for the stingray to come out of the shadows."</p>

HEADLINE	11/28 Judge: Roof can act as own attorney
SOURCE	http://abcnews.go.com/US/wireStory/jury-selection-resume-charleston-church-shooting-trial-43816980
GIST	<p>A white man accused of fatally shooting nine black parishioners at a Charleston church last year was allowed to act as his own attorney in his federal death penalty trial Monday.</p> <p>Dylann Roof's request came against his lawyers' advice, and U.S. District Judge Richard Gergel said he would reluctantly accept the 22-year-old's "unwise" decision.</p> <p>Death penalty attorney David Bruck then slid over and let Roof take the lead chair. The lawyers can stand by and help Roof if he asks.</p> <p>The development came the same day jury selection resumed in the case. The selection process was halted Nov. 7 after lawyers for Roof questioned his ability to understand the case against him. Judge Gergel's ruling last week cleared the way for Monday's process to begin anew.</p> <p>Roof, 22, is charged with counts including hate crimes and obstruction of religion in connection with the June 17, 2015, attack at Emanuel African Methodist Episcopal Church in Charleston. He faces a possible death sentence if convicted.</p>

HEADLINE	11/28 No suspects in Donnie Chin murder case
SOURCE	http://www.seattlepi.com/local/crime/article/International-District-residents-Unacceptable-10641271.php
GIST	Nearly a year-and-a-half since Donnie Chin's slaying, his neighbors, friends and family in the International District continue to demand answers about the community leader's killer.

State Rep. Sharon Tomiko Santos, D-Seattle, convened the third community meeting with police and city officials Monday night at the Nagomi Tea House to discuss an investigation in which no suspects have yet been identified.

Chin, the founder of the International District Emergency Center and known as the guardian of the neighborhood, was shot in his vehicle July 23, 2015 near Eighth Avenue South and South Lane Street.

He was a beloved resident who filled in the gaps where the neighborhood felt neglected by police, often rendering aid to people before firefighters could even reach the scene.

Attendees wore T-shirts bearing Chin's image and buttons reading, "Justice for Donnie."

Reports indicate that Chin was responding to a call of shots fired when he was caught in the crossfire of two groups shooting at each other.

His killer or killers remain at large.

"We're here to keep our elected officials and government agencies accountable to us," Santos said, adding that the community has been kept in the dark about the investigative details of Chin's case. She called the lack of information "unacceptable."

HEADLINE	11/28 Conviction tossed in Renton slaying
SOURCE	http://www.seattlepi.com/local/crime/article/Conviction-thrown-out-in-slaying-of-Renton-young-10641336.php
GIST	<p>A Renton man convicted of murdering another young man at a house party must receive a new trial, a state appeals court ruled Monday.</p> <p>A King County jury convicted Santiago Ortuno-Perez in December 2014, finding that he had killed 22-year-old Jesus Cristobal Castro little more than a year before. Ortuno-Perez, now 27, was sentenced to 23 years in prison in the killing.</p> <p>Now, though, Ortuno-Perez will likely get a chance to make the argument he couldn't during his first trial – that another man at the party killed Castro.</p> <p>A three-judge court of appeals panel found that Ortuno-Perez should've been allowed to offer evidence that the other man was the killer, or, at least, that someone else could've killed Castro.</p> <p>"Ortuno-Perez was denied his right to present a complete defense," Judge Stephen Dwyer said in the ruling.</p>

	<p>“A new trial,” he continued, “is required.”</p> <p>Castro, who had recently fathered a daughter, suffered his fatal wound at 2 a.m. on Oct. 12, 2013. He was shot in the head with a .22-caliber firearm at close range; he never regained consciousness and died days later of his injuries.</p> <p>While as many as a dozen people were near Castro when he was shot, including Ortuno-Perez. Another man who he claims was the true killer was also in the crowd.</p> <p>Ortuno-Perez was arrested in Kent hours after the shooting. Police found a .22-caliber bullet in his pocket, but it was substantially different from the one that killed Castro. The gun that fired the fatal show has not been recovered.</p>

HEADLINE	11/28 Vancouver: fake cop attempted to kidnap
SOURCE	http://q13fox.com/2016/11/28/vancouver-police-man-impersonating-cop-tries-to-kidnap-woman/
GIST	<p>VANCOUVER, Wash. (AP) — Authorities say they're searching for a man who impersonated a police officer and handcuffed a woman he was trying to kidnap in southwestern Washington.</p> <p>Vancouver police said in a news release that the woman's friend was driving her to meet someone Sunday night when a vehicle with flashing lights approached them from behind.</p>

	<p>Police say they stopped, believing it was a police officer, and a man wearing what appeared to be a police uniform approached the vehicle.</p> <p>Police say the man pulled the woman out, handcuffed her and put her in his vehicle. Police say the victim realized it wasn't an officer and fled on foot.</p> <p>The suspect also fled. He's described as in his 30s, about 5-foot-8 with a medium build and no facial hair.</p>

HEADLINE	11/28 Judge upholds Arizona ID theft laws
SOURCE	http://www.breitbart.com/texas/2016/11/28/upheld-id-theft-laws-used-sheriff-arpaio-prosecute-illegal-aliens/
GIST	<p>A federal district court judge in Arizona has upheld two identity theft laws used to prosecute illegal aliens in employment raids by Maricopa County Sheriff Joe Arpaio.</p> <p>The case involves the constitutionality of two Arizona laws that provide for criminal penalties when an act of identity theft is done with the intent to obtain or continue employment (statute amended in 2007 and 2008 to apply specifically to the use of false identities to obtain employment), and another statute that makes it a crime to commit forgery (passed in 1977).</p> <p>Most of the tips that generated investigations by the Maricopa County Sheriff's Office (MCSO) were from citizens in the community about a place of business or its employees and were made on telephone and email hotlines set up by the MCSO. The department would investigate, and if there was evidence of a crime, would apply for and execute a search warrant for the employment worksite. While executing the warrant, the MCSO would seize employment files and arrest workers they believed had committed identity theft or forgery.</p> <p>The MCSO conducted over 80 workplace investigations resulting in the arrest of 806 employees who "were almost exclusively unauthorized aliens," the Court's Order said.</p>

HEADLINE	11/28 SC serial killer charged w/3 more murders
SOURCE	http://www.nbcnews.com/news/us-news/s-c-suspected-serial-killer-todd-kohlhepp-charged-three-more-n689336
GIST	<p>Todd Christopher Kohlhepp, the South Carolina man who investigators say is a serial killer, was charged Monday evening with three more counts of murder — bringing the total to seven.</p> <p>Kohlhepp, 45, was arrested early this month when Spartanburg County sheriff's deputies investigating a sex crime tip heard banging sounds coming from a metal container on his property. They found Kala Brown, 30, who had been missing since August, along with her boyfriend, Charlie Carver.</p>

	<p>Brown told investigators that she saw Kohlhepp shoot and kill Carver, whose body was found in a shallow grave. Kohlhepp then led investigators to the grave sites of Meagan Coxie, 25, and Johnny Coxie, 29, authorities said.</p> <p>Deputies filed arrest warrants Monday in Spartanburg County Magistrate Court charging Kohlhepp with murder in the deaths of Carver and the Coxies. He was also charged with multiple kidnapping and weapons charges in connection with their deaths.</p> <p>Kohlhepp was ordered held without bond Monday night. He was already being held without bond on four other counts of murder from a 2003 quadruple homicide near the town of Chesnee, which Sheriff Chuck Wright has said he has confessed to.</p>

HEADLINE	11/28 USPS: reward for robbery attempt info
SOURCE	http://komonews.com/news/local/50000-reward-for-info-on-attempted-armed-robbery-of-letter-carrier
GIST	<p>BOTHELL, Wash. - A \$50,000 reward is being offered for information leading to the arrest of a suspect who attempted to rob a letter carrier at gunpoint earlier this month.</p> <p>Jeremy R. Leder of the U.S. Postal Inspection Service says the attempted robbery took place Nov. 1 at about 1:50 p.m. as the letter carrier was delivering mail in the area of 169th Street SE and 35th Drive NE in Bothell.</p> <p>The suspect displayed a handgun and attempted to grab items of value from the letter carrier but was unsuccessful, Leder said.</p> <p>During the incident, the suspect's hand was smashed in the car door when the letter carrier was fleeing. The suspect likely sustained cuts and bruises on his right hand as a result.</p> <p>After the failed robbery attempt, the suspect fled the scene in a late '80s or early '90s red Acura Integra. Reports indicate the suspect was accompanied in the car by two women.</p> <p>The suspect is described as a white male in his 30s with a thin build, standing about 5-feet-10-inches tall, weighing 170 pounds, with dark brown chin hair. The suspect was wearing a black or dark-colored hooded sweatshirt with a zipper.</p> <p>Leder said the U.S. Postal Inspection Service is offering a \$50,000 reward to anyone who can provide information leading to the arrest and prosecution of those involved in the attempted robbery.</p>

HEADLINE	11/28 Porch 'pirates' crash the holidays
SOURCE	http://www.reuters.com/article/us-datadive-porch-idUSKBN13N28X?sp=5
GIST	The Grinch, apparently, has transformed into the Porch Pirate.

A survey last year by insurancequotes.com [found that 23 million Americans have had packages stolen](#) from their homes before they could open them. Also, the USPS received more than 96,000 complaints about stolen mail last year, according to [Ring](#), a video doorbell company.

The flow of packages to doorsteps this year will be greater than ever - online shoppers [spent \\$5.27 billion on Thanksgiving Day and Black Friday](#), and [sales were forecast at an additional \\$3.3 billion on the following Monday](#), known as Cyber Monday, according to Adobe Digital Insights.

Until drones can deliver packages right into consumer's waiting arms, there have been few technological advances that are solving the problem. The customer's best move is defensive -- two-thirds say they have changed their behavior because of what has become known as "porch piracy".

In a study just released by [Vivint Smart Home](#), which sells home security systems, 49 percent say they have adjusted their schedules to be home for a delivery and 46 percent have changed the way they receive packages.

City-dwelling millennials who live in apartments are the most fearful, and also the most proactive. More than half of the millennials surveyed had sought help from the police about their stolen goods by sharing video evidence, and putting details of the crime on social media. As a result, 36 percent of millennials say they have recovered a stolen package.

HEADLINE	11/28 Suspect Ohio State attack identified
SOURCE	http://www.nbcnews.com/news/us-news/suspect-dead-after-ohio-state-university-car-knife-attack-n689076
GIST	<p>An Ohio State University student plowed a car into a campus crowd, then jumped out and started stabbing people with a butcher knife before being shot dead by police Monday morning, officials said.</p> <p>Ten people were taken to hospitals after the ambush, but none of the injuries were considered life-threatening. The incident was initially reported as an "active shooter" situation, but the suspect did not shoot anyone.</p> <p>A police officer was on the scene within a minute and killed the assailant, likely saving lives, university officials said. "He engaged the suspect and eliminated the threat," OSU Police Chief Craig Stone said.</p> <p>Law enforcement officials told NBC News the suspect's name is Abdul Razaq Ali Artan, an 18-year-old student at the university. He was a Somali refugee who left his homeland with his family in 2007, lived in Pakistan and then came to the United States in 2014 as a legal permanent resident of the United States, officials said.</p>

	<p>The motive was unknown, although law enforcement sources said Artan posted a rant on social media prior to the incident. Officials said the attack was clearly deliberate and may have been planned in advance.</p> <p>"This was done on purpose," Stone said.</p>

HEADLINE	11/28 Man plows crowd w/car; stabs victims
SOURCE	http://www.cnn.com/2016/11/28/us/ohio-state-university-active-shooter/index.html
GIST	<p>Ohio State University officials lauded the efforts of Officer Alan Horujko, 28, in stopping Monday's attacker before he could injure more people.</p> <p>Horujko brought an end to the situation in less than two minutes by fatally shooting the attacker, 18-year-old Ohio State student Abdul Razak Ali Artan, when he failed to comply with orders to put down his weapon.</p> <p>Authorities are still investigating Artan's motive, officials said.</p> <p>The suspect in the Ohio State University attack rammed his car into a group of pedestrians before using a butcher knife to cut several people, university officials said.</p> <p>At least nine people were hospitalized, including one in critical condition. "Victim injuries include stab wounds, injury by motor vehicle and other injuries that are being evaluated," OSU said.</p> <p>The suspect was an 18-year-old of Somali descent who lived in the area, a federal law enforcement official said. Investigators have identified the suspect but have not publicized his name, the official said. The car used in the attack was registered to a family member.</p> <p>A US official said the suspect was a legal permanent resident.</p>

HEADLINE	10/13 Court enjoined SPD disclosing 'secrets'
SOURCE	http://www.jdsupra.com/legalnews/put-your-docs-where-i-can-see-them-83508/
GIST	<p>What happens when trade secret protections collide with laws granting public access to government records? This question took center stage in a recent case involving the Seattle Police Department (“SPD”). A federal district court enjoined the SPD from disclosing a software vendor’s allegedly trade secret information in response to a reporter’s public records act request. Besides serving as a reminder of the precautions that companies should take when disclosing intellectual property to public agencies, the case also raises interesting questions and strategic considerations.</p> <p>Software vendor Versaterm creates information management systems for public agencies. Police departments around the country, including SPD, have licensed software products from Versaterm. SPD’s license agreements generally provide that SPD may not copy or display the user manuals and documentation Versaterm provides with its software products. The parties’ agreements also provide that Versaterm may designate certain of its material as “proprietary information,” and that absent such a designation, Versaterm’s materials may be subject to disclosure under Seattle’s Public Records Act.</p> <p>A reporter in Austin, Texas suspected that something was fishy with crime reporting statistics from police departments using Versaterm’s software. He filed a public records request with SPD seeking “[m]anuals and other training documents relating to [Versaterm’s software] specifically any guides or instructions about how to query and export crime data from the system.” Because Versaterm designated the manuals it provided to SPD as “proprietary information,” SPD notified Versaterm of the request and of SPD’s intent to produce the documents absent a court order.</p> <p>Versaterm promptly sought a temporary restraining order and then a preliminary injunction from the U.S. District Court in Seattle to halt the disclosure. Insisting that “[t]he metaphorical wrecking ball is about to hit the building,” Versaterm argued that its software manuals disclose critical Versaterm trade secrets,</p>

including the functionality and design of Versaterm’s software, instructions on how to use the software, and screen shots of the software.

Several aspects of the court’s order granting Versaterm’s injunction are worth noting.

First, even though the SPD did not contest that Versaterm’s documents contained trade secrets, the SPD argued that it had a broad duty to disclose public records, it had no affirmative duty to invoke a trade secrets exemption to the public records laws on Versaterm’s behalf, and that any such exemption should be construed narrowly. While the court’s order prevents the SPD’s disclosure of the documents (for now), the case highlights the risks involved with providing trade secrets to government agencies. Usual contractual provisions (*e.g.*, non-disclosure agreements) may not be enough to trump laws mandating broad access to public records.

Second, the court declined to rule on Versaterm’s argument that the [recently-enacted federal Defense of Trade Secrets Act](#) qualified as a “statute which exempts or prohibits disclosure of specific information or records” for purposes of Washington’s state public records act. The court did not reach the merits of this argument because it was not properly briefed, leaving open an important question regarding the interplay between state public records laws and the DTSA.

Third, before granting Versaterm a preliminary injunction, the court ordered briefing on whether the reporter was a “necessary party” to the lawsuit under [Federal Rule of Civil Procedure 19](#); the court concluded the reporter was not, reasoning that the reporter’s “interest in disclosure” is adequately represented by SPD. But query whether SPD actually shares *Versaterm’s* interest in *non-disclosure*, because such disclosure could lead to public scrutiny of SPD’s own crime statistics.

Notably, SPD did not directly oppose Versaterm’s motion—it simply filed a “response” asking the Court to determine whether Versaterm’s manuals are exempt from disclosure—nor did it challenge whether the documents actually constituted trade secrets (despite the fact that, prior to the lawsuit, SPD had already [made public](#) at least some portions of Versaterm software manuals).

Now that the Court has granted a preliminary injunction, what is stopping SPD from entering into a settlement agreement and stipulated permanent injunction in order to save costs?

HEADLINE	10/13 Seattle teachers ‘black lives matter’ event
SOURCE	http://www.theroot.com/articles/news/2016/10/seattle-teachers-plan-black-lives-matter-demonstration/
GIST	Teachers in the Seattle Public Schools district have planned a Black Lives Matter event next week to coincide with an effort by the school district to close the gap of opportunity between students of different races.

KIRO 7 reports that about 1,000 teachers have ordered Black Lives Matter T-shirts that will be worn Oct. 19 during an event called Black Lives Matter in the Seattle Public Schools, a move that is endorsed by Seattle Education Association, the labor organization that represents more than 5,500 educators.

Teachers at Seattle's John Muir Elementary School took part in a similar event Sept. 16, wearing Black Lives Matter T-shirts and hosting Black Men Uniting to Change the Narrative, during which black men from the community welcomed kids to school. KIRO 7 reports that the event was almost canceled after the school received threats of violence, but the school staff decided to have the event anyway.

Jesse Hagopian, a teacher at Seattle's Garfield High School, told KIRO 7 that the threat against John Muir was made by a white supremacist and that Seattle teachers responded by taking the event districtwide.

The Seattle Public Schools district respects the teachers' right to express themselves. A district spokesperson told KIRO 7 that the T-shirts are a good visual, and they hope that the message inspires people to do the work of eliminating opportunity gaps, an effort the district itself is focused on. A campaign highlighting the district's efforts is also planned for next week.

In addition to the district, the Seattle Parent Teacher Student Association has come out in support of the educators.

HEADLINE	10/13 Sniper attack on Utah substation
SOURCE	http://www.utilitydive.com/news/sniper-attack-on-utah-substation-highlights-grid-vulnerability/428202/
GIST	<p>Dive Brief:</p> <ul style="list-style-type: none">• Deseret News <u>reported</u> last month that someone with a high-powered rifle fired several shots and successfully disabled a substation owned by Garkane Energy Cooperative, leading to a day-long power outage for about 13,000 Utah residents.• The co-op offered up to \$50,000 for information leading to a reward; the damage will take months to repair and could cost up to \$1 million.• The incident, <u>reminiscent of an attack on a Pacific Gas and Electric substation in 2013</u>, is a reminder that large portions of the United States' grid remain vulnerable to attack, potentially from either cyber intrusions or being physically disabled. <p>Dive Insight:</p> <p>While much of grid security concern is now focused on the potential for a blackout-inducing cyberattack, the events in Utah are a reminder that physical vulnerabilities are prevalent and a larger blackout is still possible.</p> <p>Navigant energy director Brian Harrell <u>spoke with EnergyWire</u> about the attack, saying "electric infrastructure continues to be vulnerable to firearms attack ... we must assume that at some point in the</p>

future a North American utility will suffer from a planned and coordinated attack against electrical infrastructure."

Three years ago, a PG&E was targeted in a sniper attack that disabled 17 transformers. The utility responded with a [\\$100 million security spending plan](#), and federal security protocols have been upgraded. But the span of the grid makes [protecting infrastructure difficult](#).

By contrast, Garkane serves six counties in South-Central Utah and two counties in North-Central Arizona, a largely rural area. The co-op also serves four national parks, and private lands encompass only about 10% of its service territory of 16,000 square miles.

The attack on Garkane succeeded when bullets disabled the transformer's oil-cooled radiator.

Recently, grid security has been focused on cybersecurity. Lloyd's of London last year issued a report finding a widespread attack on the United States grid could lead to a total economic loss ranging from \$243 billion up to \$1 trillion in the most damaging scenarios. A series of cyberattacks in Ukraine [caused widespread blackouts](#), underscoring the worries from utility officials and lawmakers. In some good news, FirstEnergy [successfully fended off hacker intrusions](#) last year.

HEADLINE	10/13 Seattle considers hiring change at SPD?
SOURCE	http://crosscut.com/2016/10/council-considers-unilateral-action-to-diversify-police-force/
GIST	<p>Washington state law mandates that veterans receive extra points on the civil service exam to become fire fighters or police officers. But because the overwhelming majority of veterans are white males, these “preference points” tend to enforce those demographics within fire and police forces, even as departments struggle to be more inclusive and diverse.</p> <p>Now, a movement is growing to expand the preference system, awarding points for other skills — speaking other languages, for example, or experience in community service — that may foster more cultural competency and connection with the community.</p> <p>As the Seattle City Council considers Mayor Ed Murray’s proposed budget, some councilmembers wonder if this change couldn’t be expedited. Although the city recommended this reform last week in a proposed suite of accountability measures, it’s part of the cumbersome and often slow federal consent decree to reform the department. As such, it could be months before that proposal sees the light of day.</p> <p>That’s an issue because Murray wants funding for 72 new police officers by the end of November, well before the accountability legislation will become law. Councilmember Lisa Herbold wants a guarantee for revised preference policies before she signs the check for more officers.</p>

“I think it’s appropriate for the council to signal its intention for the new hires to be hired according to the use of this more expansive preference point policy,” she said over the phone. “There’s some certainty there. We can do that now without having to wait for deliberative omnibus of the accountability bill.”

Last month, Crosscut reported on the enthusiasm gap between the King County Sheriff Department and Seattle Police department toward adopting the proposal. On the one hand, County Sherriff John Urquhart unilaterally changed the rule, implementing expanded preference points less than a year after he took office.

In Seattle, the proposal has stalled out since it was first pitched in late 2013, despite early enthusiasm.

Since Crosscut covered the issue last week, the question of preference points has again been a conversation inside City Hall. Early budget talks have centered around whether it needed to be lumped in with other police reform efforts currently underway, or whether the council or Police Chief Kathleen O’Toole could just make it happen.

“I think the level of officer staffing is important,” Councilmember Debora Juarez told O’Toole in a budget committee meeting last Monday. “But more important is who we hire and how we train them. My main concern is this: Is the department looking at hiring people with other skills and expertise in dealing with residents who are victims or trauma mental health?”

O’Toole defended the department’s recent hiring class, pointing to an 11 percent bump in people of color hired between 2014 to 2016.

That’s great, says Herbold, but it’s not a change to the system like expanding preference points, which she calls “a structural change that hopefully results in a long-living shift in how we do hiring, [rather than] something we’re doing because something’s wrong or we have an administration interested in diversity.”

The rule change could come from the city’s HR department, which tells Crosscut that no decisions have been made yet on the issue. It could also come from the council.

“We have the capability to change hiring standards,” said Councilmember Tim Burgess. “That is clearly the city council’s prerogative.”

HEADLINE	10/13 Mayor reveals new Seattle homeless plans
SOURCE	http://mynorthwest.com/422196/murray-new-seattle-homeless-plans/
GIST	Mayor Ed Murray announced a series of new Seattle homeless initiatives Thursday evening, which includes opening four new city-authorized homeless tent encampments.

Murray is dedicating \$1.2 million for the four new city-authorized encampments. He is also putting \$1 million toward increasing the number of safe alternative locations for people living unsheltered, and storage for their belongings when encampments are cleared. He said that the city is looking into vacant city, county and state lands for the new authorized encampments.

The previous city-authorized encampments were controversial among Seattleites.

“I personally have gone back and forth over the past two years over what the right approach is (to homelessness),” Murray said. “It is one of those areas where I get complimented or bashed.”

“There are areas in this city where it is unacceptable to have people camp,” he said. “We want to find a way to get people places they can camp, but at the same time we can’t have people in our parks or on our sidewalks, or on school property or areas where they are at risk.”

It comes as Council Members Sally Bagshaw and Mike O’Brien each have proposed their own takes on homeless camping legislation the council is currently considering. Each is attempting to define where homeless individuals can camp on public property. The two held discussions with the press Thursday, but that was before Murray made his own announcement.

Murray’s statements Thursday night also touched upon the Seattle homeless camping issue at the core of Bagshaw and O’Brien’s bills. The mayor said that people will be removed from places where they are at risk, or places that interfere with public use. He said the policy will be that people will be allowed to camp in town, unless the city has a better place to move them.

HEADLINE	10/12 Millions N. Carolina chickens die in floods
SOURCE	https://www.yahoo.com/news/millions-north-carolina-chickens-die-hurricane-matthew-floods-203948573--finance.html
GIST	<p>CHICAGO (Reuters) - Flooding from Hurricane Matthew has killed up to 5 million poultry birds in North Carolina, most of them chickens, the state's top environmental official said on Wednesday, hurting a major contributor to its economy.</p>

Donald van der Vaart, secretary of the North Carolina Department of Environmental Quality, also told Reuters that some pits that hold hog waste on farms had been inundated with floodwaters. The waste, mixing with water, may eventually make its way into rivers, streams and the Atlantic Ocean.

Van der Vaart said he did not know how many pits had been inundated but that the environmental damage would be minimal because the hog waste will be "vastly diluted" by floodwaters.

North Carolina officials have been racing to help farmers swamped by Matthew and to assess damages since the storm dumped heavy rains on the state over the weekend. They have wanted to avoid a repeat of Hurricane Floyd, which overwhelmed hog farms and pits in 1999, contaminating waterways with animal carcasses and waste.

Agriculture is the state's top industry, contributing about \$84 billion to the economy, according to the North Carolina Department of Agriculture and Consumer Services.

The department has confirmed 1.8 million poultry have died, mostly chickens, spokesman Brian Long said. The total is expected to increase, he added.

Last year, North Carolina produced about 823 million chickens for meat, according to the U.S. Department of Agriculture.

Sanderson Farms Inc, the third largest U.S. poultry producer, said it lost about 250,000 chickens being raised for meat in the state.

Tyson Foods Inc said its losses were minimal because the company does not have operations raising chickens for meat in flooded areas.

Privately held Perdue Farms said it was still assessing the number of chickens it lost.

HEADLINE	10/14 Investigation into accidental shootings
SOURCE	http://hosted.ap.org/dynamic/stories/U/US_ACCIDENTAL_SHOOTINGS_KEY_FINDINGS?SITE=AP&SECTION=HOME&TEMPLATE=DEFAULT&CTIME=2016-10-14-03-22-56
GIST	<p>The Associated Press and the USA TODAY Network combined forces to investigate accidental shootings involving children, researching more than 1,000 incidents over a 2½-year span. In all, those shootings claimed the lives of more than 320 minors and more than 30 adults.</p> <p>The investigation used information collected by the Gun Violence Archive, a nonpartisan research group, news reports and public sources. It analyzed the circumstances of every death and injury from accidental shootings involving children ages 17 and younger from Jan. 1, 2014, to June 30 of this year - more than 1,000 incidents in all.</p> <p>Among the findings:</p> <ul style="list-style-type: none"> -Fatal accidental shootings occur more often than the federal government tracks. In 2014, the last year for which statistics were available, the U.S. Centers for Disease Control and Prevention counted 74 unintentional firearms deaths of children. The AP and USA Today Network found 113 such deaths the same year, suggesting the federal government missed a third of the cases. -Deaths and injuries spike for children under age 5, with 3-year-olds the most common shooters and victims among young children. Nearly 90 3-year-olds were killed or injured in the shootings, the vast majority of which were self-inflicted. -Accidental shootings spike again at ages 15-17, when victims are most often fatally shot by other children but typically survive self-inflicted gunshots. -The shootings most often happen at the children's homes with handguns legally owned by adults for self-protection; hunting accidents are far less common. -The shootings are more likely to occur on weekends or around holidays such as Christmas. -As a region, the Deep South has rates of accidental shootings involving minors far above the national rate. Louisiana, Tennessee, Alabama, Mississippi and Georgia are among the top 10 states with the highest rates.

HEADLINE	10/14 Latest from National Weather Service
SOURCE	http://weather.seattlepi.com/US/WA/Seattle.html#WND
GIST	<p>Statement as of 4:49 am PDT on October 14, 2016</p> <p>... Wind Advisory in effect until 6 PM PDT this evening... ... High wind watch remains in effect from Saturday afternoon through late Saturday night... ... High Wind Warning has ended...</p> <p>The National Weather Service in Seattle has issued a Wind Advisory... which is in effect until 6 PM PDT this evening. The High Wind Warning has ended.</p> <p>* Timing... southerly winds will rise again midday today and peak this afternoon or early evening... then ease temporarily tonight. A stronger storm will arrive Saturday evening with high winds likely.</p> <p>* Winds... south winds 20 to 30 mph with gusts to 45 mph today... strongest midday through afternoon. South winds 20 to 40 mph with gusts to 65 mph are possible Saturday night.</p> <p>* Impacts... there were scattered power outages overnight... and more are possible with the winds today. Tree damage is typically greater this early in the season... so keep in mind that falling limbs and trees are an occasional cause of injury and fatality during western Washington windstorms.</p> <p>Precautionary/preparedness actions...</p> <p>A Wind Advisory means that winds of 35 mph are expected with gusts as high as 50 mph. Winds this strong can make driving difficult... especially for high profile vehicles. Use extra caution.</p> <p>A high wind watch means there is the potential for a hazardous high wind event. Sustained winds of at least 40 mph... or gusts of 58 mph or stronger may occur. Continue to monitor the latest forecasts.</p>

HEADLINE	10/13 SEA: normal operations despite high winds
SOURCE	http://komonews.com/weather/scotts-weather-blog/sea-tac-airport-expecting-normal-operations-during-dual-wind-storms
GIST	<p>Perhaps the second-most question I've heard about the wind storms aside from "how windy will it be" is, "I hope my flight this weekend will still be able to leave."</p> <p>But rest assured, you don't have to worry this weekend about cots plastered across Sea-Tac Airport as dozens or hundreds of flights in and out of Seattle get canceled. Actually, wind storms are not that big of a deal for airport operations.</p> <p>It all comes down to the direction of the wind, not necessarily the speed, says Sea-Tac spokesperson Brian DeRoy. Planes are accustomed to flying at 500 mph, so what's another 40 mph? And if the wind is coming at the plane, it's actually just adding to the aerodynamics of the fuselage and provides pilots with more available lift. No biggie.</p> <p>In fact, runways are intentionally built in parallel alignment with the traditional wind pattern of the city. Luckily, our winds in Seattle usually come from a generally northerly or southerly direction, thanks to our geographic location between two mountain ranges. Thus, Sea-Tac Airport's runways are oriented north-south.</p> <p>Sea-Tac air traffic controllers then make sure to send the flow of air traffic into the headwind. It's a neat trick around Seattle that you can tell the weather by which way the planes are flying over the city.</p> <p>Generally cloudy, rainy days come with south winds and thus planes land from the north and take off to the south. And on sunny days, it's a north wind and the flow is reversed.</p> <p>"Lucky" for us, these particular wind storms this weekend are keeping with a classic southerly wind direction for Seattle. So they'll just point the planes to land from the south and take off from the north.</p> <p>"We don't anticipate (the storms) being a major problem," DeRoy told me.</p>

HEADLINE	10/13 Bernie Sanders to return to Seattle
SOURCE	http://www.king5.com/news/politics/bernie-sanders-to-return-to-seattle-this-week-for-local-candidate/335763554
GIST	<p>Senator Bernie Sanders will return to Seattle this week to campaign for Pramila Jayapal, who's running for the open 7th district congressional seat long held by retiring Seattle Congressman Jim McDermott.</p> <p>Sanders, who overwhelmingly won Washington's presidential caucuses during primary season, drew crowds of thousands during his three visits to Washington State earlier this year.</p>

	<p>State Senator Jayapal was one of Sanders earliest supporters for president, endorsing him in August of last year. Sanders returned the favor and has since endorsed Jayapal in her congressional race against State Representative Brady Pinero Walkinshaw.</p> <p>The Jayapal campaign says the focus of Saturday’s rally will be to “get out the vote,” around a week ahead of ballots are sent out statewide.</p> <p>WHEN: Saturday, October 15th, Doors open at 4:00</p> <p>WHERE: The Showbox, Downtown Seattle, 1426 1st Ave, Seattle, WA 98101</p>

HEADLINE	10/14 Police: heightened threat of ambush
SOURCE	http://www.foxnews.com/us/2016/10/14/police-see-heightened-threat-ambush-after-year-unrest.html
GIST	<p>Hours after five Dallas police officers were killed by sniper fire during a July protest over police aggression, a call reporting a break-in at an apartment came in to the Valdosta Police Department in Georgia.</p> <p>Officer Randall Hancock, a 10-year veteran, responded to the scene, where an armed man later identified as Stephen Beck was lying in wait. Beck shot Hancock three times, with two bullets catching in his bulletproof vest and a third entered his abdomen. Hancock, who survived, returned fire and severely wounded the suspect.</p> <p>Beck, 22, was suffering from depression and set up the scene in a bid to commit suicide-by-cop.</p> <p>It was just one example in a growing number of police officer ambushes across the country in recent months. On Wednesday night, two Boston police officers were critically injured after responding to a domestic call where they were shot by a man wearing body armor. And on Saturday, two Palm Springs, Calif., police officers were killed by a suspected gang member who lured them to their deaths.</p> <p>Law enforcement experts say an ambush assault consists of four factors: the element of surprise, concealment of the assailant, suddenness of the attack and a lack of provocation. They can be planned or spontaneous.</p> <p>“It can happen anywhere, anytime,” Kevin Hassett, the president of the Retired Police Association of the State of New York, said. “You keep your fingers crossed and hope you go home at night and see your kids.”</p>

Hassett worked for the Port Authority of New York and New Jersey Police Department for 30 years. Although he saw violence and chaos in his time, he believes an anti-cop climate that some say is fueled in part by Black Lives Matter, has made the job even more dangerous.

“Wearing the uniform always came with an inherent risk, even back then,” he said. “I’m just glad I’m not a cop now.”

The past year has taken its toll on many police departments and communities across the country. Racially charged police shootings have driven a wedge between police and the vulnerable communities they protect.

Steven Groeninger, the communications director for the National Law Enforcement Officers Memorial Fund, said there have been 14 deadly ambushes involving police officers compared to 16 all of last year. Since 2000, there have been roughly 200 ambush attacks on police officers each year.

Carla Barrett, an assistant professor at John Jay College of Criminal Justice, did not study recent statistics regarding police ambushes, but spoke to FoxNews.com about the issue of tension in the inner cities.

She interviewed inner-city youth throughout New York while conducting research and found that many have a “profound fear of police.”

“Yet at the same time they do not hate police,” she said. “They just want better police.”

She said she also believes there is a fear in many police officers “especially the good ones” that there is a danger in every encounter.

HEADLINE	10/13 Many Americans without flood insurance
SOURCE	http://www.cbsnews.com/news/as-hurricane-matthews-damage-mounts-many-victims-dont-have-flood-insurance/
GIST	<p>Many Americans don’t have flood insurance, some because they don’t want to pay for it, some because they don’t see the need for it.</p> <p>As of August, only 19 percent of homeowners in Florida had flood insurance, 2 percent in Georgia, 9 percent in South Carolina and 5 percent in North Carolina, according to the Federal Emergency Management Agency. Even in high-risk flood zones, the rate in those states ranged from just 25 percent to 65 percent.</p> <p>Industry officials say it is a troubling situation, especially since the risk of flooding appears to be on the rise.</p>

“We seem to be having more and more flooding events, be it climate change or other things. We’re seeing areas that are experiencing flooding events that may not have experienced them in the past,” said Cynthia DiVincenti, a vice president at Aon National Flood Services.

“Flooding is the most common and costly disaster we see in the United States,” said FEMA spokesman Rafael Lemaitre. Flood claims have averaged more than \$1.9 billion per year since 2006, according to federal officials.

Flood insurance in low- to moderate-risk areas averages \$400 to \$600 a year, according to FEMA. FEMA, through the National Flood Insurance Program, offers flood insurance because it’s generally not profitable for private insurers to sell it.

Matthew sideswiped Florida and Georgia last week before blowing ashore briefly in South Carolina and unloading more than a foot of rain on North Carolina, where it triggered disastrous flooding. The U.S. death toll is well over 30.

North Carolina Gov. Pat McCrory said Thursday the number of power outages was down to about 55,000, form a high of nearly 900,000 when the storm hit last week. Thursday, during a press conference, McCrory said the state’s death toll is at 22.

But McCrory said flooding continues to be a major problem in the eastern part of the state.

“The poorest of the poor are the ones that are being hurt the most by the floods,” the governor said, citing conditions in Lumberton and smaller communities of Pembroke and St. Pauls.

Homeowners without flood insurance may qualify for federal grants for shelter and food, but those are typically small sums and aren’t meant to replace all losses. Homeowners can also apply for low-interest disaster loans, which must be repaid.

HEADLINE	10/13 Colombia extends ceasefire with FARC
SOURCE	http://time.com/4530963/colombia-rebel-ceasefire-extended/?xid=homepage
GIST	<p>BOGOTA, Colombia (AP) — President Juan Manuel Santos announced on Thursday that he is extending a ceasefire with Colombia’s largest rebel movement in a bid to give more time to efforts to save a peace deal rejected by voters.</p> <p>Santos said in a televised address that he was extending by two months the ceasefire with the Revolutionary Armed Forces of Colombia until Dec. 31.</p>

	<p>He made the announcement after meeting with students who have been organizing demonstrations across the country to demand the accord be implemented immediately despite it being rejected in a referendum.</p> <p>“Let it be clear: this isn’t an ultimatum or deadline,” Santos said, adding that he hoped to have an agreement before year’s end. He said the lives of soldiers and guerrillas depended on warfare not resuming. “Time is conspiring against peace and life.”</p>

HEADLINE	10/13 Baltimore police union suggests dept. fixes
SOURCE	http://www.nbcnews.com/news/us-news/baltimore-police-union-suggests-fixes-after-scathing-doj-report-n666086
GIST	<p>BALTIMORE — The Baltimore police union released its own suggested fixes on Thursday after a scathing Department of Justice report found officers have used excessive force, made unwarranted arrests and systematically discriminated against African Americans.</p> <p>The police union's recommendations include overhauling training curriculum, clarifying policies and procedures, and streamlining use of force standards for all units across the department.</p> <p>The union is also asking for more supervisors, and increased training for them prior to rank promotions, and the creation of a new rank between officer and sergeant. Officers also want better technology, and say involuntary overtime work should be eliminated.</p> <p>The DOJ report, issued in August, outlined discriminatory practices by Baltimore Police and mandated sweeping reforms. The Justice Department opened an investigation into the department last May, less than a month after the city's streets exploded in civil unrest, prompted by the death of Freddie Gray, a young black man whose neck was broken in the back of a police wagon.</p> <p>The Justice Department looked at hundreds of thousands of pages of documents, including internal affairs files and data on stops, searches and arrests.</p> <p>It found that one African-American man was stopped 30 times in less than four years, and never charged. Of 410 people stopped at least 10 times from 2010 to 2015, 95 percent were black. During that time, no one of any other race was stopped more than 12 times.</p> <p>With the release of the report, the city agreed to negotiate with the Justice Department a set of police reforms over the next few months to fend off a government lawsuit. The reforms will be enforceable by the courts.</p> <p>The union in its recommendations acknowledged that the discriminatory practices investigators identified were indeed rampant, but blamed them on the police department's emphasis on statistics.</p>

HEADLINE	10/13 Duterte is man with fighting words
SOURCE	http://abcnews.go.com/International/man-fighting-words-rodrigo-duterte/story?id=42723270
GIST	<p>He's compared himself to Hitler. He's vowed to wage a war on drugs via execution. He's threatened to cut all ties with the U.S. He swears like a sailor and has been nicknamed "The Punisher."</p> <p>But he also created one of the safest cities in the Philippines when he was mayor, and he enacted some of the country's first pro-LGBT legislation, anti-rape legislation, and anti-religious discrimination legislation. He has a Sunday talk show that people watch more than the news.</p> <p>He's the ever-enigmatic Philippine President Rodrigo Duterte, and he's causing quite the stir around the world lately.</p> <p>The chief prosecutor of the International Criminal Court in the Hague, Fatou Bensouda, expressed concern today about the thousands of extrajudicial killings in the first few months of Duterte's term and sent a harsh warning to those involved.</p> <p>"Let me be clear," she said in a statement. "Any person in the Philippines who incites or engages in acts of mass violence ... is potentially liable to prosecution before the Court."</p> <p>She said her office will be closely monitoring activity in the coming weeks to see if an examination is necessary.</p> <p>When he called President Obama "son of a b----" and told him to "go to hell," threatening to cut off ties with the U.S., Duterte propelled himself into the international spotlight and painted a controversial picture of his leadership style to the rest of the world.</p> <p>The truth, however, is more complex than his comments might suggest.</p> <p>Many Filipinos, like Patricio Abinales, a professor at the University of Hawaii and former Woodrow Wilson Center scholar who grew up on Duterte's home island of Mindanao, attribute Duterte's anger to a somewhat-forgotten bombing in 2002. "People say he's never forgotten it," Abinales said.</p> <p>American Michael Meiring brought a homemade bomb into a hotel in Davao and accidentally blew it up ahead of time, injuring himself and ending up in a hospital, according to authorities. Then-Mayor Duterte, along with the police waiting to question Meiring, were shocked when U.S. FBI operatives took him out of the hospital and flew him out of the city without telling local officials, reportedly promising immigration documentation to hospital administrators for the favor.</p>

According to a report in NPR's Morning Edition, Duterte was furious and has held a grudge ever since.

"He's famous for holding grudges," Abinales said. Mindanaoans suspected that Meiring was an undercover CIA operative working to destabilize Mindanao, and a former army intelligence officer responded, "I cannot say that's right, but I cannot say that it's wrong," according to the same NPR report.

Duterte in 2013 denied the U.S. permission to use Davao as a base for drone operations, citing the 2002 incident in his reasoning.

But his anger's roots may live deeper than 2002.

The U.S. colonial rule of the Philippines from 1898 to 1946, for starters. More than that, Duterte was in college in the 1960s, when the U.S. was in the midst of the Vietnam War and was using several bases in the Philippines for their proximity to the country. President Lyndon B. Johnson also called for Philippine troops for the effort. This caused a stir among Filipinos, who were mostly against that war.

One of the people who may have influenced Duterte is Jose Maria Sison, the former head of the communist party who was exiled from the Philippines and is one of Duterte's mentors and friends. Sison was one of his professors during this time, and organized youth protesters against the Vietnam War.

Duterte was a member of that protest movement formed by Sison, called "Kabataang Makabayan," according to ASEAN Today, which noted that the movement was "known for its anti-American imperialism stance."

Eighty-three percent of Filipinos have "much trust" in him, according to the first polls conducted about his presidency by Philippines-based research nonprofit Social Weather Stations.

The highest approval ratings, at 88 percent feeling "satisfied," come from his home island of Mindanao, while other regions like the Visayas are at 75 percent and Metro Manila are at 74 percent.

HEADLINE	10/14 Report: rockets fired near Turkish resort
SOURCE	http://abcnews.go.com/International/wireStory/reports-rockets-fire-turkish-resort-hurt-42799544
GIST	<p>Turkish news reports say assailants have fired three rockets near a Mediterranean resort town, striking a shelter used by fishermen. No one was hurt in the attack.</p> <p>Hurriyet newspaper said the target of the attack on Friday may have been a tanker moored at sea, not far from the shelter. It said the rockets were fired from a mountainous area near a highway linking the resort of Kemer to the city of Antalya.</p>

	The motive of the attack was not known.
	Turkey has been rocked by a spate of deadly attacks by Islamic State group militants or Kurdish rebels.

HEADLINE	10/14 Japan 'protests' UN cultural agency
SOURCE	http://abcnews.go.com/International/wireStory/japan-withholds-annual-dues-unesco-42796960
GIST	<p>Japan has withheld dues for the U.N. cultural agency, saying it wants to make sure the organization functions properly, a gesture seen by local media as a protest against the registration for world heritage status of China's documents relating to the Nanking massacre.</p> <p>Japan disputes China's historical views on the 1937 massacre of Chinese citizens by the Japanese military. China says up to 300,000 people were killed, while Japanese nationalists have largely played down or denied the incident. Japan also has criticized UNESCO's listing last year of Chinese Nanking documents as a memory of the world.</p> <p>On Friday, Foreign Minister Fumio Kishida, when asked by a reporter, confirmed that Japan withheld UNESCO dues of nearly 4 billion yen (\$40 million) for this year. He refused to say whether it was to protest the agency's move to list the Chinese documents.</p> <p>A Foreign Ministry official later said that Japan is watching to see if UNESCO is living up to its founding purpose of promoting peace among member nations through education, and will consider the timing of its payment while examining whether the U.N. body is operating appropriately.</p>

HEADLINE	10/14 Limits on gun research hamper efforts
SOURCE	http://abcnews.go.com/US/wireStory/limits-gun-research-hamper-efforts-combat-gun-deaths-42797907
GIST	<p>It's the kind of information you might expect from long-range government research: On average, one American child or teenager is killed or injured every day in an accidental shooting. The most common victims are ages 3 or 16. And the shootings happen most frequently in their own homes.</p> <p>Yet for the most part, such government research doesn't exist.</p> <p>Instead, those details were amassed by a team of reporters from The Associated Press and the USA TODAY Network. The news organizations teamed up to analyze information gathered over the past 27 years by the Gun Violence Archive, a nonprofit that is trying to capture details about every shooting in America.</p> <p>"There's still a lot that we don't know," said Daniel Webster, the director of the Johns Hopkins Center for Gun Policy and Research.</p> <p>Among the questions he and others said could be addressed through government research: Can handguns be made safer or even made child-proof? What are the most effective ways to keep guns out of their hands? What are the most reliable ways to safely store firearms?</p> <p>While unintentional shootings account for only a fraction of firearms deaths in the U.S., gun safety advocates have long argued that they are largely preventable and call out for the kind of public health intervention the government provides for other consumer products.</p> <p>In 1993, a study by the U.S. Centers for Disease Control and Prevention set off a firestorm. Critics called it a study based on flawed data that was more advocacy than science. Its underlying conclusion: Having a gun in the household made someone more likely to be a victim of homicide or suicide.</p> <p>It wasn't long before Congress, swayed by lobbying by the National Rifle Association, enacted the so-called Dickey Amendment, named after former Congressman Jay Dickey of Arkansas. The law eliminated \$2.6 million from the CDC's budget, the same amount the agency had used for firearms research. It also prohibited the CDC from engaging in advocacy on issues related to guns.</p>

The NRA maintains that it doesn't oppose gun research but that its opposition is directed more at research that is biased, flimsy or aimed at advocacy.

"The National Rifle Association is not opposed to research that would encourage the safe and responsible use of firearms and reduce the number of firearm-related deaths. Safety has been at the core of the NRA mission since its inception," NRA spokeswoman Catherine Mortensen said. "However, firearm safety is not the goal of the advocates seeking CDC funding — gun control is."

Still, the Dickey amendment and the ensuing politics around it have led to a relative lack of comprehensive, national-level research on gun issues in the ensuing two decades.

Instead, most studies have been confined to using data collected at the state or local level, funded by private foundations or state governments but very little that is funded by the federal government. The data itself is limited — and thus its conclusions are limited.

California has funded a number of studies aimed at assessing the impact of several factors on gun violence. Those include whether a history of multiple drunken driving convictions is a predictor of violence among people who purchase firearms legally and whether comprehensive background checks are effective. Some cities, including Seattle, have provided money for limited research into gun-related violence.

One privately funded study examines the underground gun market in Chicago, and similar studies are underway in Boston, Baltimore, Los Angeles and New York. The only federal research into that issue is a study funded by the federal National Institute for Justice that focuses solely on New Orleans.

Researchers lament the limited data available and believe it has made it next-to-impossible for policymakers to craft legislation based on fact or with much certainty as to whether it will have the intended impact. They cannot predict the effect of a ban on AR-style firearms, or restrictions on ammunition, or the effectiveness of biometric "locks" on firearms.

Mark Rosenberg, who led the CDC's gun violence research as director of its National Center for Injury Prevention and Control, said several fundamental questions would benefit from in-depth federal research: What leads to gun violence? What are the most effective ways to reduce it? What is the best way to craft legislation to make it happen? And perhaps most importantly, how might this work without infringing on Americans' Second Amendment rights?

HEADLINE | **10/13 Conductor: transit train overcrowded**

SOURCE	http://abcnews.go.com/US/conductor-ntsb-hoboken-train-crowded-usual/story?id=42775109&cid=clicksource_4380645_1_hero_headlines_headlines_hed
GIST	<p>The NJ Transit train that crashed into Hoboken Terminal on Sept. 29 was "very" crowded, the conductor told the National Transportation Safety Board, according to a preliminary report released today.</p> <p>The conductor said fares could not be collected because of the overcrowding, with passengers standing in the train's vestibules. The train was also traveling with four cars, when it usually has five, according to the conductor.</p> <p>A bystander on the platform was killed and 110 were injured.</p> <p>The rest of the report reiterated details already announced by federal investigators.</p> <p>The event recorder from the controlling cab car indicated that the throttle was moved from the idle position to the No. 4 position about 38 seconds before the crash. The NTSB says the train increased from 8 mph to about 21 mph.</p> <p>Just prior to the collision, the throttle moved back to the idle position and the emergency brake was applied less than one second before impact, when the train was still moving 21 mph.</p> <p>Investigators have collected blood and urine samples from all crew members for toxicology examinations. The results have not yet been released.</p> <p>The engineer of the train told investigators he does not remember anything after checking his speedometer upon entering the terminal, which he says read 10 mph, according to the report. His next memory is waking up on the floor of the cab after the accident.</p>

HEADLINE	10/13 Feds to collect police shooting data
SOURCE	http://www.msn.com/en-us/news/us/feds-to-begin-police-shooting-data-collection-by-2017/ar-AAiUK0j?li=BBnbcA1
GIST	<p>WASHINGTON — The FBI is expected to launch the federal government's pilot program to collect data on police-involved shootings and other incidents of lethal and non-lethal force by early next year, the Justice Department announced Thursday.</p> <p>The collection effort, proposed in the aftermath of persistent, racially charged police encounters that have thrust the issue into the national spotlight in the past two years, will start with an analysis of incidents drawn from the FBI, Bureau of Alcohol Tobacco Firearms and Explosives, Drug Enforcement Administration and the U.S. Marshals Service, before it is rolled out to state and local agencies across the country.</p>

	<p>"Accurate and comprehensive data on the use of force by law enforcement is essential to an informed and productive discussion about community-police relations," Attorney General Loretta Lynch said in a written statement, outlining an updated timetable for the project. "In the days ahead, the Department of Justice will continue to work alongside our local, state, tribal and federal partners to ensure that we put in place a system to collect data that is comprehensive, useful and responsive to the needs of the communities we serve."</p> <p>The FBI project, Justice officials said Thursday, goes beyond provisions set out in the Death in Custody Reporting Act, passed by Congress in 2014. That law requires states and federal law enforcement agencies to submit information about the deaths of civilians during encounters with police or while in law enforcement custody. The FBI's new repository also will include forcible actions by police that result in serious bodily injury and the discharge of firearms.</p>

HEADLINE	10/13 NWS: Saturday storm is 'worst-case'
SOURCE	http://q13fox.com/2016/10/13/nws-leading-toward-worst-case-scenario-for-saturday/
GIST	<p>SEATTLE — The National Weather Service in Seattle now has a higher confidence that Saturday's storm will be the "worst-case scenario."</p>

	<p>On Wednesday, the agency gave a 1 in 3 chance for a historic storm in Western Washington as the remnants of Typhoon Songda is expected to hit the state. On Thursday, the NWS increased that chance to 50/50.</p> <p>The NWS said the exact track of the low will make a huge difference in how badly the storm will impact the region.</p> <p>If the low directly crosses some part of the coast, the agency warns that it could lead to a historical windstorm for nearly all of Western Washington. If the low passed further offshore, most of the damaging winds would be north of Everett.</p>

HEADLINE	10/13 Healthcare insurance signup slowdown
SOURCE	http://www.newsmax.com/Newsfront/obamacare-enrollment-slowdown/2016/10/13/id/753276/
GIST	<p>Enrollment in the Obamacare insurance marketplace is likely to stall or even decline for 2017 as higher premiums drive away people who aren't eligible for government subsidies, according to S&P Global Ratings forecasts.</p> <p>“Our forecasted modest-to-negative growth is clearly a bump in the road, but doesn't signal ‘game-over’ for the marketplace,” S&P analyst Deep Banerjee wrote in a report released Thursday.</p> <p>This November will be the fourth open enrollment period for individuals to choose insurance plans under the Affordable Care Act, President Barack Obama's signature health-care law. The “significant slowdown” predicted by S&P would be another setback for ACA's government-run insurance markets, after big insurers pulled out of many states because of mounting losses.</p> <p>ACA enrollment will range from 10.2 million to 11.6 million people after 2017's enrollment season, which starts Nov. 1, S&P said. The lower end of the forecast range implies a decline of 8 percent compared with 2016 and the higher end a 4 percent gain.</p> <p>With premiums set to rise an average of 25 percent across the marketplace, according to data from ACASignups.net, some current enrollees who aren't eligible for tax credits may not re-enroll in 2017. Still, a moderation in premium increases beyond 2017 will likely bring growth back to the marketplace, according to the S&P analysis.</p>

HEADLINE	10/13 NTSB: brakes on crashed train worked
SOURCE	http://www.nbcnews.com/news/us-news/brakes-train-deadly-hoboken-crash-were-working-ntsb-report-n665781

<p>GIST</p>	<p>The brakes of the commuter train that barreled into a New Jersey station last month were working properly, according to a federal report released Thursday.</p> <p>While some of the equipment on the NJ Transit train was damaged in the incident at the Hoboken Terminal, investigators were able to repair and test an air brake system in the front cab car, where the train operator was stationed, as well as the rear locomotive brakes.</p> <p>"The brakes function as designed," the National Transportation Safety Board said in its preliminary findings, which come two weeks after the Sept. 29 wreck that killed a bystander on a station platform and injured more than 100 others, mostly inside the train.</p> <p>The NTSB did not give a reason for the cause of the crash. It said that the train operator did not remember what happened right before the accident, which had been previously reported. The operator, Thomas Gallagher, 48, also said he was fully rested before his shift.</p> <p>"He stated that when he checked the speedometer, he was operating at 10 mph upon entering the terminal track," the report said. "He said he remembers waking up in the cab laying on the floor after the accident, but has no memory of the accident."</p> <p>Emergency brakes were initiated just one second before the crash, the report found.</p>

<p>HEADLINE</p>	<p>10/13 New phase of hurricane relief in Haiti</p>
<p>SOURCE</p>	<p>http://abcnews.go.com/International/wireStory/hurricane-matthew-relief-effort-haiti-enters-phase-42779239</p>
<p>GIST</p>	<p>An international relief effort for victims of Hurricane Matthew entered a more advanced stage Thursday as a second U.S. military ship arrived off Haiti's coast and U.N. convoys and non-government organizations began reaching more isolated communities.</p> <p>Food, clean water and construction materials have begun pouring into the southwestern peninsula, though many people there still say they've seen little or no aid.</p> <p>Those working to send everything from water purification systems to building materials say the scope of the damage from Matthew and the difficulty reaching people create logistical challenges similar to those faced after the devastating earthquake that struck the crowded capital and surrounding areas in January 2010. But while the death toll from last week's storm is in the hundreds, the Haitian government has said the earthquake killed more than 300,000.</p> <p>"There's just so much to do, not to make it more than the earthquake, but it's so widespread, it's everything across the board," said Chris Bessey, the country representative for Catholic Relief Services.</p>

But amid the challenges, the relief effort has risen visibly in recent days. Teams from the Haitian Red Cross and Civil Protection agency have fanned out across the peninsula and large convoys from the U.N. and the migration agency are seen more throughout the disaster zone. On Wednesday, the U.S. military made 13 helicopter flights to hard-to-reach areas with 159 metric tons of food supplies, the U.S. Agency for International Development said.

On Thursday, USAID announced more than \$12 million in additional humanitarian assistance to aid hurricane-stricken communities. David Harden, head of humanitarian assistance for the U.S. agency, said the package of short-term relief for Haiti includes \$7 million for food and \$3 million for emergency relief supplies. USAID will also ship in 38 metric tons of chlorine to help provide clean water, a critical issue to fight a spike of cholera.

Harden said the U.S. is also looking into long-term assistance in coordination with the Haitian government and other partners but the details have yet to be determined.

HEADLINE	10/13 NJ Transit tops list for accidents, fines
SOURCE	http://abcnews.go.com/US/wireStory/apnewsbreak-fines-accidents-mar-nj-transits-safety-record-42778237
GIST	<p>The railroad whose rush-hour train slammed into a New Jersey station last month, killing a woman and injuring more than 100 people, has had more accidents and paid more in fines for safety violations than any other commuter railroad in the country over the past five years, federal safety data show.</p> <p>Trains run by New Jersey Transit, which operates the nation's second-largest commuter railroad, have been involved in 157 accidents since the start of 2011, three times as many as the largest, the Long Island Rail Road, according to an Associated Press analysis of data from January 2011 through July 2016.</p> <p>NJ Transit had a significantly higher accident rate during that span than the rest of the nation's 10 largest commuter railroads, ranked by weekday ridership, and had the highest rate of accidents attributed to human factors, such as speeding and drug impairment. In all, the accidents have caused more than \$6 million in damage and injuries to 13 passengers.</p> <p>At the same time, the state-run railroad has paid \$519,280 in fines to settle 183 federal safety violations — nearly \$160,000 more than the amount paid by Metro-North, the suburban New York railroad that carries slightly fewer weekday riders. They included 33 violations for drug or alcohol use and 33 violations of operating procedures, both more than any other commuter railroad.</p> <p>"It speaks to a culture of not caring, of indifference to the safety of commuters, and paying fines without worrying about the effect of their infringements," said Michael Lamonsoff, a lawyer whose clients include a Hoboken victim. "This accident is testament to the fact they really don't care about their commuters."</p>

HEADLINE	10/13 New UN secretary-general elected
SOURCE	http://abcnews.go.com/US/wireStory/expected-approve-guterres-secretary-general-42767306
GIST	<p>The U.N. General Assembly elected Antonio Guterres on Thursday as the next secretary-general of the United Nations, a post he pledged to use to be "a bridge-builder" and to promote a new "diplomacy for peace."</p> <p>The 193 U.N. member states elected Guterres by acclamation, following the Security Council's nomination of the 67-year-old former Portuguese prime minister and U.N. refugee chief by acclamation last week.</p> <p>Guterres will take over as U.N. chief on Jan. 1 when Secretary-General Ban Ki-moon's second five-year term ends. He will be the ninth secretary-general in the organization's 71-year history.</p> <p>Assembly President Peter Thompson introduced the resolution to elect Guterres, said members wanted it adopted by acclamation, and banged his gavel in approval as diplomats broke into applause.</p>

HEADLINE	10/13 Safety concern NM nuclear dump site
SOURCE	http://abcnews.go.com/US/wireStory/watchdogs-concerned-readiness-mexico-nuke-dump-42784637
GIST	<p>A series of recent ceiling collapses at the federal government's only underground nuclear waste repository has watchdogs calling on officials to ensure safety before moving ahead with a planned reopening later this year.</p> <p>U.S. Energy Department officials and the contractor that manages the Waste Isolation Pilot Plant in southern New Mexico will update the public on the collapses during a meeting Thursday evening.</p> <p>A radiation release forced the closure of the repository in February 2014. Since then, thousands of tons of waste left over from decades of nuclear weapon research and development have been stacking up at sites around the country, hampering the government's multibillion-dollar cleanup program.</p> <p>The waste is meant to be entombed in storage rooms carved out of a salt formation deep underground. Contamination and limited ventilation has made maintenance of the salt rock walls and ceilings difficult, but officials have said the recent collapses happened in areas that are restricted and will not affect plans for resuming some operations before the end of the year.</p>

HEADLINE	10/13 FTC: tech support pop up ads phony
SOURCE	https://www.consumeraffairs.com/news/feds-charge-tech-support-pop-up-ads-were-phony-101316.html
GIST	<p>Tech support scams keep popping up, just like the pop-up ads that are often used to rope in unsuspecting victims. In the latest case, the Federal Trade Commission (FTC) has charged a group calling itself Global Access Technical Support with deceiving consumers.</p> <p>The defendants allegedly used deceptive pop-up ads to scare thousands of consumers into paying hundreds of dollars each for unnecessary technical support services.</p> <p>The ads led consumers to think there was something wrong with their computer and, secondly, that the pop-ups originated from Microsoft, Apple, or other reputable technology companies.</p> <p>The ads often included loud alarms or recorded messages warning of the apparent dire threat to consumers' computers and "hijacked" consumers' browsers, leaving consumers unable to navigate around the ads or close them. The ads prompted consumers to contact a toll-free number.</p>

HEADLINE	10/13 New boss, new structure for US CERT
SOURCE	http://fedscoop.com/new-boss-structure-for-u-s-cert
GIST	Cyber first responders at the Department of Homeland Security have a new chief.

The U.S. Computer Emergency Response Team, US-CERT, and the Industrial Control Systems, or ICS-CERT, have a new manager as a result of a reorganization at DHS' National Cybersecurity and Communications Integration Center, said NCCIC Director John Felker Thursday.

“We have restructured and added another deputy director,” Felker told CyberScoop. The existing Deputy Director, Rick Driggers, will be the deputy for operations, while Randi Greenberg Kieffer takes up the newly created post of deputy director for threat detection and analysis. Felker will oversee both the US- and ICS-CERTs.

“We are dividing it up functionally,” Felker said. The operations side of the house will concentrate on events and response, housing, among other elements, the hunt and incident response teams, the National Cybersecurity Assessment and Technical Services team and the exercise team — which helps plan cyber drills across the government.”

“Threat detection and analysis will have both the CERTs and that’s it,” said Felker. CERTs are the teams that assess and catalogue new vulnerabilities — and send out realtime alerts about them.

A third NCCIC element, Cyber Force Management, will handle human resources and other support functions.

Kieffer started last month, according to her LinkedIn profile. She was previously chief information security officer for the Transportation Security Administration, and before that served at Immigration and Customs Enforcement.

HEADLINE	10/13 Cybercrime 2016: new frontier
SOURCE	http://www.thinkadvisor.com/2016/10/13/cybercrime-2016-the-new-frontier
GIST	<p>New technology and digital advances enable firms to grow their businesses faster than ever. Cybercrime is also evolving and growing at a similar pace and continues to threaten and limit this potential.</p> <p>Recently the U.S. Director of National Intelligence ranked cybercrime as the top national security threat — higher than that of terrorism, espionage and weapons of mass destruction. In 2015 alone, Symantec discovered more than 430 million new unique pieces of malware, up 36% from the previous year. Cyberattacks are no longer a question of <i>if</i> — they are simply a question of <i>when</i>.</p> <p>Losses from cyberattacks can be significant. Financial costs alone can be in the millions. Some larger firms have reported losses associated with a cyberattack in excess of \$100 million. But cyberattacks don't just affect the bottom line. They can also seriously damage a firm's reputation and business continuity efforts. According to one 2015 survey, only 36% of companies that experienced a cyberattack chose to</p>

report it to authorities. For cybercrimes involving extortion, many companies chose to pay the attackers in bitcoin to avoid publicity and potential reputation damage.

Today's cybercriminals are proving adept at creating new ways of committing classic crimes. One of the newer malware threats affecting businesses and individuals alike is ransomware.

In 2015 alone, reported incidents of "crypto-style" ransomware grew by 35%, according to Symantec. This variant of ransomware is a family of malware that takes files on a PC or network storage, encrypts them and then extorts money to unlock the files. This can often be sums in the five-figures for business entities. Furthermore, when ransomware is present, the targeted computer will not only encrypt local files, but often attempt to encrypt files on other network-connected devices and locations as well.

Ransomware has also evolved in recent years and moved beyond the PC to Macs, smartphones and Linux systems. Experts predict that smartwatches and televisions will also be susceptible to ransomware attacks by year-end.

Peeling the Onion

Onion-layered incidents have also emerged in the last year as a top cyberthreat for businesses. While teams address a primary cyberattack, such as a distributed denial of services (DDoS), a secondary attack — often far more damaging — is uncovered. This type of multi-layered attack can require a large amount of resources and time to investigate and resolve, as the security team must peel back layers of information (the "onion") to establish the root of the problem.

Use of TOR (the onion router) makes things even more difficult for security teams because of the anonymity it provides by encrypting and randomly forwarding traffic through a multi-layered network of relays.

The Insider Threat

Technology is not the only threat in the world of cybercrime; often those who use it can pose a significant threat as well. According to a recent IBM report 2015, 60% of all cyberattacks were carried out by insiders, either ones with malicious intent (44.5%) or those who served as inadvertent actors (15.5%).

These inadvertent actors can set off massive security breaches simply by clicking a malicious link, answering a phishing phone call or plugging in a thumb drive that hasn't gone through proper security screening.

HEADLINE	10/13 Air Force hardens 'flying network'
SOURCE	http://www.stripes.com/news/air-force/air-force-hardens-its-flying-networks-against-cyber-threats-1.433977

GIST	<p>As the U.S. Air Force deploys pilots for combat, including the campaign targeting Islamic State, it's accelerating efforts to harden the computer networks that control everything from warplanes' navigation to weapons systems from cyber threats.</p> <p>A plane is a "flying network" with multiple systems that could be targeted by hackers, according to Todd Probert, vice president of mission support and modernization at Raytheon, whose Air Force contracts include helping beef up cyber defenses on F-16 warplanes and Global Hawk surveillance aircraft.</p> <p>"If some piece of cyber malware gets in there, it can take that plane out for the duration," Probert said in a phone interview. "The threat is changing literally daily. The best you can do is make something harder or more resilient."</p> <p>Boosting cyber defenses, which have to adjust to changing tools employed by adversaries, is a process unfolding across the service's weapons and systems, Peter Kim, the Air Force's senior information security officer, said in an interview Tuesday in Washington.</p> <p>"That's going to take a long time to get to, but we've started that journey and it's going to get there" in the next few years, Kim, 49, said. "They need to be secured and defended in the same manner, if not more than, like we do our core network."</p> <p>Beyond nation-states and criminals, the top cyber threat to the Air Force now is "people who don't know that there's a threat out there," Kim said. "The thing that keeps me up at night is the people part of it," he said.</p> <p>The "biggest vulnerability" is not sharing enough about the scope and what's at stake, he said. That means expanding airmen's understanding of cybersecurity from merely running antivirus software on computers to how breaches occur.</p> <p>"We still have people plugging iPhones into computers; we still have people using thumb drives, hard drives; downloading things they shouldn't be downloading onto their laptops; and plugging things into things they shouldn't be plugging into. We have people going to websites they're not supposed to go to," Kim said. "So I need to reach those people and say, 'it's a different world now.'"</p>

HEADLINE	10/14 Russia: arrests in largest hacking group
SOURCE	http://www.scmagazineuk.com/50-arrests-for-russias-largest-hacker-group/article/548158/
GIST	Earlier this month the Russian Federal Security Service (FSB in Russian), together with the Interior Ministry, conducted a mass arrest of hackers across the country, jointly suspected of using malicious computer programs to steal RUB 3 billion (£57 million) from several Russian banks.

	<p>The arrests took place in 15 of the country's regions, with a total of 50 suspects detained.</p> <p>Alexander Zdanov, an official spokesman of the FSB, toldSCMagazineUK.com that those arrested are suspected of creating of a botnet of infected computers used to carry out targeted attacks on the infrastructure of Russian banks to steal cash.</p> <p>Vladimir Kropotov, head of the Department of Cyber-attacks at 'Monitoring of Positive Technologies', a leading Russian IT company, told SC that Russian law enforcement agencies managed to detect and then arrest members of one of Russia's largest and most dangerous hacker groups, which specialised in stealing money from Russian bank accounts.</p> <p>According to the FSB, the group has been operating since 2011, and has been very cautious, using some very interesting approaches, one of which is the so-called 'disembodied Trojan', a malicious computer program which reportedly does not leave any traces after it has broken into a computer.</p>

HEADLINE	10/14 British banks keep hacks under wrap
SOURCE	http://www.reuters.com/article/us-britain-banks-cyber-idUSKBN12E0NQ
GIST	<p>Britain's banks are not reporting the full extent of cyber attacks to regulators for fear of punishment or bad publicity, bank executives and providers of security systems say.</p> <p>Reported attacks on financial institutions in Britain have risen from just 5 in 2014 to 75 so far this year, data from Britain's Financial Conduct Authority (FCA) show.</p> <p>However, bankers and experts in cyber-security say many more attacks are taking place. In fact, banks are under almost constant attack, Shlomo Touboul, Chief Executive of Israeli-based cyber security firm Illusive Networks said.</p> <p>Touboul cites the example of one large global financial institution he works with which experiences more than two billion such "events" a month, ranging from an employee receiving a malicious email to user or system-generated alerts of attacks or glitches.</p> <p>Banks are not obliged to reveal every such instance as cyber attacks fall under the FCA's provision for companies to report any event that could have a material impact, unlike in the U.S. where forced disclosure makes reporting more consistent.</p> <p>Banks are not alone in their reluctance to disclose every cyber attack. Of the five million fraud and 2.5 million cyber-related crimes occurring annually in the UK, only 250,000 are being reported, government data show.</p>

	But while saving them from bad publicity or worried customers, failure to report more serious incidents, even when they are unsuccessful, deprives regulators of information that could help prevent further attacks, the sources said.

HEADLINE	10/14 Evony gaming website hacked
SOURCE	https://www.hackread.com/evony-gaming-company-website-hacked/
GIST	<p>In June 2016, the official website of Evony gaming company suffered a massive data breach in which 33,407,472 of its registered user accounts were stolen. Things couldn't go worse when in August 2016, the gaming site suffered another data breach on its forum in which 938,000 of its registered accounts were stolen.</p> <p>Now, the data breach notification website LeakedSource has discovered the stolen Evony data that includes usernames, email addresses, unsalted MD5 and SHA-1 (Secure Hash Algorithm 1) passwords and IP addresses of 33 million gamers.</p> <p>Evony also lets users sign in with Facebook Connect, a single sign-on application which allows users to interact with other websites through their Facebook account. This means the stolen account may also include if not millions then at least thousands of Facebook login credentials.</p> <p>Evony is known for its Evony: Age II game which, according to developer's site is played by 18 Million Players in over 167 countries, however, it is still unclear if the company had ever issued any security notice to its registered users about the breach.</p>

HEADLINE	10/14 Researchers: online skimming jumps 69%
SOURCE	http://www.infosecurity-magazine.com/news/cards-at-risk-as-online-skimming/
GIST	<p>Security researchers are warning that the number of e-commerce stores infected with credit card stealing malware has risen 69% over the past year, with many site owners failing to take action.</p> <p>Dutch researcher Willem de Groot found 3501 online retail sites last year were infected with malicious JavaScript, allowing cybercriminals to siphon off card details to sell on the dark web.</p> <p>However, the figure has now jumped to 5929, with hundreds of the stores having failed to spot or take action since November 2015.</p> <p>Victim organizations vary from car makers (Audi ZA) to government (NRSC, Malaysia) to fashion (Converse) and even NGOs (Science Museum).</p>

	<p>The malware in question apparently uses multi-layer obfuscation to stay hidden, and scans for popular payment plugins like PayPal and URLs featuring the word “checkout.”</p> <p>De Groot has actually found three distinct malware families and nine separate variants, indicating that multiple groups are involved. He traced some of the campaigns back to Russia.</p> <p>The black hats are taking advantage of the fact many e-commerce site owners fail to keep software up-to-date, leaving vulnerabilities that hackers are only too ready to exploit.</p> <p>The researcher has submitted his findings to Google’s Safe Browsing team but thus far only a small percentage of the detected malware is being blocked.</p>

HEADLINE	10/13 Whisper adds self-destructing messages
SOURCE	http://www.infosecurity-magazine.com/news/whisper-adds-selfdestructing/
GIST	<p>It’s the stuff of spy novels: What if you could send sensitive information in a message and have it automatically self-destruct after its intended recipient read it?</p> <p>Whisper Systems’ latest release of the end-to-end encrypted Signal email service is making that happen in the digital realm, by including support for disappearing messages.</p> <p>With the update (for iPhone, Android and desktop), any conversation can be configured to delete sent and received messages after a specified interval. The configuration applies to all parties of a conversation, and the clock starts ticking for each recipient once they’ve read their copy of the message.</p> <p>“Disappearing messages are a way for you and your friends to keep your message history tidy,” the company explained, in a blog. “They are a collaborative feature for conversations where all participants want to automate minimalist data hygiene.”</p> <p>Of course, cameras have always been the bane of auto-destruct messages—at least, according to Get Smart, et al, and Whisper cautions users to keep this in mind.</p> <p>“[This is] not for situations where your contact is your adversary — after all, if someone who receives a disappearing message really wants a record of it, they can always use another camera to take a photo of the screen before the message disappears,” the company said.</p> <p>The disappearing timer values range from five seconds to one week, giving users a range of options for ephemeral message history.</p>

HEADLINE	10/13 Report: Brazil hotbed of financial e-fraud
SOURCE	http://www.scmagazine.com/brazil-hotbed-of-financial-fraud-report/article/548337/
GIST	<p>Brazil has emerged as a primary center of financially motivated e-crime threat activity, according to a just released report from FireEye.</p> <p>Threat actors in the South American country are going after targets both within and outside the country, with much of their focus on U.S. businesses.</p> <p>For instance, FireEye examined one Brazilian cybercrime group that specializes in payment card fraud operations which puts to use a number of strategies to take advantage of already compromised payment card credentials. These actors share or purchase data dumps online, hack merchant websites and compromise payment card processing devices. They then use this material to generate further card information and launder and monetize their illicit gains with online purchases of goods and services, as well as ATM withdrawals.</p>

	<p>FireEye detected the group's actions, including several steps to disguise their activity.</p> <p>On a daily basis, members use a number of tools, including CCleaner, to delete any trace of their process. They wipe browser sessions, temporary files, Clipboard, URSs, cookies, etc., and other evidence of their actions that might be tracable by law enforcement.</p> <p>Putting to use such tools as Technitium MAC Address Changer, the actors also change their system's MAC address to avoid detection. Additionally, to further assure anonymity and disguise their criminal operations, the group uses Tor, or proxy-based tools similar to Tor, as well as virtual private network services that route IPs through several countries.</p> <p>As might be expected, the group's preferred virtual currency is Bitcoin, which effectively hides identities.</p>

HEADLINE	10/13 Study: 12yr old bug exposes IoT devices
SOURCE	http://thehackernews.com/2016/10/sshowdown-iot-security.html
GIST	<p>Are your internet-connected devices spying on you? Perhaps.</p> <p>We already know that the Internet of Thing (IoT) devices are so badly insecure that hackers are adding them to their botnet network for launching Distributed Denial of Service (DDoS) attacks against target services.</p> <p>But, these connected devices are not just limited to conduct DDoS attacks; they have far more potential to harm you.</p> <p>New research [PDF] published by the content delivery network provider Akamai Technologies shows how unknown threat actors are using a 12-year-old vulnerability in OpenSSH to secretly gain control of millions of connected devices.</p> <p>The hackers then turn, what researchers call, these "Internet of Unpatchable Things" into proxies for malicious traffic to attack internet-based targets and 'internet-facing' services, along with the internal networks that host them.</p> <p>Unlike recent attacks via Mirai botnet, the new targeted attack, dubbed SSHowDown Proxy, specifically makes use of IoT devices such as:</p> <ul style="list-style-type: none"> • Internet-connected Network Attached Storage (NAS) devices. • CCTV, NVR, DVR devices (video surveillance). • Satellite antenna equipment. • Networking devices like routers, hotspots, WiMax, cable and ADSL modems. • Other devices could be susceptible as well.

	<p>More importantly, the SSHoWDown Proxy attack exploits over a decade old default configuration flaw (CVE-2004-1653) in OpenSSH that was initially discovered in 2004 and patched in early 2005. The flaw enables TCP forwarding and port bounces when a proxy is in use.</p> <p>However, after analyzing IP addresses from its Cloud Security Intelligence platform, Akamai estimates that over 2 Million IoT and networking devices have been compromised by SSHoWDown type attacks.</p>

HEADLINE	10/13 IT pros: shadow IT poses growing risk
SOURCE	http://www.darkreading.com/cloud/80--of-it-pros-say-users-set-up-unapproved-cloud-services/d/d-id/1327179?
GIST	<p>A conflict of interest is driving the rise of shadow IT among organizations.</p> <p>Tech pros are responsible for controlling and safeguarding data; employees want to accomplish tasks as efficiently as possible. As a result, more workers have begun to use cloud-based tools without consulting IT to verify their security.</p> <p>This is the key takeaway from a new SpiceWorks study entitled "Data Snapshot: Security, privacy, and the shadowy risks of bypassing IT." To learn more about the growth and risk of this practice known as "shadow IT," researchers surveyed 338 IT pros across North America, Europe, the Middle East, and Africa.</p> <p>Results indicate shadow IT poses a growing risk to businesses. Eighty percent of IT pros report their end users have secretly set up unapproved cloud services, and 40% claim users have gone behind their backs at least five times.</p> <p>To employees, it may not seem dangerous to adopt cloud services like Dropbox or Google, which they often use outside the office, but tech pros are concerned. Nearly 40% of respondents believe shadow IT has increased their data's vulnerability in the past five years.</p>

HEADLINE	10/13 'Teen extremist' deported from Egypt
SOURCE	http://www.dailytelegraph.com.au/news/terror-arrests-teen-extremist-deported-from-egypt/news-story/aec1c4470fd622e2dd0d965ea864e543
GIST	<p>ONE of the alleged teenage extremists accused of planning a public beheading in Bankstown on Wednesday was deported from Egypt last year where he was attempting to join a foreign terror group.</p> <p>The boy was one of two 16-year-olds charged with planning a terrorist attack and being a member of a terror organisation after the pair allegedly bought two knives from a Bankstown gun shop ahead of what police say was an 'imminent' attack.</p> <p>Egyptian security forces stopped and interrogated one of the teens in December and found he was travelling to the country to join extremist fighters in the Sinai region, The Australian reports.</p> <p>The other boy was pictured chanting through a megaphone during the 2012 Hyde Park riots, just meters away from an extremist now serving time at Supermax after being found guilty of a terror offence.</p> <p>Just moments before the teenagers were arrested outside a Bankstown prayer hall, the boys are believed to have washed, shaved and prayed.</p> <p>A man who lives at the hall told <i>The Daily Telegraph</i> the pair were inside a toilet cubicle with one showing the other how to use water for the purification ceremony before Islamic prayer.</p> <p>It is this ritualistic behaviour police will use to allege the boys were preparing for martyrdom.</p> <p>Both were yesterday refused bail in Parramatta Children's Court where it was revealed one of the boys had revealed to his mother he wanted to outdo the murder of police worker Curtis Cheng during an intercepted phone call.</p> <p>"When they come, I am going to do something to them that they have never seen before. I am going to do something bigger," he allegedly said in the phone call.</p> <p>Police say the teen was drawing a "direct comparison" between himself and Farhad Jabar, the 15-year-old who shot Cheng outside police headquarters in Parramatta last year before being killed by special constables.</p>

	Acting Police Commissioner Cath Burn said yesterday the arrest marked the 11th imminent terrorist attack police had foiled.

HEADLINE	10/13 US cash to Iran funded Houthi attack?
SOURCE	http://www.worldtribune.com/report-u-s-cash-to-iran-may-have-funded-houthi-attack-on-american-navy/
GIST	<p>Iran likely used a portion of the Obama administration’s \$1.7 billion cash payment to arm Houthi rebels in Yemen who recently fired missiles at a U.S. Navy vessel in the Red Sea, a report said.</p> <p>Members of Congress are investigating how American taxpayer funds are being used by Iran to fund global terror operations, including attacks on U.S. forces, the Washington Free Beacon reported on Oct. 12.</p> <p>“Just this weekend, Iranian-backed Houthi rebels shot missiles at a U.S. Navy destroyer in the Red Sea,” Sen. Ted Cruz, Texas Republican, told the Free Beacon. “It is not a coincidence that Iranian aggression against America and our allies has doubled since the JCPOA (nuclear deal) went into effect — the \$150 billion signing bonus is clearly going a long way.”</p> <p>Cruz and Sen. Kelly Ayotte, New Hampshire Republican, are petitioning the Pentagon to provide a full analysis of Iran’s military activity since last summer’s nuclear deal.</p> <p>In a letter sent to Secretary of Defense Ash Carter and Joint Chiefs of Staff Chairman Joseph Dunford on Oct. 11, Cruz, Ayotte and 15 other senators pointed to evidence that Iran has significantly increased its military activity since the nuclear accord went into effect.</p> <p>“The plain purpose of transferring the payment in cash to Tehran was to circumvent the effects of U.S. and international financial sanctions,” the lawmakers wrote, according to a copy of the letter obtained by the Free Beacon. “Iran is almost certainly using this windfall to skirt the arms embargo and illicitly purchase weapons for the Islamic Revolutionary Guard Corps (IRGC), the terrorist organization Hezbollah, and/or the murderous Assad regime in Syria.”</p> <p>“We are deeply concerned that this large infusion of U.S. taxpayer-funded cash into the coffers of the world’s leading state sponsor of terrorism is going to further embolden Iran and result in our troops and our allies confronting more lethal and better equipped adversaries and potential adversaries,” the letter states.</p>

HEADLINE	10/14 ISIS online magazine: hunt them like prey
-----------------	--

SOURCE	http://www.news.com.au/lifestyle/real-life/news-life/islamic-state-tells-lone-terrorists-to-target-people-on-quiet-walks-beaches-and-night-shifts/news-story/72914e71abdefcc63e0c80b8c92ab10b
GIST	<p>ISLAMIC State has issued a disturbing call to lone wolf followers to kill Westerners on “quiet walks ... beaches” and in laneways “nearby nightclubs”.</p> <p>The terrorist organisation has released the second issue of its online English-language propaganda magazine Rumiya via twitter and blogs. It contains detailed and graphic information about carrying out terror attacks including how to choose victims, how to kill them and when and where to strike. Some of the articles about slaughtering non-believers — referred to as ‘kafir’ or ‘kuffrs’ — are illustrated with images of beheaded men, weapons and a child with a gun.</p> <p>The editorial ‘A message from East Africa’ includes instructions for followers to “hurl themselves into the midst of the battle by attacking the (disbeliever) nearest to them”.</p> <p>“Let them follow the example of the lions who have preceded them by striking the crusader citizens and interests wherever they are found in the West,” it reads.</p> <p>An article in the magazine titled ‘Just Terror Tactics’ advises followers that “choosing a target ... is just like hunting prey”.</p> <p>“When carrying out a knife operation, it is not advised to target very large gatherings or overly crowded areas, as this presents a disadvantage and only increases the likelihood of being prevented from achieving kills,” it reads.</p> <p>“Therefore, it is advised that when conducting an operation by oneself, the target should be a smaller crowd, particularly for the one strong in build or skilful in using a knife, as such attacks are proven to inflict terror.</p> <p>The magazine includes several boastful references to recent attacks in Kenya, and the July attack on the Holey Artisan Bakery in Dhaka, Bangladesh that killed 20 people, including an American citizen.</p> <p>The first issue of the magazine encouraged lone wolves to attack and kill Australians in public acts of terror.</p> <p>“Kill them on the streets of Brunswick, Broadmeadows, Bankstown, and Bondi. Kill them at the MCG, the SCG, the Opera House, and even in their backyards,” an article published in the online periodical urged.</p> <p>“Stab them, shoot them, poison them, and run them down with your vehicles.</p> <p>“Kill them wherever you find them until the hollowness of their arrogance is filled with terror and they find themselves on their knees with their backs broken under the weight of regret for having waged a war</p>

	<p>against the believers, and by Allah’s will, and then through your sacrifices, this Ummah [community of Muslims] will be victorious.”</p> <p>Many experts and government officials have warned that as IS loses territory in Iraq and Syria, it will lash out globally through attacks on western countries.</p>

HEADLINE	10/14 Austria faces ‘heightened danger’
SOURCE	https://www.thelocal.at/20161014/austria-faces-heightened-danger-of-terror-attack
GIST	<p>The head of Austria’s federal anti-terrorism unit (BVT), Peter Gridling, says that Austria faces a heightened danger of a terrorist attack.</p> <p>Speaking ahead of a major anti-terrorism exercise in Vienna this evening, he said: "we must not close our eyes and ignore the dangers". According to the BVT the main danger comes from jihadists returning from conflict zones in the Middle East, or those who tried to leave Austria to fight with the Islamic State group and were prevented from doing so.</p> <p>Gridling added that the number of known jihadists in Austria is currently around 288. The ‘hotspots’ for radicalization in Austria are Vienna, Styria and Lower Austria, he said.</p> <p>However, the number of active or potential jihadists from Austria has slightly fallen in 2016 - which Gridling said was down to the action of security forces and judicial authorities, with prison sentences for those attempting to join the Islamic State acting as a deterrent.</p> <p>Gridling said that he couldn’t rule out that radical jihadis had entered Austria along with the influx of refugees and that they may have been able to set up a terror sleeper cell.</p>

HEADLINE	10/14 Ariz. woman sent ISIS material to prison?
SOURCE	http://www.cbsnews.com/news/arizona-michelle-bastian-isis-al-qaeda-terror-plot-husband-thomas-bastian-jail/
GIST	<p>PHOENIX -- An Arizona woman accused of mailing bomb-making instructions and promotional materials from terrorist groups to a state prison in what investigators say was a plot to kill a warden was booked on suspicion of terrorism.</p> <p>Police say Michelle Marie Bastian, 49, of Florence, sent articles from al Qaeda and Islamic State of Iraq and Syria (ISIS) magazines that were found in the cell where her husband is serving a life sentence for murder. Authorities say the articles made it past prison security because Bastian disguised them as legal papers.</p>

Investigators say her husband, Thomas Orville Bastian, converted to Islam after [entering prison and later became radicalized](#). Investigators say Michelle Bastian mentioned in phone calls with her husband that he is a supporter of ISIS.

A document filed in court by prosecutors said an investigative source told them last month that Bastian was going to provide the items to carry out the attack. It's not clear whether the materials needed to build explosives were actually found at the prison.

CBS News affiliate [KPHO reports](#) Bastian was arrested Wednesday morning by FBI agents at a bakery in Chandler where she worked as a bookkeeper. Agents also searched her Florence home.

Authorities say a search of Thomas Bastian's cell turned up handwritten notes on how to build an explosive device and several pages from al Qaeda's Inspire magazine that contained instructions on making bombs out of kitchen items.

Thomas Bastian, now 39, is serving a life sentence for a murder conviction in a 2007 shooting death that police said was a conspiracy to cash in on a \$500,000 insurance policy. He was accused of being a member of the conspiracy, but police say another man fired the fatal shots.

HEADLINE	10/13 Who are the Houthis; what do they want?
SOURCE	http://www.nbcnews.com/news/world/who-are-yemen-s-houthis-what-do-they-want-n665636
GIST	<p>U.S. missile attacks on targets in Houthi-controlled areas of Yemen on Thursday marked a new stage in the country's civil war and raised the prospect of deeper American involvement in the protracted conflict. It also throws a spotlight on a conflict that has dragged on for almost two years and threatens to play into a wider regional schism between Sunni and Shiite Islam.</p> <p>Who are the Houthis? The Houthis are key players in an alliance of rebels formally known as Ansar Allah — or "Partisans of God" — who follow Shiite Islam.</p> <p>Their name comes from Hussein Badr al-Din al-Houthi, who led an uprising in 2004 aimed at winning greater autonomy for provinces and protecting them from the perceived encroachment of Sunni Islam.</p> <p>Houthi was killed in 2004 but his family and supporters led further rebellions and their influence has continued to expand following the 2012 ouster of strongman President Ali Abdullah Saleh.</p> <p>Houthis now control much of northern Yemen, having taken over the capital Sanaa in September 2014 and pushed the government into exile in November 2015.</p>

They have been able to persuade large numbers of Yemen's armed forces to join them, allowing them to build up weaponry, according to [Pieter Wezeman, a senior researcher with the Stockholm International Peace Research Institute](#).

Who is supporting them?

Sunni-ruled Saudi Arabia and its allies, including the U.S., see the Shiite Houthis as being financially and militarily supported by Shiite-ruled Iran. Iran denies this, although the U.S. Navy says it has intercepted several shipping boats since the war began carrying Iranian weaponry suspected to be on the way to Yemen.

Iran is a regional foe of Saudi Arabia and continues to be a critic of the government in Riyadh and its bombing campaign in Yemen. However, the Washington Institute for Near East Policy said there were limits to Iran's ties with the Houthis.

"Houthi relations with the Islamic republic resemble the Iran-Hamas relationship more than the Iran-Hezbollah relationship — that is, the Houthis are autonomous partners who usually act in accordance with their own interests, though often with smuggled Iranian arms and other indirect help," analysts wrote in a report early Thursday.

Houthis also fire missiles or mortars almost daily into southern Saudi border areas. In June 2015, they [fired a Scud missile at Saudi Arabia](#) but it was intercepted.

Were Houthis behind the failed attack on the USS Mason?

The Houthis on Thursday reiterated a denial that they carried out the failed missile attacks on the U.S. navy destroyer, a news agency controlled by the group reported, according to Reuters.

They said the missiles did not come from areas under its control, said the Saba news agency, citing what it called a military source.

"These allegations are unfounded and [Houthis] have nothing to do with this action," the agency reported the source as saying. "Such claims are part of the general context of creating false justifications to escalate assaults and cover up the continuous crimes committed by the aggression against the Yemeni people, along with the blockade imposed on it, and after the increasing condemnations to such barbaric and hideous crimes against Yemenis."

Has America been involved in Yemen until now?

The U.S. has been providing logistical support and refueling to the Saudi-led coalition battling the Houthis and other rebels. U.S. military operations have focused instead on the influence of al Qaeda in Yemen, a breeding ground for Islamist militancy.

What are the prospects for resolving the conflict?

A shaky cease-fire between the government and the Houthis began in April but collapsed in August after peace talks broke down.

The exiled government of President Abd-Rabu Mansour Hadi is still recognized internationally, including by the U.N. and the U.S.

Hadi had previously proposed a plan under which Yemen would become a federation of six regions, but Houthis rejected it.

Gerry Northwood, chief operations officer with British maritime security firm MAST, suggested the Houthis would find it difficult to stage similar strikes now that the U.S. has retaliated.

What is the situation inside Yemen?

At least 4,125 civilians have been killed in Yemen during the conflict, [the Office of the United Nations High Commissioner for Human Rights](#) said Monday.

Instability and large-scale displacement, as well as weak governance, corruption, resource depletion and poor infrastructure, have hindered development in the poorest country in the Middle East.

HEADLINE	10/13 ISIS set Iraq oil wells ablaze
SOURCE	http://www.cnn.com/2016/10/12/world/burning-oil-wells-isis-iraq/index.html
GIST	<p>"We cover the children at night when they sleep," said Khalil. His hands were stained black, the air in the entrance to his house thick with smoke.</p> <p>Khalil, his wife and five children live but a minute's walk from a blazing oil well, one of more than a dozen ISIS has set alight in recent months.</p> <p>ISIS militants had set the wells on fire hoping to obscure the view of Iraqi and coalition warplanes, but it didn't stop Iraqi forces from driving them out of town in late August. Technicians from the provincial oil company were able to put some of the fires out, but not the one near Khalil's house. Every time they tried, ISIS fighters lobbed mortar rounds their way.</p> <p>Thirty-year oil industry veteran engineer Hussain Salim has the formidable task of putting out the fires, and explained to me in great technical detail how it's done. It only takes a quick glance at the black smoke on the horizon to understand the scale of the work at hand. "It took 30 days, a month, to put out one fire," he said.</p>

	<p>They've managed to put out six fires so far, but they have nine to go. The engineers estimate 5,000 barrels of oil are burning here every day. Earlier this week ISIS militants sabotaged another well.</p> <p>Despite all this, life is returning to Al-Qayyara. Vegetable stalls are up and running, as well as stores for mobile phones, a gadget banned under ISIS rule. But also here, the topic of conversation quickly turns to the pall of black smoke hovering over town.</p> <p>"It's a second Daesh," said vegetable vender Shaalan, using an Arabic term for ISIS. "It's cancer."</p>

HEADLINE	10/13 NYC bombing suspect 'talks' to officials
SOURCE	http://www.cbsnews.com/news/new-york-city-bombing-suspect-ahmad-rahami-communicating-authorities-nodding/
GIST	<p>The hospitalized man accused of setting bombs in New York City and New Jersey has been communicating with authorities by nodding, CBS News has learned.</p> <p>Two law enforcement officials confirmed to CBS News that Ahmad Khan Rahami, 28, nodded no when asked if anybody else was involved in the bombings that injured 31 people in Manhattan's Chelsea neighborhood last month. No one was injured in the New Jersey explosion.</p> <p>Rahami, an Afghan-born U.S. citizen, was shot between eight and 10 times when he was captured in northern New Jersey two days after he allegedly detonated a pipe bomb along the route of a Marine Corps charity race in the New Jersey shore town of Seaside Park and a pressure cooker bomb in New York City on Sept. 17.</p> <p>When asked if the bombing locations were chosen at random, Rahami nodded yes, the law enforcement officials told CBS News.</p> <p>Rahami was expected to survive his injuries. His breathing tube has been removed.</p> <p>He was scheduled to be arraigned Thursday on charges that he tried to kill police officers in New Jersey before they captured him. Prosecutors said he will appear via video from his hospital bed.</p> <p>Authorities were still investigating Rahami's family members. They weren't sure how a video of Rahami practicing with a pipe bomb in his backyard got on his sister's phone. Rahami had gotten rid of his personal cellphone and was using disposable phones.</p>

HEADLINE	10/14 ISIS crushes rebellion plot in Mosul
-----------------	---

SOURCE	http://www.reuters.com/article/us-mideast-crisis-iraq-mosul-exclusive-idUSKBN12E0Z0
GIST	<p>Islamic State has crushed a rebellion plot in Mosul, led by one of the group's commanders who aimed to switch sides and help deliver the caliphate's Iraqi capital to government forces, residents and Iraqi security officials said.</p> <p>Islamic State (IS) executed 58 people suspected of taking part in the plot after it was uncovered last week.</p> <p>Residents, who spoke to Reuters from some of the few locations in the city that have phone service, said the plotters were killed by drowning and their bodies were buried in a mass grave in a wasteland on the outskirts of the city.</p> <p>Among them was a local aide of IS leader Abu Bakr al-Baghdadi, who led the plotters, according to matching accounts given by five residents, by Hisham al-Hashimi, an expert on IS affairs that advises the government in Baghdad and by colonel Ahmed al-Taie, from Mosul's Nineveh province Operation Command's military intelligence.</p> <p>Reuters is not publishing the name of the plot leader to avoid increasing the safety risk for his family, nor the identities of those inside the city who spoke about the plot.</p> <p>The aim of the plotters was to undermine Islamic State's defense of Mosul in the upcoming fight, expected to be the biggest battle in Iraq since the 2003 U.S.-led invasion.</p> <p>According to Hashimi, the dissidents were arrested after one of them was caught with a message on his phone mentioning a transfer of weapons. He confessed during interrogation that weapons were being hidden in three locations, to be used in a rebellion to support the Iraqi army when it closes in on Mosul.</p> <p>IS raided the three houses used to hide the weapons on Oct. 4, Hashimi said.</p> <p>"Those were Daesh members who turned against the group in Mosul," said Iraqi Counter-terrorism Service spokesman Sabah al-Numani in Baghdad, using an Arabic acronym for Islamic State. "This is a clear sign that the terrorist organization has started to lose support not only from the population, but even from its own members."</p> <p>A spokesman for the U.S.-led military coalition which conducts air strikes on Islamic State targets in Syria and Iraq was unable to confirm or deny the accounts of the thwarted plot.</p>

HEADLINE	10/14 Afghan officials: heavy loss of forces
SOURCE	http://abcnews.go.com/International/wireStory/afghan-officials-200-police-soldiers-killed-42800028?cid=clicksource_4380645_1_hero_headlines_headlines_hed

GIST	<p>Hundreds of members of Afghanistan's security forces have been killed recently fighting insurgent attacks on the main city in the southern province of Helmand, officials said on Friday.</p> <p>Abdul Majeed Akhonzada, deputy head of the provincial council, and lawmaker Sheer Muhammad Akhon put the number of soldiers and police killed in the past 10 days in and around Lashkar Gah at more than 200.</p> <p>Separately, they each said 45 civilians had also been killed in the fighting, which saw Taliban militants launch attacks on at least two areas of the city earlier this week.</p> <p>Akhon says 100 security forces personnel have also been wounded. Both police and soldiers fight on Afghanistan's front lines.</p> <p>Akhonzada and Akhon both say it is the worst situation the province has faced in the 15 years since the Taliban's regime ended with the 2001 U.S. invasion.</p> <p>The fighting in Lashkar Gah began on Monday with a suicide attack using a car packed with explosives that killed at least 40 people, including many police officers.</p> <p>Gunmen then entered the city where fighting has continued, forcing many people to flee the city for neighboring Kandahar province, Akhon said.</p> <p>He said the U.S. military was present in the city, "but they are just monitoring and doing nothing." The Americans have a mandate to train and assist Afghan forces in most battlefield situations. U.S. military officials could not immediately be reached for comment.</p> <p>The Taliban have been gradually taking over Helmand and officials have said they now control around 85 percent of the province.</p>

HEADLINE	10/14 More airstrikes target Syria's Aleppo
SOURCE	http://hosted.ap.org/dynamic/stories/M/ML_SYRIA?SITE=AP&SECTION=HOME&TEMPLATE=DEFAULT&CTIME=2016-10-14-06-25-48
GIST	<p>BEIRUT (AP) -- Residents of opposition-held eastern Aleppo woke up to a fresh wave of airstrikes Friday amid clashes between government forces and rebels, part of a devastating military campaign by Syria and Russia that opposition activists say killed dozens of people in the past week.</p> <p>President Bashar Assad has voiced his intention to recapture the northern city's rebel-held eastern neighborhoods, saying a military victory in Aleppo would provide the Syrian army a "springboard" from which to liberate other areas of the country.</p>

	<p>"You have to keep cleaning this area and to push the terrorists to Turkey to go back to where they came from, or to kill them. There's no other option," he said in an interview with a Russian media outlet, Komsomolskaya Pravda, released Thursday.</p> <p>Syrian government forces have encircled the eastern half of Aleppo, besieging tens of thousands of people and pounding the territory with airstrikes on daily basis. The siege and deadly bombardment has caused an international outcry with a number of countries and groups accusing Syria and Russia of war crimes in connection with attacks on medical facilities and aid convoys.</p>

HEADLINE	10/14 US-led airstrikes on Mosul intensify
SOURCE	http://hosted.ap.org/dynamic/stories/M/ML_IRAQ?SITE=AP&SECTION=HOME&TEMPLATE=DEFAULT&CTIME=2016-10-14-07-28-15
GIST	<p>KHAZIR, Iraq (AP) -- The US-led coalition is increasing airstrikes in and around the militant-held city of Mosul as Iraqi ground forces build up ahead of a planned operation to retake the city, it said in a statement Friday.</p> <p>The coalition said its planes had conducted more than 50 airstrikes against the Islamic State group in the Mosul area over the past two weeks.</p> <p>"We have been intensifying our efforts in and around Mosul," said Col. John Dorrian, a spokesman for the US-led coalition.</p> <p>Iraqi ground forces are moving into place to the south and east of Mosul. While Qayara air base to the south of Mosul remains the main base of operations, Iraqi army convoys, including a unit of the country's elite special forces, could be seen traveling to frontline positions to the east of the city.</p> <p>"All the troop movements now are related to the Mosul operation," said Iraqi Army Brig. Gen. Firas Bashar, stationed at an Iraqi army base in Makhmour.</p>

HEADLINE	10/13 Hezbollah vows to maintain jihad in Syria
SOURCE	http://www.breitbart.com/jerusalem/2016/10/13/hezbollah-vows-maintain-jihad-syria/
GIST	<p>(REUTERS) – The Lebanese Shi’ite movement Hezbollah vowed to maintain its “jihad” in neighboring Syria at a huge rally in Beirut on Wednesday, a day after its leader Sayyed Hassan Nasrallah said the war was in a phase of escalation.</p> <p>Addressing thousands marking Shi’ite Islam’s annual Ashura religious commemoration in a heavily secured square in Hezbollah’s south Beirut stronghold, Nasrallah said the war in Syria was being fought in defense of the whole region.</p> <p>“We will continue to bear our great responsibilities of jihad there. Your sons are there, and your men, your brothers, your husbands. They are defending their existence, dignity and the resistance,” he said.</p> <p>In a speech on Tuesday, Nasrallah asserted the Middle East was in a phase of escalating tension and there appeared to be no prospect of a political solution to the war in Syria.</p> <p>“The regional scene is currently one of tension and escalation, and it does not appear that there are paths for negotiations or solutions,” he said in a rare live televised speech before thousands of supporters in Beirut, adding that “the theater (in Syria) was open to more tension, escalation and confrontation.”</p> <p>On Wednesday, black-clad supporters paraded through the streets to mark the 7th-century death of the Prophet Mohammed’s grandson Hussein, seen by Shi’ites as a divinely guided leader, and they roared approval of Nasrallah’s remarks.</p> <p>“We answer your call, o Nasrallah!” they chanted.</p>

HEADLINE	10/13 Lawyer: German suspect death scandal
SOURCE	http://www.bbc.com/news/world-europe-37641263
GIST	<p>The death in a prison cell of a Syrian refugee suspected of planning a bomb attack in Germany is a judicial scandal, his lawyer has said.</p> <p>Jaber al-Bakr, 22, strangled himself in a jail in Leipzig with his shirt and the government has demanded an immediate inquiry.</p> <p>His lawyer said the prison was aware Bakr was a suicide risk after he was captured on Monday. However, regional authorities said he had not been considered an acute risk.</p> <p>Jaber al-Bakr was detained on Monday on suspicion of plotting to bomb an airport in Berlin, possibly in the coming days.</p> <p>When police raided his flat in the eastern city of Chemnitz early on Saturday, they found 1.5kg of TATP, a home-made explosive used in the deadly jihadist attacks in Paris last year and in Brussels last March.</p> <p>Sebastian Gemkow, justice minister in the eastern state of Saxony, told reporters a psychological assessment of the prisoner had been made and safety measures had been taken. And the head of the prison described Bakr during the day as "calm and on an even keel".</p> <p>"It shouldn't have happened, but it did," the justice minister said, adding that he took responsibility for the suicide but would not resign.</p> <p>Prison officials rejected reports that Bakr was only being checked on an hourly basis.</p> <p>Originally, he was given top-level supervision, involving 15-minute intervals, but a panel of experts agreed hours before he died to lower the regular checks to every 30 minutes.</p> <p>There is no video monitoring of prisoners held in remand cells in Saxony, said prison governor Rolf Jacob. A guard stationed outside the cell door would have been more appropriate, he acknowledged.</p> <p>Jabr al-Bakr's body was found at 19:45 (17:45 GMT) on Wednesday evening, 15 minutes after a regular check, the prison governor said. Attempts to resuscitate him failed.</p> <p>Defence lawyer Alexander Huebner was adamant his client was a risk as he had already broken light bulbs and tampered with power sockets. He had also been refusing food and drink.</p>

	<p>The prison governor said later that the damage had been assessed as vandalism rather than an indication of potential suicide.</p> <p>"How could this happen?" Mr Huebner asked. "He must have been the best-guarded prisoner in Germany."</p> <p>German Interior Minister Thomas de Maiziere demanded a "rapid and comprehensive inquiry".</p>

HEADLINE	10/13 Oregon hospital ER quarantined
SOURCE	http://komonews.com/news/local/ore-hospital-er-quarantined-after-multiple-people-start-hallucinating
GIST	<p>COOS BAY, Ore. - A hospital in Coos Bay quarantined its emergency room after a 78-year-old patient, her caregiver, two sheriff's deputies and a hospital employee all began having hallucinations.</p> <p>KVAL-TV News reported Wednesday that authorities have not yet pinpointed what caused the mysterious episodes, but they believe it was something spread by direct contact.</p> <p>The bizarre incident began around 3 a.m. Wednesday when the elderly woman's caregiver, a 52-year-old woman, called authorities to say people were vandalizing her car.</p> <p>A deputy responded to the home, on East Bay Road in North Bend, but found nothing. The caregiver called back at 5:30 a.m. and was then taken to Bay Area Hospital after deputies suspected the woman might be having a medical issues causing hallucinations.</p> <p>Medical personnel checked her, she appeared fine and returned home.</p> <p>Then the two deputies who worked with the caregiver began having hallucinations and had to be hospitalized. After that, the 78-year-old woman and a hospital employee started showing similar symptoms and had to be hospitalized as well.</p> <p>The Coos County Haz Mat Team responded to Bay Area Hospital and the residence on East Bay Road. The team cleared the emergency room and began decontaminating vehicles and equipment.</p> <p>Everyone involved was quarantined while an investigation was conducted to determine the cause of the hallucinations - but nothing was found in the emergency room or the home on East Bay Road. Blood samples revealed nothing unusual.</p> <p>"No source of contaminate has been identified or found," Sgt. Pat Downing of the Coos County Sheriff's Office said in a press release.</p>

HEADLINE	10/13 NYPD official crime-fighting phone
SOURCE	http://www.cbsnews.com/news/this-is-nypds-official-crime-fighting-phone/

Across [New York City](#), more officers are staring at their phones. On a single day last week, 5,500 [NYPD officers](#) logged in and clicked on 39,000 notifications.

But they're not distracted from work. Those notifications were 911 calls. Crimes that would have just disappeared into the vast void of police reports are being solved more frequently, after officers adopted their official NYPD phones.

That's right, the NYPD is finally -- finally! -- catching up with the modern mobile age and equipping its officers with smartphones, nearly a decade after the first [iPhone](#) came out. The NYPD began rolling out its first handsets for the city's 36,000 police officers in April 2015, and finished equipping the entire force earlier this year. Now, new officers at the New York City Police Academy in College Point, Queens, get phones along with their guns and badges.

As the advent of smarter phones have improved our daily lives, these handsets have likewise made it easier for the city's finest to fight crime. Officers are able to respond to 911 calls faster, solve crimes more efficiently and create stronger ties to their community.

So what are the phones of choice for the men and women entrusted to guard the safety of the 8.4 million residents of New York?

The [Lumia 830](#) and [Lumia 640 XL](#).

You read that right. Life and death situations rely on outdated phones running on Microsoft's Windows Phone software.

You may knock the unpopular Windows Phone platform, which commands less than 1 percent of the phone market, but the NYPD believes Microsoft was the most appropriate way to go.

The department looked at Apple's [iOS](#) and Google's [Android](#), but picked Windows Phone for its security features, and the ability to remotely manage the thousands of devices being handed out.

Among all the fancy apps and high-tech additions, the phone's most basic function is what's been helping police-community relations the most, calling.

Before the phones were issued, officers didn't have a work email or phone number they could give out to people who needed their help in follow-up incidents.

At the time, it was against NYPD policy to give out their personal contact information. Victims who wanted to contact the specific officers who took their report would have to call the precinct and leave a message, sometimes to voice mailboxes shared by entire squads.

	<p>When they were first introduced, older officers had been skeptical of the devices, some even worried they were being tracked with the phones. The phones also have had a tough time dealing with the daily wear and tear police officers go through every day, leading to broken devices in the line of duty. A handful of the phones are lost every week.</p> <p>The NYPD is testing new devices, and plans to upgrade to a Windows 10 phone by next summer. Along with security, the department is looking into battery life and processor speed as important features.</p> <p>The next smartphone will have to be able to handle the department's vision for new apps, like a connection to the city's array of security cameras, or two-way digital dispatch.</p>

HEADLINE	10/13 Maldives quits Commonwealth
SOURCE	http://abcnews.go.com/International/wireStory/maldives-quits-commonwealth-citing-unfair-treatment-42775011
GIST	<p>The Maldives government said Thursday it has decided to leave the Commonwealth because the grouping of former British colonies has treated it "unjustly and unfairly" and sought to interfere in its politics.</p> <p>The statement by the Foreign Ministry came weeks after the Commonwealth threatened the country with suspension if it failed to show progress in key democratic governance issues by next March.</p> <p>The Commonwealth seems to be convinced "that the Maldives would be an easy object that can be used, especially in the name of democracy promotion, to increase the organization's own relevance and leverage in international politics," the statement said.</p> <p>It said the grouping had "treated the Maldives unjustly and unfairly. The Commonwealth has sought to become an active participant in the domestic political discourse in the Maldives, which is contrary to the principles of the charters of the U.N. and the Commonwealth."</p> <p>Government spokesman Ibrahim Hussain Shihab said the Maldives' withdrawal from the 53-state grouping would take effect immediately.</p>

HEADLINE	10/13 Sex scandals rock King Co. Sheriff's Office
SOURCE	http://www.thedailybeast.com/articles/2016/10/14/rape-jokes-crotch-grabbing-and-more-allegations-against-seattle-sheriffs.html
GIST	<p>A sergeant who used hand-sanitizer to draw a penis on his female subordinate's car. Rape investigators accused of joking about masturbating to victims' stories. These are just a few of the scandals to rock the Seattle-area sheriff's over the past four years.</p>

And after settling a sexual-harassment lawsuit for \$1 million in 2013, the King County Sheriff's Office (KCSO) is again embroiled in a legal fight over its treatment of female officers. This time, two sheriff's deputies and one sergeant are accusing the county of gender-based discrimination, sexual harassment, sexual-orientation based harassment, and retaliation. And discovery for the civil suit is already dredging-up new allegations of misconduct at KCSO, with a former head of internal affairs seeking whistleblower protections before he talks.

Central to many of these claims is King County Sheriff John Urquhart, 69, who was elected amid promises to clean up the corruption-plagued agency. Urquhart has been with KCSO since 1980, working his way through roles such as narcotics detective and spokesman before beating incumbent Republican Sheriff Steve Strachan in 2012. Urquhart's tenure so far, however, has been ignominious, involving the two sexual-harassment lawsuits, a cop convicted of pimping his wife and selling his colleagues steroids, a bogus "sex trafficking bust," a chief-of-staff with polygraph problems, and more.

In this latest lawsuit, initially filed in April 2015, two former King County deputies and one current sergeant seek damages from King County for gender-based harassment, discrimination, and retaliation. The complaint specifically calls out the actions of Sheriff Urquhart, Major Sean Ledford, and Sergeant Dewey Burns.

Burns, a supervisor in the Metro Transit Division, had been the subject of a 2014 incident involving defensive tactics instructor Melissa Deer. A sworn statement from Deer claims he grabbed her crotch during a training exercise "knowing full well that his hand was never supposed to be near my crotch."

"I was shocked, angry and pissed off," wrote Deer. "I asked him 'What are you doing?' He shrugged and acted like it was a joke." Deer called the incident "degrading," "sexist," and "a sexual assault."

In 2015, another allegation involving Burns surfaced. In this case, text messages showed the sergeant making racist, anti-gay, and sexually explicit comments to other staffers, including a female subordinate, Deputy Amy Shoblom. The texts were "shocking and can't be ignored or explained away," said Urquhart, who fired Burns over the content deemed racist and homophobic.

However, Urquhart did not see anything inappropriate about the sexually charged content Burns exchanged with Shoblom, finding that "the vast majority" of the texts had been welcomed by her and "on many occasions Deputy Shoblom instigated the highly sexualized texting between the two."

That's not how Shoblom, a nine-year veteran of KCSO, describes it. The 33-year-old is one of three plaintiffs in the current suit, along with Diana Neff, 50, and Julie Blessum, 45. After Shoblom transferred to the Metro Transit division in 2013, Burns had "direct supervisory authority" over Shoblom, according to the suit, and she considered it "a condition of employment" to take his antics in stride.

These antics included texting her half-naked photos of women he was sleeping with, asking during a roll call if she had “hooked up” with a male deputy, and drawing a penis on the hood of her car with hand sanitizer, among other things, according to the complaint.

After complaining to a captain and getting no response, Shoblom told another sergeant, Lou Caballero, about what was going on and he also filed a complaint. In August 2015, both were fired, allegedly for lying about an argument with a bus driver.

Neff and Blessum, meanwhile, say they were subject to a different sort of harassment/discrimination. Both worked in KCSO’s Shoreline precinct, and both were gay. Neff, who had been with the sheriff’s office since 1987, became a sergeant in 2000 and was assigned to Shoreline in 2006. Blessum came to the precinct in 2012. Major Ledford arrived as precinct chief in 2013.

Ledford’s presence changed things in the department, according to the lawsuit. He “refused to speak to Neff or other women who held positions of authority” and treated them in other discriminatory ways. At one point, he and the precinct’s second-in-command allegedly tried to have a female storefront deputy reassigned because “her hair was askew” and they didn’t think it made a good first impression. The woman had just gone through chemotherapy treatment for cancer, and her “hair” was a wig.

Both Neff and another female sergeant filed complaints with superiors that they say were ignored. Neff spoke with Urquhart’s top deputy, Anne Kirkpatrick, who allegedly told her the sheriff said she could make it work or leave.

Eventually, Ledford had Neff and the other female sergeant who had complained transferred out of Shoreline, replacing them both with male sergeants. (Neff’s replacement immediately hung up a poster on his door “that disparaged and mocked transgender persons,” the suit says.) Within 18 months of Ledford taking over, the precinct had gone from having three women in positions of leadership to having none.

Blessum, who remained in the precinct as a deputy, claims that “in Neff’s absence, gay bashing became par for the course at Shoreline.” She requested a transfer out of Shoreline, which was denied, and eventually quit in November 2014.

Neff, who had moved on to another precinct, was soon subjected to an internal affairs investigation that her complaint says was instigated by Sheriff Urquhart.

“A longstanding member of the KCSO’s officer’s guild leadership has stated that in all his years he has never seen the sitting Sheriff act as a complainant in an internal investigation,” it states. Neff was eventually cleared of all wrongdoing.

“Given the breadth of the inquiry and the fact that litigation is ongoing, it is very difficult to meaningfully respond,” says Sergeant Cindi West, media relations officer for the sheriff’s office, when contacted for

	comment. “The lawsuit challenges certain actions taken by the Sheriff’s Office against two former officers and one current officer. The Sheriff’s Office stands by those actions and decisions, contends they are about officer accountability not harassment, and is confident a jury will view them similarly.”
	A trial for the civil suit is scheduled for January 2017.

HEADLINE	10/14 Suspect found hanged in police van
SOURCE	http://www.usatoday.com/story/news/nation-now/2016/10/14/suspect-found-hanging-phoenix-police-van/92037618/
GIST	<p>PHOENIX — A woman is said to be in extremely critical condition after attempting suicide while in police custody in Phoenix.</p> <p>The woman, whom police identified as a domestic-violence suspect, was in the back of a police wagon and being driven to a booking facility early Wednesday when police say she slipped out of her handcuffs and fashioned a noose out of a shoelace.</p> <p>Sgt. Vince Lewis, a Phoenix Police Department spokesman, said the woman tied the shoelace around her neck and attached the other end to an air vent above her.</p> <p>The woman was the only detainee in the back of the wagon, according to Lewis.</p> <p>Upon arrival at the booking facility, the two transport officers discovered the woman unconscious, cut her free and began life-saving efforts, Lewis said. She was taken to a hospital, where she remained Thursday evening.</p>

HEADLINE	10/13 Russia ‘weapons’ just filled with hot air?
SOURCE	http://www.foxnews.com/tech/2016/10/13/are-russian-weapons-just-filled-with-hot-air.html
GIST	<p>The same technology that produces bouncy castles is reportedly a part of Russian military strategy.</p> <p>MIG-31 fighter jets, T-80 tanks and even a S-300 missile system are all available for sale from a company called Rusbal— and all of them are as solid as a hot air balloon and as deadly as a bouncy castle from a child’s birthday party. The inflatable decoys, which look real from the air, are part of a Russian military strategy that includes deceit and confusion, The New York Times reports.</p> <p>“There are no gentlemen’s agreements in war,” Rusbal’s director, Maria Oparina, told The New York Times about the idea of trickery in battle. The company is said to provide the decoys to the Russian Ministry of Defence.</p>

	<p>The inflatable weapons are made from fabric, not rubber, a material that can withstand punctures better, according to the Times. In the company's factory, where about 80 people work, employees use sewing machines to construct inflatable tanks and the like.</p> <p>The company's website— which features a tagline of "Fantasy from air"— advertises some of its inflatable military products, and offers plenty of other fun inflatable creations as well. Among them are an inflatable Kremlin, an inflatable penguin, and even an inflatable Russian doll that stands over eight feet tall, according to the site.</p> <p>Deadly force, indeed.</p>

HEADLINE	10/13 Threats cancel 'clown lives matter' walk
SOURCE	http://www.tucsonnewsnow.com/story/33381384/clown-lives-matter-peace-walk-canceled-after-multiple-threats
GIST	<p>TUCSON, AZ (Tucson News Now) - The organizer of an upcoming "Clown Lives Matter" peace walk has canceled the event, citing multiple death threats.</p> <p>Nikki Sinn posted the announcement to one of her Facebook pages.</p> <p>The pro-clown event was meant to show that "clowns are not psycho killers," and quickly made national headlines.</p> <p>The idea came about after creepy clown sightings were reported in multiple states around the country. Some of these clowns have reportedly chased cars, made threats, or attempted to lure children into wooded areas.</p> <p>A spokesman of the Arizona Black Lives Matter campaign told The Arizona Republic he felt the title was insensitive to the cause and "takes away the focus of a serious issue in this country."</p> <p>Sinn said that was not her intention.</p> <p>"I do not want to offend anyone with the name," she said. "I have had a lot of backlash and it's sad because it was honestly harmless and what I thought, positive."</p> <p>The walk was scheduled to take place on Fourth Avenue on Saturday, Oct. 15.</p> <p>The Tucson Police Department was aware of the event, and was planning to have officers patrolling on foot in the area.</p>

HEADLINE	10/14 Japan scrambles jets at record rate
SOURCE	http://www.reuters.com/article/us-japan-china-scrambles-idUSKBN12E0V8?il=0
GIST	<p>Japan's air defense force scrambled its fighter jets in response to Chinese military aircraft at a record rate in the six months ended Sept. 30, raising the number of such incidents from a year ago by about three-quarters.</p> <p>In the six months to the end of September, fighters scrambled to chase Chinese planes 407 times compared with 231 times in the same period last year, according to a press release from the Japanese Air Self Defence Force.</p> <p>Encounters with Russian aircraft, which are often bombers that fly around Japan from the north skirting its airspace, rose 67 percent to 180.</p>

HEADLINE	10/13 Active TB cases rise in Minnesota
SOURCE	http://www.breitbart.com/big-government/2016/10/13/two-hundred-ninety-six-refugees-diagnosed-active-tuberculosis-minnesota/
GIST	<p>Two hundred and ninety-six refugees were diagnosed with active tuberculosis (TB) between 2010 and 2014 in Minnesota, according to the Minnesota Department of Health.</p> <p>Seventy-one were diagnosed within one year of their arrival, while 225 were diagnosed after the first year, but within five years of their arrival.</p> <p>The number of active TB cases reported among refugees arriving in Minnesota is ten times higher than reported in any of the fourteen other states that have released refugee TB data to the public, or made it available to Breitbart News.</p> <p>The previous high among the other reporting states was Wisconsin, which reported 27 cases of active TB among refugees arriving in the state between 2014 and 2015.</p> <p>The other thirteen states, and the number of diagnosed cases of active TB among refugees are: Nebraska (21), Louisiana (21), Michigan (19), Vermont (17), Colorado (16), Florida (11), Ohio (11 in one county), Idaho (7), Kentucky (9 in one county), North Dakota (4 in one county), Indiana (4), California (3), and Tennessee, where two refugees have been diagnosed with the very dangerous, multi-drug resistant (MDR) TB.</p>

	<p>With 296 cases of active TB diagnosed among refugees over five years, Minnesota reported more cases than all fourteen other states where that data has been made available — a combined total of 172 cases.</p> <p>The total number of active TB cases diagnosed among refugees resettled in the United States in recent years now stands at 468, but 36 states have yet to report their number. Data reported in several of the fourteen states in which there is some data (Ohio, North Dakota, Kentucky, and Tennessee) is only partial, and in other states (California, and Indiana) covers only the most recent year, rather than the five most recent years.</p>

HEADLINE	10/13 Florida: Zika found in new neighborhood
SOURCE	http://www.bloomberg.com/news/articles/2016-10-13/florida-ids-new-miami-neighborhood-as-zika-zone
GIST	<p>Miami Beach, Fla. (AP) -- Health officials announced Thursday a new Zika zone in Miami — a setback less than a month after declaring the nearby Wynwood neighborhood cleared of the virus following aggressive mosquito spraying.</p> <p>Five people have been infected with Zika in a 1-square-mile area of the city just north of the Little Haiti neighborhood and about 3 miles north of Wynwood, according to a statement released Thursday by Gov. Rick Scott's office.</p> <p>It is the third Miami-area neighborhood identified where mosquitoes have transmitted the virus to people, after Wynwood and a touristy section of Miami Beach, which is still considered an active transmission zone. Wynwood was declared free of the virus after 45 days went by without any new infections.</p> <p>These are the first such areas of transmission confirmed in the continental U.S., following major outbreaks of the disease across Latin America.</p>

HEADLINE	10/14 Accidental shootings killing children
SOURCE	http://abcnews.go.com/US/wireStory/accidental-shooting-kills-child-day-42798109
GIST	<p>Hours earlier, he was a happy 4-year-old who loved Ironman and the Hulk and all the Avengers. Now, as Bryson Mees-Hernandez approached death in a Houston hospital room, his brain swelling through the bullet hole in his face, his mother assured the boy it was OK to die.</p> <p>Bryson shot himself last January with a .22-caliber Derringer his grandmother kept under the bed. It was an accident, but one that could be blamed on many factors, from his grandmother's negligence to the failure of government and industry to find ways to prevent his death and so many others.</p>

The Associated Press and the [USA TODAY](#) Network set out to determine just how many others there have been.

The findings: During the first six months of this year, minors died from accidental shootings — at their own hands, or at the hands of other children or adults — at a pace of one every other day, far more than limited federal statistics indicate.

Tragedies like the death of Bryson Mees-Hernandez play out repeatedly across the country. Curious toddlers find unsecured, loaded handguns in their homes and vehicles, and fatally shoot themselves and others. Teenagers, often showing off guns to their friends and siblings, end up shooting them instead.

Using information collected by the Gun Violence Archive, a nonpartisan research group, news reports and public sources, the media outlets spent six months analyzing the circumstances of every death and injury from accidental shootings involving children ages 17 and younger from Jan. 1, 2014, to June 30 of this year — more than 1,000 incidents in all.

Among the findings:

—Deaths and injuries spike for children under 5, with 3-year-olds the most common shooters and victims among young children. Nearly 90 3-year-olds were killed or injured in the shootings, the vast majority of which were self-inflicted.

—Accidental shootings spike again for ages 15-17, when victims are most often fatally shot by other children but typically survive self-inflicted gunshots.

—They most often happen at the children's homes, with handguns legally owned by adults for self-protection. They are more likely to occur on weekends or around holidays such as Christmas.

—States in the South, including Alabama, Louisiana, Mississippi, Tennessee and Georgia, are among those with the highest per capita rates of accidental shootings involving minors.

In all, more than 320 minors age 17 and under and more than 30 adults were killed in accidental shootings involving minors. Nearly 700 other children and 78 adults were injured.

The U.S. Centers for Disease Control and Prevention reported that 74 minors died from accidental discharges of firearms in 2014, the latest year for which comparable data are available. The AP and USA TODAY analysis counted 113 for that year, suggesting the federal government missed a third of the cases.

HEADLINE	10/13 Australia: child sex predator handbook
SOURCE	https://www.thecourier.co.uk/fp/news/local/perth-kinross/298959/newslink-5583908_95876-1/
GIST	<p>Ross Bayley (28) from Perth came under police investigation after a toddler revealed he had been sexually assaulted by him.</p> <p>Officers recovered computer equipment from his home and found that the Tor browser, which is intended to allow anonymity for online users, had previously been installed on a device.</p>

Advocate depute Steven Borthwick told the High Court in Edinburgh that recovered internet activity revealed the user had viewed a site which offered “detailed and graphic advice and history regarding paedophilia, paedophiles and also provided links to additional internet pages dealing with that subject matter”.

The prosecutor said: “The user has utilised the Tor browser to view deeply concerning material which offers advice regarding how to groom and sexually abuse children.”

Police cyber crime examiners said the material was extensive and amounted to “a manual of how to abuse children and get away with it”.

One of the analysts, who has seven years experience checking computers containing indecent child images, said: “In all my years as an examiner I have never previously encountered documentation such as this.

“The extensive content recovered, which gives instruction and advice in how to groom, prepare and abuse children, in our experience as analysts, is the worst offensive, upsetting, vile documentation we have encountered in the Cyber Crime unit.”

He added: “Subsequently one of the analysts involved, an examiner with nine years’ experience, could not continue reading as the content made them too upset and nauseous.”

A cache of indecent images of children was also recovered from the equipment and evidence was recovered showing the downloading of photos and videos involving the sexual abuse of youngsters.

Police later detained Bayley who told them: “I’m really, really sorry I need help.”

HEADLINE	10/13 Lawyer: ‘lonely’ NCIS agent betrayed US
SOURCE	http://abcnews.go.com/US/defense-paints-ncis-mole-pitiful-wreck-ahead-sentencing/story?id=42759288&cid=clicksource 4380645 1 hero headlines headlines hed
GIST	<p>He was lonely. He needed a girlfriend. He needed father figure. He was suffering from physical ailments. He has mental disorders. He drank too much. He was tired. He was weak. And when he was at his absolute lowest point, he was preyed upon.</p> <p>That's how attorneys for John Beliveau say the former Naval Criminal Investigative Service (NCIS) agent was seduced into becoming a mole in the law enforcement agency for a Malaysian kingpin in one of most widespread corruption cases in U.S. military history.</p>

"In the instant offense, severe mental illness and compromised judgment, rather than greed, motivated Mr. Beliveau," the attorneys argued in a recent court filing, painting a pitiful picture of their client before a sentencing hearing Friday. The defense wants a year's home confinement followed by supervised release. "He was weak and vulnerable, and in his compromised state, he exercised terrible judgment."

Prosecutors aren't buying it and called the defense's request an "insult." They want him to serve 15 years in prison.

Beliveau, who was a supervisory special agent in the NCIS, pleaded guilty almost three years ago to trading secret information in exchange for luxury travel, prostitutes and some \$30,000. But what he really wanted, his attorneys said, was a friend.

He was on the payroll of Leonard Francis, also known as Fat Leonard, the charismatic head of Glenn Defense Marine Asia (GDMA). Francis' business was in naval husbandry, providing large American ships in-port services like waste disposal, laundry and refueling at ports throughout Southeast Asia.

Behind the scenes, Francis operated a sprawling bribery ring involving scores of U.S. Navy servicemen who allegedly provided Francis classified information on ship movements, steered their ships toward his ports or otherwise aided in Francis' ripping off the Navy to the tune of tens of millions of dollars. More than a dozen of Navy officers, up to the rank of vice admiral, already have been disciplined, have been criminally prosecuted or face charges related to the conspiracy. Francis was arrested in September 2013 and pleaded guilty in January 2015.

Beliveau came into play after Francis learned he was under investigation by the NCIS, the Navy's law enforcement agency. Beliveau, who joined the NCIS in 2002, met Francis when he was stationed in Singapore from 2008 to 2012 and found Francis to be a "wealthy, smooth-talking, popular man," Beliveau's attorneys said. In the NCIS agent, Francis apparently saw someone he could use.

HEADLINE	10/14 Indianapolis: police office hit by gunfire
SOURCE	http://abcnews.go.com/US/wireStory/indianapolis-police-district-office-hit-gunfire-42800027
GIST	<p>Gunfire has struck an Indianapolis police department district office, and officials said Friday that investigators believe whoever is behind this attack also shot at another city police office this month.</p> <p>No one was reported injured in either shooting, the latest of which happened about 11 p.m. Thursday at the North District Headquarters.</p> <p>"This person is extremely violent," Police Chief Troy Riggs told reporters early Friday. "It's someone that we need to be vigilant in trying to capture quickly."</p>

	<p>After the first shooting, Riggs had said it may have been in response to a recent crackdown on drugs that included arresting suspected drug dealers and taking more than \$3 million in narcotics off the street.</p> <p>On Thursday night, police say officers inside the building heard shots and took cover before trying to find a suspect. Some windows and walls were damaged, and a vehicle in a parking lot was struck by gunfire. Witnesses reported hearing a vehicle speed away afterward.</p> <p>Police didn't immediately confirm how many shots were fired, but Riggs said at last one bullet entered the building.</p> <p>In a statement, the Indianapolis Metropolitan Police Department said that an initial investigation suggests the suspect or suspects who shot at the North District headquarters also was responsible for the shooting Oct. 4 at the Northwest District Headquarters.</p>

HEADLINE	10/13 Vancouver PD: gang member arrested
SOURCE	http://komonews.com/news/local/vancouver-pd-gang-member-accused-of-trafficking-firearms-heroin
GIST	<p>VANCOUVER, Wash. — Vancouver Police say they've arrested a gang member who is accused of trafficking firearms and large amounts of heroin.</p> <p>Jeffrey D. Lewis, 29, was out on bail on previous heroin charges when he was located in a convenience store parking lot Wednesday. Police say he didn't show up to a court date, and is believed to be involved in trafficking of firearms and drugs in Vancouver, Longview and Yakima.</p> <p>A SWAT team responded, and police say Lewis intentionally rammed one of their cars in an attempt to flee. He was arrested moments later on charges of assault, conspiracy to distribute heroin and driving while license suspended.</p> <p>A search warrant on his car was completed Thursday, where police found a stolen handgun, 1/4 ounce of meth and one ounce of heroin. Lewis will face more charges including possession of a stolen firearm, unlawful possession of a firearm and possession of a controlled substance with intent to deliver.</p>

HEADLINE	10/13 Bomb threat emailed to Issaquah school
SOURCE	http://komonews.com/news/local/bomb-threat-emailed-to-issaquah-high-school-police-to-patrol-campus
GIST	Issaquah - Police officers will be at Issaquah High School on Friday morning, after the school's principal received an email citing a bomb threat.

	<p>In a message to families Thursday night, Principal Andrea McCormick said she received an email that said, "Issaquah High may be a bombed October 14, 2016. Take all precautions needed."</p> <p>The district said it doesn't believe the threat is credible. But, it followed security protocols by notifying police and will bring in officers to patrol the campus throughout the night and Friday morning.</p> <p>The district also said it will be reviewing campus security camera footage before school starts on Friday, to ensure student and staff safety.</p>

HEADLINE	10/13 Charge: parents tried to sell baby on eBay
SOURCE	http://www.foxnews.com/world/2016/10/13/germany-investigates-couple-trying-to-sell-baby-girl-on-ebay.html
GIST	<p>Police in the western German city of Duisburg say they're investigating the parents of a 40-day-old girl on allegations they were trying to sell their infant daughter on eBay.</p> <p>Duisburg police said Thursday that the baby was listed on the internet auction site on Tuesday for a price of 5,000 euros (\$5,500). In a raid of the parents' apartment on Wednesday evening they were able to seize evidence suggesting the posting was made from their internet connection.</p> <p>Authorities say other members of the family also had access to the connection, however.</p> <p>The parents, described by police only as "refugees," have been taken in for questioning on suspicion of human trafficking.</p>

HEADLINE	10/13 Report: driver sped up in parade crash
SOURCE	http://www.foxnews.com/us/2016/10/13/driver-spod-up-moments-before-oklahoma-parade-crash-ntsb-says.html
GIST	<p>TULSA, Okla. – The woman accused of driving her car into spectators at Oklahoma State University's homecoming parade and killing four people sped up as she approached the parade route, according to a federal report released Thursday.</p> <p>The National Transportation Safety Board reported that co-workers who saw 26-year-old Adacia Chambers before the crash said she seemed distracted. The agency said her "emotional distress" was the probable cause of the crash that also injured dozens of people on Oct. 24, 2015.</p> <p>The report said Chambers' car accelerated from 54 mph to 59 mph in the five seconds before she struck a police motorcycle blocking the roadway along the parade route. The NTSB reports that she applied the</p>

	brakes after hitting the motorcycle, though the report doesn't say how fast she was driving when she hit the crowd. The speed limit in the area was 35 mph, according to the report.
	Chambers has pleaded not guilty to four counts of second-degree murder. Prosecutors allege she intentionally drove her car around a barricade and into spectators at the parade in Stillwater.

HEADLINE	10/14 Sweden: search for man in clown mask
SOURCE	http://abcnews.go.com/International/wireStory/swedish-police-man-clown-mask-stabbing-42799579
GIST	<p>Swedish police are looking for a man wearing a clown mask and a yellow jacket who slightly wounded a person in southern Sweden with a sharp object, the latest incident involving adults in creepy outfits scaring passers-by.</p> <p>Police spokeswoman Ulla Brehm says there have been two similar incidents where people dressed like clowns stood outside schools and "scared children. This is not a crime as such but very, very unpleasant."</p> <p>Brehm says the incidents "likely had spread via social media from the United States" adding "it is not funny when people are being scared."</p> <p>She said Friday the 19-year-old man was stabbed late Thursday with a knife in the shoulder in Varberg, south of Goteborg. He sustained superficial wounds and despite searches, the attacker has not been found.</p>

HEADLINE	10/14 Pakistan: gunmen kill 3 paramilitary officers
SOURCE	http://abcnews.go.com/International/wireStory/gunmen-kill-pakistani-paramilitary-troops-quetta-42798278
GIST	<p>A Pakistani official says gunmen riding on motorcycles shot and killed three paramilitary officers in the southwestern city of Quetta before fleeing.</p> <p>Wasay Khan, a spokesman for the Frontier Corps, says the officers were on guard duty when they were attacked on Friday. Two died at the scene, while the third succumbed to his wounds at a hospital.</p> <p>No one claimed responsibility for the attack.</p> <p>Baluchistan, of which Quetta is the provincial capital, has long been the center of a low-level insurgency by small separatist groups which demand more autonomy and a greater share in the region's natural resources, like gas and oil. The province is also home to Islamic militants.</p> <p>The government says it's trying to improve the local economy and bring the separatists into mainstream politics.</p>

HEADLINE	10/13 Police: Everett shootings gang related
SOURCE	http://www.heraldnet.com/news/police-3-casino-road-shootings-in-everett-are-gang-related/
GIST	<p>EVERETT — Police have confirmed that three shootings in the past month on W. Casino Road are gang-related.</p> <p>A 15-year-old boy was shot Monday night along the 900 block of W. Casino Road. He was seriously injured and taken to Harborview Medical Center in Seattle. An update of his condition was not immediately available. No one has been arrested.</p> <p>A 13-year-old boy was hit by gunfire Sept. 16 near the scene of Monday night’s shooting. An 18-year-old was shot Sept. 16 outside The Bluffs apartment on W. Casino. Both teens survived.</p> <p>No arrests have been made in those assaults.</p> <p>“It appears that all three shootings are gang-related,” Everett police officer Aaron Snell said Thursday.</p>

HEADLINE	10/13 Cops shooting suspect a constable
SOURCE	http://www.cbsnews.com/news/boston-officers-shot-suspect-was-city-constable/
GIST	<p>BOSTON -- A man wearing body armor and armed with an assault rifle shot two Boston police officers responding to a report of a domestic disturbance at his home before being shot and killed by other officers, police said.</p> <p>The suspect was identified as Kirk Figueroa, 33, of East Boston. The Boston City Clerk’s Office confirmed to CBS Boston that Figueroa was a constable for the city, and was sworn in in July.</p> <p>A car with the name of a website was towed from the shooting scene Thursday morning. On the website, elitepolicing.org, a man who identifies himself as Kirk Figueroa says his company, Code Blue Protection Corp., provides police support, fugitive apprehension and extradition services, and armored car training.</p> <p>Figueroa described himself as a Boston constable, a former member of a U.S. Army Reserve military police unit, a bounty hunter in California and a former corrections officer. He also said he was trained in mixed martial arts. Constables are authorized to serve subpoenas and other legal documents.</p>

CRIMINAL INTELLIGENCE

"Backpage.com" CEO Arrested In Multi-State Operation.

The [New York Times](#) (10/6, Mele, Subscription Publication) reports the CEO of "Backpage.com," Carl Ferrer, was "arrested Thursday and charged with conspiracy and pimping a minor after the authorities raided the company's Dallas headquarters, according to court records." The joint investigation between California and Texas authorities also resulted in the arrest of two men who helped to found the company in 2004. Brian Fichtner, a special agent of the California Department of Justice, submitted an affidavit that says, "Defendants have known that their website is the United States hub for the illegal sex trade and that many of the people advertised for commercial sex on Backpage are victims of sex trafficking, including children."

Authorities Arrest 28 In Bust Of Wisconsin, Illinois Street Gang.

The [AP](#) (10/6) reports that the FBI on Thursday participated in the arrests of "28 people linked with a violent gang that operated in southeastern Wisconsin and northern Illinois." The arrestees, purported members and associates of the Maniac Latin Disciples, face federal and state charges including armed

robbery and narcotics trafficking. "Dozens of local and federal law enforcement agencies participated in an operation Thursday morning that the FBI says 'aimed to dismantle the MLD's violent grip over southeastern Wisconsin.'" the AP reports.

Baltimore Authorities Charge 34 Alleged Gang Members. The [Baltimore Sun](#) (10/6) reports that Baltimore police have announced charges against 34 members of the Black Guerrilla Family street gang. The suspects were named in two separate drug distribution indictments. "Of the 34 people who were indicted in the two cases, 19 are still being sought by police," the Sun reports.

47 people, 44 Companies Charged In International Bank Fraud Scheme. [New Jersey Local News](#) (10/6) reports a New Jersey county prosecutor on Thursday announced charges against 47 individuals and 44 companies "in a sprawling international bank fraud ring that operated a 'multimillion-dollar scheme to steal from banks and corporations.'" 26-year-old Carlos Alcantara of South Amboy, New Jersey and associates "allegedly created companies to dupe 'unwitting companies and individuals' into wiring 'significant sums of money to newly-established, but fraudulent corporate bank accounts.'"

UK Police Using Drones To Deter Criminal Behavior.

The [Daily Mirror \(UK\)](#) (10/6) reports police officers in South Wales "have 10 pilots using their force drones in a bid to catch people breaking the law" and deter "anti-social behavior." Residents living near city parks have been complaining about the noise from dirt bikes, and in response police have used drones to conduct surveillance on the area. Officers "have not only received the information needed to seize bikes, but they are seeing the techniques acting as a deterrent to the riders which is meaning a reduction in the number of bikes accessing the land." The drones deployed by the officers have a battery life of about seven hours, "can travel at up to 40mph, and most importantly for the officers, the devices can capture high quality images from a distance."

Carfentanil Linked To 19 Deaths In Wayne County.

The [Detroit Free Press](#) (10/6, Hall) reports carfentanil, an animal tranquilizer, is being mixed "with heroin and other street drugs" and is "killing people in Michigan." The combination drug "has been linked to at least 19 deaths in Wayne County since July," according to the state Department of Health and Human Services. Carfentanil "was also suspected but not confirmed in a Kent County case last month." Residents and healthcare providers are "on alert" for the "deadly danger the drug poses," which according to officials "has no antidote."

We hope you are enjoying the **LEIU Daily** and you are deriving a great deal of value from this report. It provides you with the latest law enforcement news and include timely coverage of issues involving organized crime, terrorism, gambling, and legal news that may impact you. You can count on **LEIU Daily** for comprehensive coverage. I am glad we can share this member benefit with you as I believe it will help us all stay abreast of rapidly developing stories, issues, and regulations in our field.

On another note --Your LEIU Executive Board believes this Daily Briefing is also beneficial to others in your department and encourage you to share with your colleagues, subordinates, and management. **Please take the time to invite your unit members to receive the LEIU Daily each morning via the "Invite a colleague" button at the bottom of your briefing. Sharing this briefing with your team is one of the benefits of your LEIU membership. The more people who can benefit from this Daily Briefing the more effective we become.**

LEGAL ISSUES

Obama Commutes Another 102 Federal Prison Sentences.

The [AP](#) (10/6, Lederman) reports Obama's move is "part of his end-of-term push to spur action on criminal justice reform," and that the "latest round...brings to 774 the number of sentences Obama has shortened, including 590 this year."

The [Washington Times](#) (10/6, Boyer) reports that the commutations are "becoming a monthly routine," and notes that "fifteen of the inmates were convicted of firearms crimes – either using a weapon during a drug transaction, or possessing a gun illegally as a convicted felon." According to the Times, "eight individuals were convicted of trafficking in more than five kilos of cocaine, and a ninth

person, Cesar R. Jara of El Paso, Texas, was convicted in 2006 of trafficking 1,000 kilograms or more of marijuana.”

[USA Today](#) (10/6, Locker) reports that its “analysis of Obama’s 673 commutations through August showed a marked change in strategy on his clemency initiative.” While “before August, almost all of the inmates whose sentences were commuted were released within four months...the last two rounds of commutations granted in August showed that 39% came with a year or more left to serve on the sentence.” Obama “has also commuted the sentences of even more serious offenders.” Yesterday, for example, “11 of the 102 commutations involved sentences involving a firearm.” According to [The Hill](#) (10/6, Fabian), meanwhile, “thirty inmates in the latest batch have firearm-related convictions.”

Oregon Supreme Court Rule Police Cannot Interfere With Mail For Investigations.

The [Oregonian](#) (10/6) reports the Oregon Supreme Court released a ruling on Thursday that will affect the practice of police and postal inspectors removing “packages from the mail stream to investigate them for drugs or drug money.” The Oregonian says it has “long been recognized locally and federally that police don’t have a right to open private letters or parcels without a warrant, but the ruling makes clear that police acting without a warrant in Oregon also don’t have a right to interfere with the mail by doing just about everything short of opening it.” In the initial investigation Police removed a suspicious package at the airport postal cargo center and had a drug-sniffing dog sniff a “line up” of six packages. The dog signaled there “was something of interest” in the suspicious package. The Judge found that the “first misstep by police was physically removing the package from the mail stream when they had no reasonable suspicion or probable cause.”

TECHNOLOGY

Few Police Agencies Using Gun Database Technology.

In a piece for the [Washington Post](#) (10/6, Schwartzapfel, Project), Beth Schwartzapfel of The Marshall Project lauds the National Integrated Ballistic Information Network (NIBIN), which “contains high-resolution images of almost 3 million casings police have collected from crime scenes or test-fired from guns used in crimes nationwide since 1999,” and “reads unique markings that guns leave on shell casings and then flags potential matches, signaling when the same gun may have been used in more than one shooting.” However, “only a few hundred of the nation’s 18,000 police departments use the database,” and of those, “only a handful have been using it the way ATF intends.” The technology

“requires a considerable commitment of personnel and money,” and “many departments have adopted it in a scattershot way: They enter shell casings inconsistently and fail to follow up on leads.”

ACLU Critical Of Social Media Tracking Tools Used By Police.

The [AP](#) (10/6, Gurman) reports the ACLU is expressing criticism of “common tools that allow police to conduct real-time social media surveillance during protests.” Law enforcement uses “services such as Geofeedia, which map, collect and store information from social media posts, [as a tool] to help find crime witnesses, spot brewing problems during large gatherings and gauge community sentiment.” The ACLU argues the “software can be easily used to collect information on peaceful protesters or target certain groups.” The AP points out that social media tracking software is “also used by news organizations, retailers and companies to quickly analyze large amounts of social media.”

POLICING & POLICY

Chicago Police Officer Did Not Shoot Attacker For Fear Of Media Scrutiny.

The [Chicago Sun-Times](#)  (10/6, Spielman) reports Chicago Police Superintendent Eddie Johnson said Thursday that a female police officer was attacked by a “subject under the influence of PCP” during a “simple traffic accident” on Wednesday that “turned ugly.” Johnson said the subject “viciously pounded [the officer’s] head into the street as her partner was trying to get him off of her. The attack went on for several minutes.” Johnson added the officer told him at the hospital Wednesday evening that “she thought she was gonna die. And she knew that she should shoot this guy. But, she chose not to because she didn’t want her family or the department to have to go through the scrutiny the next day on national news.”

DOJ Backs Delaware Police In Fight Against Cell Site Simulator FOIA Request.

The [AP](#)  (10/5, Chase) reports that federal authorities are supporting the Delaware State Police in their fight against a FOIA request seeking information about how law enforcement agencies use cell site simulators. “Lawyers for the U.S. Department of Justice filed a ‘statement of interest’ last week in a Superior Court lawsuit filed by the American Civil Liberties Union on behalf of a Delaware man. The suit challenges the refusal of state officials to provide details about DSP’s purchase and use of the

technology, which mimics a cell phone tower in order to connect with and collect information on nearby cell phones,” the AP says. “Although the United States is not a party to this case, it has a direct interest in the protection of the information withheld by the DSP,” Justice Department lawyers wrote. “Cell site simulator technology is a key tool in the Federal Bureau of Investigation’s investigation, interdiction, and suppression of criminal and terrorist activity.” [USA Today](#) (10/5, Baker) also reports on this story.

California Sheriff’s Office Issuing Gun Vaults To Promote Safe Storage.

The [AP](#) (10/6) reports the Santa Clara, California, County Sheriff’s Office is issuing “all deputies department-issued gun vaults for their personal vehicles to help promote weapon safety.” The storage program “comes months before a state law is set to take effect that will require any person to take the same precautions when handguns are left unattended in vehicles.”

CRIME & DRUGS

Obama Commutes Another 102 Federal Prison Sentences.

The [AP](#) (10/6, Lederman) reports Obama’s move is “part of his end-of-term push to spur action on criminal justice reform,” and that the “latest round...brings to 774 the number of sentences Obama has shortened, including 590 this year.”

The [Washington Times](#) (10/6, Boyer) reports that the commutations are “becoming a monthly routine,” and notes that “fifteen of the inmates were convicted of firearms crimes – either using a weapon during a drug transaction, or possessing a gun illegally as a convicted felon.” According to the Times, “eight individuals were convicted of trafficking in more than five kilos of cocaine, and a ninth person, Cesar R. Jara of El Paso, Texas, was convicted in 2006 of trafficking 1,000 kilograms or more of marijuana.”

[USA Today](#) (10/6, Locker) reports that its “analysis of Obama’s 673 commutations through August showed a marked change in strategy on his clemency initiative.” While “before August, almost all of the inmates whose sentences were commuted were released within four months...the last two rounds of commutations granted in August showed that 39% came with a year or more left to serve on the sentence.” Obama “has also commuted the sentences of even more serious offenders.” Yesterday, for example, “11 of the 102 commutations involved sentences involving a firearm.” According to [The Hill](#) (10/6, Fabian), meanwhile, “thirty inmates in the latest batch have firearm-related convictions.”

“Backpage.com” CEO Arrested In Multi-State Operation.

The [New York Times](#) (10/6, Mele) reports the CEO of “Backpage.com,” Carl Ferrer, was “arrested Thursday and charged with conspiracy and pimping a minor after the authorities raided the company’s Dallas headquarters, according to court records.” The joint investigation between California and Texas authorities also resulted in the arrest of two men who helped to found the company in 2004. Brian Fichtner, a special agent of the California Department of Justice, submitted an affidavit that

says, “Defendants have known that their website is the United States hub for the illegal sex trade and that many of the people advertised for commercial sex on Backpage are victims of sex trafficking, including children.”

OFFICER SAFETY & WELLNESS

Missouri Police Officer Killed While Responding To Disturbance.

The [Washington Post](#) [redacted] (10/6, Larimer) reports four-year veteran St. Louis County, Missouri, Police Officer Blake Snyder was “killed Thursday while responding to an early-morning call, [in] a fatal encounter that rapidly unfolded after the officer arrived on the scene.” Snyder and other officers responded to a call about a subject banging on a home’s front door. They approached the suspect, “who was sitting alone in the car,” and attempted to give commands before the suspect opened fire. Chief Jon Belmar says Officer Snyder “gave the suspect some commands, because he couldn’t see his hands. The suspect produced a pistol and he shot officer Snyder point-blank.” Belmar adds that the shot that struck Snyder was “immediately fatal.” Snyder is survived by a wife and young son.

LA County Sheriff’s Sergeant “Executed” When Responding To Burglary Call.

The [Los Angeles Times](#) [redacted] (10/5, Rocha, Winton, Serna, Queally) reports 29-year veteran Los Angeles County Sheriff’s Sergeant Steve Owen “was shot and killed in Lancaster on Wednesday while responding to a residential burglary call.” The gunman “tried to flee in the slain lawman’s cruiser” while holding two teenagers hostage before being captured. Owen “previously won the agency’s highest honor for courage.” The Times says Owen’s wife, “who is a member of the department’s Arson Explosive Unit,” was able to reach the hospital shortly before he died. Sheriff Jim McDonnell released a statement saying, “The tragedy of a deputy sheriff such as Sgt. Steve Owen making the ultimate sacrifice has a massive impact on the whole law enforcement family.”

In an separate [Los Angeles Times](#) [redacted] (10/6, Serna, Cruz) piece, Sheriff Jim McDonnell explains that the suspect “executed” Owen. The suspect “shot Owen with a stolen gun and stood over his body, then fired another four rounds into the sergeant,” according to the Sheriff. The suspect then searched Owen’s body for his duty weapon “with the intent to use it to murder” other responding deputies.

TECHNOLOGY

UK Police Using Drones To Deter Criminal Behavior.

The [Daily Mirror \(UK\)](#) [redacted] (10/6) reports police officers in South Wales “have 10 pilots using their force drones in a bid to catch people breaking the law” and deter “anti-social behavior.” Residents living near city parks have been complaining about the noise from dirt bikes, and in response police have used drones to conduct surveillance on the area. Officers “have not only received the information needed to seize bikes, but they are seeing the techniques acting as a deterrent to the riders which is meaning a reduction in the number of bikes accessing the land.” The drones deployed by the officers have a battery life of

about seven hours, “can travel at up to 40mph, and most importantly for the officers, the devices can capture high quality images from a distance.”

ACLU Critical Of Social Media Tracking Tools Used By Police.

The [AP](#) (10/6, Gurman) reports the ACLU is expressing criticism of “common tools that allow police to conduct real-time social media surveillance during protests.” Law enforcement uses “services such as Geofeedia, which map, collect and store information from social media posts, [as a tool] to help find crime witnesses, spot brewing problems during large gatherings and gauge community sentiment.” The ACLU argues the “software can be easily used to collect information on peaceful protesters or target certain groups.” The AP points out that social media tracking software is “also used by news organizations, retailers and companies to quickly analyze large amounts of social media.”

ALSO IN THE NEWS

Few Police Agencies Using Gun Database Technology.

In a piece for the [Washington Post](#) (10/6, Schwartzapfel, Project), Beth Schwartzapfel of The Marshall Project lauds the National Integrated Ballistic Information Network (NIBIN), which “contains high-resolution images of almost 3 million casings police have collected from crime scenes or test-fired from guns used in crimes nationwide since 1999,” and “reads unique markings that guns leave on shell casings and then flags potential matches, signaling when the same gun may have been used in more than one shooting.” However, “only a few hundred of the nation’s 18,000 police departments use the database,” and of those, “only a handful have been using it the way ATF intends.” The technology “requires a considerable commitment of personnel and money,” and “many departments have adopted it in a scattershot way: They enter shell casings inconsistently and fail to follow up on leads.”

CRIMINAL INTELLIGENCE

FBI Arrests NSA Contractor Suspected Of Stealing Critical Codes.

News that NSA contractor Harold Martin III was arrested for stealing important computer codes received extensive coverage Wednesday. Nearly all reports noted that the codes were allegedly used by the NSA to hack foreign actors. [USA Today](#) (10/5, Johnson) reports that according to the government complaint, six files that Martin had “were produced through sensitive government sources, methods and capabilities which are critical to a wide variety of national security issues.” [NBC News](#) (10/5) says the investigation is looking into a link between Martin and the Shadow Brokers, “and any connection between Martin and NSA hacking tools that were put up for sale by the Shadow Brokers, a senior official said.”

Opioid Crisis May Be Spreading.

The [Wall Street Journal](#) (10/5, A1, Kamp, Campo-Flores, Subscription Publication) reports on its front-page that small-scale drug labs are popping up nationwide. Law enforcement personnel say such labs threaten to add a new dimension for authorities that are already trying to combat the large-scale drug

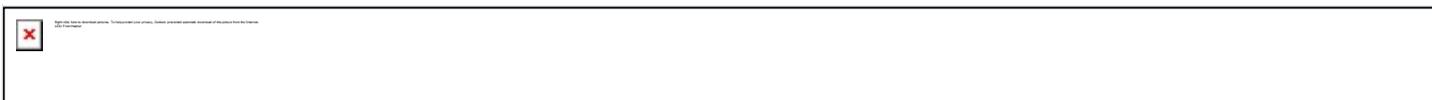

gangs and address the opioid crisis. According to the Centers for Disease Control and Prevention over 28,000 people died from opioid-related overdoses in 2014, more than double the total from a decade earlier.

NPR Examines Strength Of Aryan Brotherhood Of Texas.

[NPR](#) (10/4) examines the current strength of the Aryan Brotherhood of Texas (ABT), "one of the most violent crime syndicates in America," after a Justice Department crackdown two years ago. Investigators "say...there is less mayhem on the streets and fewer vicious attacks by Aryan brothers on each other" as a result of the arrests. However, former enforcers for the gang tell NPR that the ABT will likely come back violently. Mike Squyres, a veteran gang investigator at the Harris County Sheriff's Office in Houston, says the relative quiet currently is a "respite" for law enforcement, before the ABT "will start growing again." Squyres adds that the "key is that these defendants got time in federal prison, not in Texas prisons," because they might end up in a "federal penitentiary in New York, [where] there may be only one other" ABT member.

US Charges Two Colombians With Trafficking Three Tons Of Cocaine.

The [AP](#) (10/5) reports that "two Colombian men have been extradited to Los Angeles to face charges that they tried to smuggle tons of cocaine into the United States, federal prosecutors announced Wednesday." Dicson Penagos-Casanova, 36, and Juan Gabriel Rios Sierra, 34, "allegedly handled at least \$70 million worth of cocaine that was seized by authorities after planes carrying the drugs crashed, the U.S. attorney's office said." The men were extradited to Los Angeles from Columbia on Tuesday "and could face up to life in federal prison if convicted of conspiracy and cocaine possession charges." An indictment unsealed on Tuesday "contends that Penagos and Rios arranged for cocaine processed in laboratories outside Meta, Colombia, to be shipped to underground storage facilities near clandestine airstrips in Venezuela."

We hope you are enjoying the **LEIU Daily** and you are deriving a great deal of value from this report. It provides you with the latest law enforcement news and include timely coverage of issues involving organized crime, terrorism, gambling, and legal news that may impact you. You can count on **LEIU Daily** for comprehensive coverage. I am glad we can share this member benefit with you

as I believe it will help us all stay abreast of rapidly developing stories, issues, and regulations in our field.

On another note --Your LEIU Executive Board believes this Daily Briefing is also beneficial to others in your department and encourage you to share with your colleagues, subordinates, and management. **Please take the time to invite your unit members to receive the LEIU Daily each morning via the "Invite a colleague" button at the bottom of your briefing. Sharing this briefing with your team is one of the benefits of your LEIU membership. The more people who can benefit from this Daily Briefing the more effective we become.**

LEGAL ISSUES

DOJ Backs Delaware Police In Fight Against Cell Site Simulator FOIA Request.

The [AP](#) (10/5, Chase) reports that federal authorities are supporting the Delaware State Police in their fight against a FOIA request seeking information about how law enforcement agencies use cell site simulators. "Lawyers for the U.S. Department of Justice filed a 'statement of interest' last week in a Superior Court lawsuit filed by the American Civil Liberties Union on behalf of a Delaware man. The suit challenges the refusal of state officials to provide details about DSP's purchase and use of the technology, which mimics a cell phone tower in order to connect with and collect information on nearby cell phones," the AP says. "Although the United States is not a party to this case, it has a direct interest in the protection of the information withheld by the DSP," Justice Department lawyers wrote. "Cell site simulator technology is a key tool in the Federal Bureau of Investigation's investigation, interdiction, and suppression of criminal and terrorist activity." The DOJ filing prompted the judge in the case to postpone arguments in the case, saying the letter offered new details that had not previously been on record in the case. [USA Today](#) (10/5, Baker) also reports on this story.

TECHNOLOGY

West Virginia Marshals To Use Scanners To Track Sex Offenders.

[West Virginia MetroNews](#) (10/5) reports from Morgantown, WV that “nearly instantaneous information sharing about sex offenders will help the US Marshals Service and West Virginia State Police track the guilty. ‘What took days previously will now take moments. And, time is of the essence,’ said Alex Neville, Chief Deputy US Marshal for Northern West Virginia.” The Marshals Service “presented \$5,000 worth of equipment to Troop 1 of the West Virginia State Police Wednesday morning.” According to Neville, “the donated technology could help expedite investigations and the tracking of fugitives. ‘This would be information pertaining to sex offender registration data. That would be photographs of sex offenders and supporting documentation regarding their record of conviction or biological data that would assist the United States Marshal Service.’”

Carlin: Most Young Terrorist Recruitment Linked To Social Media.

[CNBC](#) (10/5) reports that ISIL is “so adept in its use of social media for propaganda and recruitment, that most cases of domestic terrorism can now be traced to social media platforms. ‘We’ve got to get the message out: Terrorists are using social media to target young kids,’ said John Carlin, assistant attorney general for national security at the Department of Justice.” Carlin’s comments “came in an on-stage interview with CNBC’s Andrew Ross-Sorkin at the Cambridge Cyber Summit at MIT on Wednesday.” CNBC adds that “Internet terrorists are deliberately using social media to target tens of thousands,” Carlin said. ISIL “and others are using platforms like Facebook, YouTube and Twitter to reach isolated teens here in the United States, and they know how to get their attention with social media posts, Carlin said.”

HEADLINE	10/04 Duterte latest tirade against US
SOURCE	http://www.cbsnews.com/news/philippines-president-duterte-tells-obama-you-can-go-to-hell/
GIST	<p>MANILA, Philippines - Philippine President Rodrigo Duterte has told President Barack Obama “you can go to hell” in his latest tirade against the U.S. over its criticism of his deadly anti-drug campaign.</p> <p>He also lashed out anew at the European Union in a speech Tuesday saying the 28-nation bloc, which has also criticized his brutal crackdown, “better choose purgatory, hell is filled up.”</p> <p>Duterte, who took office in June, has been hypersensitive to criticisms over his anti-drug fight, which has left more than an estimated 3,000 suspected drug dealers and pushers dead in just three months, alarming the United Nations, the E.U., the U.S. and human rights watchdogs.</p> <p>Angered by the U.S. criticism, Duterte has declared he wants to reduce the presence of U.S. troops in the country.</p> <p>The brash-talking president has lashed out at everyone critical of his bloody drug war, which most call a human rights violation for its encouragement of vigilantism and lack of due process. He recently felt forced to apologize to Jews worldwide for comparing himself and his drug war to Hitler.</p> <p>President Barack Obama, U.N. officials and human rights watchdogs have raised concerns over the widespread killings, but Duterte has lashed back at them and other critics. He said that critics were impeding his battle against a problem that has worsened into a national security threat.</p>

HEADLINE	10/03 Seahawks players meet with Seattle PD
SOURCE	http://www.seattletimes.com/sports/seahawks/seahawk-doug-baldwin-and-teammates-meet-with-seattle-police-department-officers/
GIST	<p>After the Seahawks decided to link arms during the national anthem, their way of responding to recent police shootings and other social issues, receiver Doug Baldwin said the next step was for the players to turn their public stances into future action.</p> <p>“Our team is united together to have a follow through,” Baldwin said.</p>

As part of that follow through, Baldwin and other Seahawks players met on Monday at the team's practice facility in Renton with members of the Seattle Police Department. An SPD spokesman confirmed the meeting but said other details were not immediately available.

Baldwin had said last month that such meetings would be forthcoming.

"At this very moment, we're scheduling a meeting with the mayor of Seattle, with police chiefs across the country, across the state I should say, and we're discussing ways to just start discussion," Baldwin said following the Seahawks' season opener against Miami. "That's the first step, is to have communication. We need to know the perspective of other people. The greatest tragedy for any human being is going through their entire lives believing the only perspective that matters is their own. We need to break down those walls and barriers and get people to see that there's perspectives outside of their own eyes."

After helping the Seahawks' form their decision to link arms as part of the team's Building Bridges Task Force, Baldwin later made a call for all 50 state attorneys general to review their policies for police training and law enforcement.

Baldwin revealed during an interview on 60 Minutes Sports set to air Tuesday at 8 p.m. that he had received death threats after initially speaking out on police-related topics.

HEADLINE	10/03 Study: distrust yields fewer 911 calls
SOURCE	http://www.washingtontimes.com/news/2016/oct/3/police-distrust-among-blacks-yields-fewer-911-call/
GIST	<p>Black Americans have significantly less confidence in their local police departments than white Americans, surveys show, and it could be having some startling effects on crime.</p> <p>A new study analyzing nearly 900,000 911 calls in Milwaukee found that emergency calls from majority-black neighborhoods dropped precipitously after the highly publicized beating of a black man by police officers. In the months after the number of emergency calls fell, Milwaukee saw an uptick in homicides — highlighting a potential link between incidents of police violence and an increases in violent crime.</p> <p>The findings come as the latest FBI crime data released last week show a 4 percent uptick in violent crime and an 11 percent increase in homicides in 2015.</p> <p>The study of 911 calls, done by faculty from Harvard, Yale and Oxford universities, looked at calls placed to police in Milwaukee between 2004 and 2010. It honed in on calls and crime rates after the widely publicized 2004 beating of Frank Jude, a black man, by several police officers. The incident had gone unreported for months before the Milwaukee Sentinel Journal broke the story in early 2005.</p>

Controlling for factors such as seasonal ebbs in crime rates and weather, the researchers estimated that 22,000 fewer 911 calls were made over the following year after accounts of the beating hit the press — equating to a 17 percent drop overall.

However, calls from majority-black neighborhoods fell by 56 percent, while those from white neighborhoods had “a small decline.” In addition, the study found calls from white neighborhoods rebounded to usual levels much more quickly than those from black neighborhoods.

The study notes that publicized cases of police violence “not only threaten the legitimacy and reputation of law enforcement; they also — by driving down 911 calls — thwart the suppression of law breaking, obstruct the application of justice, and ultimately make cities as a whole, and the black community in particular, less safe.

“It is one thing to disparage law enforcement in your thoughts and speech after an instance of police violence or corruption makes the news,” the study notes. “It is quite another to witness a crime, or even to be victimized, and refuse to report it.”

The study’s authors conclude that the drop in 911 calls “shows that in predominantly black neighborhoods, publicized cases of police violence can have a community-wide impact on crime reporting that transcends individual encounters.”

One of the authors, Matthew Desmond of Harvard, told the Sentinel Journal that the researchers could not definitively say the drop in calls caused the homicide spike, but “I think the pattern of homicide data does suggest the drop in crime reporting in the immediate aftermath of Frank Jude might have contributed to that spike in a major way.”

HEADLINE	10/04 Govt. rehires firm linked to OPM breach
SOURCE	http://www.infosecurity-magazine.com/news/us-government-re-hires-firm-linked/
GIST	<p>A new US government bureau created recently to manage security background checks on staff has hired a private company linked to the massive data breach at the Office of Personnel Management.</p> <p>US officials confirmed the hiring of KeyPoint Government Solutions by the new National Background Investigations Bureau (NBIB), Reuters claimed.</p> <p>An OPM spokesperson claimed the agency has already told Congress that a KeyPoint contractor’s log-ins were stolen by hackers and subsequently used to breach government systems, landing the attackers with a goldmine of sensitive security clearance information relating to federal employees.</p>

	The NBIB, which was created partially in response to that breach of over 22 million records, will apparently use KeyPoint staff and those from three other private sector firms to carry out field interviews for security clearance investigations.

HEADLINE	10/03 Seattle safe injection sites proposed
SOURCE	http://mynorthwest.com/409741/safe-injection-sites-seattle/
GIST	<p>The Seattle City Council was briefed Monday on a proposal for safe injection sites aimed at drug users in the region. The proposal is an attempt to mitigate the negative public effects of addiction in the area.</p> <p>“A major recommendation was that we create, essentially, a location where people can use drugs they obtain, bring them into the facility, they can get clean supplies to use those drugs, and be monitored during that consumption — generally by an RN or a health care provider,” Dr. Caleb Banta-Green from the University of Washington told the council.</p> <p>His argument is that the sites will cut down on public drug use, and therefore remove many of the negative effects on society such as dirty needles on the ground, overdoses and public use.</p> <p>The proposal is the product of the Heroin Crisis Task Force, which was formed by Seattle Mayor Ed Murray and King County Executive Dow Constantine. The task force is promoting one safe injection site in Seattle and one outside the city limits. On Monday, they made their case for why such safe injection sites are needed. According to Dr. Banta-Green, there were about seven million syringes traded in at King County needle exchanges last year – that equates to 19,000 each day.</p> <p>“What we’ve seen so far, the evidence is that they will use less in public,” Dr. Banta-Green said. “There will be less public consumption. There will be less infection disease transmissions. And the evidence is pretty good that there will be less overdose deaths.”</p>

HEADLINE	10/03 Major Aleppo hospital bombed again
SOURCE	http://abcnews.go.com/International/major-hospital-aleppo-syria-bombed-time-days/story?id=42533806
GIST	<p>Bombs struck one of the largest hospitals in east Aleppo, Syria, today for the third time in less than a week.</p> <p>The hospital, known as M10, operates underground and is the largest trauma and ICU center in eastern Aleppo. It was hit by bunker-buster bombs, which can destroy underground structures and hurt people sheltering underground, according to the Syrian American Medical Society (SAMS), which supports the hospital.</p>

	<p>The same hospital was also attacked Saturday and last Wednesday. Every time, it was forced to shut down due to extensive damage. The hospital was also closed at the time of today’s attack, but staff and technicians were inside, trying to repair the facility and protect the equipment, according to SAMS.</p> <p>“Our initial reports are telling us that three maintenance workers were killed and other staff remain under the rubble,” SAMS spokesperson Caroline Philhower told ABC News. “We are still learning more information as the attack was very recent.”</p> <p>Fewer than 30 doctors are now left working in Aleppo city, down from 35 several days ago, a senior official of the United Nations health agency said.</p>

HEADLINE	10/03 Immigration rules led to deadly gangs?
SOURCE	http://www.foxnews.com/us/2016/10/03/us-immigration-policies-allow-gangs-to-thrive-in-violence-plagued-ny-community-say-critics.html
GIST	<p>Critics say a combination of federal and local policies is being blamed for rolling out the red carpet for illegal immigrants, some of whom have committed violent crimes, allowing them to pour into a Long Island, N.Y., neighborhood where four teens have been murdered in recent weeks.</p> <p>Federal policy that allows Central American children apprehended by Border Patrol to be placed with illegal immigrant sponsors has sent thousands of teens to the region in recent years. While most don't arrive as hardened gang members, many are placed in homes with little supervision, say critics.</p> <p>“It should not be surprising that when these kids are allowed to enter illegally and then are placed in the custody of someone who is here illegally, they do not have much of an interest in complying with the process,” said Jessica Vaughan, director for policy studies for the Center for Immigration Studies.</p> <p>Compounding matters for some communities on Long Island, which has been plagued with violent crimes from the notorious El Salvadoran gang MS-13, is Suffolk County's status as a sanctuary county. The Center for Immigration Studies reports that Sheriff Vincent DeMarco, who could not be reached for comment, refuses to honor Immigration and Customs Enforcement detainers without a warrant.</p> <p>Vaughan noted that illegal immigrants have a big incentive to sign up as sponsors of unaccompanied children, whether they are family or not: Doing so shields them from deportation.</p> <p>Curtis Sliwa, founder of the community protection group the Guardian Angels, said Suffolk County being a sanctuary region only empowers MS-13.</p>

"Sanctuary will have a great impact on safety in Suffolk County as long as gang bangers are allowed to prey on their own people," says Sliwa, referring to the MS-13 primarily targeting Central American migrants for gang membership.

Known for patrolling subway platforms in New York City, Sliwa has now deployed Guardian Angels to bucolic communities on eastern Long Island, where violent crime at the hands of MS-13 is rising.

Vaughan and others claim the situation is a recruiting pipeline for MS-13, and Suffolk County has seen a rise of the notorious and violent gang. Last month, Nisa Mickens and Kayla Cuevas, both 15, were brutally murdered. Days after the teens were found beaten to death, the skeletal remains of 19-year-old Oscar Acosta and 15-year-old Miguel Garcia-Moran were discovered, all allegedly linked, according to the Suffolk County Police Department, to this violent clique -- sparking community outrage.

Vaughan has observed, through close analysis of immigration court records, that about half of the children are not showing up to their hearings.

Between 2013 and 2015, ICE had deported 5,834 people who entered the country as unaccompanied children, but by the time the feds catch up to them they are well into their adult years and have already committed a violent crime.

Mark Weber, spokesman for the U.S. Department of Health and Human Services, said the goal of the program is to place the children with their parents or family members who are already in the country -- regardless of their immigration status.

"Last year, 55 percent of children were released to a parent, 36 percent were released to a close family member and the remaining 9 percent were released to a distant or non-relative sponsor," says Weber.

Weber says he does not have updated figures on how many children were placed with illegal immigrant sponsors, which includes home visits and follow-up calls once the child has been placed with the sponsor. However, the statistics posted on the HHS website tell part of the story.

According to the HHS website, in fiscal year 2015 only 1,895 home visits were conducted out of 33,726 referrals made by DHS.

Vaughan expressed little confidence in the follow-up phone call system, saying there is no way to monitor the progress of the child.

Over the past four years alone, 225,725 unaccompanied Central American children have entered the United States -- with nearly 3,500 of them being placed in Suffolk County between October 2013 and July 2016.

HEADLINE	10/03 NHTSA probes Ford vehicles
SOURCE	http://www.cbsnews.com/news/us-probes-ford-vehicles-for-steering-door-latch-problems/
GIST	<p>DETROIT -- Two Ford Motor Co. models are under investigation by U.S. safety regulators for problems similar to those that have caused nearly 3 million other Ford vehicles to be recalled.</p> <p>The probes cover about 643,000 vehicles including 380,000 Edge SUVs from the 2011 to 2013 model years, and nearly 263,000 Fusions from the 2010 model year. In each case, other Ford vehicles have been recalled for what appears to be the same problems.</p> <p>About 1,560 people have complained to the National Highway Traffic Safety Administration that the “door ajar” warning light won’t shut off on the Edges, and some have reported that the doors can fly open while the SUVs are moving. One injury was reported. The problem is similar to one that has dogged Ford for the past year, forcing it to recall 2.4 million other vehicles.</p> <p>In the other case, NHTSA said it has 547 complaints that the electric power-assisted steering can fail on the 2010 Ford Fusion. Last year, the company recalled Fusions from the 2011 and 2012 model years, but did not recall the 2010 models even though they have the same power steering system, the safety agency said in documents posted Monday. NHTSA said it has 12 reports of crashes and four injuries due to the problem.</p> <p>The investigations could lead to expansion of the previous recalls, although that decision has not been made. The safety agency says it will “assess the scope, frequency and consequence” of the alleged defects.</p>

HEADLINE	10/03 India, Pakistan troops exchange gunfire
SOURCE	http://www.cbsnews.com/news/indian-pakistani-troops-exchange-gunfire-kashmir/
GIST	<p>SRINAGAR, India - Indian and Pakistani troops fired at each other in disputed Kashmir on Monday, as Indian troops searched an army camp elsewhere in the region where suspected militants killed an Indian paramilitary soldier.</p> <p>The exchange of gunfire lasted about five hours and caused no casualties, according to an Indian army officer who spoke on condition of anonymity because he was not authorized to speak to media. The army said earlier that Pakistani troops had fired without provocation using small arms and mortar shells in the Poonch sector of the Line of Control separating the Indian- and Pakistani-controlled parts of Kashmir.</p> <p>Pakistan’s army said in a statement that its troops were responding to unprovoked firing by Indian soldiers.</p>

HEADLINE	10/03 WSDOT: Tacoma traffic delays to 2017
SOURCE	http://q13fox.com/2016/10/03/wsdot-expect-traffic-backups-near-sr-16-and-i-5-in-tacoma-through-spring-2017/
GIST	<p>TACOMA — Drivers are bracing for backups and delays on eastbound State Route 16 through Tacoma.</p> <p>The Washington State Department of Transportation says starting Wednesday the SR 16 on-ramp to northbound I-5 will be reduced to one lane until spring 2017. The change will give construction crews room to work on a project extending HOV lanes into Tacoma, according to WSDOT.</p> <p>Crews are building new road approaches to the newly constructed bridge over Interstate 705/State Route 7. WSDOT says that new bridge will eventually carry all northbound I-5 traffic. The existing northbound I-5 lanes will be converted into HOV lanes.</p> <p>“Because we’ve used this traffic configuration before, we already know it will cause delays,” said WSDOT Project Engineer Brenden Clarke. “Space is very tight through the area, which limits our options. We’ll work as quickly as we can to get this phase of construction behind us.”</p>

HEADLINE	10/03 ‘Cops’ returns to Pierce County
SOURCE	http://mynorthwest.com/409207/cops-returns-to-pierce-county/
GIST	<p>Pierce County deputies were back in the limelight over the weekend for the newest episode of “Cops.”</p> <p>The “Clueless” episode aired Saturday night. For Pierce County law enforcement, it’s a privilege.</p> <p>“I’ve worked with ‘Cops’ for years,” sheriff’s office spokesperson Deputy Ed Troyer told Don O’Neill earlier this year. “We’ve done over 100 segments with them and we like having them here. Our guys like it. It’s great for morale.”</p> <p>Though some departments don’t want to be the center of attention, that isn’t the case over in Pierce County.</p> <p>“We get people sending us emails from all over the country about how professional our guys are,” Troyer said. “We got guys that saw us on ‘Cops,’ applied, and now work for us.”</p> <p>Troyer told the “Ron and Don Show” that the Pierce County Sheriff’s Office is quite different than a lot of other agencies that are on camera. The department covers several communities — from Mount Rainier to the Key Peninsula.</p> <p>That’s not to say the department hasn’t passed on the opportunity to be on the show in the past. For example, the department took a pass on the show’s 26th season. That was because of a lack of manpower, Troyer told The News Tribune.</p>

	<p>Around the same time the department made the decision to not join the reality television program, it was also reporting its lowest staffing levels in years. A study found the department was down to 179 deputies in 2013 and 2014. Staffing has since been slowly increasing since. There were reportedly 184 deputies working for the department in 2015 and 189 for 2016.</p> <p>Those staffing levels are still significantly lower than they were in 2007 when 235 deputies were working for the department.</p> <p>In June, the department reported it wants to hire 72-82 new employees, including civilians, deputies, sergeants, and lieutenants.</p>

HEADLINE	10/03 Aiming for Cascadia innovation corridor
SOURCE	http://www.nytimes.com/2016/10/03/technology/next-big-tech-corridor-between-seattle-and-vancouver-planners-hope.html? r=0
GIST	<p>VANCOUVER, British Columbia — Seattle and Vancouver are like fraternal twins separated at birth. Both are bustling Pacific Northwest coastal cities with eco-conscious populations that have accepted the bargain of dispiriting weather for much of the year in exchange for nearby ski slopes and kayaking and glorious summers.</p> <p>Yet 140 miles of traffic-choked roads and an international border divide the two cities, keeping them farther apart than their geographic and cultural identities would suggest.</p> <p>Now the political, academic and tech elite of both cities are looking for ways to bring them closer together, with the aim of continuing the growth of two of the most vibrant economies in North America.</p> <p>“Vancouver has a lot more in common with Seattle than we do with Calgary, Montreal, Toronto, anywhere else in our country,” Christy Clark, the premier of British Columbia, said in an interview. “We should make the most of those cultural commonalities.”</p> <p>Whether their grand vision of a “Cascadia innovation corridor” — which borrows its name from the region’s Cascade mountain range — ever materializes, leaders on both sides of the border have motives for getting cozier immediately. American tech icons like Microsoft, with voracious needs for global engineering talent, are expanding their Vancouver offices, partly because of Canada’s smoother immigration process.</p> <p>For its part, Vancouver wants to bring more American technology companies to the city in hopes of spinning out future entrepreneurs who will expand its comparatively small base of technology companies.</p>

	<p>Last month, officials and executives from both cities huddled in a Vancouver hotel to discuss how to enable people, ideas and capital to flow more freely between them, as heedless of the international border separating the cities as a pod of orcas swimming in the sea.</p> <p>At the Cascadia conference, Ms. Clark and Jay Inslee, the governor of Washington, signed an agreement to deepen the ties between Vancouver and Seattle, including more research collaboration between the University of British Columbia and the University of Washington. Bill Gates, co-founder of Microsoft, and Satya Nadella, its current chief executive, talked about globalization and education.</p> <p>But Vancouver remains a relative small fry in tech, with about \$1.78 billion in venture capital flowing into local tech start-ups in the last decade, compared with about \$8.9 billion in Seattle, the research firm Pitchbook estimates.</p>

HEADLINE	10/03 Report: illegal immigration nears record
SOURCE	http://www.washingtonexaminer.com/border-report-illegal-immigration-set-to-break-record-vip-smuggling-offered/article/2603422
GIST	<p>The newest surge in illegal immigration from Mexico did not slow in August, as expected, and now is on the verge of breaking the 2014 record, driven by deported migrants eager to return and illegals paying smugglers extra money for VIP services, according to a new report from the border.</p> <p>"FY2016 has already seen the second highest number of apprehensions in the last five years, and will likely come close to or even exceed the number of apprehensions as the crisis year of 2014," said the report from two immigration experts for the Wilson Center who recently return from a border tour to conduct interviews with immigrants.</p> <p>What was surprising, said the report, is that the expected slowdown in illegal immigration in August, when the heat typically drives people away, didn't occur.</p> <p>"Central Americans continue to arrive at the U.S.-Mexico border in surprising numbers. While they have not yet surpassed the peak of fiscal year 2014, August 2016 had the highest number of [unaccompanied children] and family unit apprehensions of any August in the past five years including 2014. Normally, apprehensions begin to decline in August because of the heat and the reduced demand for seasonal labor in the U.S. – which makes the increased apprehension numbers this August surprising," said the report.</p>

HEADLINE	10/03 Army secretary: stretched very thin
SOURCE	http://www.newsmax.com/Newsfront/army-force-soldiers-isil/2016/10/03/id/751460/
GIST	The Army is being "stretched very thin" as it draws down to a total force of 980,000, and "I do worry about that," the service's top civilian leader said Monday.

At the Association of the United States Army's annual convention in Washington, Army Secretary Eric Fanning said the rise of ISIS and Russian aggression are creating a bigger demand for soldiers, **Defense News reported.**

"We did not see Russia being as aggressive as it is," Fanning said, per Defense News. "We did not have ISIL to contend with like we do now. There are a lot of requirements on an Army that is being asked to do a lot of things globally.

"Just in the last four years or so, we have increased our uniformed [and] civilian presence in the Pacific theater by 50 percent while we are drawing down."

Defense News noted the drawdown aims for 450,000 in the active Army, 335,000 in the Army National Guard, and 195,000 in the Army Reserve by the end of 2018.

"I do worry about that," Fanning said. "We are running it hard."

But Fanning said any increase in Army forces cannot be done without proper funding, Defense News reported.

"The worst thing for the Army would be that we are required to keep a larger force structure but the budget does not change," he said. "We have already taken a lot of risk in our modernization accounts . . . and in our operations and maintenance accounts. The force structure that we are headed towards, while there are a lot of requirements levied against it, it is, we think, a balanced force structure for the budget that we have."

HEADLINE	10/03 LAPD chief defends 2 fatal shootings
SOURCE	http://www.cbsnews.com/news/lapd-chief-defends-2-fatal-weekend-police-shootings/
GIST	<p>LOS ANGELES -- The Los Angeles police chief on Monday defended the use of deadly force against two men in separate fatal shootings over the weekend, saying one turned toward officers with a gun and the other pointed what looked like a real gun at police.</p> <p>LAPD Chief Charlie Beck released new details of Saturday's shooting of 18-year-old Carnell Snell in South Los Angeles and a fatal police shooting of an unidentified Hispanic man on Sunday.</p> <p>The shootings come amid heightened tensions over police actions involving black people and other minorities across the country.</p> <p>In Snell's shooting, officers tried to pull over a car he was in because it had paper plates that didn't match the year of the vehicle -- a possible indication of a stolen car and something commonly seen in drive-by shootings, Beck said.</p> <p>Snell, seated in the back, looked at officers and then ducked down "as if to hide from them," Beck said.</p> <p>When officers tried to pull the car over, Snell jumped out holding his waistband and the foot pursuit began, he said.</p> <p>After a chase of several hundred yards, Beck said, Snell took a gun from his waistband and turned in the direction of the pursuing officers, prompting the shooting.</p> <p>Snell died at the scene and police recovered a fully loaded semi-automatic gun with one round in the chamber within 5 feet of where Snell lay, Beck said, adding that the weapon had not been fired.</p> <p>In the other shooting Beck addressed, a man was shot when he pointed what turned out to be a replica handgun at police in another high-crime area on Sunday, the chief said, adding that an orange tip had been colored black to make the replica look real.</p> <p>The man remained unidentified. He was only described as Hispanic.</p>

	Beck said both officers involved in that shooting were wearing body cameras and the footage supports their accounts while refuting claims that the man was shot on the ground.

HEADLINE	10/04 Colombia’s rebels left in limbo
SOURCE	http://time.com/4517544/colombia-rebels-farc-peace-deal-limbo/?xid=homepage
GIST	<p>BOGOTA, Colombia (AP) — As peace talks in Colombia advanced over the past year, 7,000 rebel fighters began slowly emerging from their jungle hideouts hoping for, if not a hero’s welcome, at least an outstretched hand from fellow Colombians tired of a half century of bloody combat.</p> <p>But with the peace deal’s stunning defeat in a referendum Sunday, the future of the Revolutionary Armed Forces of Colombia’s rebels is now in limbo just a few days after they unanimously ratified the accord and began planning a return to civilian life.</p>

For now, a return to the battlefield in a war that has already killed 220,000 people and displaced 8 million seems unlikely. Within hours of defeat, FARC leader Rodrigo Londono reaffirmed the group's commitment to peace, saying its only weapon going forward would be the power of its word. On Monday, he said his troops would honor its commitments to the government and stick by a permanent cease-fire.

The government has vowed the same and President Juan Manuel Santos quickly dispatched his negotiators to Cuba to try to salvage the accord. He also extended an olive branch to arch-rival former President Alvaro Uribe, inviting the hard-line conservative who led the opposition to the accord to join him in a bid to renegotiate and strengthen it.

But the rebels' ambition, enshrined in a 297-page document that would have allowed them to avoid jail time and form a political movement with seats in Congress, is now at risk. As part of the deal, rebels who confess their crimes to special peace tribunals were to be spared prison sentences and instead perform development work in areas hard-hit by the conflict.

Colombians overwhelmingly loathe the FARC, who they blame for dozens of crimes from drug-trafficking and the forced recruitment of child soldiers to kidnapping and attacks on civilians. That hatred was only reinforced by Sunday's results. The FARC always opposed Santos' idea of a referendum and instead favored ratifying the accord in a constitutional convention.

HEADLINE	10/03 Geologists: major L.A. quake soon
SOURCE	http://www.king5.com/news/local/7-earthquake-to-shake-la-or-not/328689465
GIST	<p>HOUSTON-LOS ANGELES (KHOU) -- As I type this up from my perch in Houston -- an area more at risk for a meteor impact than a major earthquake -- learning of one of the first ever, "earthquake advisories" issued for Los Angeles sounds like something out of the movies. Geologists with the California Earthquake Prediction Evaluation Council (CEPEC) say a 7.0 could hit at any moment either today or tomorrow.</p> <p>The reason for the hype? A large grouping of micro-quakes have occurred with high frequency -- one after another -- in the Salton Sea, a lake located directly on the San Andreas fault southeast of Los Angeles.</p> <p>Earth scientists say this, "swarm" of quakes could act like the wick to a firework, triggering the infamous fault to unleash a historic and devastating 7.0+ quake right through our nation's 2nd largest city. The San Andreas fault typically shakes once every 200 years, but according to geological history it hasn't since the 17th century. If 1680 was the last big one, LA is about 136 years overdue!</p> <p>We've only popularly speculated what could happen in summertime blockbusters like, "San Andreas" with The Rock and in B-movies like, "10.0 Earthquake" (which was actually pretty entertaining.) While the state of California wouldn't separate from the continent and while LA would not be sent plummeting into the sea, its countless warehouses, movie studios, cinder block buildings, scores of downtown skyscrapers, its theme parks and bridges -- all could break apart with debris falling to the streets below. A 7.0 in LA would mean that that the ground could shake for one minute straight, with violent aftershocks for days after. Fires from broken natural gas lines, impassible roads from fallen overpasses, and general mayhem would result in looting and general anarchy. The National Guard would have to swoop in -- like ASAP -- in a huge mobilization.</p> <p>If LA does get a huge earthquake, it'll be horrible -- but scientifically, it'll be a landmark in earthquake forecasting. So far, there have been no successful earthquake warnings and consequently millions of lives worldwide have been lost. If they get it right, it'll not only shake up LA, but the whole world.</p> <p>The chance for this happening today is roughly double what it is on any other day: only 1 in 3000. But, some geologists estimate using this same data says that there's only a 1 in 100 chance in the next day or so! In the real world, that's thankfully still a generally small chance, but if it was going to happen sometimes soon anyway, this would be the time.</p>

HEADLINE	10/03 'Thin blue line coffee' helps COPS
SOURCE	http://www.king5.com/news/local/thin-blue-line-coffee-to-help-families-of-fallen-officers/328680334
GIST	<p>EDMONDS, Wash. -- After 18 years in law enforcement, Carl Orsi has consumed more than his share of coffee. It runs through his veins, much like his commitment to police officers everywhere.</p> <p>Orsi and his wife Cheri moved to Edmonds when he retired from the Berkley, California Police Department. His career saw the start of the crack cocaine epidemic, the Rodney King riots, and more murders than he can remember. But it was what he watched from the safety of his living room this summer -- the ambush-style slaughter of five Dallas police officers at a Black Lives Matter rally -- that impacted him in a way he has never experienced before.</p> <p>"The job is hard enough. Now you've got people targeting police officers just for the fact they wore a blue uniform," Orsi said.</p> <p>Not long after the Dallas killings, Orsi decided to get into the coffee business. He founded Thin Blue Line Coffee, a reference to the "thin blue line" of police that protects people from criminals.</p> <p>Proceeds from the sale of his coffee go to Concerns of Police Survivors (COPS), an organization that supports families of police killed in the line of duty.</p> <p>"Once you're in the law enforcement family, you're in the family for good," said Orsi. "I just want to take care of family."</p> <p>Orsi sees the venture as simply a way to support people who have lost a loved one. It's a cause he believes everyone can get behind regardless of color or politics.</p> <p>"Because it doesn't just affect the officer. It affects the family, their teammates, the whole community."</p>

HEADLINE	10/03 Who are Syria's 'white helmets'?
SOURCE	http://www.nbcnews.com/news/world/who-are-syria-s-white-helmets-n656171
GIST	<p>As the Syrian peace accord has crumbled — even threatening to reignite the Cold War — and barrel bombs continue to fall on the rebel-held city of Aleppo, many are fleeing the death and destruction. But one group of residents has vowed to stay behind and help.</p> <p>They are the "White Helmets," a volunteer team of first responders who plunge head-first into crumbling buildings to save civilians trapped in the rubble of Syria's brutal civil war.</p> <p>Named after their iconic protective headgear, the group of about 3,000 rescue workers have reportedly saved more than 60,000 lives since the civil war began.</p>

	<p>In August, their courage garnered international attention when they rescued 5-year-old Omran Daqneesh, the stunned little boy covered in dust and blood whose photo shocked the world.</p> <p>They have since been nominated for the 2016 Nobel Peace Prize.</p> <p>The heroism of these ordinary citizens — former doctors, shopkeepers, and teachers — is profiled in a 40-minute Netflix documentary.</p> <p>"These are very normal, ordinary people who now do one of the most extraordinary jobs on this planet," said the film's director, Orlando von Einsiedel told NBC News last month.</p> <p>"They represent the best of what humanity can be," he said. "It has given us faith in humanity and has made us want to be better people."</p>

HEADLINE	10/04 Turkey suspends 12,800 police officers
SOURCE	http://www.nbcnews.com/storyline/turkey-military-coup/turkey-suspends-12-800-police-officers-following-failed-coup-n659101
GIST	<p>ANKARA, Turkey — Turkish authorities on Tuesday suspended some 12,800 police officers from duty over their suspected links to U.S.-based Muslim cleric Fethullah Gulen as Turkey pressed ahead with its vast crackdown on a network it says is behind the country's July 15 failed military coup.</p> <p>In a brief statement posted on its website, the Turkish police headquarters said those suspended were allegedly "in cohesion with or connected to" Gulen's movement. It said 2,523 of them were police chiefs.</p> <p>The move comes a day after the Cabinet extended by a further three months a state of emergency declared after the coup, which has facilitated the government's crackdown on Gulen's movement.</p>

HEADLINE	10/03 Nigeria risks renewed oil supply curbs
SOURCE	http://www.bloomberg.com/news/articles/2016-10-03/nigeria-risks-renewed-oil-supply-curbs-amid-fraying-cease-fire
GIST	<p>If the Nigerian government wants to fight militants blowing up oil pipelines, it should send troops into the creeks and mangrove swamps of the Niger River delta. Not the city.</p> <p>That's the suggestion of Babalola Olarewaju, a taxi driver who plies the airport route in Port Harcourt, the largest city in the restive oil-rich region.</p>

“We’re talking about people who blow up pipelines in the night and then disappear,” said Olarewaju, 41, as he perched on the hood of his rickety cab outside the Le Meridien Hotel in the city center, referring to three T-72 tanks, Nigeria’s main battle tank, parked about a mile away. “What has a tank got to do here in the city?”

Dozens of tanks and 3,000 more troops have joined existing forces in and around Port Harcourt in the past month, a sign the government is pulling out the stops to quell a new wave of violence in Africa’s second-largest oil producer. So worrisome are the attacks that OPEC allowed Nigeria to be exempt from production curbs the cartel agreed on last week, the oil ministry said.

A six-week-old cease-fire show signs of weakening: The Niger Delta Avengers, responsible for more than 90 percent of all attacks this year, on Sept. 23 claimed responsibility for an attack, its first since July 24, on a key supply pipeline to Royal Dutch Shell Plc’s Bonny export terminal, a few miles outside Port Harcourt, in a statement on its website. The authenticity of the website, which has proved reliable before, couldn’t be verified.

There’s a lot at stake. Exxon Mobil Corp. is planning to resume some shipments at its Qua Iboe terminal, the country’s largest, at the end of September and expects repairs on the 400,000 barrel-a-day main export line will be completed in December. Shell also expects its Forcados terminal, out since February, to come back on line any time now. The company earlier this month lifted a delivery halt on its Bonny terminal shipments it had imposed in August after saboteurs breached its main supply pipeline.

HEADLINE	10/03 Millions brace for Caribbean hurricane
SOURCE	http://abcnews.go.com/International/hurricane-matthew-expected-bring-life-threatening-floods-parts/story?id=42531051
GIST	<p>The brunt of Hurricane Matthew's dangerous wind and rain is expected to strike several Caribbean countries tonight and Tuesday as the Category 4 hurricane heads toward Haiti, Cuba and Jamaica.</p> <p>The hurricane, with maximum sustained winds of 145 mph, is expected to bring "life-threatening flash floods and mudslides," according to the National Hurricane Center.</p> <p>According to the Associated Press, the outer bands of the storm were soaking Haiti Monday night. Officials pushed residents in a suburb of Port-au-Prince who lived near a river to seek shelter.</p> <p>At least three people had died in the storm -- one in Colombia, one in St. Vincent and the Grenadines and a fisherman in the waters off Haiti. Another fisherman was missing there, the AP said.</p> <p>Rainfall of up to 25 inches -- with isolated areas of 40 inches -- is forecast over the next two days across southern Haiti and parts of the southwestern Dominican Republic. As much as 12 inches of rain is</p>

	expected in Cuba and parts of western Haiti, and up to 10 inches is forecast in eastern Jamaica, according to the National Hurricane Center.

HEADLINE	10/04 Evacuations as Colorado fire rages
SOURCE	http://abcnews.go.com/US/wireStory/hundreds-buildings-evacuated-fire-rages-colorado-42546238
GIST	<p>A wind-whipped wildfire destroyed several structures and forced hundreds of evacuations near a small mountain community in southern Colorado, authorities said Monday.</p> <p>More than 500 buildings were evacuated throughout the day and into the evening, affecting about 1,250 residents of Beulah, which is southwest of Pueblo. And more residents were warned to be ready to leave if necessary.</p> <p>No injuries were reported.</p> <p>The fire, which has destroyed at least seven structures and burned about 4 square miles, started on top of Beulah Hill on the east side of the community Monday afternoon and jumped Colorado Highway 78, The Pueblo Chieftain reported.</p>

HEADLINE	10/03 What next for Colombia?
SOURCE	http://www.reuters.com/article/us-colombia-peace-idUSKCN1230BH
GIST	<p>Colombia's government and Marxist guerrillas scrambled on Monday to revive a plan to end their 52-year war after voters rejected the hard-negotiated deal as too lenient on the rebels in a shock referendum result that plunged the nation into uncertainty.</p> <p>Any renegotiated peace accord now seems to depend on whether the Revolutionary Armed Forces of Colombia (FARC) could accept some tougher sanctions against them.</p> <p>"No" voters, who narrowly won Sunday's plebiscite, want assurances the rebels will hand in cash from drugs, spend time in jail, and earn their political future at the ballot box rather than get guaranteed unelected seats in Congress.</p> <p>Both President Juan Manuel Santos and Rodrigo Londono, the top FARC commander better known by his nom de guerre Timochenko, put a brave face on the referendum setback after their teams had negotiated for four years in Havana.</p> <p>They vowed to maintain a ceasefire and keep working together, even though that could now be another lengthy and complicated process. "I will keep seeking peace until the last minute of my term," said Santos, who leaves office in mid-2018.</p> <p>In a statement, the FARC said it would "remain faithful" to the accord signed last week with the government and called on Colombians to mobilize peacefully to support terms of the existing agreement.</p>

HEADLINE	10/03 US cuts talks with Russia over Syria
SOURCE	http://www.cbsnews.com/news/us-cuts-off-talks-russia-syria-cease-fire-aleppo-hospital/
GIST	<p>WASHINGTON – The U.S. State Department announced Monday it had suspended bilateral talks with Russia over the failed cease-fire in Syria's five-year-old civil war, saying Moscow had "failed to live up to its own commitments."</p>

	<p>The cessation of talks was announced amid worsening diplomatic relations between Washington and Moscow, and just after aid groups said their hospitals have been apparently directly targeted by a Russian-led bombing campaign. Activists have blamed the Russian government for 9,000 deaths in the last year.</p> <p>In a statement, spokesman John Kirby said “Russia and the Syrian regime have chosen to pursue a military course, inconsistent with the Cessation of Hostilities, as demonstrated by their intensified attacks against civilian areas, targeting of critical infrastructure such as hospitals, and preventing humanitarian aid from reaching civilians in need, including through the September 19 attack on a humanitarian aid convoy.”</p> <p>The U.S. and Russia had negotiated a short-lived and largely unsuccessful cease-fire that included a military coordination deal. As part of the suspension, the U.S. is withdrawing personnel that it had dispatched to take part in the creation of a joint U.S.-Russia center. That center was to have coordinated military cooperation and intelligence if the cease-fire had taken hold. The suspension will not affect communications between the two countries aimed at de-conflicting counter-terrorism operations in Syria.</p>

HEADLINE	10/03 Italy: 6,000 migrants rescued off Libya
SOURCE	http://abcnews.go.com/International/wireStory/italy-6000-migrants-rescued-sea-off-libya-42541637
GIST	<p>The Italian coast guard says 6,055 migrants have been rescued in one day in the Mediterranean off Libya. Nine bodies were recovered.</p> <p>The coast guard said it coordinated a total of 39 rescues Monday in the sea about 30 miles north of Tripoli. Smugglers took advantage of the first day of calm seas after days of rough waters to launch vessels crowded with migrants who pay them in hopes of reaching European shores.</p> <p>Italian coast guard and navy ships, as well as vessels in European Frontex sea patrols and several humanitarian organizations, participated in the rescues.</p>

HEADLINE	10/03 Judge tosses Ferguson civil rights suit
SOURCE	http://abcnews.go.com/US/wireStory/judge-tosses-lawsuit-ferguson-protest-police-tactics-42540460
GIST	<p>A federal judge has tossed out a \$40 million civil rights lawsuit that alleged police used excessive force against protesters in Ferguson after the 2014 police shooting death of Michael Brown.</p> <p>U.S. District Judge Henry Autrey, in a 74-page ruling Friday in St. Louis, found that the nine plaintiffs "completely failed to present any credible evidence" proving crowd-control tactics by police in the days following Brown's August 2014 death in the St. Louis suburb involved malice or bad faith.</p>

	<p>Autrey also concluded that the protesters ignored "repeated warnings" to disperse and that the officers named as defendants were entitled to immunity from the lawsuit.</p> <p>The protesters on Monday filed a notice of their plans to appeal Autrey's ruling to the 8th U.S. Circuit Court of Appeals.</p>

HEADLINE	10/03 Hawaii telescope battle rages
SOURCE	http://www.nytimes.com/2016/10/04/science/hawaii-thirty-meter-telescope-mauna-kea.html
GIST	<p>MAUNA KEA, Hawaii — Little lives up here except whispering hopes and a little bug called Wekiu. Three miles above the Pacific, you are above almost half the oxygen in Earth's atmosphere and every step hurts. A few minutes in the sun will fry your skin. Brains and fingers go numb. At night, the stars are so close they seem tangled in your hair.</p> <p>Two years ago, this mountaintop was the scene of a cosmic traffic jam: honking horns, vans and trucks full of astronomers, V.I.P.s, journalists, businesspeople, politicians, protesters and police — all snarled at a roadblock just short of the summit.</p> <p>Abandoning their cars, some of the visitors started to hike up the hill toward what would have been a groundbreaking for the biggest and most expensive stargazing machinery ever built in the Northern Hemisphere: the Thirty Meter Telescope, 14 years and \$1.4 billion in the making.</p> <p>They were assembling on a plateau just below the summit, when Joshua Mangauil, better known by his Hawaiian name of Lanakila, then 27, barged onto the scene. Resplendent in a tapa cloth, beads, a red loin cloth, his jet black hair in a long Mohawk, he had hiked over the volcano's cinder cones barefoot.</p> <p>"Like snakes you are. Vile snakes," he yelled. "We gave all of our aloha to you guys, and you slithered past us like snakes."</p> <p>"For what? For your greed to look into the sky? You guys can't take care of this place."</p> <p>No ground was broken that day or since.</p> <p>To astronomers, the Thirty Meter Telescope would be a next-generation tool to spy on planets around other stars or to peer into the cores of ancient galaxies, with an eye sharper and more powerful than the Hubble Space Telescope, another landmark in humanity's quest to understand its origins.</p> <p>But to its opponents, the telescope would be yet another eyesore despoiling an ancient sacred landscape, a gigantic 18-story colossus joining the 13 telescopes already on Mauna Kea.</p>

	Over the years, some have portrayed this fight as a struggle between superstition and science. Others view the telescope as another symbol of how Hawaiians have been unfairly treated since Congress annexed the islands — illegally in the eyes of many — in 1898. And still others believe it will bring technology and economic development to an impoverished island.

Cyber Awareness

[Top of page](#)

HEADLINE	10/03 Nat'l Cybersecurity Awareness Month
SOURCE	https://www.fbi.gov/news/stories/national-cyber-security-awareness-month-2016
GIST	<p>Data breaches resulting in the compromise of personally identifiable information of thousands of Americans. Intrusions into financial, corporate, and government networks. Complex financial schemes committed by sophisticated cyber criminals against businesses and the public in general.</p> <p>These are just a few examples of crimes perpetrated online over the past year or so, and part of the reason why Director James Comey, testifying before Congress last week, said that “the pervasiveness of the cyber threat is such that the FBI and other intelligence, military, homeland security, and law enforcement agencies across the government view cyber security and cyber attacks as a top priority.”</p>

	<p>The FBI, according to Comey, targets the most dangerous malicious cyber activity—high-level intrusions by state-sponsored hackers and global cyber syndicates, and the most prolific botnets. And in doing so, we work collaboratively with our domestic and international partners and the private sector.</p> <p>But it's important for individuals, businesses, and others to be involved in their own cyber security. And National Cyber Security Awareness Month—a Department of Homeland Security-administered campaign held every October—is perhaps the most appropriate time to reflect on the universe of cyber threats and on doing your part to secure your own devices, networks, and data.</p>

HEADLINE	10/04 Hacked Steam accounts with malware
SOURCE	https://www.hackread.com/hacked-steam-accounts-spreading-malware/
GIST	<p>Steam users are again under the radar of cyber criminals — This time, hacked steam accounts have been found distributing Remote Access Trojan (RAT).</p> <p>Previously we informed our readers about the hacking of Steam accounts. Now a Reddit user is claiming that some of these hacked accounts are distributing malware.</p> <p>The user on Reddit who goes by the alias Hayaddict can be seen alerting about the hacked Steam accounts being used to SPAM malicious URLs. Steam chat is the primary platform used for the distribution of this new malware. The chat messages contain a link to a video available at this address: videomeo.pw. As soon as the recipient of this message visits this page, another message window pops up requesting the visitor to download a Flash Player update to watch the video.</p> <p>Lawrence Abrams from Bleeping Computers writes that if the unsuspecting user downloads this update and installs it, nothing will happen and the video still won't be displayed because the installer is actually a malware. This Trojan immediately executes zaga.ps1, which is a PowerShell script that downloads a 7-zip archive, a CMD script and 7-zip extractor from the zahr.pw server.</p>

HEADLINE	10/03 Real-time phishing emerges in Brazil
SOURCE	http://www.infosecurity-magazine.com/news/realtime-phishing-emerges-in-brazil/
GIST	<p>A real-time phishing campaign is targeting Brazil. This tactic is designed to emulate a banking Trojan by extracting critical data from its victims in real time via a live, interactive phishing attack.</p> <p>According to IBM X-Force, the phishing scheme takes place over a web session between the attacker and the victim. It is able to mimic a target website's look and feel, more so than just an idle phishing page. From afar and behind the scenes, cyber-criminals impersonate the victim's bank and ask for all kinds of account details. Data stolen through interactive phishing can be commercialized on underground boards.</p>

“Most likely, the criminal will access the compromised account from the bank’s website to make a transaction in real time, all the while milking more authentication details from the unsuspecting victim,” they said, in a blog post. “The emergence of this new method will likely contribute to rises in fraud in Brazil over the coming months.”

Typical tactics include sending emails impersonating a bank, redirecting users to fake sites, deploying pharming attacks, inducing malicious proxy changes, or launching fake windows or images on the victim’s desktop to rob access credentials, account information, card data and personally identifiable information (PII). But all of these have one downside: Most banks require users to provide personal details in real time to authenticate customers during digital transactions.

“This usually foils fraud attacks,” the researchers noted. “These details are called out-of-band authentication because they happen away from the user’s browser, via a smartphone, card reader or numeric code chart.”

Interactive phishing takes place via a real-time web session that dupes users with a seamless flow of changing screens and messages controlled by the attacker from a remote server. And it can give cyber-criminals real-time access to a time-based code issued by the bank for a given transaction.

HEADLINE	10/04 SANS Institute IoT botnet warning
SOURCE	http://www.infosecurity-magazine.com/news/sans-institute-in-iot-botnet/
GIST	<p>The SANS Institute is urging security professionals to help monitor the internet for attempts to compromise IoT devices after confirming that they’re happening virtually every minute.</p> <p>The organization’s Johannes Ullrich wrote in a new note that he ran a test using an old DVR connected to a "normal" cable modem internet connection, ensuring that it wouldn’t be used to attack other systems.</p> <p>“The sad part is, that I didn't have to wait long. The IP address is hit by telnet attempts pretty much every minute. Instead of having to wait for a long time to see an attack, my problem was that the DVR was often overwhelmed by the attacks, and the telnet server stopped responding. I had to reboot it every few minutes,” he explained.</p> <p>“Not all attacks were successful. The attacks used various passwords, and my honeypot only allowed logins for one of them. But a couple times an hour, someone used the correct password.”</p> <p>The attacks all followed a similar pattern, according to Ullrich.</p>

	<p>They started with an attacker running commands to ensure they weren't connected to a router or a common honeypot like cowrie.</p> <p>This was followed by some additional fingerprinting, before downloading binaries of only a few hundred bytes.</p> <p>Soon after, they started scanning for more vulnerable IoT devices at more than 100 connections per second.</p> <p>“Interestingly, I didn't see any attempt by these bots to reset the password. The DVR was left wide open to additional attacks,” said Ullrich.</p>

HEADLINE	10/03 ICS-CERT: 427 vulnerabilities 2015
SOURCE	http://www.securityweek.com/over-400-vulnerabilities-reported-ics-cert-2015
GIST	<p>The Industrial Control Systems Cyber Emergency Response Team (ICS-CERT) last week published its annual vulnerability coordination report for the fiscal year 2015. The report provides details on the number and types of security holes disclosed to the agency last year.</p> <p>ICS-CERT published 197 advisories and 16 alerts in 2015, which cover a total of 427 vulnerabilities. This is a considerable increase from the previous year when the organization was only informed of 245 issues.</p> <p>There is also an increase in the percentage of vulnerabilities coordinated with ICS-CERT – only roughly 7 percent of these flaws were disclosed without allowing the vendor to release a patch, compared to nearly 20 percent in 2014.</p> <p>According to ICS-CERT, 43 percent of the security holes reported last year have been rated high severity, a considerable drop compared to the previous year, when more than 70 percent of flaws were classified as high severity. The average CVSS scores have gradually decreased over the past years, from 8.55 in 2010 to 6.85 in 2015.</p> <p>As for the most affected industries, the energy sector tops the chart, with more than 800 vulnerabilities reported since 2011, followed by critical manufacturing, with over 700 flaws. The water and wastewater systems sector was also impacted by over 600 bugs.</p>

HEADLINE	10/03 'DressCode' spotted in Android apps
SOURCE	http://www.scmagazine.com/no-shoes-shirts-or-ties-needed-in-order-to-be-served-by-this-trojan-malware/article/526451/

GIST	<p>Victims don't need shoes or a shirt to get served by the DressCode malware which has already been spotted in 3,000 Android applications, 400 of which are available in the Google Play Store.</p> <p>Trend Micro researchers said the malicious code only makes up a small portion of the code in the "trojanized" apps making it difficult to detect since the malicious apps are disguised as anything from games, skins and themes to phone optimization boosters, according to a Sept. 29 blog post.</p> <p>Once installed the malware connects to its command and control server and allows threat actors to infiltrate a victim's network where it can scan for other unprotected devices for an attacker to seize control over. The malware poses a significant threat to enterprise networks with BYOD programs as it could allow and attacker to bypass the NAT device to attack an internal server or to access sensitive data.</p>

HEADLINE	10/03 IoT botnet code release means mayhem
SOURCE	http://www.scmagazine.com/powerful-botnet-source-code-goes-public-prepare-for-trouble/article/526618/
GIST	<p>The release of the source code for 'Mirai,' the Internet of Things (IoT) botnet responsible for launching a historically large DDoS attack against security researcher Brian Krebs, on Hackforums Friday by a user under the nickname "Anna-senpai," will mark the beginning of a wave of high-powered IoT botnet DDoS attacks, researchers said.</p> <p>Anna-senpai claimed to have gotten into the cybercrime industry to make money with no plans of staying long, releasing the source code in response to increased scrutiny from the security industry, according to an Oct. 1 KrebsonSecurity blog post.</p> <p>"With Mirai, I usually pull max 380k bots from telnet alone," Krebs quoted Anna-senpai as saying. "However, after the Kreb [sic] DDoS, ISPs been slowly shutting down and cleaning up their act. Today, max pull is about 300k bots, and dropping."</p> <p>The malware spreads by continuously scanning the web for vulnerable devices using default or hard-coded usernames and passwords. Once infected, the devices are seeded with malicious software that converts them into the bots and forces them to report to a central control server which can be used as a staging ground for launching powerful DDoS attacks, the post said.</p> <p>Experts agree that the release of the code will trigger a flood of new high powered DDoS attacks powered by insecure routers, IP cameras, DVRs and other easily hackable IoT devices and Rubicon Labs Vice President of Product Rod Schultz told SCMagazine that reusable code blocks driving technological innovation will cause problems.</p>

SOURCE	http://thehackernews.com/2016/10/dropbox-password-hack.html
GIST	<p>Over a month ago, The Hacker News reported about the Dropbox Hack, where hackers had managed to steal more than 68 Million Dropbox accounts in a data breach that was initially disclosed by the online cloud storage platform in 2012.</p> <p>Although the initial announcement failed to reveal the true scale of the data breach, it was in late August when the breach notification service LeakBase obtained files containing details on over 68 million accounts, which contains email addresses and hashed passwords for Dropbox users.</p> <p>Last month, a hacker was selling this Dropbox data dump on a Dark Web marketplace known as TheRealDeal for around \$1200.</p> <p>However, Motherboard recently discovered that a researcher has just uploaded the full dump of hacked Dropbox database online.</p> <p>Thomas White, known online as The Cthulhu, uploaded Monday the full Dropbox data dump onto his website in a move, as he claims, to help security researchers examine the data breach.</p> <p>So, anyone can now download the leaked database of 68,680,741 Dropbox accounts, containing email addresses and hashed passwords, totally for FREE.</p>

HEADLINE	10/03 Facebook takes on Craigslist, eBay
SOURCE	http://money.cnn.com/2016/10/03/technology/facebook-marketplace-craigslist/index.html
GIST	<p>Facebook is taking on Craigslist and eBay with a new marketplace for people to sell and hunt for stuff.</p> <p>Appropriately called "Marketplace" -- which launched Monday -- the section lets people browse items for sale nearby. Buyers can also search and filter results based on category, price and location.</p> <p>The new feature is located via a tab inside the Facebook (FB, Tech30) mobile app.</p> <p>Each listing contains basic information about the item on sale, including photos, descriptions and asking price. There's also a counter for the number of times a post has been viewed.</p> <p>Marketplace lets buyers message sellers and make an offer, too -- as well as make arrangements for pick up and payments. Facebook doesn't facilitate the transactions.</p> <p>After a seller posts a listing, it can be shared elsewhere on Facebook. Although anyone over 13 years of age can join Facebook, the Marketplace feature is only be available to users who are over 18.</p>

	While the feature is new, Facebook users have long been able to buy and sell things through the platform. Many people already create for-sale posts and share them with their friends or inside a group. Now, Marketplace formalizes the process and puts the concept of classifieds in one place.

HEADLINE	10/03 ISIS leader al-Baghdadi 'poisoned'?
SOURCE	http://nypost.com/2016/10/03/isis-leader-al-baghdadi-may-have-been-poisoned/
GIST	<p>The Pentagon is investigating whether ISIS kingpin Abu Bakr al-Baghdadi was poisoned during a lunchtime feast — causing him to fall seriously ill.</p> <p>The ISIS leader and three commanders were eating in the small town of Be'aj, Iraq, when all four suffered “severe poisoning” and had to be “transferred to an unknown location under strict measures,” the Iraqi news agency WAA said.</p> <p>The barbaric terror group, also known as ISIL and Daesh, has launched a full-scale investigation to find the culprits, according to WAA.</p> <p>Pentagon spokesman and Navy Capt. Jeff Davis told The Post that he is “aware of the reports, but we have no information to corroborate [them].”</p> <p>“Suffice it to say we always have great interest in the whereabouts and condition of the leader of ISIL,” Davis added when asked if the US military was looking into the matter.</p> <p>Over recent years, Baghdadi has risen to the top of the extremist world, becoming the most feared jihadi leader since Osama bin Laden.</p> <p>The US government has put a \$7 million bounty on his head.</p>

HEADLINE	10/03 First responders drill for potential attack
SOURCE	http://chicago.cbslocal.com/2016/10/03/drill-prepares-first-responders-for-potential-terror-attack/
GIST	<p>CHICAGO (CBS) — Police officers, firefighters, and other first responders took part in the largest full-scale active shooter exercise in the state overnight in Rosemont.</p> <p>Anti-terrorism experts have said these types of large-scale training sessions are critical to prepare for attacks, saying it isn't a matter of if but when and where the next one is coming.</p>

Return to Top	<p>The drill in Rosemont involved approximately 300 first responders. The exercise was modeled after a Paris-style terrorist attack, with multiple active shooters. It also included a mock truck bomb detonating at a stadium, and dozens of mock terrorists moving in on a public place.</p> <p>Approximately 300 volunteers played the roles of victims and innocent bystanders, who responders needed to help while also searching for the attackers.</p> <p>“The skills that our first responders are honing tonight are applicable in a variety of circumstances. Part of the process is intended to identify gaps in our preparedness, identify strengths so that we can reinforce our strengths, and fill those gaps wherever they exist,” said Ernest Brown, executive director of the Cook County Department of Homeland Security.</p> <p>The drill included first responders from multiple Cook County municipalities, as well as private sector partners.</p>

HEADLINE	10/03 US warships sent to southern Yemen
SOURCE	http://www.foxnews.com/world/2016/10/03/us-warships-sent-to-area-where-iran-backed-rebels-attacked-saudi-led-coalition-ship.html

GIST	<p>The U.S. Navy dispatched three warships near the southern coast of Yemen after four rockets hit and nearly sank a United Arab Emirates auxiliary ship Saturday, two U.S. defense officials told Fox News.</p> <p>Iran-backed Houthi rebels in Yemen claimed responsibility for the attack. There were no reported injuries to the Emirati crew. Al Jazeera reported on video of the attack.</p> <p>Iran supplied the Houthis with the “shoulder-fired rockets” that nearly destroyed the UAE ship, according to two U.S. officials. It was not immediately clear what type of rocket the rebels may have fired.</p> <p>Military officials sent the Navy warships to the southern end of the Bab al-Mandab Strait, also known as the Mandab Strait, which connects the Red Sea to the Gulf of Aden. Two U.S. Navy guided-missile destroyers, USS Mason and USS Nitze, armed with Tomahawk cruise missiles, Harpoon anti-ship missiles and an assortment of deck-mounted high-caliber machine guns, joined USS Ponce, a floating staging ship which includes a compliment of special operations forces, according to one official.</p>

HEADLINE	10/03 DOJ: 561 FBI FISA requests 2012-2014
SOURCE	http://www.homelandsecuritynewswire.com/dr20161003-from-2012-to-2014-fbi-submitted-561-section215-applications-doj-oig
GIST	<p>The Department of Justice (DOJ) Office of the Inspector General (OIG) last week released a June 2016 report examining the FBI’s use of the investigative authority granted by Section 215 of the Patriot Act between 2012 and 2014.</p> <p>Section 215 is often referred to as the Foreign Intelligence Surveillance Act (FISA) “business records” provision. DOJ IG says that the report, which was mandated by the USA Freedom Act of 2015, is the DOJ OIG’s fourth review of the FBI’s use of FISA business records. Three previous reports issued in March 2007, March 2008, and May 2015 addressed the FBI’s use of Section 215 authority between 2002 and 2009. A classified version of the report released publicly last week was submitted to Congress and DOJ leadership when it was completed in June, and was being released publicly upon completion of a classification review by the FBI and the intelligence community.</p> <p>The report released last week notes that from 2012 through 2014 the DOJ, on behalf of the FBI, submitted 561 Section 215 applications to the FISA Court, all of which were approved. DOJ OIG found that while the number of business records orders obtained by the FBI increased significantly between 2007 and 2012 — an increase that was largely driven by the refusal of several communications providers to produce</p>

	electronic transactional records in response to FBI National Security Letters — the number of Section 215 orders peaked in 2012 with 212 orders and has declined annually since that time. DOJ OIG further found the orders were used far more frequently in counterintelligence cases than as a counterterrorism or cyber tool.

HEADLINE	10/03 ISIS battle for Dabiq ‘apocalyptic’
SOURCE	http://www.homelandsecuritynewswire.com/dr20161003-isis-regards-battle-for-dabiq-as-an-apocalyptic-showdown-of-muslim-and-christian-armies
GIST	<p>This may not be the end of the ISIS caliphate – which military experts say will occur sometime during the second half of 2017 – but the Islamist organization views the coming battle for the town of Dabiq in apocalyptic terms nonetheless.</p> <p>U.S.-backed Syrian opposition forces and Turkish military units are within forty-eight hours of reaching the ISIS-controlled Dabiq, which jihadists regard as the preordained site of the final apocalyptic battle between Muslims and Christians.</p> <p>Business Insider notes that Prophet Muhammad foretold 1,400 years ago “the last hour will not come” until an Islamic army defeated “the Romans” there. ISIS view the Americans and their regional supporters as the Romans.</p> <p>Dabiq, located northeast of Aleppo near the Turkish border, has no strategic value, but the Islamists are likely to defend it as long as they can because of its theological value. In the past few weeks the organization has sent several hundred of its most experienced fighters to defend the town, which came under its control in 2014.</p> <p>U.S. commanders say that taking Dabiq would be a blow to ISIS morale, especially as the groups will soon lose Mosul in Iraq and Raqqa in Syria – the two largest cities held by the Islamists.</p> <p>ISIS emphasized the theological significance of Dabiq, even naming one of its two main English-language propaganda magazines after the town.</p> <p>“The spark has been lit in Iraq, and its heat will continue to intensify — by Allah’s permission — until it burns the Crusader armies in Dabiq,” Abu Musab al-Zarqawi, one of Isil’s founders, said in a 2015 issue of the magazine.</p> <p>Military analysts say, however, that the coming loss in Dabiq is not likely to dent the group’s resolve.</p>

	“If they lose the battle, I’m sure they’ll fold it into their narrative of ‘in God’s good time’, said Kyle Orton of the Henry Jackson Society think-tank. “The idea is that there is much suffering and many setbacks needed before the promised land.”

HEADLINE	10/03 FBI charges immigrant in terror plot
SOURCE	http://www.breitbart.com/jihad/2016/10/03/islamic-immigrant-charged-terror-plot-maryland/
GIST	<p>The FBI has detained yet another Islamic immigrant named Mohamed for preparing a jihad attack.</p> <p>This time, the arrested Islamic immigrant is Nelash Mohamed Das, aged 24. He was born in Bangladesh and was living in Maryland.</p> <p>Since 2001, law-enforcement officials have arrested more than 101 people named for Islam’s reputed prophet, Muhammad. Many other Islamic immigrants, converts and citizens have launched deadly attacks against Americans in Orlando, Florida, in Chattanooga, Tennessee, in San Bernardino, California, in Fort Hood, Texas, and in other places.</p> <p>In 2015, Das began to prepare a murder attempt of a U.S. service member living in Hyattsville, Maryland. When he and a confidential FBI source drove to the target’s house on October 3, Das was arrested as he tried to remove the weapons from the car’s trunk.</p> <p>Das repeatedly expressed his determination to comply with Islam’s doctrinaire call for war against non-believers, showed his support for the Islamic States in Syria, and expressed his belief in orthodox Islam’s offer of paradise in exchange for murder.</p> <p>According to the Baltimore Sun, Das used social media last year to express his support for ISIS, prosecutors said, “including support for terrorist attacks in Paris, France, and San Bernardino, California.” Das tweeted the name and hometown of the service member, prosecutors said, and said the service member “aspires to kill Muslims.”...</p> <p>On Twitter, Das also expressed envy of people “slaying kuffar” — killing nonbelievers — and dying as religious martyrs, prosecutors said...</p> <p>During a meeting [with the confidential FBI source] on Sept. 11, prosecutors said, “Das confirmed that he was committed ‘100 percent’ to conducting an attack.”</p> <p>“That’s like my goal in life,” he told the source, prosecutors said. And on Friday, prosecutors said, he sent the source a text: “I’m ready”</p>

HEADLINE	10/04 'Core Al-Qaeda' on rise in Syria
SOURCE	http://www.aol.com/article/news/2016/10/04/core-al-qaida-on-the-rise-in-syria/21491065/
GIST	<p>The group that launched the Sept. 11 attacks, waged insurgent war against U.S. forces in Afghanistan, catalyzed extremist movements in places like Iraq, Yemen, Somalia and North Africa, and was supposed to have been all but "decimated" and hiding in Pakistan's tribal regions has found new life in the conflict in Syria, and according to the Defense Department is on the rise there.</p> <p>The U.S. conducted an airstrike in Syria on Monday morning against an operative in what Pentagon spokesman Navy Capt. Jeff Davis described as "core al-Qaida." Davis wouldn't confirm the effect of the strike or even the target itself, though local media reported it was Abu Farag al-Masri, an Egyptian and senior commander of an al-Qaida affiliate.</p> <p>The strike was against a "prominent al-Qaida leader," Davis said, adding that the military has observed "a bit of a growth of core al-Qaida in Syria."</p> <p>The revelation indicates increased danger for the U.S. from Syria, a veritable cauldron of violence that now serves as one of the most likely havens from which terrorist groups can plan and execute attacks abroad.</p> <p>"Al-Qaida central is not decimated. I'd put it as simply as that," says Charles Lister, a terrorism expert and senior fellow at the Middle East Institute. "If anything, they are rapidly revitalizing themselves on Syrian territory, which should be of serious concern."</p> <p>President Barack Obama and other top U.S. government officials refer to "core al-Qaida" or "al-Qaida central" in the context of having been decimated by U.S. military and intelligence operations during the war in Afghanistan. According to the Pentagon, it differs clearly from other extremist networks operating internationally and on the ground in Syria, such as the Islamic State group, which formally separated itself from al-Qaida after its public rise in 2011; the Khorasan group, considered the experimental arm of al-Qaida's planning operations; or the Nusra Front, now known as Jabhat Fateh al-Sham, a Syrian al-Qaida affiliate that has operated in close tandem with elements of the Syrian opposition fighting the regime of Bashar Assad, including reportedly some opposition groups the U.S. has supported.</p> <p>The al-Qaida that Osama bin Laden founded, now under the leadership of the elusive Ayman al-Zawahiri, sees Syria as an opportunity to establish a second and much more central base of operations where it would have greater access to its enemies. Since 2012, Western intelligence has tracked its operatives moving in and out of Syria from places like Iran, Yemen, Central Asia and elsewhere in the Middle East.</p> <p>"There's been a movement over the last three to four years by al-Qaida in Afghanistan and Pakistan to throw as much resources as possible into Syria because of what it represents: the potential opportunity to have an Afghanistan of the late 1990s but this time in Syria, practically on Europe's doorstep with easy access to Turkey and then back into Syria," Lister says.</p>

HEADLINE	10/04 Afghanistan battle rages in Kunduz
SOURCE	http://abcnews.go.com/International/wireStory/afghan-officials-battle-taliban-rages-kunduz-42547833
GIST	<p>Fierce gunbattles raged for a second day Tuesday across Afghanistan's embattled northern city of Kunduz after the Taliban launched a new, multipronged attack on the city they had briefly captured last year, officials said.</p> <p>Interior Ministry spokesman Sediq Sediqqi said Afghan security forces were "trying to secure the city" but that Taliban gunmen are hiding in residential homes, making progress slow and difficult.</p> <p>The Taliban began their attack from all directions early the previous day. They briefly raised a flag over a main intersection before being repelled from the city center.</p> <p>Mohammad Yusouf Ayubi, the head of the Kunduz provincial council, said the city has become a battlefield, with fighting going on in many different areas on Tuesday.</p> <p>Taliban militants have planted mines in different areas of the city, making movement extremely difficult, he said. "Local people are trapped in their homes."</p> <p>The city fell to the Taliban a year ago before the insurgents were beaten back by Afghan forces with the help of U.S. airstrikes. It is the capital of Kunduz province, a breadbasket region that borders Tajikistan to the north and sits on a major crossroad in the country.</p>

HEADLINE	10/03 Seattle, police union stuck in mediation
SOURCE	http://www.thestranger.com/slog/2016/10/03/24587124/mayor-threatened-seattle-police-union-with-immediate-move-to-arbitration-two-months-ago
GIST	<p>Back in July, one week after the resignation of Seattle Police Officers Guild president Ron Smith and one day after the guild rejected a new contract offer, Mayor Ed Murray threatened to "immediately move" to binding arbitration with the city's largest police union if a labor agreement could not be reached.</p> <p>The move would have brought in an outside arbitrator to settle disputed terms and force an agreement. But more than two months later, with the negotiations dragging into their twenty-first month, the city and union remain in mediation, negotiating with one another.</p>

In a letter obtained by *The Stranger* through a public records request, Mayor Ed Murray wrote to the new head of the police guild, Kevin Stuckey, on July 22:

We cannot continue to operate under a collective bargaining agreement that restricts the ability of the Department and the City to make needed improvements to our operations and accountability processes... One way or another, reform is going to happen. While I remain hopeful that such changes can be achieved at the bargaining table, the city is fully committed to immediately move to interest arbitration if that is necessary.

The city's police officers—SPOG's members—had overwhelmingly voted down the city's contract proposal one day prior. The vote was 823 to 156, according to a report from Q13 Fox.

We published a confidential summary of the offer, which showed the city had negotiated a raft of reforms in the agreement, including changes to the makeup of the Discipline Review Board, a tribunal stacked two-to-one with police that can overturn firing decisions. (Cynthia Whitlatch, fired for racial bias last year, is appealing to the body.) But Sam Sinyangwe, an analyst with the Black Lives Matter group Campaign Zero, said the reforms in the agreement didn't go nearly far enough.

Then, in an August hearing, federal judge James Robart, who oversees the Department of Justice consent decree, sent a strong message to the union: The city would "not be held hostage" by SPOG holding out for more pay in exchange for reforms that protect the civil rights of Seattle residents. The judge threatened to override the negotiation process if the union "resists needed change."

"I think the entire city of Seattle would march behind me in that position," Robart said.

So, why hasn't the city acted on Murray's threat and already moved to arbitration?

"Currently, we remain in mediation," said mayoral spokesperson Benton Strong. "The shift in leadership at SPOG had an impact on the schedule of our negotiations, but discussions continue."

Strong refused to elaborate, so we're left with the above statement—which, given recent events, is a bit puzzling. By the time the mayor sent his letter, the shift in leadership had already taken place. The former SPOG president, Ron Smith, had resigned in the wake of an offensive Facebook post. The mayor was addressing his replacement, Kevin Stuckey, who Smith considered one of his union allies.

Last week, the *Seattle Times* reported that Rich O'Neill, the notorious former-former president of SPOG and current vice-president of the union, is now taking on the lead role in negotiating the contract.

According to the *Times*, O'Neill had campaigned within SPOG against the ratification of the city's previous offer.

HEADLINE	10/03 Police scan gun show license plates
SOURCE	http://www.foxnews.com/us/2016/10/03/feds-enlist-police-to-scan-gun-show-customers-license-plates-report-finds.html
GIST	<p>Federal agents have persuaded police officers to scan license plates to gather information about gun-show customers, government emails show, raising questions about how officials monitor constitutionally protected activity.</p> <p>Emails reviewed by The Wall Street Journal show agents with the Immigration and Customs Enforcement agency crafted a plan in 2010 to use license-plate readers—devices that record the plate numbers of all passing cars—at gun shows in Southern California, including one in Del Mar, not far from the Mexican border.</p> <p>Agents then compared that information to cars that crossed the border, hoping to find gun smugglers, according to the documents and interviews with law-enforcement officials with knowledge of the operation.</p> <p>The investigative tactic concerns privacy and guns-rights advocates, who call it an invasion of privacy. The law-enforcement officials say it is an important and legal tool for pursuing dangerous, hard-to-track illegal activity.</p> <p>There is no indication the gun-show surveillance led to any arrests or investigative leads, but the officials didn't rule out that such surveillance may have happened elsewhere. The agency has no written policy on its use of license-plate readers and could engage in similar surveillance in the future, they said.</p> <p>Last year, the Journal reported that the Drug Enforcement Administration had considered conducting such surveillance at gun shows, but scrapped the plans for unclear reasons. Emails and interviews with law-enforcement officials show ICE went ahead with the strategy in 2010, relying on local police to do so.</p>

HEADLINE	10/02 Surge: NYC schools missing children
SOURCE	http://www.foxnews.com/us/2016/10/02/disturbing-trend-kids-going-missing-from-new-york-city-schools.html
GIST	<p>City schools keep losing kids. Complaints about unsupervised children who went missing from school buildings, buses and field trips or were left unattended surged to 457 last year — nearly twice the 279 cases reported in 2014, the office of the Special Commissioner of Investigation for city schools told The Post.</p> <p>The “disturbing trend” has gotten worse since SCI chief Richard Condon warned Chancellor Carmen Fariña in May 2015 that lax supervision was putting kids in harm’s way. Condon’s report came after the</p>

drowning death of Avonte Oquendo, [a 14-year-old autistic student who ran out of his Queens school undetected in October 2013](#). His body [washed up on a beach several months later](#).

The most alarming cases involve special-needs students and the city’s youngest charges, including 3- and 4-year-olds in pre-kindergarten, which Mayor de Blasio has made it his mission to expand.

At PS 154 in Queens, teacher Stephen Morganlander and substitute paraprofessional Jennifer Vasquez failed in July 2015 to supervise a pre-K boy who ran out of his gym class, left the building and walked four blocks home.

The school had no cameras and the doors had no alarms, SCI discovered. Last November, the city Department of Education claimed it installed more than 21,000 door alarms in 1,200 school buildings to prevent children from wandering off, as required by “Avonte’s Law,” passed by the City Council.

HEADLINE	10/03 Philadelphia investigates clown threats
SOURCE	http://www.usatoday.com/story/news/nation-now/2016/10/03/philadelphia-school-district-investigating-clown-threats/91459542/
GIST	<p>Philadelphia school district officials and police are investigating creepy clown threats made against local schools on social media, officials said Sunday.</p> <p>In a joint statement, the school district and Philadelphia Police Department said officials are investigating the disturbing threats against students and teachers, WCAU-TV reported.</p> <p>“The safety of our children and the communities surrounding our schools is a top priority for us and we are taking this matter seriously,” officials said in the statement.</p> <p>Philadelphia is far from the first city to deal with threatening social media posts warning against violence from creepy clowns. People posing as threatening clowns on social media are forcing schools nationwide to send letters to parents, and some have even been locked down.</p> <p>On Sunday night, the Spring Independent School District in Houston issued a security statement due to new clown threat hoaxes made online, KHOU-TV reported.</p>

HEADLINE	10/03 Russia withdraws from plutonium treaty
SOURCE	http://www.nytimes.com/2016/10/04/world/europe/russia-plutonium-nuclear-treaty.html
GIST	MOSCOW — Saying relations with the United States have deteriorated into a “radically changed environment” of threat and instability, President Vladimir V. Putin withdrew Russia on Monday from a

plutonium disposal treaty that was one of the framework nuclear disarmament deals of the early post-Cold War period.

The treaty, signed in 2000, required Russia and the United States to destroy military stockpiles of plutonium, the radioactive material used in some bomb cores, in a deal presented as yet another step away from nuclear doomsday.

The deal has no bearing on the numbers of nuclear weapons deployed by Russia or the United States. Instead, it concerns 34 tons of plutonium in storage in each country that might go into a future arsenal.

Still, the abrogation signals that the nuclear agreements that accompanied the breakup of the Soviet Union and were to lead the world back from the hair-trigger brink of atomic conflict could be open to revision, as Russia's relations with the West sour on a range of disputes today, including Syria and Ukraine and the Kremlin's interference in the domestic politics of Western democracies.

Russia will withdraw from the original pact and subsequent amendments, the decree says, meaning that the country will no longer be treaty bound to destroy its plutonium stockpiles. But the decree also offers an assurance, backed by no bilateral agreement, that the plutonium will not be used for military purposes.

HEADLINE	10/03 NKorea nuke scientists worked in Russia
SOURCE	http://www.upi.com/Top_News/World-News/2016/10/03/Report-Russia-allowed-North-Korea-nuclear-scientists-to-conduct-research/6581475546563/?spt=hts&or=3
GIST	<p>TOKYO, Oct. 3 (UPI) -- Moscow may have allowed several North Korean nuclear researchers to work at Russian nuclear sites, including a scientist who is under United Nations Security Council sanctions.</p> <p>The North Korean nuclear scientists were allowed to engage in their research in Russia until early 2015 when Pyongyang stopped paying an annual membership fee to the Russian government, Japanese news agency Jiji Press reported Monday.</p> <p>Katsuhisa Furukawa, who served on the U.N. Security Council's North Korea sanctions committee, said the group has evidence the North Koreans were allowed to conduct studies at Russian nuclear facilities in violation of international sanctions.</p> <p>Russian authorities had said the North Korean scientists' work was "not related to nuclear weapons research," but Furukawa said the researchers were working at a major nuclear research institute where North Korea was one of 18 countries in representation.</p>

	The Japanese official said the Russian policy is a violation of international sanctions, adding the research center may have also hosted Ri Chae Son, a North Korean nuclear scientist under U.N. sanctions since 2009.

HEADLINE	10/03 Creepy clown spotted on Idaho trail
SOURCE	http://www.khq.com/story/33307788/creepy-clown-spotted-on-coeur-dalene-trail
GIST	<p>COEUR D'ALENE, Idaho - 17-year-old Tyler Clinedinst told KHQ he was walking to a friend's house on the Centennial trail between Lake City High School and Bluegrass Park Sunday night when he saw a clown emerge from behind a tree.</p> <p>"I heard laughing out of my earbuds, so when I unplugged my earbuds I saw him, and he started chasing me," said Clinedinst. "He had reddish pants on with a red and white shirt and a black mask."</p> <p>Clinedinst said the clown was also holding knives. He ran to his friend's house, locked the doors, and his friend's mother called police.</p> <p>"We see a lot of clowns on Facebook and half of them aren't real probably, but yeah, I didn't expect to see one out here," said Clinedinst.</p> <p>Coeur d'Alene Police confirmed they have received a few calls of people seeing suspicious clowns throughout town. Police say they are aware of what's happening and are keeping an eye out for copycats.</p>

HEADLINE	10/04 NYPD ‘don’t be afraid of the clowns’
-----------------	---

SOURCE	http://www.cbsnews.com/news/creepy-clown-rumors-upenn-umass-uconn-nypd-dont-be-afraid-clowns/
GIST	<p>NEW YORK -- Don't fear the creepy clowns.</p> <p>That was the message on Monday from a top New York Police Department official whose main job is protecting the city from terrorism.</p> <p>Asked about the unexplained spike in reports in other places of menacing by people dressed as clowns, Deputy Commissioner John Miller told reporters that the department had assessed supposed clown threats against the city on social media and deemed them harmless.</p> <p>"We're tracking it but we don't see any real threat here," Miller said. "We have tried to avoid falling into the trap of putting extra police protection or presence in places where we've had these."</p> <p>He added: "Our main message is don't believe the hype and don't be afraid of the clowns."</p> <p>Since August, people in upstate New York and in states including South Carolina, Maryland, Pennsylvania, Ohio and Georgia have reported scary or suspicious incidents involving people dressed as clowns. Two suburban school districts on Long Island recently beefed up security after alerting police of clown reports.</p> <p>The clown scare took over the social media feeds of students at a couple major universities on Monday night, meanwhile, with unfounded rumors about clown sightings on Twitter drawing large crowds onto campuses.</p> <p>Penn State appeared to be the college with the largest clown rumor-related disturbance, with a college police official telling CBS News "hundreds" of people had gathered in the streets. Pictures and video posted online showed students chanting anti-clown slogans.</p> <p>"Several people are saying they have seen clowns, but nobody has actually confirmed they have seen a clown," however, the police official told CBS News.</p>

HEADLINE	10/04 Indonesia air force largest military drill
SOURCE	http://www.reuters.com/article/us-southchinasea-indonesia-idUSKCN124009
GIST	Indonesia's air force is holding its largest military exercise this week, near some of its islands in the South China Sea, in a show of sovereignty over the gas-rich area on the fringe of territory claimed by China, officials said on Tuesday.

President Joko Widodo in June launched an unprecedented campaign to bolster fishing, oil exploration and defense facilities around the Natuna island chain after a series of face-offs between the Indonesian navy and Chinese fishing boats.

China, while not disputing Indonesia's claims to the Natuna islands, has raised Indonesian anger by saying the two countries had "over-lapping claims" to waters near them, an area Indonesia calls the Natuna Sea.

"We want to show our existence in the area. We have a good enough air force to act as a deterrent," said Jemi Trisonjaya, spokesman for Indonesia's air force.

More than 2,000 air force personnel were taking part in the two-week long exercise, which includes the deployment of Indonesia's fleet of Russian Sukhoi and F-16 fighter jets, he said.

Other branches of the Indonesian armed forces are not taking part in exercise, which ends on Thursday.

China claims almost the entire South China Sea, where about \$5 trillion worth of trade passes every year. Brunei, Malaysia, the Philippines, Taiwan and Vietnam also have claims.

While Indonesia is not part of the dispute over claims in the South China Sea, it objects to China's inclusion of waters around the Natuna Islands within its "nine-dash line", a demarcation line used by China to show its claims in the sea.

HEADLINE	10/03 Mystery polio-like illness paralyzing kids
SOURCE	http://www.nbcnews.com/health/health-news/mysterious-polio-illness-paralyzing-u-s-children-n658766
GIST	<p>Little Carter Roberts, of Chesterfield, Virginia, was a typical 3-year-old — playful, healthy, and active. But over the course of a weekend Carter went from his happy-go-lucky self to a paralyzed patient unable to move his arms or legs.</p> <p>"He needed a tube to help him breath," says his mother Robin Roberts. "Doctors were working really hard to try and figure out what was going on."</p> <p>At the hospital, the Roberts family was left with more questions than answers. Doctors considered a list of diagnoses from Guillain-Barré Syndrome to various other auto-immune diseases. Finally, after an MRI scan and hours of waiting, Carter was diagnosed with acute flaccid myelitis (AFM) — a mysterious muscle weakness, similar to polio — that appears to be on the rise this year.</p> <p>On Monday, the Centers for Disease Control and Prevention reported that, as of August 2016, there have been 50 cases of confirmed AFM across 24 states. That's nearly double over 2015, when 21 cases for the whole year were reported.</p>

	AFM has been linked to a strain of enterovirus that's now circulating again. Some doctors are warning this could be the same mysterious, polio-like illness detected in 2014 that paralyzed 120 children.

HEADLINE	10/03 Deal: FBI destroyed Clinton laptops
SOURCE	http://www.foxnews.com/politics/2016/10/03/fbi-agreed-to-destroy-laptops-clinton-aides-with-immunity-deal-sources-say.html
GIST	<p>Immunity deals for two top Hillary Clinton aides included a side arrangement obliging the FBI to destroy their laptops after reviewing the devices, House Judiciary Committee sources told Fox News on Monday.</p> <p>Sources said the arrangement with former Clinton chief of staff Cheryl Mills and ex-campaign staffer Heather Samuelson also limited the search to no later than Jan. 31, 2015. This meant investigators could not review documents for the period after the email server became public -- in turn preventing the bureau from discovering if there was any evidence of obstruction of justice, sources said.</p> <p>The Republican-led House Judiciary Committee fired off a letter Monday to Attorney General Loretta Lynch asking why the DOJ and FBI agreed to the restrictive terms, including that the FBI would destroy the laptops after finishing the search.</p> <p>The immunity deals for Mills and Samuelson, made as part of the FBI's probe into Clinton's use of a private email server when she served as secretary of state, apparently included a series of "side agreements" that were negotiated by Samuelson and Mills' attorney Beth Wilkinson.</p> <p>The side deals were agreed to on June 10, less than a month before FBI Director James Comey announced that the agency would recommend no charges be brought against Clinton or her staff.</p>

HEADLINE	10/03 Teens charged in fake clown threats
SOURCE	http://www.nj.com/gloucester-county/index.ssf/2016/10/clown_threats_lead_to_charges_against_gloucester_c.html
GIST	At least two teens in Gloucester County have been arrested and charged for allegedly posting social media threats similar to the creepy "clown" craze going on around the country, police said.

	<p>More charges may be on the way for two juveniles in Deptford Township, police said Monday night.</p> <p>One of the teens charged is a 13-year-old female — whose identity was not released, but attends Bunker Hill Middle School in Washington Township. Police said she made threats that started out "broadly based," Washington Township Police Department Capt. Dennis Sims said Monday evening. Those threats against students later turned much more specific, Sims added. Names and addresses of specific people were included in the threat, according to police.</p> <p>According to NBC10, the girl made the threats because of the current trend, which began with reports of people dressed as clowns in rural South Carolina trying to lure kids into the woods, and because she thought it would be funny. The report adds that the teen's parents are cooperating with investigators.</p> <p>The girl was charged with one count of cyber harassment, a fourth-degree crime, and released to her parents, police said.</p> <p>Police said later Monday that a second teen — a 14-year-old male — was charged with cyber harrassment in connection with a separate, but similar, investigation.</p> <p>Deptford Police said on Monday that two juveniles will be charged with false public alarm in relation to two different social media accounts that were created and posted threats about clowns coming to harm students and teachers specifically at Deptford schools.</p>

HEADLINE	10/03 Sex assaults prompts new programs
SOURCE	http://mynorthwest.com/409380/prevalance-of-sexual-assault-prompts-new-programs-strategies-from-king-co-advocates/
GIST	<p>Despite the best efforts to prevent sexual assault, it remains prevalent in our state and across the nation.</p> <p>Recent studies find more than 33 percent of women in Washington have been sexually assaulted in their lifetime, but only about one-third sought counseling.</p> <p>Since 1976, the King County Sexual Assault Resource Center has been working to change that.</p> <p>A rape or forcible sex offense happens every 3.5 hours — over 4,000 a year. And 80 percent of sexual assaults happen before the victims turn 18, according to Deanne Yamamoto, the deputy executive director of the King County Sexual Assault Resource Center.</p> <p>“Unfortunately there’s a really big need (for our services). We serve thousands of victims of sexual assault and child physical abuse every year,” Yamamoto said.</p>

Return to Top	<p>The agency says at any given time it has over 800 clients taking part in some form of their open and legal advocacy services alone, and at least 200 receiving trauma-specific therapy.</p> <p>Their ultimate goal in treating the victims is helping them overcome the devastation of post-traumatic stress and learn to lead what she calls a “healthy” life.</p> <p>The organization has developed therapies for young victims, so they can grow up and experience healthy relationships and overcome the trauma of abuse.</p> <p>The focus isn’t exclusively on victims — it’s about prevention as well.</p> <p>“Think about this: sexual assault is 100 percent preventable and it can end tomorrow if we end perpetration,” she said.</p> <p>So how do you do that? It starts young. Yamamoto says the message has to be hammered home from an early age that victimization of any kind, including bullying, is unacceptable.</p>

HEADLINE	10/03 Angry mob busted: Calif. police arrest 3
SOURCE	http://www.foxnews.com/us/2016/10/03/angry-mob-busted-california-police-arrest-3-in-attack-on-patrol-car.html
GIST	<p>California police arrested three men believed to have been part of an angry mob that kicked a patrol car while yelling “F the police, we run the streets”, in an incident that was caught on video and widely shared on social media.</p> <p>The arrests were announced Friday as officials released dashcam video from the California Highway Patrol car, ABC 30 reported.</p> <p>Footage from the incident, which unfolded two weekends ago, showed a group of people in Fresno punching and kicking the stopped car before the officer sped away unharmed.</p> <p>"There were other people that were chanting, yelling, 'F the police, we run the streets,'" Fresno Police Chief Jerry Dyer told the station.</p> <p>Capt. Craig Kunzler said the officer is “doing fine” and is back on the job, but the suspects caused more than \$12,000 in damages and face charges for felony vandalism and inciting a riot, according to ABC 30. The officer reportedly was responding to calls of illegal street racing and reckless driving before the crowd closed in.</p>

	<p>Three men suspected in the attack -- Federico Gonzalez, Gabriel DeAnda and Milton Rodriguez – were identified through the dashcam video and fingerprints on the car.</p> <p>Dyer said one of the men admitted to the attack, saying he was upset at the highway patrol recently towing his vehicle, while another said he was proud of the damage he caused.</p> <p>Police are looking for a fourth suspect, 19-year old Guadalupe Gonzales, and are trying to identify five more people.</p>

HEADLINE	10/04 Guilty pleas in immigration fraud, scams
SOURCE	http://abcnews.go.com/US/wireStory/admit-sham-marriages-crime-reports-immigration-scam-42548611
GIST	<p>Tarunkumar and Sachin Patel wanted to find a way so that more of their friends and business associates from India could get permanent legal status to remain in the United States. But they admitted Monday their plans were federal crimes.</p> <p>Now they and up to 17 others face prison time.</p> <p>The men said that in 2011 they arranged four sham marriages between their friends and American women the two Patels had met. The two are business acquaintances. Then in 2014, Tarunkumar Patel said he began bribing a Mississippi police officer to create false crime reports in an effort to immigration authorities to grant them special visas for victims of certain types of crimes.</p> <p>The Patels, former Jackson officer Ivory Harris and lawyer Simpson Goodman pleaded guilty Monday in federal court in Jackson to conspiracy charges, as did two of the men who benefited from the fake police reports. The Patels and Goodman face up to 10 years in prison, having pleaded guilty to both marriage fraud and the police report fraud.</p> <p>A seventh defendant pleaded guilty Friday, and more guilty pleas from others in the scheme are scheduled this month. Nineteen people were indicted in two linked cases in April.</p>

HEADLINE	10/03 Rising Vegas murder rate strains police
SOURCE	http://www.nytimes.com/2016/10/04/us/las-vegas-homicides.html?_r=0
GIST	<p>LAS VEGAS — In the seven months since Heriberto Diaz Marcial was shot and killed walking home from his job as a casino porter on the Vegas Strip, church volunteers have knocked on hundreds of doors in his neighborhood and handed out fliers seeking information.</p> <p>The police released blurry security footage of a gray sedan tied to his three killers. His wife, Maria Diaz, has gone on television to plead for help.</p> <p>But so far, nothing.</p> <p>Detectives in Las Vegas pride themselves on having one of the country’s better track records for solving homicides, clearing nearly eight in every 10 cases while many other big-city departments struggle to solve half of their murders.</p> <p>But like other big cities across the nation, Las Vegas is in the midst of a dramatic rise in homicides. The rising murder rate is now testing whether the 19 homicide detectives at the Las Vegas Metropolitan Police Department can keep solving those crimes as new calls pour in, from parks awash in heroin, from streets where freelance gang members are quick to draw their guns, and from poor neighborhoods that lie just blocks from the shimmering casinos of the Strip.</p> <p>The nation’s murder rate, which has declined sharply for the last 20 years, rose by nearly 11 percent in 2015, the largest single-year jump in nearly 50 years. But there are still far fewer murders than in the 1990s, and criminologists believe that many large cities are in a period in which they will see steep, and unpredictable, rises and falls in homicides, but that murder rates across the country will remain fairly constant. A few cities were responsible for much of the increase, according to F.B.I. figures.</p>

In Las Vegas, the victims are a mix of African-Americans, whites and Latinos who have been killed during robberies, gang shootings, drug disputes and domestic violence incidents.

For homicide detectives here, the most disturbing factor may be that much of the killing is being committed by teenagers and men in their early 20s, many of whom do not understand the consequences of engaging in violence.

“You find out there was a minor altercation and someone pulled out a gun,” said Lt. Daniel McGrath, who heads the Police Department’s homicide section. “They are so quick to resort to violence that it goes from profanity to shooting.”

As homicides here have swelled to 125 so far this year — a 27 percent increase over 2015 — detectives have watched caseloads grow to five or six apiece, and have become accustomed to phones ringing at 3 a.m. bringing more bad news.

“I’ve got a lot of tired people,” Lieutenant McGrath said.

The pace of the killings has been relentless, even for veteran detectives, who have seen the number creep steadily upward, from 84 in 2012, and are spending more of their time at crime scenes.

April was especially violent, with 24 homicides, the most in any month in the city’s history. While the pace has slowed somewhat, the count this year may surpass the 157 killed in 2006. The city’s worst year was 1996, when 167 people were murdered.

The homicide clearance rate for Las Vegas remains a point of satisfaction for investigators even as they are swamped with cases. Last week, the unit added two detectives to bring the total to 21, in order to help with the caseload, Lieutenant McGrath said.

And Las Vegas is still far better than most cities at clearing homicides — which generally means that a suspect has been arrested or identified.

In Chicago, for instance, detectives solve about 30 percent of their cases, and Philadelphia and Baltimore investigators clear about 50 percent. But clearance rates can swing drastically. Detroit, for instance, solved only about 9 percent of its murders in 2012, but now reports a clearance rate of more than 60 percent.

July 2016

New developments in technology continue to challenge our traditional definitions of search and Fourth Amendment violations. In this month's issue, we look at one case where the court ruled in favor of the suspect when investigators used a StingRay device without a warrant. In another case, however, the court refused to get involved in the technical aspects of a search warrant involving a GPS tracker. Both cases build on *United States v. Jones*, which found that the use of a GPS tracker on a vehicle constituted a search.

But even as the courts grapple with issues created by contemporary investigatory tools, basic investigation tactics continue to be defined. The third case we examine draws on the 1975 *Brown v. Illinois* ruling to further clarify when evidence is admissible following an unlawful detention.

Thanks for reading!

Warrant required for StingRay cell-site simulator device

Agents investigating an international drug-trafficking organization obtained warrants for pen register information and cell site location information (CSLI) for a target cell phone. Using CSLI, the agents were able to determine the general vicinity for the target cell phone, but the location was not sufficiently precise enough to identify the particular apartment building or apartment where the phone was being used.

[Read more](#)

GPS tracker installation specifics fall outside court's jurisdiction

A confidential informant (CI) told officers that Faulkner was traveling to and from Chicago to obtain heroin and then sell it in Minneapolis. The CI described Faulkner's two cars and two residences. During surveillance, officers saw Faulkner driving both cars to and from both residences. The officers obtained a warrant to place GPS trackers on either or both of Faulkner's vehicles. The warrant specified that the device could be placed on either of Faulkner's vehicles located in Hennepin County (Minneapolis). The officers ultimately placed the device on one of the vehicles while it was in Ramsey County (St. Paul).

Evidence admitted after unlawful detention leads to discovery of arrest warrant

An officer stopped Strieff after he left a home where officers had watched numerous persons come and go after a brief visit. Suspecting that Strieff was involved in drug crimes, the officer stopped him and asked what he was doing at the home. The officer asked for Strieff's identification and checked for warrants. Upon learning of an active arrest warrant, the officer arrested Strieff. A search incident to arrest yielded methamphetamine and drug paraphernalia.

On-Demand Webinar: Priority of Life: A Model for Improving Officer Safety and Reducing Risk

Presented by Chief (Ret.) Mike Ranalli, Esq.

Law enforcement agency mission statements necessarily stress the value of all human life, but this focus fails to account for the fact that sometimes, officers will face situations where they must prioritize certain lives over others. Priority of Life is a concept that recognizes that officers must prioritize and balance the safety of hostages, innocent persons and themselves when dealing with individuals engaged in criminal or suicidal behavior that threatens the safety of others. Join Lexipol to learn about how your agency can incorporate the concept of Priority of Life to give officers more practical instruction on use of force. [Watch it today!](#)

POLICING & POLICY

New Study Finds No Racial Bias In Police Violence.

[CNN](#)  (7/25, Howard) details a “provocative” new paper published on Monday in the Journal of Injury Prevention that “combined statistics from various hospital, law enforcement and media sources to expand data on police-involved violence.” CNN says the study found that “while racial minorities were more likely to be stopped by police, the probability of being killed or injured during that stop may not vary by race.” The study found that “once an actual stop or arrest occurs, that racial disparity disappears, and blacks face no greater risk of injury or death.”

NYPD Unveils New Tactical Equipment.

The [Wall Street Journal](#)  (7/25, Kanno-Youngs) reports officers with the NYPD will be equipped with new tactical equipment in the wake of recent attacks on law enforcement. The Journal says the Department purchased 20,000 bullet-resistant helmets and 6,000 vests. The Journal adds that the equipment will be issued to patrol officers, according to NYPD Commissioner William Bratton.

COMMUNITY

Michael Jordan Donates \$1 Million Each To Institute For Community-Police Relations, NAACP.

[Reuters](#)  (7/25, Ortiz) reports retired basketball star Michael Jordan on Monday announced he will donate \$1 million each to the Institute for Community-Police Relations and the NAACP. Jordan said in a statement, “As a proud American, a father who lost his own dad in a senseless act of violence, and a black man, I have been deeply troubled by the deaths of African-Americans at the hands of law enforcement and angered by the cowardly and hateful targeting and killing of police officers.” The Institute for Community-Police Relations is “an organization launched in May by the International Association of Chiefs of Police that will work to foster best practices in community policing.”

The [Chicago Sun-Times](#)  (7/25, De Luca) reports that Jordan said the Institute for Community-Police Relations is doing important work “focused on building trust and promoting best practices in community policing” and the NAACP Legal Defense Fund is working “in support of reforms that will build trust and respect between communities and law enforcement.” Jordan added, “Although I know these contributions alone are not enough to solve the problem, I hope the resources will help both organizations make a positive difference.”

The [Washington Post](#)  (7/25, Jackman) provides more background on the Institute for Community-Police Relations, saying the organization focuses on “technology and social media, community policing and crime reduction, training and education, and officer safety and wellness.”

Basketball Star Gathers Law Enforcement, Community Leaders For Discussion With Kids.

The [AP](#)  (7/25) reports basketball star Carmelo Anthony spent a few hours on Monday before leaving to “continue the Americans’ pre-Olympic tour” by gathering “basketball stars, community leaders and police officers to speak with teenagers and young adults about the importance of respect, communication and safety.”

CRIME & DRUGS

Miami Judge Rules That Bitcoin Is Not Money For Laundering Case.

The [Miami Herald](#)  (7/25, Ovalle) reports a judge in Miami ruled that Bitcoin does not qualify as money for the purposes of a laundering case. The judge explained that Bitcoin “was not backed by any government or bank, and was not ‘tangible wealth’ and ‘cannot be hidden under a mattress like cash and gold bars.’” The Herald says the “case was believed to be the first money-laundering prosecution involving the virtual currency.”

Obama Signs Opioid Bill.

The [Lake County \(IL\) News-Sun](#)  (7/26, Newton) reports President Obama on Friday signed a new law “aimed at reducing heroin and prescription opiate deaths.” The legislation “approves \$181 million in funding for states to battle heroin and opiate

addiction through efforts from naloxone to education, and new emphasis in courts on treatment instead of incarceration.” The bill’s sponsor, Illinois Rep. Robert Dold (R) “said the funding will be put toward programs that include providing naloxone to first responders in law enforcement.”

OFFICER SAFETY & WELLNESS

Officers Trying To Avoid Attention During Leisure Time.

[USA Today](#)  (7/25, Disis, King) reports, in the wake of recent attacks, officers are attempting to avoid attention when not on the job. Indianapolis Metropolitan Officer Lauren Carmack “has decided that she should not wear clothing that identifies her as a police officer while she’s out with her stepdaughter.” While Officers remain cautious, USA Today says that some have noticed that the recent attacks have inspired an increased amount of public appreciation, with members of the public “offer[ing] to pick up the tab for a cup of coffee or a meal” or shaking hands and saying “thank you.”

TECHNOLOGY

Europol, Cybersecurity Firms Launch “No More Ransom” Initiative.

[AFP](#)  (7/25, Hennop) reports Europol and a “coalition of cybersecurity firms” launched the “No More Ransom” initiative, which is an online portal “aimed at informing the public about the dangers of ransomware and helping victims to recover their data without having to pay ransoms to cyber criminals.” AFP says the website can be found at www.nomoreransom.org 
[Digital Trends](#)  (7/25) reports the website contains decryption tools for download, but the site urges users to read “how-to guides before attempting to decrypt their infected files.”

NATIONAL SECURITY

Germany Boosting Police Presence After Recent Attacks.

[Bloomberg News](#)  (7/25, Donahue) reports Germany is boosting police presence across the country after a series of deadly attacks. Police presence will be “intensified at airports, train stations and other public places.”

ALSO IN THE NEWS

Dallas Police Department Applications Up 344%.

The [Washington Post](#)  (7/25, Bogage) reports applications to the Dallas Police Department are up 344% after Police Chief David Brown told protesters they could fix the community by putting in an application three weeks ago. The Department has been receiving nearly 40 applications per day.

CRIMINAL INTELLIGENCE

Federal Judge In New York Sentences Colombian Drug Dealer To 35 Years.

The [AP](#) (7/25, Neumeister) reports from New York that “a Colombian described as one of history’s biggest cocaine dealers was sentenced to 35 years in prison Monday by a Manhattan judge who called the scope of his crimes ‘staggering.’” Daniel Barrera, 48, known as “El Loco,” was sentenced by US District Judge Gregory Woods, “who rejected a defense lawyer’s request for leniency on the grounds that his client tried to cooperate, urged others to surrender and had rescued victims of kidnappings.”

[Reuters](#) (7/25, Raymond) reports that prosecutors said Barrera, 48, “had been one of the most prolific drug traffickers of the last two decades before his capture in Venezuela in 2012 following years in hiding.” Prosecutors “said that from 1998 to 2010, Barrera ran a cocaine manufacturing and trafficking syndicate that produced an estimated 5,000 kilograms of cocaine a month, resulting in more than 720 tons of cocaine being produced during the scheme.”

NYPD Unveils New Tactical Equipment.

The [Wall Street Journal](#) (7/25, Kanno-Youngs, Subscription Publication) reports officers with the NYPD will be equipped with new tactical equipment in the wake of recent attacks on law enforcement. The Journal says the Department purchased 20,000 bullet-resistant helmets and 6,000 vests. The Journal adds that the equipment will be issued to patrol officers, according to NYPD Commissioner William Bratton.

Munich Shooter Used Replica Gun Converted To Fire Real Ammunition.

The [Daily Mail](#) (7/24, Thompson) reports the shooter that killed nine people in Munich, Germany last Friday used a replica Glock purchased on the dark web from Slovakia. The Daily Mail says investigators believe the gun was converted to fire real ammunition.

Chicago Using Predictive Policing To Reduce Violent Crime Rate.

The [Chicago Tribune](#) (7/22, Gorner) reported Chicago Police are attempting to use predictive policing strategies to reduce the recent rise in violent crime. The Tribune says the department is relying on a "strategic subject list" for its "overall antiviolence strategy, which includes seizing illegal weapons, and is geared at gang factions police say are responsible for much of the rise in violence." The strategy also includes "call-ins", which are "meetings at which gangs are warned they will be singled out if more violence occurs, but gang members also are offered help to change their way of life."

Newspaper Profiles Washitaw Movement.

[The Guardian \(UK\)](#) (7/25, Teague) profiles the Washitaw movement, an African American branch of the sovereign citizens movement to which Baton Rouge shooter Galvin Long had pledged alliance. According to the Washitaw, its members were the original settlers of the Americas. Despite their unique views, the Guardian paraphrases Southern Poverty Law Center researcher Mark Patok as saying, they "fall in line with sovereign aspirations: to separate themselves from the United States, and unburden themselves of its laws." The sovereign citizens movement has recently swelled to 300,000 adherents. The FBI calls sovereign citizens "a domestic terrorist movement" the newspaper says.

LEGAL ISSUES

Miami Judge Rules That Bitcoin Is Not Money For Laundering Case.

The [Miami Herald](#) (7/25, Ovalle) reports a judge in Miami ruled that Bitcoin does not qualify as money for the purposes of a laundering case. The judge explained that Bitcoin "was not backed by any government or bank, and was not 'tangible wealth' and 'cannot be hidden under a mattress like cash and gold bars.'" The Herald says the "case was believed to be the first money-laundering prosecution involving the virtual currency."

Connecticut Congress Members Unveil "Casey's Law."

The [AP](#) (7/25) reports, "U.S. Sen. Richard Blumenthal and Rep. Joe Courtney, both Connecticut Democrats, unveiled "Casey's Law" on Monday in Hartford." The law would have DHS "determine whether foreign countries are systematically and unreasonably refusing or delaying attempts by U.S. officials to deport dangerous criminals," and calls on the State Department to "notify foreign

governments that the U.S. may deny visas to their citizens, if their countries 'systematically and unreasonably' refuse or delay the deportation of nationals in the U.S. who have been convicted of felonies or violent crimes, or are a threat to national security or public safety."

Judge Orders Yahoo To Say How It Collected Emails In Drug Case.

The [Tech Times](#) (7/25) reports that a US magistrate judge has "ordered Yahoo to explain how it was able to recover emails used as evidence in a drug case that were supposedly deleted." The emails were partially responsible for the conviction of drug trafficker Russel Knaggs. His defense team claims the emails' recovery by Yahoo should not have been possible and the evidence may have instead been gathered by real-time interception or NSA surveillance. "In its appeal, the defense requested documents from Yahoo, including instruction manuals for peripheral equipment used in retrieving the emails," the Times says.

TECHNOLOGY

Europol, Cybersecurity Firms Launch "No More Ransom" Initiative.

[AFP](#) (7/25, Hennop) reports Europol and a "coalition of cybersecurity firms" launched the "No More Ransom" initiative, which is an online portal "aimed at informing the public about the dangers of ransomware and helping victims to recover their data without having to pay ransoms to cyber criminals." POLICING & POLICY

NYTimes Examines Demands, Challenges Of Policing In America.

A more than 3500-word [New York Times](#)  (7/23, Times) front-page analysis reports that being a police officer in the US today means “Being a warrior one minute, on guard at all times, and minutes later answering the most banal questions.” The article indicates that, of the almost half million police officers in the country and 12,000 police departments, “The demands, challenges, resources and cultures of each police force vary. But there are also commonalities.” The article highlights some of these variations and commonalities in the routines of officers from Maryland, Connecticut, California, Texas, New York, and Minnesota.

Security Services On Alert For Terror Threats Ahead Of DNC.

The [Philadelphia Inquirer](#)  (7/24) reports, “Thousands of law enforcement officials from at least 50 federal, state, and local agencies are expected to descend upon Philadelphia to secure this week’s Democratic National Convention, as well as the dozens of protests associated with it.”

WPost Analysis Considers The Rise Of Black Nationalist Groups Amid Growing Racial Tensions.

A more than 2,100-word [Washington Post](#) (7/23, Sullivan) analysis reports on the “broad landscape of black nationalist groups” that it says are “playing a role in the country’s violent summer 2016,” including black nationalist groups like the People’s New Black Panther Party and Washitaw Nation. The Post indicates their numbers are growing, from 113 to 180 groups between 2014 and 2015. Analysts say the rise of these groups is linked to the “rise in white supremacist and white nationalist activity” in the past two years.

Local Officials Using Federal Tactic To Curb Gun Violence.

The [Minneapolis Star Tribune](#) (7/23, Montemayor) reports that “amid signs of a rise in illegal firearms trafficking, federal prosecutors in Minnesota have hit on a novel strategy to crack down on gun violence and get shooters off the streets,” and that “instead of prosecuting suspects for murder, where convictions can be difficult to obtain, they charge multiple defendants with conspiracy to buy and possess guns illegally.” The strategy “is rooted in the successful prosecution of 11 gang members in 2014, after what authorities called an ‘all-out shooting gang war’ in the Twin Cities.”

COMMUNITY

Prayer Vigil Held In Chicago To Honor Law Enforcement.

The [Chicago Tribune](#) (7/24, Rhodes) reports a prayer vigil was held Sunday morning “for a Chicago police officer shot Thursday night, as well as for several law enforcement officers shot and killed nationwide in recent weeks.” The Chicago officer “was treated and released for his injuries.” Police Superintendent Eddie Johnson is quoted, saying, “It’s a difficult time to be in law enforcement. We’re more than a team, we’re a family. It’s important to show support for one another as we go through these difficult times.”

CRIME & DRUGS

DEA Warns Of Counterfeit Pills Laced With Deadly Opioids.

[The Guardian \(UK\)](#) (7/24, Zalkind) reports the US Drug Enforcement Administration has warned that “hundreds of thousands of counterfeit prescription pills laced with a deadly synthetic opioid have infiltrated the US drug market.” The counterfeit pills were processed with pharmacy-grade machines and look like known prescriptions medications, but are laced with fentanyl, “a synthetic drug between 50 and 100 times more powerful than morphine.” Many of these counterfeit pills are sold as Roxycodone and are priced at \$10 to \$20 per pill.

TECHNOLOGY

Illinois Governor Signs Law Limiting Stingray Use.

The [AP](#) (7/22) reported Illinois Governor Bruce Rauner signed a law limiting police use of Stingray devices. The AP says the law “requires police to delete all non-target phone information within 24 hours and prohibits them from accessing data for use in an investigation not authorized by a judge.” The AP notes that Congress is considering legislation to limit stingray use, and “a dozen states have adopted regulations” so far.

NATIONAL SECURITY

German Officials: Munich Gunman Planned Attack For A Year.

The [New York Times](#) (7/24, Eddy) reports the 18-year-old gunman who killed nine people in Munich on Friday “had been treated for depression and paranoia and appeared to have begun planning the attack about a year ago,” German authorities said Sunday. Ali Sonboly, a dual German-Iranian citizen, “appeared to have begun planning the attack after visiting the site of a 2009 school shooting in Winnenden, Germany, in which 15 people were killed, initial evidence gleaned from his computer showed.” The [Washington Post](#) (7/24, Booth) says that German authorities told a press conference there is growing evidence “to support their theory that the gunman was ‘obsessed’ with mass killings and may have been a depressed loner who was bullied in school.”

ALSO IN THE NEWS

Malaysian Police Foil Attempted ISIL-Connected Bombing Of Law Enforcement Officers.

[Reuters](#) (7/23, Sipalan) reports that Malaysian authorities said on Saturday that they thwarted an attempted bomb attack on high-ranking police officers and arrested 14 suspected ISIL operatives, including the alleged recruiter of militant Abu Ghani Yaacob, who was killed in Syria in mid-April. The suspects arrested in the week-long operation ranged from the ages of 20 and 49 and served as cooks, a mechanic, a student, and a welder.

Spanish Police Arrest Nine Over Illegal Arms Ring.

The [AP](#) (7/23) reports Spanish police have arrested nine individuals, including the leader, of an “international ring allegedly involved in extortion and illegal arms sales.” The leader, “a Polish multimillionaire and former soldier,” was captured during a raid of a home in Ibiza. Police allege the illegal arms ring had been “involved in the sale of over 200,000 AK-47 assault rifles, missile launchers and tanks to South Sudan during the armed conflict in the African country.”

LAW ENFORCEMENT AT WORK

Agents Rescue Immigrants From Rio Grande.

The [Laredo \(TX\) Morning Times](#) (7/24) reports, "Border Patrol agents assigned to the Laredo Sector rescued four immigrants as they tried to enter the U.S. illegally" at around 1 am last Friday, and one agent "jumped into the Rio Grande to rescue these individuals who were in distress." The agent "reached them and brought them to safety." Border Patrol Laredo Sector chief Mario Martinez is quoted saying, "The Rio Grande River is dangerous and despite the dangers, undocumented immigrants still risk their life attempting to swim across this unpredictable river. This rescue is an example of a Border Patrol agent going above and beyond his duty. I commend his actions in risking his life to save others."

Subject: Stuntman hopes to re-try Evel Knievel's Snake River Canyon jump on Sept. 17

A plan by Hollywood stuntman Eddie Braun to re-enact Evel Knievel's failed 1974 jump over the Snake River Canyon – Braun hopes to launch on Sept. 17 – is examined by AP sports writer Pat Graham, who reports that Braun wants to prove Knievel could've made it had his parachute not prematurely deployed. "Evel took off on one side of the canyon in 1974," Braun told the AP. "I'm hoping his spirit lands on the other side of the canyon in 2016."

Braun, 54, said he's completed the necessary paperwork and will launch a few miles away from Knievel's original site near Twin Falls. "How many people get to fulfill the dreams of their hero? It's kind of like touching Superman's cape," he said.

He's partnered with two sons eager to complete the legacies of their fathers: Kelly Knievel, who was present the day of the crash, and rocket designer Scott Truax, whose dad constructed the original rocket cycle for Knievel. Braun said he's dubbed his steam-powered rocket cycle "Evel Spirit." Here's Graham's full report:

Stuntman to attempt Knievel's launch over Snake River Canyon

Fueled by the memory of the late daredevil Evel Knievel, Hollywood stuntman Eddie Braun plans to strap into a steam-powered rocket cycle on Sept. 17 for his most death-defying role yet. He will replicate a launch over the Snake River Canyon that could have cost Knievel his life four decades ago.

By PAT GRAHAM, AP Sports Writer

The Hollywood stuntman doesn't want to follow in his idol's footsteps so much as rocket above them — over a gaping canyon, no less.

Evel Knievel's iconic launch, Take II.

Eddie Braun, fueled by the memory of the late daredevil, plans to strap into a steam-powered rocket cycle on Sept. 17 for his most death-defying role yet: Replicating a launch over the Snake River Canyon in Idaho that could have cost Knievel his life four decades ago.

Braun named his rocket "Evel Spirit " after his boyhood hero. It's nearly identical to the model Knievel used for his failed canyon attempt on Sept. 8, 1974. Braun wants to prove Knievel could've made it had his parachute not prematurely deployed.

Joining this endeavor are two sons eager to complete the legacies of their fathers: Kelly Knievel, who was present the day of the crash, and rocket designer Scott Truax, whose dad constructed the original rocket cycle for Knievel.

Ready, set, and (gulp) launch.

"Evel took off on one side of the canyon in 1974. I'm hoping his spirit lands on the other side of the canyon in 2016," said the 54-year-old Braun, who says he completed the necessary paperwork and will launch a few miles away from Knievel's original site that's near Twin Falls, Idaho. "How many people get to fulfill the dreams of their hero? It's kind of like touching Superman's cape."

Braun has long been fascinated by everything Knievel, the popular figure who attempted so many memorable motorcycle jumps over an iconic career:

- The fountains at Caesars Palace in 1967 (crashed, crushed pelvis and femur)
- 13 buses at Wembley Stadium in London in 1975 (crashed, broke pelvis and back)
- 14 Greyhound buses at Kings Island theme park in Ohio in 1975 (success).
- A 90-foot tank filled with sharks in 1977 (crashed on landing ramp during rehearsal, broken arms)

And, of course, the Snake River Canyon attempt. Wearing his patriotic jumpsuit, Knievel was the epitome of cool and calm.

Soon after takeoff, his parachute deployed and halted the rocket's momentum. Watching that day was son, Kelly, and the rocket's designer, Robert Truax, who put a comforting arm around Kelly as the cycle drifted into the canyon.

Evel Knievel walked away with only minor injuries.

"He flipped a coin with his life, and came out alive," said Kelly Knievel, whose father died in 2007 at 69 after suffering from diabetes and pulmonary fibrosis. "My dad certainly had nine lives, didn't he?"

Just before the attempt, the daredevil landed on the cover of Sports Illustrated. Just after, his celebrity status was only cemented.

The town of Twin Falls can't forget him, either. He put the city on the map — and opened its eyes because the Evel Knievel cavalcade supposedly left behind a trail of unpaid bills.

In 1974, Chris Talkington worked as the news director for the local television station and watched Knievel fail to make it over the canyon and then fail to pay vendors for their services. Now a city councilman in Twin Falls, he said his town is wiser about what to expect from a daredevil attempting to jump the canyon.

"It woke our little town up," explained Talkington, who wasn't aware of Braun's jump but said there is a ramp near the canyon. "I look forward to (another attempt). I applaud them."

As a kid, Braun would often jump over trash cans in the driveway on his Schwinn Stingray, pretending to be Knievel. Braun even became a professional stuntman because of Knievel, serving as a stunt double for actors such as Ray Liotta and Charlie Sheen, along with coordinating stunts for movies, TV shows and music videos.

For three years, Braun tried to launch this project and invested nearly \$1.5 million. He's looking to raise another \$150,000.

He said he's secured the proper permission and permits from private land owners, Federal Aviation Administration, even Homeland Security, to green light his blastoff. Others have stepped up as well, including Slash from Guns N' Roses. Braun said the guitarist recorded a theme song for him — fittingly using Elton John's hit, "Rocket Man."

The jump will be live-streamed on the Internet.

For years, many believed Evel Knievel's daredevil son, Robbie — who's completed more than 350 jumps — might be the first to take a crack at the canyon. At one point, Robbie Knievel was looking at the jump in 2011, but it didn't take flight.

"Eddie put together the team and he's the one that got it done," Kelly Knievel explained. "It's very dangerous — and very ambitious."

Scott Truax used his father's blueprints to reconstruct the rocket. He wanted to show that his dad's version of Evel Knievel's "X2 Skycycle" would've worked, if not for the parachute malfunction.

The late Robert Truax was considered one of top rocket scientists of the 20th century.

"With this re-creation, it is my intent to clear his name and tell his amazing story," Scott Truax said in an email. "I like to think that instead of looking up at the rocket launch, he and Evel will be looking down on it and that's a much better view."

The rocket will reach a top speed of 400 mph in about 3 seconds and an altitude of 3,000 feet before the engine cuts off and the parachute deploys. Braun says he expects to soar about 1,500 feet or 0.28 miles over the canyon.

While parachute technology has improved, there's still plenty of danger.

That's why Braun's wife and four kids aren't planning to attend the launch. Braun constantly reassures them.

"They think it's really cool that dad gets to fly a rocket," Braun said. "I guess there's just a little Evel in all of us."

Op-Ed
Quid No Quo

The high court's decision on corruption in McDonnell v. U.S. is correct

By Craig Engle, Arent Fox LLP

It is rare when the U.S. Supreme Court overturns someone's criminal conviction. It is even rarer when it does so unanimously. Something must be terribly out of whack inside the Justice Department when that happens — as it was with the attempted conviction of Governor Bob McDonnell of Virginia on half-cooked charges of corruption.

Op-Ed
BigLaw's Gender Diversity Problem Is The Traditional Model Itself

By Mark A. Cohen, Legal Mosaic LLC

BigLaw was architected by men for men. And while some firms are making considerable efforts to level the playing field and right past wrongs, their structure, reward system and deeply embedded resistance to change militates against rapid progress. Diversity will be achieved when the traditional law firm partnership model has its sunset.

brought to you with support from

POLICING & POLICY

Dallas Police Department Inundated With Applications For Employment Following Chief's Plea.

The [Atlanta Journal-Constitution](#)  (7/13, Link) reports the Dallas Police Department has been “inundated with job applicants after the police chief told protesters earlier this week that the agency was hiring.” Chief David Brown, at a news conference Monday, was quoted, saying “Don’t be a part of the problem. We’re hiring. We’re hiring. Get off that protest line and put an application in.” The Journal-Constitution says the spike in application is good for the department, as they are in the same situation as “cities across the nation [that] have struggled to bring on new staff amid ever-tightening budgets and increasing tensions.”

Proposed “Back The Blue Act” Would Create Increased Penalties For Those Who Target Officers.

The [Washington Post](#)  (7/13, Demirjian) reports Sens. John Cornyn (R-TX), Ted Cruz (R-TX), and Thom Tillis (R-NC) introduced a bill on Wednesday that would “ratchet up penalties against anyone who intentionally targets police.” The bill

would make “attempting or conspiring to kill a law enforcement officer or judge a federal crime punishable by up to 30 years in jail.” The [Houston Chronicle](#) (7/13, Diaz) reports the bill is called the “Back the Blue Act.”

Baltimore Police Relying On 24/7 War Room To Target Repeat Offenders.

The [Baltimore Sun](#) (7/13, Rodricks) reports the Baltimore Police have utilized a 24/7 war room for the past year to “bring police, prosecutors, and federal law enforcement agencies together to target violent repeat offenders and build cases against them.” Lt. Jarron Jackson says the war room has been “very effective” as the task force has “been able to identify a multitude of crime drivers” within the city. Jackson says the group analyzes data to find suspects responsible for most of the city’s shootings and forms a “trigger-pull list.” Lt. Jackson says the “dedicated units within the war room have subtracted 566 trigger pullers” from the streets of Baltimore in the one year of its existence.

COMMUNITY

Law Enforcement Officials, Activists Have “Productive” White House Meeting.

The [AP](#) (7/13, Freking) reports President Barack Obama met with law enforcement officials, community activists, and politicians for over four hours on Wednesday to begin a conversation on how to “resolv[e] issues between police and the communities they serve.” Those in attendance called the meeting productive, and the President said he looks forward to repeating the “kind of respectful conversations” had during the meeting. Police groups and activists “did agree the meeting...could lead to building trust and improving accountability in police departments.”

IACP President Terry Cunningham, who was seated next to the President during the meeting, is quoted, saying “From the law enforcement perspective, we hear it, we understand it. I think that too often we comment about statistics. This isn’t about statistics from one side or another. This is about emotion. This is about people’s lives. This is about fear in the community and it’s our job to make people safe.” Cunningham also “said the Dallas Police Department exemplified that commitment to their community when officers used themselves as human shields to protect bystanders from possibly being shot.”

Call for Case Examples

The IACP continues to track hot button issues facing our membership. One such issue is the continued threat that smartphone encryption poses to law enforcement when investigating crimes and keeping the public safe. As part of that effort, it is important that our members continue to provide examples in which smartphone encryption has impeded aspects of an investigation or prevented the identification of potential suspects resulting in an unsolved case.

As some may be aware, the House Judiciary and House Energy and Commerce Committees announced the formation of a working group to study the encryption issue and receive input from stakeholders impacted. IACP has been asked to brief the working group this summer. Please send anecdotal stories or specific case examples where encryption has impacted an investigation to Sarah Guy at guy@theiacp.org by July 29, 2016. We are particularly interested in case examples from CA, IL, MA, MI, NJ, NY, OH, WA, WI, and VA.

CRIME & DRUGS

Obama To Sign Opioid Bill.

[The Hill](#)  (7/13, Ferris) "Floor Action" blog reports "the White House on Wednesday reluctantly agreed to sign off" on a bill that aims to fight opioid abuse. [McClatchy](#)  (7/13, Pugh) reports that the Senate on Wednesday passed the Comprehensive Addiction and Recovery Act by a vote of 90-2.

Telephone Scams Double In Past Three Years.

[NBC Nightly News](#) (7/13, story 8, 2:00, Holt) reported telephone scams have doubled in the past three years, with the "average consumer now receiving 10 such calls per week." The most common scams involve callers pretending to be from the IRS, Google, or claiming that the recipient has won a cruise.

OFFICER SAFETY & WELLNESS

Police Nationwide Taking Extra Precautions Following Dallas Attack.

The [Washington Times](#)  (7/13, Noble) reports police departments across the country are taking extra precautions as officers "remain on edge" following the attack in Dallas. The NYPD reported that investigators were looking into 17 individual threats against the department on the day after the massacre. In Austin, Texas, police were named as targets in a threatening Twitter post, which claimed that officers would be shot Wednesday night at 11 p.m. Police Chief Art Acevedo, before the threat was made, declared a staffing emergency, which "cleared the way for the department to require officers to work overtime for

the next two weeks for the first time in nearly a decade.” Meanwhile, in cities like St. Louis, New York, Los Angeles, and Washington, police have begun “patrolling in pairs.”

TECHNOLOGY

Burr-Feinstein Encryption Draft Appears Stalled.

[McClatchy](#)  (7/13, Cockerham) reports that the draft encryption bill from SSCI Chairman Richard Burr and Ranking Member Dianne Feinstein is unlikely to pass in the current Congress. The plan “to give law enforcement access to encrypted cellphone data has fizzled.” Feinstein spokesman Tom Mentzer “said there have been no decisions on moving forward with the proposal and ‘staff continue to consult’ on the matter.”

CRIMINAL INTELLIGENCE

Baltimore Police Relying On 24/7 War Room To Target Repeat Offenders.

The [Baltimore Sun](#) (7/13, Rodricks) reports the Baltimore Police have utilized a 24/7 war room for the past year to “bring police, prosecutors, and federal law enforcement agencies together to target violent repeat offenders and build cases against them.” Lt. Jarron Jackson says the war room has been “very effective” as the task force has “been able to identify a multitude of crime drivers” within the city. Jackson says the group analyzes data to find the suspects responsible for most of the city’s shootings and forms a “trigger-pull list.” Lt. Jackson says the “dedicated units within the war room have subtracted 566 trigger pullers” from the streets of Baltimore in the one year of its existence.

Suspect Fleeing From Police Climbs Over Fence And Into Jail.

The [Los Angeles Times](#) (7/12, Repard) reports on a “surprise ending” to a pursuit by law enforcement in San Diego (CA) County. The suspect fled from law enforcement after an attempted stop for a traffic violation. The suspect eventually “stopped outside the Vista jail and climbed a fence to get in,” where

he went straight to the jail intake area. The Times says the officers “obliged by closing a gate and arresting him.”

Telephone Scams Double In Past Three Years.

[NBC Nightly News](#) (7/13, story 8, 2:00, Holt) reported telephone scams have doubled in the past three years, with the “average consumer now receiving 10 such calls per week.” The most common scams involve callers pretending to be from the IRS, Google, or claiming that the recipient has won a cruise.

Police Nationwide Taking Extra Precautions Following Dallas Attack.

The [Washington Times](#) (7/13, Noble) reports police departments across the country are taking extra precautions as officers “remain on edge” following the attack in Dallas. The NYPD reported that investigators were looking into 17 individual threats against the department on the day after the massacre. LEGAL ISSUES

Proposed "Back The Blue Act" Would Create Increased Penalties For Those Who Target Officers.

The [Washington Post](#) (7/13, Demirjian) reports Sens. John Cornyn (R-TX), Ted Cruz (R-TX), and Thom Tillis (R-NC) introduced a bill on Wednesday that would "ratchet up penalties against anyone who intentionally targets police." The bill would make "attempting or conspiring to kill a law enforcement officer or judge a federal crime punishable by up to 30 years in jail." The [Houston Chronicle](#) (7/13, Diaz) reports the bill is called the "Back the Blue Act."

Burr-Feinstein Encryption Draft Appears Stalled.

[McClatchy](#) (7/13, Cockerham) reports that the draft encryption bill from SSCI Chairman Richard Burr and Ranking Member Dianne Feinstein is unlikely to pass in the current Congress. The plan "to give law enforcement access to encrypted cellphone data has fizzled." Feinstein spokesman Tom Mentzer "said there have been no decisions on moving forward with the proposal and 'staff continue to consult' on the matter."

TECHNOLOGY

New Technology Will Allow Police Body Camera Footage To Be Easily Searched.

[Engadget](#) (7/13) reports technology from Vu Digital, dubbed S.M.A.R.R.T. (Storage Metadata Automated Redaction Review Technology), that uses algorithms to tag and decipher data within policy body camera footage will be provided to the Orleans Parish District Attorney's Office. Engadget says the technology "makes it simple for anyone needing to comb through...footage to be able to do so." The tech can also "pick out faces, audio and text and can time stamp each bit of information to create a searchable database for the purposes of archiving and inspecting evidence." Engadget adds that the technology will likely be very useful "because of the sheer amount of data that's recorded via police cam."

Proposed Utah Legislation Will Allow Authorities To Target Drones Near Wildfires.

The [AP](#) (7/13, Price) reports the Utah governor is likely to sign a measure in the coming days to allow authorities in the state to "disable and crash drones for flying too close to wildfires." The AP says Utah would be the first state in the nation to give authorities that power. The law would also allow for "harsher penalties on people caught flying the aircraft,...if a drone causes a firefighting aircraft to crash." The bill's sponsor, state Sen. Evan Vickers, expects law enforcement will use technology to jam the signal and crash the drone, although the measure does allow law enforcement to shoot the drone down.

New Leads Released in 3 Cases of Missing Girls from the 1980s

Three young females were found in the 1980s in Broward County, Florida. Their bodies were in various states of decomposition; one was just a skeleton after being left out in the elements for several years. All have been known simply as "Jane Doe," along with their year of discovery.

A method for the Analysis and Quantitation of Cocaine on Currency

Paper currencies around the world, are typically made of a cellulose based paper which can easily adsorb cocaine onto the surface. Due to the frequency of contaminated paper coming into contact with other bills, the cocaine is easily transferred from one bill to the next. This application note explores a method for extraction, identification, and quantitation of cocaine on paper money from nine different geographical locations around the globe

In First, Federal Judge Tosses Evidence Obtained Using 'Stingray' Trackers

By pinging a targeted cell phone, the Stingray mimics a cell phone tower and forces the phone to send back a signal. By calculating the strength of the signal, authorities pinpointed the location of the targeted cellphone. Once there, they found the alleged drug dealer asleep in his bed. After finally consenting to a search of his home, authorities found the narcotics, three digital scales, and empty zip lock bags.

Automated Screening of Explosives in Soil Samples

There are a large number of explosives-contaminated sites in the US, Europe, and Asia. High levels of explosives in soil can threaten the health of humans, livestock, and wildlife. A number of remediation efforts are underway, which require the analysis of explosives in soil samples. Recently, a new technique was introduced that allows the automated super critical fluid extraction and SFC analysis of explosives in soil samples with minimal sample preparation and handling requirements to save analyst time and sample preparation expenses.

HEADLINE	07/11 Anonymous 'day of rage' false rumor?
SOURCE	http://www.snopes.com/2016/07/11/anonymous-day-of-rage-protests-2016/
GIST	<p>A rumor that the hacktivist collective Anonymous has called for nationwide 'Day of Rage' protests on 15 July 2016 is identical to a false rumor circulated in 2014.</p> <p>Early July 2016 saw a week of high-profile shootings involving police the United States: On 5 July 2016, Alton Sterling was shot and killed by police officers in Baton Rouge, Louisiana; the following day, Philando Castile was shot and killed by police during a traffic stop in Minnesota; and the day after that a sniper shot and killed five police officers during a Black Lives Matter protest in Dallas. Soon afterwards, a rumor began circulating that the hacktivist group Anonymous was now calling for a nationwide Day of Rage protests on 15 July 2016 as a response to those incidents...</p> <p>To those inclined to question the likelihood that an actual "Day of Rage" is being planned by Anonymous, we note that this rumor is virtually identical to one that was circulated two years earlier after the shooting of teenager Mike Brown in Ferguson, Missouri. As we pointed out back then, one of the key aspects of Anonymous is its amorphous nature and overall lack of central organization; as such, anyone can initiate an Anonymous "operation," and none is ever officially sanctioned by any particular portion of the collective...</p> <p>The call to demonstrate back in August 2014 was said to be a response to the ongoing protests and unrest in Ferguson, with one Twitter account, @OpFerguson, live-tweeting events and calls to action relating to the controversy. Often, actions linked to Anonymous are codenamed with a hashtag and given an "operation" title to organize activity for those who support the group and its initiatives. While the loose organizational structure of Anonymous actions allows for a level of unpredictability, the @OpFerguson Twitter account had more than 28,000 followers and appeared to be a larger and more cohesive mouthpiece for Anonymous operatives supporting Ferguson protests. The rumors of a "Day of Rage" of August 2014 were circulated for quite a while in advance of that date, and the @OpFerguson Twitter account denied any involvement in planning or calling for such an action several days beforehand...</p> <p>As in 2016, versions of e-mails and social media posts warning Americans about potential "Day of Rage" protests or unrest in 2014 were linked to posts listing the following locations and scheduling information:</p> <p><i>EMERGENCY PR: NATIONAL DAY OF RAGE</i> <i>DATE: THURSDAY, AUGUST 21 2014</i> <i>7PM ET, 6PM CT, 5PM MT, 4PM PT</i> <i>Phoenix: 5:00PM (EASTLAKE PARK, 1549 E Jefferson St , Phoenix, AZ 85034)</i> <i>Tucson: 5:00PM (CATALINA PARK, 900 N 4th Avenue, Tucson, AZ 85705)</i> <i>Little Rock: 6:00PM (OUTSIDE STATE CAPITOL BUILDING, Dr Martin Luther King Jr Dr., Little Rock, AR 72201)</i> <i>San Francisco: 4:00PM (CIVIC CENTER PLAZA, 355 Mcallister St, San Francisco, California 94102)</i></p>

HEADLINE	07/13 Dark side of Pokémon Go
SOURCE	http://www.cbsnews.com/news/the-dark-side-of-pokemon-go/
GIST	<p>The wildly successful release of Pokemon Go hasn't exactly been all fun and games. The new, "augmented reality" smartphone game, in which players try to capture cute digital monsters overlaid on real-world settings, has already spawned its share of problems and controversy.</p> <p>Police have had to warn the public about the dangers of playing the game while driving, and some distracted players have reportedly wiped out as they wandered public places in search of Pokemon. In Missouri, four men committed a string of robberies by targeting their victims through the game, CBS affiliate KMOV reported.</p> <p>Now, some experts are raising privacy concerns about the game, which became the most downloaded iPhone app following its rollout last week and has already been installed on more than 5 percent of all Android devices.</p> <p>In the game's initial release, iPhone users could sign in by creating an account or through their Google (GOOG) accounts. The latter option reportedly gave Niantic, Pokemon's developer, full access to players' Google accounts, meaning the company could access their Gmail, Google Drive files, photos and videos stored in Google Photos and other content.</p> <p>"You were giving [Niantic] permission, at least in theory to crawl into every aspect of your Google world," said Adam Levin, founder and chairman of consulting firm IDT911 and author of "Swiped: How to Protect Yourself in a World Full of Scammers, Phishers and Identity Thieves."</p> <p>If Niantic were to get hacked, all the information it collects would be up for grabs, he noted.</p> <p>"We, as consumers, give away far too much access to our information," warned Levin. "This is America: Give away whatever you want to give away, but just understand what it is you're giving away and the ramifications" of your decisions.</p> <p>"We are living in a world where breaches have become the third certainty in life," he added.</p> <p>Niantic, which was spun out of Google in 2015, responded on Monday to criticism over privacy concerns by releasing a statement that it "recently discovered" the "account creation process on iOS erroneously requests full access permission for the user's Google account."</p>

The growing privacy concerns surrounding the game have not only led some consumers to uninstall the free app but also caught the attention of lawmakers. On Tuesday, Sen. Al Franken, D-Minnesota, sent a letter to Niantic posing questions to clarify how the company will handle user information.

In their rush to join the Pokemon Go craze, many consumers, said Levin, have overlooked privacy considerations. In addition, some have been duped into downloading "clone" apps from third parties. Such apps could infect their devices with malware and make would-be Pokemon monster catchers vulnerable to identity theft and phishing scams, he said.

HEADLINE	07/12 Seattle police guild president resigns
SOURCE	http://www.thestranger.com/slog/2016/07/12/24337587/seattle-police-guild-president-resigns
GIST	<p>In the wake of another offensive Facebook post, SPOG President Ron Smith is resigning. His e-mail to members is below the jump. "I regret that this post offended any one, as that was not the intent in any way," Smith writes. "We don't need any further distractions in moving down the reform road."</p> <p>The Facebook post tried to blame the shootings of Dallas police officers by a lone gunman last week on what Smith called country's "minority movement," which many took as a thinly veiled reference to Black Lives Matter. He added the hashtag #WeShallOvercome. He deleted it after it was roundly condemned.</p> <p>Smith has had a rocky tenure during a key time for the SPD, as it tries to complete a federally-mandated reform process. He succeeded Rich O'Neil, a complete asshole, in 2014. After his election, he broke with SPOG's practice of ignoring <i>The Stranger</i>, making overtures and promising a newly open posture toward accountability. Under his direction, the union didn't join an unhinged, failed lawsuit that sought to block reforms. He gave a "stunning" interview after one year on the job, telling Seattle cops to adapt to the city's liberal political climate or get out, but backtracked after a furor within the union and calls for his resignation, then doubled down last summer on delusional right-wing rhetoric.</p> <p>SPOG members are voting by mail on a new contract this week.</p> <p>Kevin Stuckey, an African-American police officer and SPOG's representative on the Community Police Commission, will replace him at the end of the month.</p>

HEADLINE	07/12 Coffee just got more expensive
SOURCE	http://mynorthwest.com/341091/why-your-cup-of-coffee-just-got-more-expensive/
GIST	Starbucks coffee got more expensive Tuesday after the company raised prices on many of its popular coffee drinks.

In Seattle, however, Starbucks coffee has experienced more considerable price hikes over the past year than anywhere else.

Starting July 12, Starbucks coffee will cost 10-20 cents more — for the brewed variety. Espresso beverages and tea lattes have increased by 10-30 cents. The company said it expects the average customer's bill to go up by 1 percent and stress that prices on 65 percent of its menu items will not change.

The price hike comes in the wake of employee criticism over pay. Starbucks employees recently started an online petition — which has garnered 13,000 signatures — by asking the company to increase hours and staffing levels.

July's price hikes come one year after the company last spiked prices. At that time, Starbucks raised prices by 1 percent at its United States stores. But in the Seattle region prices jumped by 3.5 percent. When Starbucks raised prices in July 2015, the cost of brewed coffee went up by 10-20 cents in Seattle.

That means within one year, the cost of brewed Starbucks coffee in the Seattle-area has gone up by as much as 40 cents.

HEADLINE	07/12 Convention cities adjust security plans
SOURCE	http://www.foxnews.com/politics/2016/07/12/convention-cities-adjust-security-plans-after-shootings.html
GIST	<p>Rising tensions after the deadly ambush of police officers in Dallas and subsequent protests nationwide have led Cleveland and Philadelphia to adjust security plans for the national political conventions this month.</p> <p>Cleveland, where the Republican National Convention is to begin Monday, has moved up by a week the activation of a tip line for reporting suspicious activity, Police Chief Calvin Williams said. Security plans have been "ramped up" because of the Dallas shootings last week, which killed five officers and wounded nine others at the end of a march to protest the fatal shooting of black men by police in Louisiana and Minnesota, he said.</p> <p>"We're going to make sure we stay vigilant," Williams said. "But we also want to make sure that we ask the community to remain vigilant."</p> <p>There have been no credible reports of threats against officers in Cleveland or the surrounding region, Williams said. But adding to concerns over security is Ohio's status as an "open carry" state, meaning it's legal to carry a gun in the open without a permit. One supporter of the presumptive Republican presidential nominee, Donald Trump, has already asked Cleveland march participants to be mindful of the message that openly carrying might convey.</p>

"We really don't want people to bring long guns," said Tim Selaty Sr., lead organizer for Citizens for Trump.

In Philadelphia, where the Democratic convention begins July 25, Police Commissioner Richard Ross said Monday that his agency won't change its general approach for policing protesters at the Democratic convention. He said the Dallas shootings have "required that we do things different tactically," although, like Cleveland's police chief, he declined to elaborate on specific strategies.

With Philadelphia police already on heightened alert because of Dallas, an incident at a downtown high-rise hotel late Monday rang alarm bells. Two people were found on the rooftop with smoke bombs and camera equipment and taken into custody. There was no immediate word on what they were doing.

One Philadelphia group's police protests grew hostile in recent days, with anti-police chants and at least one speaker praising the Dallas gunman. That group, the Philly Coalition for REAL Justice, has sought a permit for a march in downtown Philadelphia on the second day of the convention. It's pending.

But a lack of official permission to demonstrate will not stop them or anyone else from protesting; police say the lack of a permit alone will not result in arrests.

HEADLINE	07/12 Oklahoma cops shot, killed unarmed man
SOURCE	http://www.cbsnews.com/news/oklahoma-police-shooting-andrew-henson-video-unarmed/
GIST	<p>WAGONER, Okla. -- Body-worn camera footage shows that a man who was killed last month by a Wagoner police officer after a high-speed pursuit was unarmed.</p> <p>The Tulsa World reports officer Robert Reynolds fatally shot 25-year-old Andrew Henson on June 7 after Henson rammed the officer's car several times during the chase.</p> <p>Video recorded by two officer-worn body cameras shows Henson turn toward the officer with both arms extended after getting out of his car.</p> <p>Officers say Henson pointed his hand in the shape of a gun, saying, "You're going to have to kill me," according to CBS affiliate KOTV. They say officer Robert Reynolds thought it was a real gun when he fired, killing Henson.</p> <p>Both the men are white.</p> <p>Police say Henson raised his arms like someone would hold and point a gun. The Oklahoma State Bureau of Investigation is reviewing the shooting.</p>

	After the shooting, the OSBI said Henson made a "threatening move" at Reynolds, but didn't elaborate.

HEADLINE	07/12 Colorado confirms refugee TB spike
SOURCE	http://www.breitbart.com/big-government/2016/07/12/colorado-now-says-sixteen-refugees-diagnosed-active-tb/
GIST	<p>The Colorado Department of Public Health and Environment admits that sixteen refugees were diagnosed with active TB between 2011 and 2014.</p> <p>The admission comes one month after Breitbart News reported ten recently arrived refugees in Colorado were diagnosed with active tuberculosis (TB). Between 2011 and 2014, 16 out of 7,754 refugees were diagnosed with active TB at the time of their initial medical screening.</p> <p>That's one out of every 484 arriving refugees.</p> <p>During that same time period, 67 out of the state's estimated 4.5 million U.S.-born residents were diagnosed with active TB. That's one out of every 67,164 U.S.-born residents of Colorado.</p> <p>Refugees resettled in Colorado developed active TB at a rate 138 times higher than U.S.-born residents of Colorado.</p> <p>The number of refugees resettled in Colorado between 2011 and 2015 diagnosed with active TB may actually be higher than sixteen, since the most recent total does not include any refugees who may have been diagnosed in 2015.</p>

HEADLINE	07/12 China rejects South China Sea ruling
SOURCE	http://www.foxnews.com/world/2016/07/12/tribunal-rules-theres-no-legal-basis-for-chinas-claims-in-south-china-sea.html
GIST	<p>A tribunal at The Hague ruled in a sweeping decision Tuesday that China has no legal basis for claiming much of the South China Sea and had aggravated the seething regional dispute with its large-scale land reclamation and construction of artificial islands that destroyed coral reefs and the natural condition of the disputed areas.</p> <p>China "does not accept or acknowledge" the tribunal or the ruling, China's state Xinhua news agency said. The nation has long maintained that the tribunal did not have jurisdiction over the dispute.</p>

The ruling is binding on both countries under a United Nations treaty that both have signed, but there is no policing agency or mechanism to enforce it. The ruling still constitutes a rebuke, carrying with it the force of the international community's opinion. It also gives heart to small countries in Asia that have helplessly chafed at China's expansionism, backed by its military and economic power.

Ruling on a variety of disputes the Philippines asked the tribunal to settle between it and China, the five-member panel unanimously concluded that China had violated its obligations to refrain from aggravating the dispute while the settlement process was ongoing.

The tribunal also found that China had interfered with Philippine petroleum exploration at Reed Bank, tried to stop fishing by Philippine vessels within the country's exclusive economic zone and failed to prevent Chinese fishermen from fishing within the Philippines' exclusive economic zone at Mischief Reef and Second Thomas Shoal.

The Philippines, which sought the arbitration ruling, welcomed the decision. "The Philippines strongly affirms its respect for this milestone decision as an important contribution to ongoing efforts in addressing disputes in the South China Sea," Foreign Secretary Perfecto Yasay said in Manila.

State Department spokesman John Kirby said the U.S. expected China and the Philippines both to comply with their obligations under the ruling, calling it an important contribution to the shared goal of peacefully resolving South China Sea disputes.

HEADLINE	07/12 Football player sorry for cop ‘image’
SOURCE	http://www.cbsnews.com/news/cleveland-browns-isaiah-crowell-apologizes-instagram-drawing-cop/
GIST	<p>Cleveland Browns running back Isaiah Crowell has apologized for posting a drawing on Instagram last week showing a police officer getting his throat slashed.</p> <p>Crowell posted the drawing after men in Louisiana and Minnesota were shot and killed by police. He subsequently deleted the post, but a screenshot continued to be circulated on social media, prompting his apology Monday.</p> <p>Five police officers were killed in a sniper attack in Dallas last Thursday night at a protest over the two deaths. Seven other officers and two civilians were wounded.</p> <p>"Last week was an emotional and difficult week as we saw extreme acts of violence against black men across our country as well as against police officers in Dallas," Crowell said in a statement distributed by the Browns.</p> <p>"I posted an image to Instagram in the midst of that emotion that I shouldn't have and immediately removed it. It was an extremely poor decision and I apologize for that mistake and for offending people. My values and beliefs do not match that image. I am outraged and upset by the deaths of Alton Sterling and Philando Castile along with so many others. I am also outraged and saddened by the attacks in Dallas and the deaths of the 5 honorable police officers (Lorne Ahrens, Michael Krol, Michael J. Smith, Brent Thompson and Patrick Zamarripa) who were providing protection while trying to keep peace. We have to be better as a society, it's not about color, it's about what's right and wrong. I was very wrong in posting that image. Every single life matters, every death as a result of violence should be treated with equal outrage and penalty."</p> <p>The Browns were clear about their displeasure with Crowell's post, calling it an "extremely disturbing and unacceptable social media decision" in a statement released later Monday night.</p>

HEADLINE	07/12 Cops mad at WNBA team social protest
SOURCE	http://www.cbsnews.com/news/report-cops-walk-off-job-minnesota-lynx-black-lives-matter/
GIST	<p>MINNEAPOLIS - The Minnesota Lynx voiced their support for social change on Saturday night, and local police officers are furious about it.</p> <p>The WNBA team wore black warmup shirts that said on the front, "Change starts with us. Justice & Accountability." On the back of the shirt were the names Philando Castile and Alton Sterling, both fatally shot by police officers this past week. Castile was killed by a suburban St. Paul police officer during a traffic stop. Also on the back of the shirt is the Dallas police shield above the phrase "Black Lives Matter."</p> <p>According to the Minneapolis Star Tribune, police officers are furious about their message. The four off-duty cops who had been hired to work the game walked off the job when they heard about the players' social statement.</p> <p>Lt. Bob Kroll, president of the Minneapolis Police Federation, the union that represents rank-and-file officers, told the Star-Tribune the four officers removed themselves from the list for working future games, which they do on an independent contract. Additionally, Kroll said that "if [the players] are going to keep their stance, all officers may refuse to work there."</p> <p>The police union spokesman Kroll slammed players for speaking out, and according to the Star Tribune, he warned against "'false narratives' in the past two years in which some allegations of police misconduct in the killing of black people were refuted."</p> <p>"Rushing to judgment before the facts are in is unwarranted and reckless," he said.</p>

HEADLINE	07/12 Mich. inmate handcuffed in shooting
SOURCE	http://abcnews.go.com/US/michigan-inmate-handcuffed-fatally-shot-bailiffs-courthouse/story?id=40511385
GIST	<p>Larry Darnell Gordon, the inmate who stole an officer's gun and shot four people, including two fatally, while he was being moved from a holding cell inside the Berrien County Courthouse in St. Joseph, Michigan, was handcuffed at the front of his body before the incident occurred, according to Berrien County Sheriff Paul Bailey.</p> <p>Gordon, who was being held on sexual assault and kidnapping charges, somehow managed to steal a gun from an officer in court despite the handcuffs, shooting two bailiffs dead and injuring two others. He took hostages for a brief period and tried to leave through a door in the courtroom, Bailey said.</p> <p>Court bailiffs shot and killed Gordon, according to Bailey.</p>

HEADLINE	07/12 PSE to close part of Montana coal
SOURCE	http://www.seattletimes.com/seattle-news/environment/puget-sound-energy-to-shut-part-of-montana-coal-power-plant/
GIST	<p>OLYMPIA — Puget Sound Energy has reached an agreement to close part of its Montana coal-fired power plant by 2022, the company announced Tuesday.</p> <p>Under a settlement with the Sierra Club and Montana Environmental Information Center, PSE and Talen Energy will shut down the two oldest units of the Colstrip Generating Station, which the companies co-own, by July 1, 2022.</p> <p>In return, the environmental organizations will drop their allegations that the plant has violated the federal Clean Air Act, which stem from a 2013 lawsuit filed with the U.S. District Court in Missoula.</p> <p>The Clean Air Act allows the U.S. Environmental Protection Agency and Department of Justice 45 days to review the settlement and possibly intervene or comment, according to court records.</p> <p>The proposed settlement represents a big step in a complex problem that has vexed Washington state officials, lawmakers, environmentalists and the company for years. It also raises the question of what form of energy PSE will choose to replace Colstrip.</p> <p>The Colstrip station — which includes four operating units — supplies about 20 percent of the power used by PSE, which has 1.1 million customers in the Puget Sound area, including parts of King County.</p> <p>The station is considered one of the major polluting coal facilities in the country, according to studies by environmental-advocacy groups using government data.</p> <p>The settlement keeps open the two newer, more efficient units, which PSE co-owns with five other companies.</p> <p>A spokesman for PSE has previously said all viable alternatives, including natural gas, wind and solar power — or a combination — could be used to replace the energy lost by the closure.</p>

HEADLINE	07/12 SPD: above curve in police reform
SOURCE	http://q13fox.com/2016/07/12/seattle-police-say-they-are-above-the-curve-when-it-comes-to-police-reform/
GIST	<p>SEATTLE -- With the divide in the nation many say all of us need to talk about race relations. It's a topic front and center at the Seattle Police Department.</p> <p>Since a 2012 consent decree with the US Department of Justice Seattle police have been working on use of force and bias policing. Recently the feds, even the president recognized the progress Seattle has made.</p>

Seattle police say they require officers to report when they see bias policing within their own department. They say more of their officers are also out in the community getting to know the people they protect.

“Our diversity is increasing both in our applicant pool and final hiring recruits, I say at this point Seattle is a leader in policing reform,” Chief Operating Officer Brian Maxey said.

COO Brian Maxey says Seattle police is now not only more diverse but better trained to deescalate dangerous situations before using force.

“Instead of doing the classroom settings we’ve gone into scenario based training,” Maxey said.

That means more role playing and simulations of intense situations.

“To see how they will implement that skill in real time,” Maxey said.

Seattle city council member Bruce Harrell acknowledges the progress made by SPD and says the vast majority of officers are good. But he says police reform in Seattle still has a long way to go.

Harrell says nationally African Americans are disproportionately affected by police misconduct. They point to a Bureau of Justice study from 2013 that said blacks and Hispanics were more likely to be searched during a traffic stop than whites.

And a Facebook post from the Seattle Police Officers Guild may put the perception of progress in jeopardy. On the heels of the deadly Dallas police shootings, the guild posted:

‘Dallas PD and their officers are in our thoughts and prayers ...the hatred of law enforcement by a minority movement is disgusting..heads in swivels brothers and sisters..#weshallovercome’

“I think it was a poorly thought through post and it’s disappointing he certainly can speak for himself or the guild can speak for him as what they meant by this post,” Maxey said.

“We need to get closer to our community to heal some of those wounds and to better develop communication,” Maxey said.

SPD says they are also encouraged by new numbers that show every year police officers deal with about 10,000 crisis situations when they come in contact with people.

They say .5% of those cases result in significant force used. That’s 50 cases out of 10,000.

HEADLINE	07/12 White man points shotgun at cops; lives
SOURCE	http://fusion.net/story/323829/police-white-man-north-carolina/
GIST	<p>In the same week two black men, Alton Sterling and Philando Castile were shot and killed by police in Louisiana and Minnesota allegedly because both men were armed, a white man who aimed his shotgun at passing motorists and officers in Raleigh, North Carolina, was taken into custody unharmed.</p> <p>Raleigh police responded to a report last Tuesday, the News & Observer reported, that William Ray, 62, was pointing a shotgun at people as they drove by. As officers approached Ray, Wake County Sheriff Donnie Harrison told reporters last week, he became “belligerent” and raised his weapon. Donnie Farmer, a deputy at the scene, was able to push the barrel of Ray’s gun away. Ray then told officers, “I got something for you,” before pulling a second gun, a pistol, from his pocket. Farmer then hit Ray’s hand as the pistol fired. No one was injured.</p> <p>“He had been drinking,” Wake County Sheriff Donnie Harrison told reporters. “He definitely had been drinking.”</p> <p>Ray was charged with assault on a law enforcement officer with a firearm and damage to property. His lawyer told the court he may be suffering from a mental illness, according to local news reports.</p> <p>Ray’s encounter with police was a stark contrast to that of Sterling and Castile: Philando Castile was reaching for his wallet to retrieve his driver’s license, as instructed, when he was shot four times and killed by Officer Jeronimo Yanez. Alton Sterling was selling CDs outside a convenience store before being pushed to the ground, tasered, and then shot to death by officers. Ray aimed two weapons at police officers, firing at least once—officers did not return fire, and Ray is alive.</p> <p>As protests unfolded around the country last week for Sterling and Castile’s deaths, many held up Ray’s case as example of how dramatic a role race can play in interactions with police.</p>

HEADLINE	07/12 New Black Panthers will go to Cleveland
SOURCE	http://www.cbsnews.com/news/new-black-panthers-will-go-to-cleveland-with-guns-for-self-defense/
GIST	<p>The New Black Panther Party, a "black power" organization, plans to attend demonstrations in Cleveland ahead of the Republican National Convention, and members plan to bring their firearms.</p> <p>Hashim Nzinga, chairman of the New Black Panther Party, told Reuters in an interview on Tuesday that the group planned on exercising its Second Amendment rights in Ohio, an open-carry state, because "there are other groups threatening to be there that are threatening to do harm to us."</p> <p>Ohio's open-carry laws are the same as Texas, where lone gunman Micah Johnson killed five Dallas police officers during a peaceful Black Lives Matter protest last week. In the wake of that incident, the law is raising security concerns for law enforcement. Nzinga expects that a few hundred members of the New Black Panther Party will be attending the Black Unity rally that will begin on Thursday and run through Sunday, the day before the convention begins.</p>

HEADLINE	07/12 Seattle: more plastic bag rules
SOURCE	http://www.king5.com/tech/science/environment/seattle-could-modify-bag-rules/270987146
GIST	<p>SEATTLE – There’s been a 50 percent decline in the amount of bags going into the garbage from Seattle’s residential sector, Seattle Public Utilities announced Tuesday. But residents and businesses should expect more changes in the near future.</p> <p>The plastic bag ban took effect in 2012, but some businesses, like fast food restaurants, can still give out plastic bags.</p> <p>Between 2010 and 2014, the amount of plastic bags in residential garbage declined from 262 tons to 136 tons, according to Sego Jackson, project manager for project stewardship at Seattle Public Utilities.</p> <p>Now SPU is planning to suggest a change in what colored bags exempt businesses can give out.</p> <p>“The problem with these green bags is that one of these is compostable and the other is not and the public can’t tell the difference,” Jackson said as he held up two bags.</p> <p>He said it becomes a problem when people put their food waste into the curbside yard debris program, using bags that aren’t compostable. He said it’s difficult and expensive to separate out the types of plastics contaminants of the compost.</p> <p>“What we think needs to happen is to restrict the green coloration to compostable bags only and not allow it for the petroleum bags,” he said.</p> <p>The proposed changes will come later this year, when SPU also suggests extending a rule that retailers charge 5-cents for paper bags. That part of the ordinance was supposed to end in December of this year.</p>

HEADLINE	07/12 Tacoma bans plastic bags
SOURCE	http://www.king5.com/news/local/tacoma/tacoma-city-council-votes-to-ban-plastic-bags/271281555
GIST	<p>TACOMA, Wash. - The Tacoma City Council has voted to ban the use of thin plastic bags by grocery stores and other businesses.</p> <p>The Tacoma News Tribune reports the council voted 8-1 in favor of the measure after hours of discussion Tuesday.</p>

	<p>The law will require retailers to charge a five-cent fee to customers for paper bags and other carryout bags they offer. That fee will be kept by the retailer.</p> <p>Joe Lonergan, the lone council member to vote against the ban, said he opposed government charging a fee that it then allows someone else to keep.</p> <p>The ordinance prohibits plastic bags less than 2.25 millimeters thick, but includes an exemption for traveling shows and events at the Tacoma Dome and convention center.</p> <p>The ordinance will go into effect in one year. Tacoma joins several other Washington cities and counties that have banned plastic bags, including Seattle, Bellingham, and Mercer Island.</p>

HEADLINE	07/13 Fire response challenge Okanogan Co.
SOURCE	http://www.king5.com/news/local/wildfire-response-challenges-in-okanogan-county/271424965
GIST	<p>OKANOGAN COUNTY, Wash. - In Okanogan County, Commissioner Jim DeTro describes the old way of fighting fire as rushing in with resources to protect people and property. But he says the new method of attack focuses too heavily on managing the wildfire.</p> <p>"We need to change things fundamentally. We have to go back to fighting fires and not managing fires, and that comes right back to initial attack," said DeTro.</p> <p>Sheriff Frank Rogers says after two harsh wildfire seasons back-to-back, the evacuation plan looks good on paper but does not work.</p> <p>"I'm not knocking the system. Why I'm saying it doesn't work, we have gone out literally and spent hours on a level one, and you just get done and the winds will pick up and so we will go back and spend hours to make it a level two," said Rogers. "In my opinion it comes out of the fire world. It's those guys. It's their world. It's their evacuations. You do it through them and emergency management, but they have to make the call."</p> <p>Rogers says his Deputies are the ones who go door to door delivering evacuation levels. Level one lets people know a fire was in their area. Level two means it's getting closer, pack up. Level three means get out because your life is in danger.</p>

HEADLINE	07/13 Death toll Italy train crash rises to 27
SOURCE	http://www.reuters.com/article/us-italy-train-crash-idUSKCN0ZT124
GIST	<p>The death toll from a high speed train crash in southern Italy rose to 27 on Wednesday after rescuers worked through the night to try to extract bodies from the tangled wreckage and continued their search in the morning.</p> <p>With Italian media focusing on the antiquated technology on the single-track line, prosecutors have opened an investigation and Prime Minister Matteo Renzi has promised that the cause of Tuesday's accident will be quickly identified.</p> <p>Rescuers were still searching for the driver of one of the trains that collided head-on while traveling down the same stretch of track linking the small towns of Corato and Andria in the southeastern Puglia region in Italy's heel.</p>

	<p>The driver of the other train was one of the victims. With dozens of people injured, some seriously, rescuers expected the death toll could rise higher.</p> <p>It is still unclear whether the accident was due to human error or a technical problem on a stretch of track where safety is dependent on telephone calls rather than computer systems.</p>

HEADLINE	07/13 Iran nuclear deal holding, but fragile
SOURCE	http://abcnews.go.com/Politics/wireStory/year-iran-nuclear-deal-holding-fragile-40538464
GIST	<p>The Iran nuclear accord is fragile at its one-year anniversary.</p> <p>Upcoming elections in both the U.S. and Iran could yield new leaders determined to derail the deal. The Mideast's wars pit U.S. and Iranian proxies in conflict. Iran's ballistic missiles are threatening American allies in the Middle East. Congressional opposition remains.</p> <p>But for now, the seven-nation nuclear pact is holding. Washington and Tehran are expanding cooperation. And Boeing's recent announcement of a multibillion-dollar plane deal with Iran Air suggests some of the agreement's early problems may be getting resolved.</p> <p>"It really wasn't long ago that we saw a rapidly expanding nuclear program in Iran, only months away from having enough weapons-grade uranium to build 10 to 12 nuclear weapons, and we were on the cusp of confrontation," Secretary of State John Kerry said recently.</p> <p>Iran has lived up to its end of the deal. It shut down thousands of centrifuges for enriching uranium and exported almost its entire stockpile of the bomb-making material. It disabled a heavy water plant that would have produced plutonium usable in a weapon. It opened up its supply chain to far greater scrutiny. An underground enrichment facility near Fordo operates under strict limits.</p> <p>If Iran were to race now toward an atomic weapon, the Obama administration and most independent experts say it would need at least a year. The U.S. and its partners — Britain, China, France, Germany and Russia — say that is enough time to discover the effort and intervene. Before the deal was struck, the timeframe for Iran to "break out" toward a bomb was a couple of months.</p> <p>Iran's compliance and the expanded breathing room have eliminated for now the threat of a military confrontation.</p>

SOURCE	http://abcnews.go.com/International/wireStory/china-blames-philippines-stirring-trouble-dispute-40536519

GIST	<p>China warned other countries Wednesday against threatening its security in the South China Sea after an international tribunal handed the Philippines a victory by saying Beijing had no legal basis for its expansive claims there.</p> <p>Chinese Vice Foreign Minister Liu Zhenmin said Beijing could declare an air defense identification zone over the waters if it felt threatened, a move that would sharply escalate tensions. But Beijing also extended an olive branch to the new Philippine government, saying the Southeast Asian nation would benefit from cooperating with China.</p> <p>The Philippines, under a U.N. treaty governing the seas, sought arbitration from an international tribunal on several issues related to its long-running territorial disputes with China.</p> <p>The tribunal in The Hague, Netherlands, rejected China's claims in a landmark ruling that also found the country had aggravated the seething regional dispute and violated the Philippines' maritime rights by building up artificial islands that destroyed coral reefs and by disrupting fishing and oil exploration.</p> <p>While introducing a policy paper in response to the ruling, Liu said the islands in the South China Sea were China's "inherent territory" and blamed the Philippines for stirring up trouble.</p>

HEADLINE	07/13 Troops sent to embassy in S. Sudan
SOURCE	http://abcnews.go.com/International/united-states-deploys-troops-protect-embassy-south-sudan/story?id=40538898
GIST	<p>ABC News has confirmed the United States deployed 40 additional troops to protect the embassy in Juba, South Sudan on Tuesday amid the deteriorating security situation there. Clashes that erupted last week have so far killed nearly 300 people, including several dozen civilians, before a ceasefire took effect on Tuesday.</p> <p>"We brought in a small contingent of U.S. military forces," U.S. Ambassador Molly Phee said in an interview with the United Nations Mission in South Sudan. "They are here to protect the embassy and to help us provide support for those Americans who want to depart from South Sudan at this time."</p> <p>The State Department announced this week the embassy is under an "ordered departure," meaning that all non-essential personnel have been ordered to leave the region. The additional forces will assist with those departures and provide additional security.</p>

HEADLINE	07/12 Malware targets power firm networks
SOURCE	http://www.zdnet.com/article/state-backed-hackers-blamed-for-malware-targeting-power-company-networks/
GIST	<p>Hackers are targeting energy companies in Western Europe with sophisticated form of malware. Cybersecurity researchers from SentinelOne Labs say that the malware, which has infected at least one power company in Europe, takes "extreme measures" to avoid detection before it drops its payload, used to report information about the infected network back to a command-and-control centre.</p> <p>Power companies have been the target of hackers before, such as the cyberattack against a Ukrainian power grid which caused blackouts in December last year.</p> <p>The researchers don't name the state they think is behind the malware, but note it is of "Eastern European origin" and has traits which suggest it is likely to be the work of a nation state; namely the sophistication of the malware sampled and the cost required to developing something as advanced in nature.</p> <p>SentinelOne said the malware was developed to work on any devices running any version of the Microsoft Windows operating system and is capable of avoiding detection by anti-virus software, firewalls and even more recent endpoint solutions capable of using sandboxing security techniques.</p> <p>Not only that but the malware is capable of detecting when it's being monitored in a sandbox environment itself and when it does, it re-encrypts itself and stops working in order to evade detection by security professionals. In this case, SentinelOne cybersecurity researchers managed to examine the malware by reverse engineering it, which once again suggests that some serious funding has gone into developing it.</p> <p>"The malware has all the hallmarks of a nation state attack due to its extremely high level of sophistication and the cost associated with creating software of this advanced nature," says Udi Shamir, Chief Security Officer at SentinelOne.</p>

HEADLINE	07/12 Pokémon Go catches personal info
SOURCE	http://www.infosecurity-magazine.com/news/pokemon-go-catches-a-ton-of/
GIST	<p>The cultural phenomenon known as Pokemon GO has already become a criminal's present on a platter, because it collects a scary amount of personal information from the user.</p> <p>The augmented reality game was first released in Australia and New Zealand on July 4th and was released in the United States right after—and in those scant few days it has grown to be an obsession for millions. The game works with Google Maps, overlaying Pokemon gyms, beacons and the Pokemons themselves onto maps of neighborhoods. As users move around in the physical world, they collect and fight the Pokemon they run across. It's sparked many to get out and walk around, which is a good thing—but something this popular always has a downside in the form of presenting a wide, attractive threat vector for hackers.</p>

Pokemon Go's creator, Niantic Labs, began by having full access to the collector's Google account if he or she used it to log into the game from an iOS device. That full account permission means that Niantic had access to all information, including email, contacts, photos and documents, as well as the ability to post, delete and send things from an account.

Niantic said in a statement that it did not use that access for ill and that so far it has accessed only user IDs and email addresses. But of greater concern than what Niantic might do with the captured information is how secure its servers are; a successful hack could lay open millions to compromise.

"We recently discovered that the Pokémon GO account creation process on iOS erroneously requests full access permission for the user's Google account," the company said. "Once we became aware of this error, we began working on a client-side fix to request permission for only basic Google profile information, in line with the data that we actually access." The update was released today.

But even outside of the iPhone problem, Pokemon Go taps into all kinds of info, including the phone's GPS information. That includes location history, current location, to the amount of time someone spent in a given place, geolocation data and more—all of which is ultimately stored by the developer.

Worse, a look at the game's privacy policy shows that it gathers personal email addresses, birth dates and privacy settings: "During gameplay and when you (or your authorized child) register to create an account with us ... we'll collect certain information that can be used to identify or recognize you (or your authorized child) (PII)," the policy states. "Specifically, because you must have an account with Google, Pokémon Trainer Club ("PTC"), or Facebook before registering to create an Account, we will collect PII (such as your Google email address, your PTC registered email address, and/or your Facebook registered email address) that your privacy settings with Google, PTC, or Facebook permit us to access."

HEADLINE	07/12 Uptick 'Nymaim' malware Brazil
SOURCE	http://www.scmagazine.com/nymaim-detections-spike-at-the-beginning-of-the-year-begin-targeting-brazil/article/509065/
GIST	<p>ESET researchers spotted a 63 percent uptick in the number of Nymaim malware detections during the first half of 2016 compared to the same time in 2015 and noticed a series of targeted attacks in Brazil.</p> <p>Most appeared in Poland which accounted for 54 percent of all Nymaim detections this year but researchers noted highly target attacks directed at financial institutions in Brazil, according to a July 12 blog post.</p>

	<p>“Despite the relatively low number of detections, which is to be expected due to the very specific target selection, Brazil accounts for 0.07% of all detection incidents involving this variant, placing it 11th in the list of countries where this variant was most often detected,” the post said.</p> <p>The attacks in Brazil appeared to target selected victims soon after Nymaim was repackaged into <i>Nymaim.BA</i>, when both the downloader and <i>Nymaim.BA</i> payload were only able to be detected by a few antivirus engines, the post said.</p> <p>Researchers said the latest version of the malware is spread via spearphishing campaigns using emails that contain malicious Microsoft Word or macros, unlike the 2013 version which used drive-by-download attacks delivered via compromised websites.</p>

HEADLINE	07/12 Report: US ICS the most exposed
SOURCE	http://www.darkreading.com/cloud/ics-mess-us-industrial-systems-the-most-exposed/d/d-id/1326236?
GIST	<p>Hundreds of thousands of industrial control systems (ICS) worldwide are available on the public Internet via a Shodan search, nearly 60,000 of them in the US, according to a new report published yesterday.</p> <p>Kaspersky Lab’s report says the around 221,000 exposed ICS devices run on some 188,019 host systems from 133 different vendors across 170 countries, with Tridium (11.1%), Sierra Wireless (8.1%), and Beck IPC (6.7%) as the biggest offenders. The security vendor also compiled data on ICS vulnerabilities that have been reported publicly and found that 189 were reported in 2015, up slightly from 2014, with about half in the critical category and 42% in the medium-severity category. Most of the vulns were in Siemens, Schneider Electric, and Hospira products.</p> <p>Exploits are available for some 26 of the reported bugs overall; exploits are not necessarily needed to attack many of the devices that were found with default credentials. The nature of the flaws reflect the relative immaturity of secure coding of these systems: 9% are buffer overflows; 7% hard-coded credentials; and 7% cross-site scripting.</p>

HEADLINE	07/12 Healthcare hacks face critical condition
SOURCE	http://www.darkreading.com/attacks-breaches/healthcare-hacks-face-critical-condition/d/d-id/1326239?
GIST	<p>Cybercriminals have moved well beyond the theft of social security numbers (SSNs) and credit card data when it comes to healthcare organizations: They're now employing more complex schemes to pick up detailed health records, as one new report out this week explains.</p> <p>According to a new study by researchers at InfoArmor of four attacks against US-based healthcare organizations, attackers in a theft campaign this spring were able to steal at least 600,000 detailed patient</p>

records and place 3 terabytes of associated data on the Dark Web's black market. These included MRI and X-ray images, patient-specific biometrics, and doctor's treatment notes. In [initial reports](#) of the breaches that came to light last month, the threat actors themselves claimed they had access to millions of records, as well as persistent unauthorized access to medical organizations' systems for ransomware distribution. Initial reports show at least part of the compromise was achieved through a zero-day attack against the remote desktop protocol (RDP), and that one of the databases was being shopped around for nearly \$500,000.

According to InfoArmor CTO Andrew Komarov, who led research into this campaign and wrote the brief released this week, attackers like these are building momentum with their attacks. They are broadly targeting the healthcare IT infrastructure, digging not just into weakly defended traditional networks, but also connected medical devices, mobile computing devices used by medical staff and, most profitably, electronic health records (EHR) systems. In this instance, the bad actors were able to gain access to victims' centralized EHR records through a compromised host for EHR software SRSsoft.

According to a [report](#) out from the Brookings Institution in May, 23% of all reported data breaches occur at healthcare organizations, and [IBM reported](#) that last year the rate of attacks struck healthcare more than any other industry.

Further, the [Ponemon Institute reported](#) that almost 90% of healthcare organizations have been hit by a breach in the past two years, costing the industry \$6.2 billion.

HEADLINE	07/11 Industrial cybersecurity threat landscape
SOURCE	https://securelist.com/analysis/publications/75343/industrial-cybersecurity-threat-landscape/
GIST	<p>Industrial control systems (ICS) surround us: they are used in electric, water and wastewater, oil and natural gas, transportation, chemical, pharmaceutical, pulp and paper, food and beverage, and discrete manufacturing (e.g., automotive, aerospace, and durable goods). Smart cities, smart houses and cars, medical equipment – all of that is driven by ICS.</p> <p>Expansion of the Internet makes ICS easier prey to attackers. The number of ICS components available over the Internet increases every year. Taking into account that initially many ICS solutions and protocols were designed for isolated environments, such availability often provides a malicious user with multiple capabilities to cause impact to the infrastructure behind the ICS due to lack of security controls. Moreover, some components are vulnerable themselves. The first available information about vulnerabilities in ICS components is related to 1997, only two vulnerabilities were published that year. Since then the number of vulnerabilities significantly increased. Over the past five years this index has increased from 19 vulnerabilities in 2010 to 189 vulnerabilities in 2015.</p>

In this research we provide an overview of the current situation with ICS security worldwide from the point of view of vulnerabilities, and vulnerable ICS components exposed to the Internet.

Main Findings

The number of vulnerabilities in ICS components keeps growing. With increased attention to ICS security over the last several years, more and more information about vulnerabilities in these systems is becoming public. However, vulnerabilities themselves could be present in these products for years before they are revealed. In total, 189 vulnerabilities in ICS components were published in 2015, and most of them are critical (49%) or have medium severity (42%).

Vulnerabilities are exploitable. For 26 of the vulnerabilities published in 2015, exploits are available. Besides, for many vulnerabilities (such as hard-coded credentials) an exploit code is not needed at all to obtain unauthorized access to the vulnerable system. Moreover, our ICS security assessment projects show that ICS are often considered by their owners as a “black box”, so default credentials in ICS components are often not changed and could be used to gain remote control over the system. The SCADAPASS project of the SCADA Strangelove team provides a representation of known default ICS credentials. Currently information on 134 ICS components of 50 vendors is available.

ICS vulnerabilities are widely diversified. New vulnerabilities were found in 2015 in the ICS components of different vendors (55 different manufacturers) and types (HMI, electric devices, SCADA, industrial network devices, PLCs and multiple others). The largest amount of vulnerabilities were found in Siemens, Schneider Electric and Hospira devices. Vulnerabilities in ICS components have a different nature. The most widespread types are buffer overflows (9% of all detected vulnerabilities), use of hard-coded credentials (7%) and cross-site scripting (7%).

Not all of the vulnerabilities found in 2015 are fixed. Patches and new firmware are available for 85% of the published vulnerabilities, the rest are not fixed or are only partially fixed for different reasons. Most of the unpatched vulnerabilities (14 out of 19) are of high level risk. These unpatched vulnerabilities pose significant risk to the owners of the corresponding systems, especially for those who, due to inappropriate network configuration management, have their vulnerable ICS systems exposed to the Internet. Examples include the 11,904 remotely available SMA Solar Sunny WebBox interfaces that are under risk of compromise though hard-coded passwords. Although for Sunny WebBox this number has significantly reduced since 2014 (when over 80 thousand available components were found), the amount is still high, and the unfixed hardcoded credentials issue (published in 2015) is now putting these systems under a much higher risk than was previously thought.

Numerous ICS components are available via the Internet. 220,668 ICS components were discovered by the Shodan search engine. They are located on 188,019 hosts in 170 countries. Most of the remotely available hosts with ICS components are located in the United States (30.5%) and Europe. Among European countries Germany has a leading position (13.9%) followed by Spain (5.9%). The available

systems are of 133 different vendors. The most widespread ones are Tridium (11.1%), Sierra Wireless (8.1%), and Beck IPC (6.7%).

Insecure protocols are widely used by remotely available ICS components. There is a number of protocols, which are open and insecure by design, such as HTTP, Niagara Fox, Telnet, EtherNet/IP, Modbus, BACnet, FTP, Omron FINS, Siemens S7 and many others. They are used on 172,338 different hosts, which corresponds to 91.6% of all the externally available ICS devices found. This provides an attacker with additional ways to compromise the devices by performing man-in-the-middle attacks.

Multiple vulnerable ICS components are externally available. We found 13,033 vulnerabilities on 11,882 hosts (6.3% of all hosts with externally available components). The most widespread revealed vulnerabilities are Sunny WebBox Hard-Coded Credentials (CVE-2015-3964), and critical vulnerabilities CVE-2015-1015 and CVE-2015-0987 in Omron CJ2M PLC. Combining these results with statistics of usage of insecure protocols, we were able to estimate the total number of vulnerable ICS hosts as 172,982 (92%).

Multiple industries are affected. We found that at least 17,042 ICS components on 13,698 different hosts in 104 countries likely belong to large companies, and availability of these components from the Internet is likely related with significant risks. Among owners we were able to identify 1,433 large organizations, including ones belonging to the following industries: electricity, aerospace, transportation (including airports), oil and gas, metallurgy, chemical, agriculture, automotive, utilities, drinks and food manufacturing, construction, liquid storage tanks, smart cities, and ICS vendors. There are also research and education entities, government institutions (including police), medical centers, financial organizations, resorts, hotels, museums, libraries, churches and multiple small businesses among identified owners of remotely available ICS. The number of vulnerable externally available ICS hosts, which likely belong to large organizations, is 12,483 (91.1%), where 453 hosts (3.3%), including hosts belonging to energy, transportation, gas, engineering and manufacturing organizations, drink and foods manufacturing, energy and transportation organizations, contain critical vulnerabilities.

HEADLINE	07/12 Fire dept. captain fired over online post
SOURCE	http://abcnews.go.com/US/wireStory/fire-department-captain-fired-posts-protesters-40520100
GIST	<p>A fire department captain in South Carolina's capital has been dismissed for posting on social media that he would run over protesters if they were still blocking traffic when his shift ended.</p> <p>News media outlets report that Capt. Jimmy Morris, a 16-year veteran of the department, was fired Monday over Facebook posts about Black Lives Matter protesters.</p>

	<p>Protesters closed an intersection near the Statehouse and prompted the closing of a small section of Interstate 126, a thoroughfare into Columbia, late Sunday. There were no arrests, injuries or property damage reported.</p> <p>The protests came after blacks were killed by police in Minnesota and Louisiana and white officers were gunned down in Dallas.</p> <p>The news reports say that in one post, Morris said the "idiots" blocking traffic "better not be there when I get off work or there is gonna be some run over dumb a----."</p> <p>The next read, "Public Service Announcement: If you attempt to shut down an interstate, highway, etc on my way home, you best hope I'm not one of the first vehicles in line because you're a-- WILL get run over!"</p> <p>City Manager Teresa Wilson said the posts violated the city's handbook regarding employees' conduct and responsibilities when communicating and working with the public.</p>

HEADLINE	07/11 Report: 600K healthcare records stolen
SOURCE	http://www.eweek.com/security/attackers-steal-600k-records-from-health-care-firms-report.html
GIST	<p>A group of attackers infiltrated American health care institutions and stole at least 600,000 patient records and attempted to sell more than 3 terabytes of associated data, according to a report set to be released later this week from security firm InfoArmor.</p> <p>Andrew Komarov, chief intelligence officer at InfoArmor, told <i>eWEEK</i> that he informed the National Healthcare and Public Health Information Sharing and Analysis Center (NH-ISAC) about the attacks in May. InfoArmor was able to discover the attack through what Komarov referred to as, "deep e-crime monitoring" as well as profiling the threat actor involved in the attacks.</p> <p>While hospitals have been a primary target for attackers in 2016, Komarov noted that the hacker he investigated was able to compromise different types of health care institutions, including private clinics and vendors of various medical equipment and suppliers like orthopedics. By being inside the compromised systems, the hacker is able to take personally identifiable information (PII) and medical data, including X-ray images, he added.</p> <p>The attacker was able to gain access to the medical information by way of weak user credentials and hacked Remote Desktop Protocol (RDP) connections on some servers that had static external IP addresses.</p>

HEADLINE	07/12 Report: CEO fraud strikes 400 firms daily
-----------------	--

SOURCE	http://www.itproportal.com/2016/07/12/more-than-400-companies-hit-by-ceo-fraud-daily/
GIST	<p>More than 400 businesses get targeted by CEO fraud scams every day, a new report by security researchers Symantec says. CEO fraud is a type of scam in which cyber-criminals target financial staff, often posing as CEOs or other executives, and request large money transfers.</p> <p>Even though it sounds too simple to work, its success rate is actually quite high, and relies mostly on putting financial staff under a lot of pressure through a sense of urgency, not giving them enough time to think things through.</p> <p>From those 400 daily targets, small and medium-sized businesses (SMB) are the biggest target (40 per cent). The second largest industry is finance (14 per cent). On average, one company will have at least two individuals being targeted.</p> <p>Organisations have lost more than \$3 billion to these scams in the past three years, with more than 22,000 victims all over the world.</p> <p>Another interesting takeaway from the report is the fact that one group holds responsibility for 12 per cent of all CEO fraud email traffic. Someone's been earning a lot of money.</p> <p>Most common subject line is Request (25 per cent), followed by Payment (15 per cent), Urgent (10 per cent) and Transfer Request (9 per cent).</p>

HEADLINE	07/11 Anonymous synchs with protests
SOURCE	http://news.softpedia.com/news/anonymous-will-synchronize-cyber-attacks-with-black-lives-matter-protests-506205.shtml
GIST	<p>Members of the Anonymous hacking collective announced this past Saturday plans to synchronize and coordinate cyber-attacks on official institutions on the same dates as Black Lives Matter protests.</p> <p>The racial tensions in the US are reaching peak points after the recent, very suspicious, and public deaths of Alton Sterling and Philando Castile.</p> <p>These incidents triggered nationwide protests from the Black Lives Matter movement, with the most famous one ending in a bloodbath, after a former military member ambushed and killed five police officers in Dallas, Texas.</p> <p>Regardless of this tragic incident, the Black Lives Matter movement plans to continue with protests over the coming days. The most important day is next Friday, July 15, when the group has scheduled 37 protests in cities across the US.</p>

HEADLINE	07/12 SPOG online post triggers complaints
SOURCE	http://www.king5.com/news/local/spog-facebook-post-yields-almost-two-dozen-racial-bias-complaints/271036987
GIST	<p>SEATTLE - A controversial statement from the Seattle Police Officer's Guild has led to almost two dozen complaints of racial bias, disabling of its social media accounts, and a resignation from the guild's top leader.</p> <p>After the backlash surrounding the post, Ron Smith, the president of Seattle Police Officer's Guild announced Tuesday he will step down from his position July 31.</p> <p>"It was absolutely stupid and totally irresponsible on his part," said Gerald Hankerson, president of NAACP Seattle.</p> <p>Hankerson accused Smith of fanning the flames of tension.</p> <p>"If we're not careful here, and we keep talking the same rhetoric here, another Dallas is going to happen," Hankerson said.</p> <p>Hankerson called for the department to speak out against the message. But last Friday, Chief Kathleen O'Toole wouldn't go that far.</p> <p>"I'm not going to defend it," she said. "I'm not going to comment on it. I'm not going to feed into the division between the police and the community."</p> <p>City council president, Bruce Harrell, called the post "a botched opportunity," but doesn't believe it represents the department's rank and file.</p> <p>By Tuesday afternoon, the Office of Professional Accountability had fielded 23 complaints alleging the post "was disrespectful, disparaging, and displayed racial bias," but it's unclear if the O.P.A. has jurisdiction to investigate an act by the union.</p> <p>"I don't know who holds the jurisdiction to hold him accountable," said Hankerson. "But the one people I do hold accountable is the officers that he claims to represent that's a part of that union. I'm looking for them to come out and say 'what he said is not indicative of who we are' and say 'he does not represent us.'"</p> <p>SPOG has taken down its social media accounts for now, until the board of directors can decide how to move forward.</p>

HEADLINE	07/12 Pokémon Go players unwelcome
SOURCE	http://q13fox.com/2016/07/12/pokemon-go-players-unwelcome-at-arlington-holocaust-museums/
GIST	<p>NEW YORK (CNNMoney) — Players of Pokemon Go are finding critters everywhere, including some places that are considered to be hallowed ground and inappropriate for gaming.</p> <p>The United States Holocaust Memorial Museum and Arlington National Cemetery, both in Washington, DC area, have both issued appeals for players to avoid hunting Pokemon on their sites.</p> <p>“Playing Pokemon Go in a memorial dedicated to the victims of Nazism is extremely inappropriate,” said Andy Hollinger, director of communications at the United States Holocaust Memorial Museum in Washington, D.C. in a statement sent to CNNMoney.</p> <p>“We are attempting to have the Museum removed from the game,” the statement said.</p> <p>Arlington, the burial ground for the nation’s war dead, tweeted out a somber request: “We do not consider playing ‘Pokemon Go’ to be appropriate decorum on the grounds of ANC. We ask all visitors to refrain from such activity.”</p> <p>Other hallowed locations where Pokemon have reportedly been spotted include the Auschwitz museum in Poland, the Los Angeles Museum of the Holocaust, the 9/11 Memorial in New York City, the Vietnam Veterans Memorial in Washington and monuments in national parks.</p> <p>Pawel Sawicki, a spokesman for the Auschwitz Memorial, told CNNMoney that he wasn’t familiar with the game, but has seen screenshots posted to Twitter of the use of Pokemon Go in Holocaust memorials.</p> <p>He wrote in a direct message to CNNMoney that creating Pokestops in memorials is “absolutely inappropriate.”</p> <p>Other locations, like National Mall and Memorial Parks have embraced the hot game. The National Park Service — which oversees the Vietnam Veterans Memorial, the Washington Monument and the Lincoln Memorial — posted on its Facebook page to encourage selfie-taking with their favorite Pokemon creatures.</p> <p>“Remember to be respectful of the memorials and other visitors,” the post reads.</p>

Terror Conditions

[Top of page](#)

HEADLINE	07/13 Australia terror recruiter found guilty
----------	---

SOURCE	http://www.theaustralian.com.au/news/nation/big-fish-terrorism-recruiter-found-guilty/news-story/772f32eff9c327e0221d5ac386ee3b97
GIST	<p>It was late 2013 and the big Afghan was in tears.</p> <p>Mohamed Ali Baryalei was in Syria, thousands of kilometres from the plush lawns and McMansions of Sydney’s Hills district, where he had grown up. Baryalei had only been in the strife-torn country a few months, but already he’d seen enough blood and killing to know he had made a terrible mistake.</p> <p>“I don’t want to be here, man,” Baryalei sobbed down the phone. “I’m over it, I’m over it ... I don’t know what to think anymore.”</p> <p>Baryalei was a formidable bloke. A former Kings Cross bouncer, he had a heavy black Salafist beard and arms like wine barrels. Other jihadis looked up to him. Police would later allege he was the instigator of the largest terrorist plot ever undertaken in Australia — to abduct and behead a random member of the public.</p> <p>If Baryalei couldn’t hack life in Syria you had to wonder about the dozens of lesser men he had helped recruit to the Islamist cause. Within a year Baryalei would be dead, blown to pieces in the Battle of Kobane, one of the most pointless and savage encounters of the Syrian civil war.</p> <p>But the man on the other end of the phone was just getting started. Police listening to those phone taps didn’t know it yet, but Hamdi Alqudsi would go on to become one of the biggest terrorist targets in Australia.</p> <p>NSW Police Assistant Commissioner Mark Murdoch told The Australian yesterday: “He was a big fish. This is a significant result for Australian law enforcement. We’ll await with great interest the decision of the judge in terms of sentence.”</p> <p>Alqudsi, 39, was yesterday found guilty of recruiting seven young Australians to fight with terror groups in Syria between June — October 2013, some of whom were sent to their deaths.</p> <p>For police, it was one of the most significant victories they have had yet in the fight against Islamic State-inspired terrorism.</p> <p>Police believe the disability support pensioner was the emir, or spiritual leader to a generation of young Australian jihadis hellbent on killing as many of their fellow citizens as they could.</p> <p>At the time of his arrest in December 2013, Alqudsi was al-Qa’ida’s main point man in Australia, sending dozens of Islamic radicals to the Syrian jihad, where they fought for Islamic State or Jabhat al-Nusra, al-Qa’ida’s official affiliate in the Syrian conflict.</p>

HEADLINE	07/12 Family: FBI set up 'another Mohamed'
SOURCE	https://theintercept.com/2016/07/12/accused-american-isis-plotter-was-set-up-family-says/
GIST	<p>Mohamed Bailor Jalloh, the former Virginia National Guardsman arrested last week on charges of plotting to provide material support to Islamic State, was manipulated by a government informant, his siblings say.</p> <p>Jalloh was also mischaracterized by the government, the family members added, with innocent or thoughtless words twisted to make the 26-year-old naturalized citizen, originally from Sierra Leone, sound like a budding terrorist. Jalloh faces up to 20 years in prison.</p>

“He is just another Mohamed that got set up,” his brother Chernor Jalloh told *The Intercept*. “He sympathizes with the oppressed abroad...The FBI used his love for those being oppressed against him by inciting him in all manners that they deemed fit.”

A criminal complaint unsealed last week and widely publicized revealed that Jalloh had been speaking for months with a government informant, who recorded conversations in which Jalloh seemed to support acts of violence. The informant solicited Jalloh’s help in procuring money and weapons that he said would be used in support of ISIS. At one point, Jalloh was provided with a mobile messaging application to help him send \$500 to an undercover FBI agent posing as an ISIS member abroad.

After Jalloh attempted to purchase a rifle at a local gun store, he was placed under arrest.

The government affidavit against Jalloh alleges that he had been radicalized by watching the lectures of former Al Qaeda ideologue Anwar al-Awlaki. But his family says that Jalloh was young and impressionable, and had been manipulated by his conversations with the government informant.

Chernor also said he believed his brother looked up to the informant as someone who was older and whose opinion should be respected. “He looked at him as an older brother with more knowledge about what is going on in the Middle East and was trying to understand their plight.”

The use of informants in FBI terrorism cases has become a source of controversy after several high-profile cases in which terrorism plots appeared to have been devised and propagated by the informant themselves. The FBI is believed to have at least 15,000 informants active in the United States.

While the full details of Jalloh’s interactions with the informant are not yet known, his family says that the behavior linked by the government to terrorism is being mischaracterized.

It’s unclear how long Jalloh had been under government surveillance. His conversations with the informant lasted several months, though reference is also made in the affidavit to a trip Jalloh took to Nigeria last year. Privacy advocates and whistleblowers have long warned that extended government surveillance could create “databases of ruin” about innocent people, whereby harmful or provocative statements are catalogued over time and then later contextualized in an incriminating manner.

Jalloh’s family claims that in his case, innocent actions and thoughtless words, or “tough talk,” are being conflated together by the government to paint a picture of him that is more nefarious than the reality.

HEADLINE	07/13 Tucson man denies DMV terror plot
SOURCE	http://www.mohavedailynews.com/news/tucson-man-denies-dmv-terror-plot/article_69d77544-48cf-11e6-830a-17f34d59d047.html

GIST	<p>PHOENIX (AP) — A Tucson man pleaded not guilty Tuesday to charges of plotting a terrorist attack on a motor vehicle office in metro Phoenix.</p> <p>Mahin Khan is accused of asking a suspected militant for help making a pipe bomb in a plot to blow up a Motor Vehicle Division office in Maricopa County.</p> <p>In court, Khan was dressed in a jail uniform, wore glasses and sported a five o'clock shadow. His only comments consisted of affirming his correct name and recognizing that he understood his legal rights.</p> <p>Kahn was charged with terrorism, conspiracy to commit terrorism and conspiracy to commit misconduct involving weapons.</p> <p>Authorities said Khan had written emails to a suspected member of the Pakistan Taliban seeking weapons and instructions for a homemade explosive. It's not clear if Khan was corresponding with an actual member of the group, but court records show that the FBI examined the emails.</p> <p>In the emails, Khan said he backed the Islamic State terrorist group and was looking to carry out an attack. Court records show the person responded that he would have to pay for two rifles and a pistol he requested, so Khan said he wanted instructions for a bomb itself.</p> <p>The FBI began investigating Khan after someone reported him for suspicious activity and agents were tracking him as he asked someone else on April 16 about targeting Mission Bay, Calif., and an Air Force recruitment center in Tucson, according to the probable cause statement filed into court records.</p> <p>The identity of that person was redacted, but it was not the suspected Taliban member.</p> <p>The statement was written before Khan's arrest, and the plot against the motor vehicle office came to light after authorities searched his home. He was indicted in that plot because it appeared he took steps to carry it out, as opposed to his discussions against the other targets, authorities said.</p>

HEADLINE	07/12 France intel: booby-trapped cars, bombs
SOURCE	http://www.cbsnews.com/news/france-intelligence-chief-predicts-attacks-booby-trapped-cars/
GIST	<p>PARIS - France's intelligence chief believes that Islamist extremists like those who carried out two waves of attacks in Paris last year will look to increase their capacity to kill by using booby-trapped cars and bombs.</p> <p>The remarks by Patrick Calvar, testifying before a parliamentary commission examining French means to fight terrorism, were published on Tuesday in a 300-page report.</p> <p>The Nov. 13 attack on a stadium, a concert hall, bars and restaurants were carried out by suicide bombers and assailants with assault rifles. But Calvar said in his May 24 testimony that he thinks attack methods will evolve.</p> <p>He said: "I'm convinced they'll go to booby-trapped vehicles and bombs, thus upping their power."</p> <p>The commission's work uncovered intelligence letdowns that led to the failure to foil the attacks that killed 147.</p>

HEADLINE	07/12 Boko Haram senior leader arrested
SOURCE	http://www.upi.com/Top_News/World-News/2016/07/12/Six-Boko-Haram-suspects-including-chief-arrested-in-Nigeria/3421468331449/?spt=hs&or=tn_int
GIST	<p>LAGOS, Nigeria, July 12 (UPI) -- Six suspected Boko Haram members, including a senior leader, were arrested after a local vigilante group found them in Lagos, Nigeria.</p> <p>They were rounded up in various parts of Lagos, Nigeria's largest city, after leaving Maiduguri in Borno state, headquarters of the militant Islamist movement that has terrorized Nigeria since 2009. Alhaji Mustapha Mohammed, leader of the Lagos Civilian Joint Task Force, said the suspects were turned over Monday to Nigeria's Department of State Services after their capture Friday. He added that the alleged Boko Haram members were found in different places around Lagos, looking unkempt and showing signs of starvation.</p>

HEADLINE	07/12 ISIS stages 'jihad Olympics'
SOURCE	https://www.rt.com/news/350758-jihad-olympics-isis-iraq/
GIST	<p>Although Islamic State has recently executed professional soccer players in Syria, members of the feared terror group had no qualms about staging their own "Jihad Olympics" in neighboring Iraq, where they played games like tug-of-war and musical chairs.</p> <p>The events, which included blowing balloons, tug-of-war, and musical chairs, looked more akin to games played at a young child's birthday party than those you would expect a radical jihadist group to put on.</p> <p>The games are believed to have taken place earlier in July in the city of Tal Afar in Iraq, which is controlled by Islamic State (IS, formerly ISIS/ISIL). Photographs allegedly showing the event were posted on Twitter by the anti-terror watchdog Terrormonitor.</p> <p>Pre-school age youngsters can be seen taking part, and, somewhat surprisingly, some of the participants in the pictures are wearing soccer shirts belonging to popular British clubs Manchester City and Glasgow Celtic.</p> <p>Although these kids games were given the thumbs up by IS, other sports such as soccer, which the jihadist group has labeled as "un-Islamic," have not been as lucky.</p> <p>The terror monitoring group "Raqqa is being Slaughtered" posted photos on Twitter showing members of the Syrian Al-Shbab soccer team from Raqqa who were killed by IS because they were suspected of spying for the Kurds.</p> <p>Three soccer players were publically beheaded in front of children in the city earlier this month.</p>

HEADLINE	07/11 Brazil arrests man for terror plot
SOURCE	http://www.breitbart.com/national-security/2016/07/11/pakistani-man-arrested-for-alleged-plot-to-bomb-brasilia-airport-before-olympics/
GIST	<p>Authorities arrested a 32-year-old Pakistani man in Brazil Sunday after his wife told police he was planning to bomb the Brasilia International Airport. Brazil is on high alert for jihadi activity as it prepares for the 2016 Summer Olympics beginning in August.</p> <p>The man, whose name law enforcement officials did not release, was allegedly planning a bomb attack on Brasilia's Juscelino Kubitschek Airport on Monday. His wife told police he had amassed explosives in his home for that purpose. She also told police he was looking to return to Pakistan that Monday.</p>

While he is described as a Pakistani national, at least one report identifies him as having been born in Algeria. He is said to have arrived in Brazil in 2014 and married, his wife being a Brazilian native. The couple subsequently split after she found out that, to marry her, the man had forged a death certificate for a woman he had married in Pakistan.

Brazil's *O Globo* newspaper reports that a search of the man's premises found no explosives on Monday, but the man has not denied the plot. When police asked him whether he was seeking to bomb the airport, the newspaper reports that he invited police to go to the airport "to find out." Police described the man as speaking "in a very disturbed way."

GIST	<p>WASHINGTON — The Pentagon has severed its relationship with its longtime propaganda contractor in Afghanistan after spending more than \$425 million on its pamphlets, broadcasts, websites and billboards.</p> <p>In February, the military denied the last of Leonie Industries' protests that it should be awarded the lucrative contract, Lt. Col. David Hylton, a spokesman for the Army's contracting command, said in an email Tuesday. Instead, the military awarded the \$32 million contract to SOS International.</p> <p>But from 2008 to 2015, Leonie was the military's top propaganda contractor despite doubts about the effectiveness of what the Pentagon calls Information Operation programs and the company's own troubled history.</p> <p>A spokesman for Leonie, Alfred Soygar, declined in an email to comment on the protest denial.</p> <p>In 2012, USA TODAY reported on the hundreds of millions of dollars the Pentagon had spent on poorly tracked information operations programs designed to sell the wars in Iraq and Afghanistan to often hostile populations. A year later, a Government Accountability Office report, meant for internal use only by the Pentagon but obtained by the paper, showed that the impact of the programs was unclear and that the military didn't know whether it was targeting the right people.</p> <p>Propaganda programs are more closely tracked now, the Pentagon says. But after a pamphlet drop in Syria late last year, military officials would not provide measures of its effectiveness, saying that information was classified.</p>

HEADLINE	07/13 ISIS preparing for end of caliphate?
-----------------	---

SOURCE	http://www.foxnews.com/world/2016/07/13/islamic-state-reportedly-preparing-for-end-its-so-called-caliphate.html
GIST	<p>Islamic State terror leaders are reportedly preparing for the fall of its so-called caliphate after the U.S.-led coalition and Russian-backed forces made significant gains in recent months in Iraq and Syria.</p> <p>The Washington Post reported Tuesday that the terror group’s leaders in Syria are bracing for its strongholds to fall, but vow to continue its wave of terror attacks abroad. U.S. counterterrorism experts believe the recent large-scale attacks in Istanbul and Baghdad are a sign that its reign in the Middle East is dwindling.</p> <p>Experts still believe that even if the terrorists affiliated with ISIS start to move underground, the group will still remain dangerous abroad.</p> <p>“Where Al Qaeda was hierarchical and somewhat controlled, these guys are not. They have all the energy and unpredictability of a populist movement,” retired Air Force Gen. Michael Hayden told The Post.</p> <p>ISIS officials still believe that its vision of a “caliphate” across the Middle East is still viable despite its losses across the region it claims. One also insisted that the group had “shifted some of our command, media and wealth structure to different countries.”</p> <p>Officials in the terror group issued a grim statement to its fighters that soon all could be lost. The Post reported that an editorial in ISIS’ weekly Arabic newsletter acknowledged that its territory could be lost just two years have rejoicing in the start of its Islamic State across the Middle East.</p> <p>Will McCants, a Brookings Institution researcher who also detailed the history of ISIS in a 2015 book, believes that the Istanbul attack and the Baghdad attack on a café are just reassurances to its followers of how volatile it could still be despite losing its territory.</p> <p>However, top ISIS leaders failed to place the blame on any of its battlefield missteps. ISIS spokesman Abu Muhammad al-Adnani has admitted that the group had made errors in its losses, McCants said.</p> <p>According to The Post, an ISIS operative spoke to a Western journalist and told the reporter that some of the militants had become disillusioned because of commanders’ mistakes. However, he added that once Raqqa falls, it would be avenged.</p> <p>“There is a message to all members of the coalition against us: We will not forget, and we will come into your countries and hit you,” he said, “one way or the other.”</p> <p>As for the next step, Islamic State leaders haven’t specified but European officials believe it’s already underway.</p>

HEADLINE	07/13 Saudi Arabia's new jihadists
SOURCE	http://www.reuters.com/article/us-saudi-security-idUSKCN0ZT0K3
GIST	<p>Technical hitches limited the death tolls in three suicide attacks in Saudi Arabia but the apparent coordination of the blasts suggests jihadis have the tools to sustain their bombing campaign.</p> <p>Three young Saudis detonated explosive vests near a Shi'ite mosque in Qatif last Monday, killing only themselves, while an attack by another young Saudi suicide bomber at the Prophet's mosque in Medina killed four policemen.</p> <p>Before dawn the same day a 34-year-old Pakistani driver had blown himself up in a car park outside the U.S. consulate in Jeddah but only injured two security guards.</p> <p>"Technically these people are poor. Psychologically they are very poor. Training-wise they are poor," said Mustafa Alani, an Iraqi security expert at the Jeddah-based Gulf Research Centre with ties to the Saudi Interior Ministry.</p> <p>"Out of five suicide bombers, four killed themselves for nothing."</p> <p>Nevertheless, that five individuals were able to build or acquire explosive vests and to plot three attacks on the same day points to a command chain and supply network that presents a formidable threat, security analysts say.</p> <p>The attacks were not claimed by any group although the government believes Islamic State is responsible after detaining 19 suspects linked to the five attackers.</p> <p>The coordination but poor training appear to be a sign of Islamic State's operational model in Saudi Arabia, recruiting would-be jihadists online and managing plots remotely with minimal involvement in training.</p> <p>An Islamic State recruit inside the kingdom will then seek friends or relatives to join him in an attack, while his handlers in Syria or Iraq suggest a target and help to provide explosives and instructions on how to make a bomb.</p> <p>That low profile makes it very difficult for the security forces to identify networks or uncover attacks before they are carried out, and Islamic State's minimal investment in operations means it has little to lose if a plot goes awry.</p> <p>Unlike during an al Qaeda campaign a decade ago there is no network of interconnected cells under a central leadership in Saudi Arabia that can be infiltrated or rolled up by the security services.</p>

	"They ask young people to stay in Saudi Arabia and create sleeper cells and this is a very dangerous thing because you do not know who is in a sleeper cell or who is a lone wolf," a senior Saudi security officer told Reuters last year.

HEADLINE	07/13 Iraq forces link up south of Mosul
SOURCE	http://www.reuters.com/article/us-mideast-crisis-iraq-mosul-idUSKCN0ZS2E6
GIST	<p>Iraqi government forces advancing on the Islamic State-held city of Mosul retook a village from IS on Tuesday and linked up along the Tigris river with army units pushing from a separate direction, Defence Minister Khalid al-Obeidi said.</p> <p>The territorial gain, which followed the recapture of a key air base nearby at the weekend, further isolated Mosul in preparation for a government assault to recover Iraq's second largest city 60 km (40 miles) to the north.</p> <p>"Forces from the 9th Armoured Division and the counter-terrorism service liberated Ajhala village north of Qayara base," Obeidi said on Twitter.</p> <p>"Our heroes arrived at the riverbank and made contact with Nineveh Liberation Operation units," he added, referring to troops who had set out from Makhmour, 25 km east of the Tigris, in March.</p> <p>The newly retaken territory still needs to be secured since IS insurgents remain holed up in several towns behind the government's front line, a military spokesman said.</p>

HEADLINE	07/12 Seattle police erasing dash cam videos?
SOURCE	https://photographyisnotacrime.com/2016/07/12/seattle-police-erasing-thousands-dash-cam-videos-massively-breaching-public-records-law/
GIST	<p>Washington state law requires all known videos by police to be kept for 90 days, but Seattle Police capture dash video from all patrol cruisers and automatically dump it 3-5 days later.</p> <p>Seattle activist Tim Clemans requested video from the fail-safe dash cam video recording system implemented by private contractor COBAN.</p> <p>His request was denied.</p> <p>Seattle Police Chief Kathleen O'Toole claimed in a lengthy letter, packed with legal jargon which you can see below, that Seattle PD would have to take cars out of service to retrieve the videos, which was clearly written by the department's legal team.</p> <p>"I think there's a reasonable way to preserve fail-safe video while not taking vehicles out of service: Remote into the car computer as admin and change the file permissions to prevent the dashcam software from deleting the video(s) requested," said Clemans on his blog.</p> <p>Based on Chief O'Toole's three page reply, it seems to indicate that Seattle Police Department definitely knows this video is being recorded, is not making any efforts to retrieve or store the videos as indicated by state law (see page 46) for at least 90 days and for the life of any criminal case.</p> <p>It's unclear what Clemans' next step will be, but it seems inevitable that Seattle PD's non-compliance with the law is sure to wind up in a courtroom costing taxpayers money to defend their own police department's law breaking activities.</p>

HEADLINE	07/12 Claim: Putin sacks Baltic fleet command
SOURCE	https://www.thesun.co.uk/news/1430469/vladimir-putin-russian-leader-sacks-every-commander-in-his-baltic-fleet-after-they-refused-to-confront-western-ships/
GIST	As many as 50 senior officers including a Vice Admiral have been purged by Vladimir Putin amid reports they refused to confront Western ships.

Other Russian news sites also speculated that attempts to cover up a crash between a Russian sub and a Polish boat may have been behind the bloodletting.

But given the endemic nature of corruption and incompetence across the Russian military, Western analysts are scratching their heads as to the real reason behind the purge.

The performance of Russia's military during recent high profile, large-scale military NATO military exercises in the Baltic may have something to do with it. As could the ever escalating games of brinkmanship being played out in the international waters and skies.

"Some hint that the 'buzzing' of USS Donald Cook by Russian Su-24 fighter-bombers on April 14, 2016 was meant to be part of a broader series of Russian confrontations against Western ships in the Baltic," says international affairs analyst Peter Coates.

"But the Russian Baltic Fleet in April, however, refused to follow such dangerous orders — hence Putin's retaliation against his own naval officers."

News of the purge has been trickling out through official Russian news agencies including TASS and Interfax.

But an article in The Moscow Times blamed "chaos" in the Baltic Fleet's command structure for the dramatic move, citing the Russian Defense Ministry as accusing the officers of dereliction of duty.

"On June 29, the Russian Defense Ministry announced it was purging the entire senior and mid-level command of the Baltic Fleet.

"It was a dramatic move that suggested deep structural problems within the fleet command.

"In total, 50 officers were dismissed from their post, including the fleet commander, Vice Admiral Viktor Kravchuk, and his chief of staff, Vice Admiral Sergei Popov," The Moscow Times report reads.

"Not since Stalin's purges had so many officers been ousted at once."

HEADLINE	07/12 N.C. deputies taunted at restaurant
SOURCE	http://abcnews.go.com/US/wireStory/north-carolina-deputies-taunted-restaurant-40516673
GIST	Two North Carolina sheriff's deputies say they were taunted and served inedible food at a restaurant in Shelby.

	<p>Cleveland County Sheriff's Capt. Joel Shores told WBTV he was angry, but not surprised by what happened at the Zaxby's restaurant Sunday.</p> <p>Shores posted a message on Facebook on behalf of the wife of one of the deputies, who were not identified.</p> <p>She said cooks yelled at the deputies and called them names. She said her husband and his partner ignored the insults and ordered anyway. The woman said her husband realized they had put the hottest sauce possible on his wings and he could not eat them.</p> <p>Shores later posted that Zaxby's had apologized.</p>

HEADLINE	07/12 County investigates 911 system outage
SOURCE	http://abcnews.go.com/US/wireStory/marylands-montgomery-county-911-system-outage-investigated-40515936
GIST	<p>Officials in a Maryland suburb of the nation's capital say they will investigate why the county's 911 system failed for two hours recently, during which time two people died.</p> <p>Officials said in a statement Monday that the Montgomery County 911 system was out from about 11:10 p.m. Sunday until 1:10 a.m. Monday. Callers received only a busy signal.</p> <p>During the outage, crews responded to two medical emergency calls involving fatalities, including that of a 91-year-old woman and a 40-year-old man. It's unclear if the outage was involved.</p> <p>County Executive Ike Leggett says he's requesting an immediate investigation.</p> <p>County chief spokesman Patrick Lacefield says the 911 outage was traced to a malfunctioning heating and air conditioning system that caused both the main power system and backup system to shut down.</p>

HEADLINE	07/12 Arctic sea ice falls to record low
SOURCE	http://www.upi.com/Science_News/2016/07/12/Arctic-sea-ice-falls-to-record-low-in-June/2381468341397/?spt=hts&or=7
GIST	<p>TORONTO -- Sea ice cover in the Arctic beat a hasty retreat throughout June, reaching record-breaking levels by month's end.</p> <p>Data published by the U.S. National Snow and Ice Data Center last week showed average sea ice extent for June was 100,000 square miles smaller than in 2010, the year of the previous June record.</p>

	<p>Almost every month this year has set new record lows for sea ice extent. March, however, was the second-lowest, slightly greater than 2015. The average sea ice extent for June was 4.09 million square miles.</p> <p>"In 30 years, the area has shrunk approximately by half. There doesn't seem to be anything able to stop this trend," said Christian Haas, an Arctic sea ice geophysicist at York University, Toronto.</p>

HEADLINE	07/12 New medical clinic for firefighters only
SOURCE	http://www.king5.com/news/health/new-medical-clinic-focused-only-on-treating-firefighters/270766613
GIST	<p>SEATTLE - A new primary care clinic focused on treating Seattle firefighters is set to open this week.</p> <p>The clinic will be run by Qliance, a Seattle-based membership-based company, and will be located above Seattle's Fire Station 2 in Belltown.</p> <p>The International Association of Fire Fighters cites studies showing firefighters face a high risk for heart disease, cancer, chronic respiratory disease, hepatitis and stress.</p> <p>"There's a great opportunity here to intervene early and help them prevent those things from developing in the first place, ideally," said Erika Bliss, MD, and CEO of Qliance.</p> <p>Bliss said Qliance will be able to cater its care to firefighters, who will have access to a streamlined version of the firefighter physical.</p> <p>The clinic is being paid for through the Seattle Fire Fighters Health Care Trust.</p>

	<p>“Because of the nature of our business, we also need unique health care and a unique program to make sure firefighters are as healthy as possible,” said Kenny Stuart, President of IAFF Local 27.</p> <p>This clinic includes a physical therapy room and an X-ray room.</p> <p>“Specialized care for fire fighters is really focused on identifying their risks patterns,” said Dr. Bliss. “Then we tailor make the experience so that we really know what fire fighters need.”</p> <p>The city will have a ribbon cutting this Thursday and will start seeing patients next week.</p>

HEADLINE	07/12 China corners rare-earth market
SOURCE	https://foreignpolicy.com/2016/07/12/decoder-rare-earth-market-tech-defense-clean-energy-china-trade/
GIST	<p>Most people have no idea what’s in an iPhone. Yttrium and praseodymium don’t exactly roll off the tongue, but they’re part of what make smartphones so small, powerful, and bright. These exotic materials are among the planet’s 17 rare-earth elements, and surprisingly, the soft, silvery metals are not at all rare.</p> <p>But they’re found in tiny concentrations, all mixed together, and usually embedded in hard rock, which makes them difficult — and messy — to isolate. In China, which mines 89 percent of global output, toxic wastes from rare-earth facilities have poisoned water, ruined farmlands, and made people sick.</p> <p>Beyond high-tech gadgets, rare earths play a critical role in national defense, enabling radar systems and guided missiles. Ironically, they also power clean-energy technologies, such as wind turbines and electric cars. This year, global consumption is expected to be about 155,000 tons, far more than the 45,000 tons used 25 years ago. Demand will only grow — likely at an accelerated pace — as the world tries to rein in climate change.</p> <p>At the moment, only China can satisfy that hunger. Yet in 2010, Beijing cut rare-earth exports by 40 percent — possibly to boost its high-tech sector — and cut off supplies to Japan over a territorial dispute. Its muscle flexing caused prices to soar, sparking new exploration for rare-earth deposits around the world.</p> <p>A boom in illegal mining in China has since driven prices back down, making it extremely difficult for non-Chinese mines to stay open or get off the ground. Nevertheless, the rest of the world hasn’t given up: There are currently 50 deposits at an advanced stage of development (see map below) that could someday challenge China’s dominance.</p>

HEADLINE	07/12 Singers add 'all lives matter' in anthem
SOURCE	http://www.nbcnews.com/news/us-news/canadian-singers-slip-all-lives-matter-message-anthem-all-star-n608306
GIST	<p>SAN DIEGO — A Canadian singing quartet changed a lyric in its national anthem and held up a sign proclaiming "All Lives Matter" during its pregame performance at the 87th All-Star Game on Tuesday.</p> <p>The Tenors, a group based in British Columbia, caused a stir at Petco Park with their unexpected actions while singing "O Canada."</p> <p>One member of the group held up the sign during the middle portion of the anthem, which is often sung in French at sporting events.</p> <p>The Tenors instead sang: "We're all brothers and sisters. All lives matter to the great." The normal lyric is "With glowing hearts we see thee rise. The True North strong and free."</p> <p>"United We Stand" was written on the back of the quartet's sign.</p> <p>Although the audio wasn't crystal-clear at the park, many fans reacted with surprise when they saw the sign on the ballpark video scoreboard. The Canadian anthem wasn't shown live on U.S. television, but it aired in Canada, where the Tenors' decisions lit up social media with overwhelming criticism of the change.</p>

HEADLINE	07/12 Seattle a 'hotspot' for car thefts
SOURCE	http://www.king5.com/news/crime/seattle-a-hot-spot-for-car-theft/270643987
GIST	<p>The National Insurance Crime Bureau recently released its annual "hot spots" report that shows the cities with the highest per capita vehicle theft rate. Yakima and Seattle rank No. 19 and No. 20 on the list.</p> <p>Washington State is considered No. 4 in the nation for most car thefts according to the NICB.</p> <p>A recent presentation by Seattle Police Detective Scotty Bach described how auto thefts are up more than 18% this year in King County. The West Seattle Blog reports that the same presentation revealed 'car prowls' are worse than ever.</p> <p>So far this year, for example, in all of King County, auto thefts are up more than 18% this year. The West Seattle Blog reports that the same presentation revealed 'car prowls' are worse than ever.</p>

HEADLINE	07/12 Ore. Gypsy Joker's eyed in torture slay
SOURCE	http://www.thedailybeast.com/articles/2016/07/12/oregon-s-white-supremacist-biker-gang-eyed-in-torture-slay.html
GIST	<p>Members of the Gypsy Joker Motorcycle Club call each other brothers. Once a Joker, always a Joker, “till the day you die,” members say. But when Robert Huggins died last July—his mutilated body identified by his Gypsy Joker tattoos—it was at the hands of his so-called brothers, police claim.</p> <p>In a July 11, 2016 hearing, prosecutors described Huggins’s death as torture, alleged punishment after a rare excommunication from the Gypsy Jokers. Someone had driven nails through the 56-year-old biker’s boots. His skull, one leg, and a rib were fractured. His face and back bore multiple slash wounds.</p> <p>Charged with Huggins’s murder are four high-ranking Gypsy Jokers, whose testimony could offer a rare glimpse inside Oregon’s secretive, white supremacist motorcycle club.</p> <p>The Portland, Oregon-based Gypsy Jokers call themselves a “One Percent” bike club. The title has nothing to do with their tax bracket. Instead it references an old motorcyclist maxim that “99 percent” of bikers abide by the law, while the other 1 percent are outlaws. Stitching “1%” patches on their jackets or tattooing the sign on their bodies, Gypsy Jokers revel in the outlaw title.</p> <p>Until his relationship with the Gypsy Jokers went bad in 2014, Robert Huggins, aka “Bagger Bobby,” was the group’s treasurer and “enforcer,” Portland Police Bureau Homicide Detective James Lawrence testified during a Monday bail hearing.</p> <p>Huggins lived in Portland, Oregon, where the Gypsy Jokers’ United States branch is headquartered. The group keeps a notorious clubhouse on Martin Luther King Jr. Boulevard. But the club’s address is the closest the group will come to diversity; Gypsy Joker membership is whites-only.</p> <p>Huggins was white. But his issues with the Gypsy Jokers apparently began when he violated that second-to-last membership clause: no needle users. Huggins was a heroin user, police say. That was his first strike. His second strike was allegedly stealing from the Gypsy Jokers’ coffers, using his treasurer role to fund his drug habit. The club kicked him out with a non-fatal beating in 2014, investigators say.</p> <p>“They were absolutely done,” Senior Deputy District Attorney Glen Banfield testified during the Monday bail hearing.</p> <p>The Gypsy Jokers appointed a new enforcer, who was quickly arrested on felony weapons charges after posing with a gun on Facebook. But Huggins was not ready to forgive the group for banishing him. In</p>

	<p>June 2015, he decided to give the Gypsy Jokers a taste of their own outlaw justice, police say. With revenge on his mind, Huggins broke into the home of Mark Dencklau, the club's regional president.</p> <p>Once inside, Huggins allegedly tied up Dencklau's girlfriend, threatened her at gunpoint, and robbed the house.</p> <p>The insult was too great for the Gypsy Jokers to ignore, prosecutors say.</p> <p>Early on July 1, 2015, a Chevrolet Suburban parked outside the home where Huggins was staying. "Somebody help me!" a woman staying at the house heard Huggins shouting. It was the last anyone heard of him. Shortly before 6 a.m., loggers found him lying dead in a rural field.</p>

HEADLINE	07/12 Europol: human smuggling record level
SOURCE	http://www.reuters.com/article/us-mideast-crisis-smuggling-europe-idUSKCN0ZS2CE
GIST	<p>LONDON (Thomson Reuters Foundation) - Law enforcement agencies are battling a surge in the number of people smugglers to record levels as criminal networks cash in on Europe's escalating migrant crisis, according to the head of the European Union's police agency Europol.</p> <p>Director Rob Wainwright said the crime-fighting agency now had close to 50,000 suspected people smugglers in its database, with an extra 7,000 suspects added in the first half of 2016.</p> <p>He said the number of people seeking to make money out of the thousands of people fleeing to Europe to escape conflict and poverty was picking up pace, with 6,400 new suspects identified by Europol in 2014 and 10,000 during 2015.</p> <p>Wainwright said people smugglers were deploying more sophisticated techniques to evade tighter border controls in Europe and increasingly pairing human trade with drug trafficking.</p> <p>"We are seeing a huge increase in the size of the criminal market ... with larger syndicates starting to bed down and take control," Wainwright told the Thomson Reuters Foundation in an interview.</p> <p>A Europol report earlier this year labeled people-smuggling as the "fastest growing criminal market in Europe", estimating gangs netted 6 billion euros (\$6.6 bln) last year which could double or triple if the migration crisis persisted.</p>

HEADLINE	07/13 Colombia targets wildlife traffickers
SOURCE	http://www.insightcrime.org/news-analysis/colombia-investigation-reveals-workings-of-wildlife-traffickers

GIST	<p>Authorities in Colombia say they have dismantled the largest wildlife trafficking ring ever discovered in the country, lifting the veil on the shadowy networks behind a lucrative, but widely underreported transnational criminal activity.</p> <p>On July 7, Colombian police announced they had taken down a wildlife trafficking ring known as Los Pajareros (The Birders), which they accused of selling and distributing endangered wildlife across Colombia and internationally.</p> <p>In raids against the network, police arrested eight people and recovered 83 animals, among them parrots, turtles, flamingos, turkeys, toucans, gulls, storks, capybaras, canaries and parakeets.</p> <p>The arrests are the result of a yearlong investigation that began with a tip off that Heriberto Mateus, alias "El Pajarero," was selling endangered species in a market in the city of Girardot, El Espectador reported. After putting Mateus under surveillance, police then traced his suppliers, the brothers Jairo and José Luis Algarra Gutiérrez, who allegedly headed the gang.</p> <p>According to El Espectador, police believe vendors such as Mateus put in their specific requests with Jairo Gutierrez, who paid locals in rural areas between \$10 and \$17 to source the animals. The animals were then sedated and transported to farms or private houses that acted as distribution centers before being trafficked on to customers or sales points.</p> <p>The animals were kept at these wildlife warehouses in deplorable conditions, and subjected to cruel treatment such as birds having their feathers dyed to make them more attractive, the police stated.</p> <p>While many of the animals were then sold in Colombia, police say some were also moved on to Ecuador and Mexico. Police sources told El Espectador they believe the animals were trafficked internationally by sedating them and then concealing them on the person of "mules" or sending them directly to buyers by mail.</p> <p>Police estimate that 90 percent of the species trafficked by Los Pajareros were endangered and that their operations earned them between \$27,000 and \$48,000 a month.</p>

HEADLINE	07/13 Torture scandal in Mexico
SOURCE	https://www.washingtonpost.com/world/the_americas/torture-scandal-in-mexico-american-nearly-beaten-to-death/2016/07/13/e4130ace-48ae-11e6-8dac-0c6e4acc5b1_story.html
GIST	MEXICO CITY — Ronald James Wooden flexes the large blacksmith’s hands with which he once forged everything from large chandeliers to intricate jewelry. He’s says he is still regaining feeling in them three years after a four-hour beating with fists and rifle butts by municipal police in southern Mexico.

The officers tightened his handcuffs and then stood on them to inflict maximum damage to his hands, said Wooden, 46, who had set up a workshop in the hills outside the silver-mining city of Taxco along with his Mexican-born wife. Police detained him for allegedly disturbing the peace, but Wooden says the beating arose from a dispute with his neighbor, a former cop who claimed to belong to a local drug cartel.

“They beat me for close to four hours. Some would get tired and then others would come in. They were going to kill me and disappear me,” said Wooden, who said he suffered nerve damage, broken ribs and injuries to his genitals.

He said what saved him was “divine intervention and the love that my family has for me.” His wife, Carmen, waited outside the police station for hours until she was allowed to pay Wooden’s 200-peso (\$12 fine) and took him to a hospital after he was released.

Human rights groups say police torture remains all too common in Mexico, but Wooden’s case from 2013 is unusual in two respects: He’s an American citizen and he’s won a court order for a criminal investigation into the beating.

A probe in 2014 by the governmental Human Rights Defense Commission in Guerrero state found that Taxco police illegally detained Wooden, contradicted themselves about how he sustained his injuries and essentially lied about their extent. It found that the American had been covered in bruises, scrapes and cuts.

The commission issued a directive that municipal authorities should punish those responsible and pay reparation.

After two years of no action, a federal judge on June 30 ordered Mexico’s government to open a formal criminal investigation for torture and kidnapping in Wooden’s case.

“This opens a new road, little explored and little used” to force authorities to investigate the thousands of torture complaints in Mexico, said Mario Santiago, a lawyer for the human rights group Idheas, which is representing Wooden. “We know there are hundreds or thousands of torture complaints all the time in the country. There is no investigation; these go unpunished.”

HEADLINE	07/12 DHS worker arrested for gun at HQ
SOURCE	http://www.cnn.com/2016/07/12/politics/dhs-contract-employee-gun/
GIST	A contract employee for the Department of Homeland Security was arrested Monday after allegedly attempting to take a concealed firearm through security at the department's headquarters, DHS spokeswoman Marsha Catron said.

The employee, an intelligence analyst, was found to be in possession of an unauthorized 9 mm pistol as he went through security screening at the DHS Nebraska Avenue Complex (NAC). Questions seeking additional details, including the employee's name and the charges filed, were referred to Washington, D.C., police, who didn't immediately respond to a request for comment.

Last month, another Homeland Security employee, Jonathan Wienke, was arrested at the NAC after allegedly carrying a gun onto DHS property without a license. Investigators later determined that Wienke may have been plotting to carry out a violent attack, possibly on senior DHS officials who worked near him.

While investigators are still determining Wienke's motive and the extent to which he may have plotted, a statement addressing the latest incident by DHS said authorities "have no information to suggest that this individual sought to cause harm," and attributed Monday's arrest to "enhanced security and screening measures at the NAC."

HEADLINE	07/12 Shots fired at D.C. officers; 5 arrests
SOURCE	http://www.wusa9.com/news/local/shots-fired-at-officers-in-se-dc-arrests-made-/270545267
GIST	<p>WASHINGTON (WUSA9) -- Five people have been arrested after shots were fired at police early Tuesday morning in Southeast, D.C., Metropolitan police said.</p> <p>The incident happened in the 3200 block of 6th Street where a large SUV was parked. When officers got there the people inside the SUV immediately started firing at them.</p> <p>The officers started firing as well. Nobody was hit or injured, authorities said.</p> <p>The occupants in the SUV refused to get out, which then led to a 30 minute barricade situation. Officers were eventually able to talk the occupants out of the SUV.</p> <p>Two adult males and two females were arrested in connection with the incident.</p>

HEADLINE	07/13 Report: Sterling's earlier brush with cops
SOURCE	http://www.cbsnews.com/news/alton-sterling-had-earily-similar-brush-with-cops-in-past-report/
GIST	<p>BATON ROUGE, La. - The CBS affiliate here has obtained a police report that details a previous arrest of Alton Sterling stemming from an incident eerily similar to the recent one that led to his being shot to death by an officer.</p> <p>CBS News also obtained a copy of the police report.</p>

Sterling, 37, was killed in a shooting involving two Baton Rouge police officers on July 5. It turns out Sterling had struggled with police in the past, WAFB says.

Documents show that, in May 2009, Sterling fought with cops outside a convenience store where he was selling CDs while carrying a gun.

In the report dated May 29, 2009, the officer said he was dispatched to a convenience store after getting a complaint about a subject "on the corner selling CDs" and that the subject had pulled a gun on someone.

According to the officer's report, when he arrived at the store, he spotted the suspect, whom he later identified as Sterling, carrying a crate of CDs.

The officer asked Sterling to put his hand on the hood of his police car and asked if Sterling had any weapons on him. The report says Sterling did "not answer" and, as the officer continued to pat him down, Sterling started reaching for his pocket.

The officer went on to say in the report that Sterling suddenly spun around and the two began to struggle. The officer and Sterling hit the ground. The officer said he was able to call for backup as Sterling tried to push him off.

"While wrestling with this subject on the ground, a black semi-auto hand gun fell from this subject's waist band at this time," the report states.

A deputy with the East Baton Rouge Sheriff's Office arrived as the officer was on the ground with Sterling. The two eventually were able to get Sterling into handcuffs. "Sterling was then escorted to my unit, where he continued to fight with officers," the report ends.

After that incident, Baton Rouge Police charged Sterling with possession of marijuana, sound reproduction prohibited (for the CDs), illegal possession of a firearm with drugs, resisting an officer and illegal possession of a stolen firearm, says WAFB.

Sterling pleaded guilty to illegal carrying of a weapon with a controlled dangerous substance. On July 19, 2011, he was sentenced to five years in prison, where he was until being granted parole on Dec. 5, 2013.

HEADLINE	07/12 Arrests in plot to attack La. police
SOURCE	http://abcnews.go.com/US/baton-rouge-gun-burglary-tied-plot-attack-police/story?id=40531402
GIST	<p>A burglary at a pawn shop in Baton Rouge is believed to be part of a larger conspiracy to attack police officers in the area, according to the Baton Rouge Police Department.</p>

Eight guns were stolen from Cash America Pawn Saturday before 2 a.m., police said. Of the four suspects who were involved in the burglary, three have been taken into custody. One suspect told police he was looking for bullets to harm police officers in the Baton Rouge Area, said Baton Rouge Police Chief Dabadie, Jr.

Police said they consider the threats credible. Six of the firearms, which were all handguns, have been recovered. A BB gun was also stolen from the store.

One of the suspects was apprehended while fleeing on foot. A 17-year-old was apprehended on the scene in possession of one handgun and one airsoft BB gun. During questioning, he informed police that he and the three other suspects stole the firearms and were going to get bullets to shoot police. He was booked into parish prison for simple burglary and theft of a firearm, police said.

One of the suspects involved in the burglary was a 13-year-old, who was charged with simple burglary and theft of a firearm, police said. Another suspect, 20-year-old Malik Bridgewater, was arrested Sunday at his home and charged with burglary and theft of a firearm. Police recovered three of the stolen handguns from him.

Police are asking that the fourth suspect, who is still at large, turn himself in. His identity is unknown.

brought to you with support from

COMMUNITY

Memorial Service Honors Fallen Officers in Dallas.

There was widespread media coverage on Tuesday of a Memorial Service held in Dallas to honor the five police officers who lost their lives in a Deadly ambush last week. Over 2,000 individuals attended the memorial, including Presidents Obama and George W. Bush, religious leaders, senators, and police officers from all across the country. The [Dallas Business Journal](#)   (7/12, Carlisle) says President Obama “called for the nation to unify,” and praised the city’s police. Obama said, “The Dallas Police Department has been doing it the right way and, on behalf of the American people, I want to thank you. You are a powerful example.”

The [Wall Street Journal](#)   (7/12, Lee, Frosch, Lazo) reports President Obama spoke at some length about the five officers who were killed, in their roles as fathers, husbands, military veterans, and police personnel. President Bush is quoted saying, “These slain officers were the best among us...With their deaths, we have lost so much. We are grief stricken, heartbroken and forever grateful.”

CRIME & DRUGS

Apparent Mass Synthetic Marijuana Overdose In New York City Sickens 33.

The [AP](#)   (7/13) reports on an apparent “mass drug overdose on a New York City street corner” that has sickened 33 individuals. Police and health officials have responded with warnings about synthetic marijuana, or K2. The New York Health Department commented, “We remind New Yorkers that K2 is extremely dangerous,” and that “the city’s public awareness efforts and aggressive enforcement actions over the past year have contributed to a significant decline in ER visits related to K2.”

Europol Warns People-Smuggling Is At Record Levels.

[Reuters](#)   (7/12, Esslemont) reports Europol issued a warning saying “law enforcement agencies are battling a surge in the number of people-smugglers to record levels as criminal networks cash in on Europe’s escalating migrant crisis.” Director Rob Wainwright “said people-smugglers were deploying more sophisticated techniques to evade tighter border controls in Europe and increasingly pairing human trade with drug trafficking.” Europol released estimates saying criminal gangs received \$6.6 billion last year for people-smuggling.

OFFICER SAFETY & WELLNESS

Three Men Arrested For Plot To Kill Baton Rouge Officers.

The [CBS Evening News](#) (7/12, story 3, 1:10, Pelley) reported Baton Rouge police say on Saturday morning, three men ages 20, 17, and 13 broke into a pawn shop and stole eight guns while a protest over the death of Alton Sterling was taking place in front of police headquarters. One suspect was found in the shop, and allegedly told the responding officer that “he was looking for bullets in order to use with the stolen guns to kill law enforcement in the Baton Rouge area.” The three young men were apparently arrested on Tuesday.

The [New York Times](#)   (7/12, Robertson) reports Baton Rouge law enforcement cited the plot “to explain the heavy police presence at protests within the last week.” One of the four suspected in the plot has not yet been arrested. Police Chief Carl Dabadie Jr. described the threat as ongoing and credible.

Lynch: DOJ Ready To Assist Michigan After Courthouse Shooting.

[Reuters](#)   (7/12) reports that Lynch said the Justice Department “stands ready to assist local law enforcement in the aftermath of a deadly shooting in a Michigan courthouse on Monday.”

Slain Michigan Bailiffs Identified. The [CBS Evening News](#) (7/12, story 4, 0:25, Pelley) reported Joseph Zangaro and Ronald Kienzle were the two bailiffs killed in Michigan yesterday after an inmate grabbed one of their guns. The inmate, whose shots injured two others, was shot and killed by another bailiff.

TECHNOLOGY

Federal Judge Suppresses Stingray Evidence In Landmark Decision.

[Reuters](#)   (7/12, Raymond) reports a federal judge in Manhattan, for the “first time,” “suppressed evidence obtained without a warrant by US law enforcement using a stingray.” The judge ruled the DEA violated a defendant’s rights when a stingray device was used “without a warrant to find his Bronx apartment.” Judge William Pauley wrote, “Absent a search warrant, the government may not turn a citizen’s cell phone into a tracking device.” The ACLU claims the ruling is the “first time a federal judge had suppressed evidence obtained using a stingray.”

“Pokémon Go” Game May Be Summer Craze, But Some Have Security, Safety Concerns.

The [Daily Beast](#)   (7/11, Allen) reports that new Nintendo mobile game Pokémon Go is a “hacker’s dream,” because the developer, a Google spin-off named Ninantic, has “acquired a gold mine of personal information” through the game. The Daily Beast says the growing “database of personal data has become a ripe target for hackers, criminals, and corporations, practically overnight.”

Police Warn Of Robberies Committed Through New “Pokemon Go” Game. [CBS News](#)   (7/10) reported Police in St. Louis and St. Charles counties are saying “four men used the newly released ‘Pokémon Go’ game to commit multiple robberies.” The suspects are alleged to have committed the robberies by “targeting their victims through the...game.” CBS News adds that police believe the suspects placed a beacon in the game to “lure...players nearby.”

CRIMINAL INTELLIGENCE

MS-13 Founder Sentenced For Illegal Re-Entry.

The [AP](#) (7/12) reports from Boston that “the founder of a notorious street gang has been sentenced to prison in Massachusetts for illegally entering the United States after having been deported.” Carlos Geovanni Martinez-Aguilar, of Mesquite, TX, was sentenced on Tuesday by a federal judge to three years in prison followed by two years of probation. Martinez-Aguilar pleaded guilty in April to unlawful re-entry of a deported alien. Federal prosecutors said Martinez-Aguilar, “a native of El Salvador, illegally entered the U.S. in 1995.” He was convicted of unarmed robbery in 2002 and was deported in 2003.

Apparent Mass Synthetic Marijuana Overdose In New York City Sickens 33.

The [AP](#) (7/13) reports on an apparent “mass drug overdose on a New York City street corner” that has sickened 33 individuals. Police and health officials have responded with warnings about synthetic marijuana, or K2. The New York Health Department commented, “We remind New Yorkers that K2 is

extremely dangerous,” and that “the city’s public awareness efforts and aggressive enforcement actions over the past year have contributed to a significant decline in ER visits related to K2.”

LEGAL ISSUES

Federal Judge Suppresses Stingray Evidence In Landmark Decision.

[Reuters](#) (7/12, Raymond) reports a federal judge in Manhattan, for the “first time,” “suppressed evidence obtained without a warrant by US law enforcement using a stingray.” The judge ruled the DEA violated a defendant’s rights when a stingray device was used “without a warrant to find his Bronx apartment.” Judge William Pauley wrote, “Absent a search warrant, the government may not turn a citizen’s cell phone into a tracking device.” The ACLU claims the ruling is the “first time a federal judge had suppressed evidence obtained using a stingray.”

Proposed Legislation To Outlaw Ransomware In California Gaining Support.

The [Los Angeles Times](#) (7/12, Ulloa) reports proposed state legislation to outlaw ransomware in California is “drawing broad support from tech leaders and lawmakers.” The Times says the proposed bill would make knowingly using ransomware a felony. Critics of the legislation are wondering “just who will get caught in the dragnet, as such incidents are tough to trace and culprits are often overseas.” The Times says California Gov. Jerry Brown may sign the legislation before the end of August.

Rhode Island Governor Signs Bill To Reduce Opioid Abuse.

The [Providence \(RI\) Journal](#) (7/12, Borg) reports that Rhode Island Governor Gina Raimondo (D) signed bills intending to prevent opioid overdose into law on Tuesday. The package of measures, which aim to reduce opioid overdose deaths by one third within three years, “requires all insurers to cover naloxone to prevent fatal overdoses, limits the length of most first-time opioid prescriptions for acute pain, and requires insurers to cover expanded medication-related treatment.”

TECHNOLOGY

Researchers Create New Anonymous Network.

[The Hill](#) (7/11, Uchill) reports researchers at MIT and the Swiss École Polytechnique Fédérale de Lausanne collaborated on creating a “network architecture they claim is a dramatically more efficient way for users to interact anonymously.” The technology, known as “Riffle networking,” “could make it more difficult for law enforcement to trace the source of illegal or copyrighted files being transmitted

over a network.” The Hill says Riffle works differently than Tor because Riffle “mixes up the order of servers, making it difficult to figure out who is contacting what.”

“Pokémon Go” Game May Be Summer Craze, But Some Have Security, Safety Concerns.

The [Daily Beast](#) (7/11, Allen) reports that new Nintendo mobile game Pokémon Go is a “hacker’s dream,” because the developer, a Google spin-off named Ninantic, has “acquired a gold mine of personal information” through the game. The Daily Beast says the growing “database of personal data has become a ripe target for hackers, criminals, and corporations, practically overnight.”

Subject: Chevrolet Police/Fire 2017 Ordering Update

All,

Please see attached for Buildout 2016-2017 and 2017 ordering dates and click on the Start-up Matrix tab at the bottom of page.

We start taking orders for our 2017 Tahoe Police and Suburban HD vehicles this Thursday, July 7. Please submit your orders as soon as you can as production for 2017 Tahoe Police vehicles do not begin until Sep 28.

2017 TAHOE PPV 4WD

2017 SILVERADO SSV

Please let your departments know we are accepting 2017 Silverado SSV Police orders. The Silverado SSV is based off the Tahoe SSV police package so it is designed for police use. It has the following exclusive equipment in its segment:

- Auxiliary Battery
- High Capacity Air Cleaner
- Upfitter Connections for Speedometer & Battery
- Surveillance Calibration (able to turn off all interior and exterior lights with one flip of the switch)
- Grille, Siren, Horn, Wiring
- Common Fleet Keys

The other manufacturers do not have this equipment available in their SSV pickups. The Silverado SSV is a true Police Pick-up Truck.

2017 IMPALA 1FL V6 DECTECTIVE

In addition, we have our all-new Impala 1FL V6 (see attached) which is intended for government fleets aimed at administration and detective use. We have several police options that you can add to the new Impala such as spot lamps, wiring harness for grille and siren speakers, and wiring harness for horn/siren circuit, interior or exterior light bars, etc.

2017 CAPRICE PPV

We are currently taking orders for our 2017 Caprice PPV's. The largest police sedan available on the market. We also have 2016 Caprice PPV's already built on the ground in California for you to tag if interested. Please see your local dealer for tagging.

2017 EXPRESS PRISONER VAN

Our Express Prisoner van is the only body on frame prisoner van available meaning that he can take the punishment and has the durability. There are plenty of Ready-made prisoner inserts are available for our van as well.

Please see attached for 2017 ordering dates.

Thank you,

Rich Patterson

Subject: REMINDER: 2016 Tahoe PPV & SSV order cut off is THURSDAY, JUNE 2

All,

The 2016 Tahoe PPV & SSV order cut off is THURSDAY, JUNE 2, 2016. Please place your orders before it's too late. 2017 TAHOE PPV PRODUCTION DOES NOT BEGIN UNTIL SEPTEMBER 28.

Attached is the latest 2016 Order Cutoff and 2017 Start of Ordering dates for General Motors. Please let your departments know about these important dates so they can order accordingly.

When you look at the attachment please look to the far right for the order cutoff and start-up dates. Dates in red have been updated from my last email. There are two tabs at the bottom – one is 2016 Build-out Matrix and the other is 2017 Start-up Matrix. Please click on the tab to see the information you want and then scroll up or down to find the vehicles you may be interested in ordering.

In the Build-out tab, SEO means Special Equipment Options. For example, back-up alarm, rear seat delete, etc.

Please let me know if you have any questions

CRIMINAL INTELLIGENCE

CNBC Analysis: Darknet Is Haven For Criminal Activity And Easier To Access Than Ever.

[CNBC](#) (5/19, Taylor) analyzes the darknet, "the part of the internet that lies beyond a normal web browser's reach." CNBC says the darknet "is a haven for an astonishing amount of criminal commerce," such as "a vast array of illegal products and services." CNBC adds that users can get onto the darknet easier than ever with the download of a TOR browser. CNBC says the darknet also contains "education services aimed at helping bad guys evade detection."

ABC News Analysis: Gun Store Burglaries On The Rise.

[ABC News](#) (5/19) reports statistics from the ATF show a "28 percent increase from 2013 to 2015" in gun store burglaries. ABC News says the statistics show "more than 12,000 handguns, shotguns, and rifles [were] stolen." ABC News adds that the ATF has released recommendations to gun dealers on how to secure their stock as "thieves have been using any means necessary to get their hands on valuable firearms."

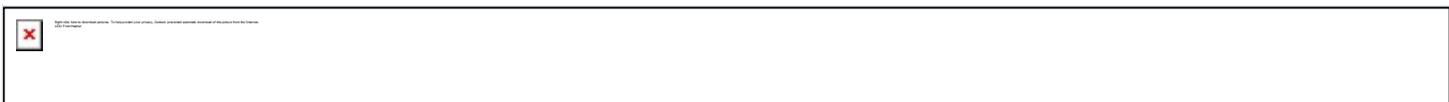

Two Individuals Added To FBI's Ten Most Wanted Fugitives List.

The [Chicago Tribune](#) (5/19, Meisner) reports that the FBI has added reputed Chicago-area street gang member Luis Macedo to its Ten Most Wanted Fugitives list. According to the bureau, Macedo has been charged with first degree murder and fleeing to avoid prosecution. He may be in Mexico or somewhere in the Southern United States. The [Los Angeles Times](#) (5/19, Rocha) reports that the FBI on Thursday added Los Angeles Man Philip Patrick Policarpio to its Ten Most Wanted Fugitives list. Policarpio has been charged with first-degree murder and state and federal warrants have been issued for his arrest. [NBC News](#) (5/19, Schuppe) adds online that authorities say Policarpio may have fled to Las Vegas.

AP Examines History Of The FBI's Ten Most Wanted Fugitives List. The [AP](#) (5/19) reports that the "FBI had hunted dangerous fugitives for years when a United Press International reporter asked in 1949 for the names of the 'toughest guys' to catch." The resulting 1949 article was so popular that then-FBI Director J. Edgar Hoover made the list permanent. "The list has been populated by bank robbers, killers, kidnappers, drug traffickers, terrorists and others – many whose names were known around the country and the world, and others who were little known beyond the city limits where their crimes were committed. Some weren't captured for years, while one guy was on the list for all of two hours before he was captured," the AP says. Several notable figures, including Osama Bin Laden, have been included in the list.

Massachusetts State Police Introduce Electronics-Sniffing Dog.

[Boston](#) (5/19, Palma) reports Massachusetts State Police introduced Winnie, who is "one of only seven dogs in the country certified" to "sniff out electronic devices." Winnie, who went through a five-week training course, will aid police in investigating "criminals such as child pornographers and those who use electronic equipment to make threats, try to conceal these items because they hold evidence of their crimes."

We hope you are enjoying the **LEIU Daily** and you are deriving a great deal of value from this report. It provides you with the latest law enforcement news and include timely coverage of issues involving organized crime, terrorism, gambling, and legal news that may impact you. You can count on **LEIU Daily** for comprehensive coverage. I am glad we can share this member benefit with you

as I believe it will help us all stay abreast of rapidly developing stories, issues, and regulations in our field.

On another note --Your LEIU Executive Board believes this Daily Briefing is also beneficial to others in your department and encourage you to share with your colleagues, subordinates, and management. **Please take the time to invite your unit members to receive the LEIU Daily each morning via the "Invite a colleague" button at the bottom of your briefing. Sharing this briefing with your team is one of the benefits of your LEIU membership. The more people who can benefit from this Daily Briefing the more effective we become.**

Bob Morehouse, Executive Director
LEIU

LEGAL ISSUES

Senators Introduce Bill To Stop Botnets.

[FedScoop](#) (5/19, Otto) reports Sens. Lindsey Graham, Richard Blumenthal, and Sheldon Whitehouse introduced the Botnet Prevention Act this week that would "give the government greater powers to prosecute and punish those who operate and rent out botnets." FedScoop adds that the bill would also "expand the Justice Department's civil injunction authority to tear down botnets."

NYPD Sued By Civil Liberties Union For Using "Stingray" Device.

The [New York Post](#) (5/19, Marsh) reports the NYPD has been sued by the New York Civil Liberties union "because of privacy concerns over portable cell phone tracking devices called 'Stingrays.'" The lawsuit claims the "NYPD has no written policing governing the use" of the devices that have the "potential to implicate the privacy of countless innocent New Yorkers." The Post adds that police records have "shown that the devices have put scores of murderers, rapists, and other violent criminals behind bars."

TECHNOLOGY

Saab Develops "Sea Wasp" Technology To Disarm Underwater Bombs.

[Fox News](#) (5/19) reports Saab has developed “Sea Wasp” technology “that will be able to discover and tackle bombs hidden underwater off US shores and near American vessels,” and will test the technology in the next year with several law enforcement groups. Fox News says “the threat of improvised explosive devices underwater continues to grow,” and this new device is “specifically designed to handle the challenging conditions human EOD divers routinely face.” Saab’s “Sea Wasp” can be controlled by two individuals from a remote site to reduce risk to personnel, according to Fox News.

Description: Briefing Title
To Whom it May Concern,

I am writing to see if I might be able to obtain the contact information for the Idaho Criminal Intelligence Center **Director**.

I have been working with several **Fusion Center directors** over the past weeks, creating a daily briefing service that is to go out to all those affiliated with them in the community – be they law enforcement, first responders, or other EMS teams.

I have included below the sample we developed for the Central Region – and I am interested in a conversation with your director about whether or not such a daily briefing would be of interest/help to the ICIC and other Fusion Centers in the West.

Many thanks for your consideration.

Regional News

Chicago Police Superintendent: Weekend Gun Violence “Completely Unacceptable.”

The [Chicago Tribune](#) (5/9, Gorner) reports that Chicago Police Superintendent Eddie Johnson, “confronted with the bloodiest weekend in Chicago” since he was named to the post six weeks ago, on Monday “called the gun violence ‘completely unacceptable’ and said the dozens of shootings highlight ‘the uphill battle’ confronting police.” A Tribune analysis found that “more than 50 people were shot, eight fatally, between Friday afternoon and early Monday, the city’s most violent weekend since the end of September.” Chicago “is already closing in on 200 homicides as the city endures its worst violence since the late 1990s,” and “at this rate, the city is on pace to top 500 homicides for the year for only the second time since 2008.”

US Charges 11 In Texas Crack House Operation.

The [Houston Chronicle](#) (5/9, Banks) reports that 11 Jefferson County, TX men are facing federal drug charges “following a federal investigation into a crack cocaine operation prosecutors believe was run out of [a] family home in Beaumont.” A federal grand jury last week “indicted 13 individuals on four counts,” and “a task force of federal, state and local officers Friday began executing search warrants, according to a press release from the U.S. Attorney for the Eastern District of Texas, based in Beaumont.” US Attorney John M. Bales “called the alleged family business ‘a vortex of misery and lost dreams,’ in the release.” The Chronicle adds that five defendants in the case, all from

Beaumont, TX, “were apprehended and are expected to have initial appearances in federal court this week,” while “six other defendants, also from Beaumont, were already in custody.”
West Virginia Man Faces Charges Over Possession Of Guns, Explosives.

The [AP](#) (5/9) reports that 66-year-old Denver Clifford Julious was arrested Friday at his Hilltop, West Virginia home “on charges of making an explosive device” after authorities executed a search warrant there and “seized multiple firearms and a substantial amount of explosive materials.” Julious, who “has a violent criminal history and had made threats to others” is facing “multiple charges, including possession of a destructive device or explosive materials and being a felon in possession of a firearm.”

Grand Forks Police Recover Explosives Following Accidental Gun Firing.

The [AP](#) (5/9) reports that over the weekend, Grand Forks, North Dakota police “recovered explosives from an apartment” following a call indicating that a man accidentally “fired a gun through the floor of an apartment.” No injuries were reported, “but officers who obtained a search warrant for the apartment called in a bomb squad when they found ‘concerning’ items.”

National News

DHS Conducts Airborne Material Tests In New York City Subway.

[ABC News](#) (5/9) reports that on Monday, DHS personnel “released non-hazardous gas into the New York city subway as part of a study designed to help authorities know how to respond in case a biological weapon, like anthrax or ricin, were released in the nation’s largest public transit system.” ABC adds that the “harmless particulate tracers” will be tracked “over the next five days from Grand Central, Times Square and Penn Station subway platforms” while “equipment at more than 55 stations throughout Manhattan will measure airflow,” according to officials.

FBI Memo Urges Police To Recreate Evidence Gathered With Stingrays.

[ZDNet](#) (5/9) reports on a recently disclosed FBI document urging a local police department to recreate evidence gathered using Stingray technology by some other means before presenting it at trial. Departments that use Stingrays are bound by a non-disclosure agreement required by the device’s manufacture. “Disclosing the use of stingrays would violate the non-disclosure agreement. Many cases have been dropped to prevent disclosing the use of the technology,” ZDNet says.

Jury Selection Begins In Trial Of Three Men Accused Of Trying To Join ISIL In Syria.

The [AP](#) (5/9, Forliti) reports jury selection began Monday in the federal trial of three Minnesota men – Abdirahman Yasin Daud, 22, Mohamed Abdihamid Farah, 22, and Guled Ali Omar, 21-- accused of plotting to travel to Syria to join ISIL. Prosecutors claim they were part of a larger group in the state’s large Somali community that conspired to help one another plan and finance their trips. All three have pleaded not guilty to multiple counts, the most serious being conspiracy to commit murder outside the US. One witness expected to testify is Abdirahman Bashir, “who was part of the conspiracy but became an informant for the FBI.” The defense is expected to “take issue with Bashir’s past and the amount of money he’s been paid by the FBI for his work.”

Obama To Convene NSC On Tuesday To Discuss Islamic State.

[Reuters](#) (5/9) reports that President Obama will meet with his National Security Council Tuesday to discuss the fight against Islamic State. The White House said in a statement, “The session is the latest in a series of NSC meetings in recent months convened at the White House and at key departments and agencies, including the CIA, the Department of State and the Department of Defense, on our campaign against the terrorist group.”

Thwarted Synagogue Attack Highlights Importance Of Security For Florida Jewish Community.

The [South Florida Sun Sentinel](#) (5/9, Carmona) reports that the recent arrest of James Gonzalo Medina, a man accused of trying to blow up a Florida synagogue, has brought security to the forefront of issues within the South Florida Jewish community. Several synagogues and other Jewish organizations contacted by reporters said they were increasing security in the wake of Medina’s arrest. Medina was arrested for attempting to use a weapon of mass destruction – a dummy bomb sold to him by an FBI informant – against the Aventura Turnberry Jewish Center on April 29. He is set to appear in court on May 10 to determine if he is safe to release on bond.

Twitter Downplays Dataminr Move.

The Wall Street Journal report saying that Twitter plans to cut off access to Dataminr for US intelligence agencies generated significant second-day coverage. [Ars Technica](#) (5/9, Kravets) reports that in a statement, Twitter “downplayed the development.” saying, “Dataminr uses public Tweets to sell breaking news alerts to media organizations such as Dow Jones and government agencies such as the World Health Organization, for non-surveillance purposes. We have never authorized Dataminr or any third party to sell data to a government or intelligence agency for surveillance purposes. This is a longstanding Twitter policy, not a new development.”

Global News

US Army General: North Korean Hackers Are Extremely Skilled.

[Tech Insider](#) (5/9, Szoldra) reports US Army General Vincent Brooks told the Senate last month that North Korean hackers “are among the best in the world and the best organized.” Tech Insider says Gen. Brooks “sees North Korean hackers as a threat to be taken seriously.”

US, Russia Reach Deal To Restore Nationwide Truce In Syria.

The [AP](#) (5/9, Lederman) reports Secretary of State Kerry on Monday announced a nationwide truce in Syria “would be restored,” but it was “immediately called into doubt” as Syria extended a local cease-fire in Aleppo by just 48 hours. Kerry, announcing the new deal, said it would “reinstate a nationwide cessation of hostilities,” but “cautioned that the agreement itself meant little if it was not backed up by the parties on the ground.” [Reuters](#) (5/9, Davison, Brunnstrom) quotes Kerry as saying, “These are words on a piece of paper. They are not actions. We have a responsibility to make certain that the opposition lives up to this, and Russia and Iran have a responsibility to make sure the Assad regime lives up to this.”

Pentagon: ISIL Military Chief Killed In Iraq.

[Reuters](#) (5/9) reports that on Monday, the Pentagon said a US airstrike hit a vehicle carrying Abu Wahib, ISIL’s military chief in Anbar province, along with three other ISIL members near the town of Rutba.

The [Washington Times](#) (5/9, Muñoz) reports Monday's strike was the fourth time in three years that Wahib, also known as Shaker Wahib al-Fahdawi al-Dulaimi, had reportedly been killed by US or allied forces. However, Monday was the first time the Pentagon confirmed his death. Cook said the Defense Department was "confident" that the strike was successful and that Wahib was among those killed. US and European counterterrorism experts claim Wahib was a close confidant of ISIL leader Abu Bakr al-Baghdadi, and had even been "tapped as a possible replacement to Baghdadi should the ISIS leader be killed." Cook said Monday's strike was one of several ongoing US efforts to combat ISIL in Iraq, stating, "It is dangerous to be an ISIL leader in Iraq and Syria these days, and for good reason." [International Talks On Libya To Be Held Next Week In Vienna.](#)

[Reuters](#) (5/9) reports international talks on support for Libya's new unity government will be held in Vienna next week, Italian Foreign Minister Paolo Gentiloni said Monday. He did not provide details on who would attend, but Reuters notes past talks on Libya have included US and European officials, as well as Libya's North African neighbors.

CRIMINAL INTELLIGENCE

Marijuana Users Increasingly Turning To "Dabbing" In New York City.

The [New York Times](#) (5/12, Nir, Subscription Publication) reports dabbing – the practice of consuming waxy marijuana extract that contains high levels of THC – “appears to have risen rapidly in New York City over the past few years, according to federal law enforcement officials as well as people who use and sell the drug.” Medical experts are beginning to voice concern over the potential unknown health risks, and critics cite the largely unregulated nature of production, which “often involves home cooks who douse marijuana with volatile butane, which can lead to explosions.”

US Planning "Surge" Of Deportation Raids.

Immigration officials are planning a serious of raids to deport Central American mothers and children who have entered the US illegally, [Reuters](#) (5/12, Edwards) reports in an exclusive, citing sources and internal documents. ICE has instructed its field offices to conduct a 30-day “surge” of arrests targeting mothers and children who have previously been told to leave the country.

Swift Reports Second Attack Similar To Bangladesh Central Bank Heist.

The [New York Times](#) (5/12, A1, Corkery, Subscription Publication) reports Swift, the messaging system used by thousands of banks and companies to transfer money across the globe, will send a letter to users Friday warning that it has suffered a second attack on a commercial bank that “bore numerous similarities” to the \$81 million heist from Bangladesh’s central bank in February. Swift said the two attacks were part of a “wider and highly adaptive campaign targeting banks.”

Research Shows Hackers Targeting Policy Groups And NGOs For Government Strategy.

[Bloomberg News](#) (5/12, Syeed) reports research from cybersecurity company CrowdStrike Inc. shows that hackers “are targeting policy groups and nongovernmental organizations to get a leg up on U.S. government strategy.” CrowdStrike claims the hackers are so-called “nation-state” hackers, that are “often tied to governments including China or Russia.”

We hope you are enjoying the **LEIU Daily** and you are deriving a great deal of value from this report. It provides you with the latest law enforcement news and include timely coverage of issues involving organized crime, terrorism, gambling, and legal news that may impact you. You can count on **LEIU Daily** for comprehensive coverage. I am glad we can share this member benefit with you as I believe it will help us all stay abreast of rapidly developing stories, issues, and regulations in our field.

On another note --Your LEIU Executive Board believes this Daily Briefing is also beneficial to others in your department and encourage you to share with your colleagues, subordinates, and management. **Please take the time to invite your unit members to receive the LEIU Daily each morning via the “Invite a colleague” button at the bottom of your briefing. Sharing**

this briefing with your team is one of the benefits of your LEIU membership. The more people who can benefit from this Daily Briefing the more effective we become.

LEGAL ISSUES

Appeals Court Considers Challenge To California's "Smart Gun" Law.

The [Wall Street Journal](#) (5/12, Palazzolo, Subscription Publication) reports that the 9th Circuit Court of Appeals is expected to rule soon on whether states may force firearm manufacturers to include safety devices on weapons. The court is considering a challenge to a California law that requires gun makers to produce handguns that will not fire a bullet left in the chamber if their magazines are detached, alerting the gun handler if a bullet is in the chamber. The Journal writes that a court ruling in the case could have an effect on whether and how quickly President Obama's recent calls for more "smart gun" technology could take effect.

Mozilla Urges Disclosure Of Firefox Vulnerability Used In FBI Probe.

[The Hill](#) (5/12, Trujillo) reports that Mozilla on Wednesday filed a brief in a child pornography case being tried in Washington state. The brief asks that the government disclose a "possible security vulnerability in its Firefox web browser that helped the FBI track down visitors to a child pornography site," The Hill says. Mozilla said there is reason to believe that the Firefox vulnerability is still active and putting users around the world at risk.

Comey: Terrorists Using Encryption As "Essential Tradecraft."

[Ars Technica](#) (5/12, Kravets) reports FBI Director James Comey told a group of reporters on Wednesday that "encryption was an 'essential tradecraft' of terror groups like ISIS." Ars Technica points out the comments come at a time when the US government is reviewing legislation "that mandates the tech sector build backdoors into their products."

Subject: UPDATE: 2016 ORDER CUTOFF AND 2017 START UP DATES FOR CHEVROLET POLICE / FIRE VEHICLES - (2016 Tahoe PPV & SSV order cut off is JUNE 2, 2016)

The 2016 Tahoe PPV & SSV order cut off is JUNE 2, 2016. Please place your orders before we run out of production slots. (2017 Tahoe PPV & SSV ordering begins July 7, 2016)

All,

Attached is the 2016 Order Cutoff and 2017 Start of Ordering dates for Chevrolet Police vehicles. Please let your departments know about these important dates so they can order accordingly.

When you look at the attachment please look to the far right for the order cutoff and start-up dates. Dates in red have been updated from my last email. There are two tabs at the bottom – one is 2016 Build-out Matrix and the other is 2017 Start-up Matrix. Please click on the tab to see the information you want and then scroll up or down to find the vehicles you may be interested in ordering.

In the Build-out tab, SEO means Special Equipment Options. For example, back-up alarm, rear seat delete, etc.

I have highlighted in **yellow** the vehicles that represent our Chevrolet Police vehicles:

Caprice PPV

Impala Detective - New for 2017 MY is our Impala Municipal or Detective sedan

Tahoe PPV & SSV
Silverado LD Crew which includes our Silverado SSV
Suburban (1500 & 3500 HD)
Express Van which includes our Express Prisoner Transport Van

NOTE:

The **Silverado SSV** is the only true police pickup on the market for the following reasons:

Auxiliary Battery	Standard
High Capacity Air Cleaner	Standard
Upfitter Connection - Speed, Battery, etc.	Standard
Spot lamp Driver or Driver & Passenger	Available
Grille & Siren Wiring	Available
Horn / Siren Circuit Wiring	Available
Upfitter Switches	Available
4G Connectivity	Available
Common Fleet Key	Available

Please let me know if you have any questions

Thank you,

CRIMINAL INTELLIGENCE

Authorities Charge 28 In Bronx, Harlem Housing Projects.

The [Wall Street Journal](#) (5/11, Kanno-Youngs, Subscription Publication) reports 21 people affiliated with a two gangs were charged for firearms offenses and drug trafficking in Bronx housing projects, according to two indictments unsealed Wednesday. Twelve suspects have been arrested, seven are still at large, and two were already in custody. During three raids in the South Bronx, federal authorities seized, crack, cocaine, marijuana, prescription drugs, guns, ammunition, and knives.

Heroin, Opium Found In Luggage At Chicago Airport.

[Reuters](#) (5/11, Madden) reports that three women were arrested at O'Hare International Airport in Chicago after CBP agents found 70 pounds of heroin and opium in their luggage. All three women, Pa Yang, Mai Vue Vang, and True Thao, are from Minnesota and arrived Tuesday on a flight from Japan.

The [Minneapolis Star Tribune](#) (5/11, Xiong, Harlow) reports that the office of DEA Minnesota head Kent Bailey "received an internal memo about the arrests in light of the drug's tie to Minnesota

and the state's Hmong community, where Bailey nearly always, if not exclusively, sees its distribution."

ICE Released Nearly 20,000 Criminal Immigrants Last Year.

The [AP](#) (5/11, Caldwell) reports Immigration and Customs Enforcement released "more than 19,700 convicted criminal immigrants" during the budget year for 2015, highlighting the case of Jean Jacques, a convict released by ICE after his native Haiti refused to accept him, who subsequently murdered a young woman, and awaits sentencing. While the Administration has said that such people should be deported, "tens of thousands" have been released, and "have been convicted of hundreds of thousands of crimes." The State Department said that it will be meeting with DHS officials over the matter.

Comey: Fewer Americans Joining ISIL.

The [AP](#) (5/11, Tucker) reports that FBI Director Comey said yesterday "fewer Americans are traveling to fight alongside the Islamic State and the power of the extremist group's brand has significantly diminished in the United States." Said Comey, "There's no doubt that something has happened that is lasting, in terms of the attractiveness of the nightmare which is the Islamic State to people from the United States." The [Los Angeles Times](#) (5/11, Wilber) notes that Comey indicated that "FBI agents have tracked an average of one person a month trying to travel, or actually traveling, to join the extremist group in Syria and elsewhere in the Middle East since August," compared "to as many as 10 Americans a month in 2014 and during the first half of 2015."

LEGAL ISSUES

Federal, State Lawmakers Propose Restrictions On Stingray Use.

[Christian Science Monitor](#) (5/11) reports several federal and state lawmakers "are moving to put tighter restrictions on when and how police can use" Stingray cellphone trackers. The Monitor details several pending pieces of legislation, including The Stingray Privacy Act, which was introduced by Rep. Jason Chaffetz in November. The Stingray Privacy Act would "require all federal, state and local agencies to obtain a warrant before using a cell site simulator and provide for a common set of emergency exceptions," according to the Monitor.

District Attorneys Urge Congress To Consider Legislation Requiring Smartphone Companies To Decrypt Data On Court Order.

Cyrus R. Vance Jr., Manhattan district attorney, Jackie Lacey, Los Angeles County district attorney, and Bonnie Dumanis, San Diego County district attorney, write in the [Los Angeles Times](#) (5/11), on the subject of encrypted data on smart phones, pointing out that the Manhattan DA has "230 inaccessible Apple devices," the Los Angeles County Sheriff's Department has "150 warrant-proof devices," and the Los Angeles Police Department has "more than 300," while San Diego and Riverside Counties have 11. Other police departments and prosecutors' offices have "hundreds more." They urge Congress to approve legislation proposed by SSCI Chairman Sen. Richard Burr and Ranking Member Dianne Feinstein to "require technology companies to provide law enforcement with decrypted data, or the technical assistance to get it, when ordered by a court to do so."

House Expected To Pass 18 Bills Centered On Combating Opioid Crisis.

[USA Today](#) (5/11, Kelly) reports that House lawmakers “are expected to overwhelmingly pass a total of 18 bills this week focused on opioid addiction, treatment and prevention.” The Obama Administration, however, “said the legislation won’t accomplish much unless Congress provides more than \$1 billion to fund the new programs.”

TECHNOLOGY

Comey: FBI Seeking To Make Broader Use Of iPhone Hack.

[Bloomberg News](#) (5/11, Strohm) reports FBI Director Comey told reporters Wednesday his agency “is exploring how to make broader use” of a software tool purchased to access San Bernardino attacker Syed Rizwan Farook’s encrypted iPhone. Comey said the tool “could `in theory be used in any case where there’s a court order’ to access data on an iPhone 5c running Apple’s iOS 9 operating system.” Comey also said the FBI is “bracing for a larger battle involving encrypted text messages, e-mails and other data.” Noting that criminals “are increasingly using services that encrypt data in motion,” that is “texts, e-mails and other information in transit over the Internet,” Comey “didn’t rule out litigation against companies such as Facebook Inc.’s mobile messaging service WhatsApp.”

LAPD Tests Electric Police Cruisers.

[NBC News](#) (5/11) reports the LAPD recently tested the Tesla Model S electric sedan. LAPD Police Administrator Vartan Yeghyan is quoted, saying the test was to “assess the vehicle’s performance in our environment and to learn what are the drawbacks and positives of this type of vehicle in our fleet operation. Not only on the regular transportation side, but also the future in the high-pursuit-rated vehicle arena.” NBC News says the LAPD is also testing the all-electric BMW i3. NBC News adds that “an all-electric police fleet could become a problem for some cities, particularly when hurricanes, tornadoes, floods and other natural disasters cause charging stations to go down.”

Phys.org Analyzes “Cyberbombs.”

[Phys \(UK\)](#) (5/11, Forno, Joshi) analyzes the definition and explanation of “cyberbomb” or “cyberweapon.” Phys says cyberbombs are not single weapons, but are “collections of computer hardware and software, with the knowledge of their potential uses against online threats.” Phys goes on to describe how targets are selected, which involves “not only technological experts but military strategists, researchers, policy analysts, lawyers and others across the military-industrial complex.”

CRIME & DRUGS

House Expected To Pass 18 Bills Centered On Combating Opioid Crisis.

[USA Today](#)  (5/11, Kelly) reports that House lawmakers “are expected to overwhelmingly pass a total of 18 bills this week focused on opioid addiction, treatment and prevention.” The Obama Administration, however, “said the legislation won’t accomplish much unless Congress provides more than \$1 billion to fund the new programs.”

Yesterday, the IACP announced its support for the Sentencing Reform and Corrections Act of 2015, S. 2123. Since its introduction in 2015, the IACP has worked with the bill’s cosponsors to offer up meaningful suggestions in order to establish adequate safeguards to ensure violent criminal and drug traffickers remain incarcerated. The legislation now achieves a proper balance of preserving and expanding mandatory minimums for violent offenders and career criminals, while reducing recidivism, and addressing the burgeoning prison population through thoughtful and careful measures. Most notably, the bill now takes a significant step to examine the entire criminal justice system, through the addition of the National Criminal Justice Commission Act, S. 1119. To view a copy of the letter of support, click [here](#).

While the Administration has said that such people should be deported, “tens of thousands” have been released, and “have been convicted of hundreds of thousands of crimes.”

Comey: Fewer Americans Joining ISIL.

The [AP](#) (5/11, Tucker) reports that FBI Director Comey said yesterday “fewer Americans are traveling to fight alongside the Islamic State and the power of the extremist group’s brand has significantly diminished in the United States.” Said Comey, “There’s no doubt that something has happened that is lasting, in terms of the attractiveness of the nightmare which is the Islamic State to people from the United States.” The [Los Angeles Times](#) (5/11, Wilber) notes that Comey indicated that “FBI agents have tracked an average of one person a month trying to travel, or actually traveling, to join the extremist group in Syria and elsewhere in the Middle East since August,” compared “to as many as 10 Americans a month in 2014 and during the first half of 2015.”

IACP IN THE NEWS

IACP Officials Meet With Bulgarian Prime Minister.

[Focus News \(BUL\)](#) (5/11) reports IACP First Vice President Don De Lucca and IACP International Policing Division Director Paul Santiago met with Bulgarian Prime Minister Boyko Borisov on Wednesday to talk about the “fight against smuggling and

corruption.” Borisov “introduced the IACP officials to the work of the Bulgarian institutions in the field, and stressed...the good coordination and the results achieved.”

CRIMINAL INTELLIGENCE

FBI Memo Urges Police To Recreate Evidence Gathered With Stingrays.

[ZDNet](#) (5/9) reports on a recently disclosed FBI document urging a local police department to recreate evidence gathered using Stingray technology by some other means before presenting it at trial. Departments that use Stingrays are bound by a non-disclosure agreement required by the device's manufacture. "Disclosing the use of stingrays would violate the non-disclosure agreement. Many cases have been dropped to prevent disclosing the use of the technology," ZDNet says.

DEA Agent: Synthetic Opioids May Be Next Epidemic.

DEA Special Agent in Charge James Shroba tells [AOL](#) (5/9) that synthetic opioids "is the next front," and "says agents are tracking the beginnings of drug traffickers tweaking the chemical compounds of Fentanyl." Shroba warns synthetic opioids are "hundreds, if not thousands of times more potent than heroin, or other opioids." AOL says synthetic Cathinones or cannabinoids, which are available in some stores, may make "new users out of people who might not normally try drugs."

Twitter Downplays Dataminr Move.

The Wall Street Journal report saying that Twitter plans to cut off access to Dataminr for US intelligence agencies generated significant second-day coverage. [Ars Technica](#) (5/9, Kravets) reports that in a statement, Twitter “downplayed the development.” saying, “Dataminr uses public Tweets to sell breaking news alerts to media organizations such as Dow Jones and government agencies such as the World Health Organization, for non-surveillance purposes. We have never authorized Dataminr or any third party to sell data to a government or intelligence agency for surveillance purposes. This is a longstanding Twitter policy, not a new development.”

We hope you are enjoying the **LEIU Daily** and you are deriving a great deal of value from this report. It provides you with the latest law enforcement news and include timely coverage of issues involving organized crime, terrorism, gambling, and legal news that may impact you. You can count on **LEIU Daily** for comprehensive coverage. I am glad we can share this member benefit with you as I believe it will help us all stay abreast of rapidly developing stories, issues, and regulations in our field.

On another note --Your LEIU Executive Board believes this Daily Briefing is also beneficial to others in your department and encourage you to share with your colleagues, subordinates, and management. **Please take the time to invite your unit members to receive the LEIU Daily each morning via the “Invite a colleague” button at the bottom of your briefing. Sharing this briefing with your team is one of the benefits of your LEIU membership. The more people who can benefit from this Daily Briefing the more effective we become.**

LEGAL ISSUES

Immigration Court Backlog Seen As Draw For More Illegal Immigration.

[Fox News](#) (5/9) says the surge of Central American migrants into the US is “worse – as Border Patrol agents apprehend even more Honduran, Guatemalan and Salvadoran immigrants claiming asylum. But due to a backlog in the courts, there is even less of a chance they’ll be deported.” Former CBP deputy commissioner David Aguilar is quoted saying, “Where the backflow and choke point is occurring is in the immigration judge docket system – 800,000 on the dockets right now. ... So, that backlog, that inability to basically send these people back, remove them back to their countries of origin, is causing a draw of more of these people coming into the country.”

ODNI Pushes Back Against Wyden Demands Over Surveillance.

[The Hill](#) (5/9, Williams) reports that the intel community is “pushing back on a Harvard report that has become a touchstone in the Capitol Hill debate over encryption.” In a letter to Sen. Ron Wyden, ODNI’s Deirdre Walsh wrote, “The public debate about the appropriate scope of lawful access to encrypted communications ... must be informed by recognition that the increased use of encryption represents a significant impediment to our efforts to protect the nation.” Wyden “had demanded feedback on the report, produced by Harvard’s Berkman Center, during a February hearing on the topic. Titled ‘Don’t Panic,’ the study suggests that law enforcement will be able to turn to alternative data streams in order to conduct needed surveillance.”

Wyden Prepping Bill To Block DOJ Revisions To Rule 41. [The Hill](#) (5/9, Williams) reports that Sen. Ron Wyden is “moving to prevent a controversial expansion of the federal government’s hacking powers.” This week, he is “expected to unveil legislation blocking a Justice Department request to allow judges to grant a single warrant for electronic searches in multiple locations – even when investigators don’t know the physical location of a device.” The DOJ, “which has been working for years on getting the change, insists the revision to what’s known as Rule 41 is a necessary update to match the realities of modern digital investigations.”

TECHNOLOGY

US Military Preparing For Potential War In Space.

The [Washington Post](#) (5/9, A1, Davenport) reports that faced with the prospect of hostilities in space, US defense officials are “developing ways to protect exposed satellites floating in orbit and to keep apprised of what an enemy is doing hundreds, if not thousands, of miles above Earth’s surface. They are making satellites more resilient, enabling them to withstand jamming efforts.”

India Claims To Have Developed Tool To Defeat iPhone Encryption.

[CNET News](#) (5/9) reports India's communications and IT minister Ravi Shankar Prasad claims the country has developed a tool that can defeat encryption for smartphones, including the iPhone. CNET News says that "Prasad didn't reveal details about how the tool works."

DOJ Creating Body Camera Catalog to Aid Law Enforcement.

[FierceGovernmentIT](#) (5/9, Richman) reports DOJ is creating a catalog of body camera devices "to help local law enforcement agencies compare and choose between them." FierceGovernmentIT says the DOJ guide will also include information about the data security and hacking susceptibility of the individual devices. FierceGovernmentIT adds that DOJ plans to make the guide available by the end of 2016.

brought to you with support from

POLICING & POLICY

NBC News Analysis: Body Camera Usage Gaining Support Among Officers.

[NBC News](#)  (5/8) analyzes the growing use of body cameras worn by law enforcement and tells the story of Ohio Officer Steven Wilson. NBC News says Wilson was exonerated by a grand jury after fatally shooting a man “who was stabbing his ex-girlfriend and wouldn’t stop.” NBC News says “Wilson is back on the job,” and he “has nothing but praise for the device that he believes may have saved his career.” NBC News adds that “testimonials like Wilson’s are beginning to pile up in support of the tiny cameras.”

States, Congress Seek Rules For Stingray Use.

The [AP](#)  (5/8) reports that law enforcement use of cell-site simulators, also known as Stingrays, is “raising privacy concerns and inspiring legislation to restrict how police can use the technology in criminal investigations,” and “states around the country [are] trying to set rules” for their use, as well as Congress. The AP adds, “Amid the heightened scrutiny, authorities have cited instances in which the cell-tracking devices have been helpful. For example, Homeland Security Assistant Secretary Seth M.

Stodder told a congressional committee in October that immigration officials used a Stingray to locate a 6-year-old girl who was being held hostage by smugglers in Arizona.”

CRIME & DRUGS

Increased “Spice” Use Having High Cost On Communities.

The [Tampa Bay \(FL\) Times](#)   (5/6, Sullivan) reports on a growing number of complaints and costly medical calls for people using spice, or “synthetic cannabinoids.” The Times says spice can “be 100 times more potent than pot,” and difficult to legislate because “manufacturers can make small changes to the chemicals so that what they’re selling is legal again.”

UK Prisons Dealing With Synthetic Drugs Epidemic.

[The Guardian \(UK\)](#)   (5/7, Allison, Hattenstone) reports prisons in the UK and Wales are dealing with increasing use of synthetic cannabis across the prison population and escalating violence associated with drug use. The Guardian interviews several sources who say the epidemic of synthetic drug use in UK prisons “is emerging as the biggest single problem facing the prison service in England and Wales.”

There is still time to register for the NEW Women’s Leadership Institute - Critical Incident Management Training, to be held June 12-15, 2016 at Fort Hood, Killeen, Texas. Class size is limited to 30, so register today at www.theiacp.org/WLI FtHoodTX.

TECHNOLOGY

Security Expert Gives Tips To Protect Computer From Ransomware.

In a piece for [USA Today](#)   (5/7), Steve Weisman, “one of the country’s leading experts in scams and identity theft,” gives four tips to combat the increasing threat of ransomware. Weisman says to avoid clicking on links “regardless of how legitimate they may appear until you have confirmed that the email is legitimate,” ensuring security software programs “are constantly updated,” the use of “application ‘whitelisting’” so that “only specific programs [will] run on your computer,” and regular data back-up.

University Of North Texas Students Create Drug Sniffing Vehicle.

[Digital Trends](#) (5/6, Hard) reports a group of students at the University of North Texas (UNT) created a “portable mass spectrometer” attached to a Ford Fusion that can be used “to sniff out drug labs even better than a bloodhound.” Digital Trends says the technology “can sniff out unique chemical signatures up to a quarter-mile away and determine their point of origin within 15 feet...with complete discretion.”

NATIONAL SECURITY

DHS To Release “Harmless Particle Materials” In New York City Subway.

The [New York Daily News](#) (5/6, Sommerfeldt) reports that DHS “will release ‘harmless particle materials’ ‘in the city’s subway system next week” to study “where hazardous material would travel in the event of a biological terrorist attack.” DHS program manager Dr. Donald Bansleben is quoted, saying, “This is important information to help local authorities to enhance their emergency preparedness.”

IACP IN THE NEWS

Law Enforcement And Tech Companies At Impasse Over Encryption Legislation.

The [New York Times](#) (5/8, Kang) reports on an escalating fight in Congress between law enforcement and tech companies over encryption legislation proposed by Sens. Richard Burr and Diane Feinstein that “would require tech companies to give access to encrypted data with court orders.”

The Times interviews IACP President Terrence Cunningham who says “there’s no question our relationship with the tech industry has gotten worse, and now it seems like the tech industry is taking every opportunity they have to put up obstacles in our way, including trying to derail legislative efforts that would give law enforcement what they need to keep people safe.” The Times says “Chief Cunningham and other members of the police chiefs’ group have talked with Mr. Burr and Ms. Feinstein, given opinions during the drafting of the legislation and hosted panels on encryption for House and Senate lawmakers.”

CRIMINAL INTELLIGENCE

Twitter Cuts Off Intelligence Agencies' Access To Full Stream Of Tweets.

The [Wall Street Journal](#) (5/8, A1, Stewart, Maremont, Subscription Publication) reports Twitter has cut off US intelligence agencies' access to a service that shows its entire livestream of public tweets. The service is provided by Dataminr, the only company Twitter authorizes to access the full stream and sell it to clients. Twitter does not own Dataminr, but owns a small stake in it. The rescinding of access has not been publicly announced, but was confirmed to the Journal by an intelligence official and others.

DHS To Release "Harmless Particle Materials" In New York City Subway.

The [New York Daily News](#) (5/6, Sommerfeldt) reports that DHS "will release 'harmless particle materials' 'in the city's subway system next week" to study "where hazardous material would travel in the event of a biological terrorist attack." DHS program manager Dr. Donald Bansleben is quoted saying, "This is important information to help local authorities to enhance their emergency preparedness."

CRIMINAL INTELLIGENCE

Growing Number Of US Police Departments Turning To Crisis Intervention Team Training.

On the front page of its Science Times section, the [New York Times](#) (4/25, Goode, Subscription Publication) reports in a 1,800-word piece that a growing number of police departments across the US are now turning to crisis intervention team training (CIT). Research has suggested that such "training can alter the way officers view people with mental illness." What's more, the CIT "approach, which teaches officers ways to defuse potentially violent encounters before force becomes necessary, is useful for officers facing any volatile situation," even situations in which no mental health crisis is "involved, law enforcement experts say."

Gardner: The Rise Of ISIL Represents A New Sort Of Terrorism.

Homeland security studies professor Jeff Gardner opines in [In Homeland Security](#) (4/25, Gardner) that the rise of ISIL constitutes a new phase of terrorism. This wave, he says, must be combated primarily

at home. Gardner lists the TSA and the FBI's watch lists as key tools "strengthening our home game to prevent any more terrorists from entering the country."

Record TSA Firearm Finds Come Amid Security Line Complaints.

[USA Today](#) (4/25) reports the "disconcerting factoid" that TSA officers last week "found 73 firearms in carry-on bags at airport checkpoints around the country," breaking a "record set in October 2015, when an alarming 68 firearms were found at checkpoints in one week." USA Today adds, "The new TSA 'firearm finds' record comes at a time when complaints are on the rise about long security checkpoint lines at many of the nation's airports."

Study Finds High Percentage Of People Who Find USB Drives Will Plug Them Into Computers.

The [Atlanta Journal-Constitution](#) (4/26, Marotti) reports a study by the University of Illinois "found that nearly half of people who find a USB drive will plug it into a computer and open the files, typically out of curiosity or in hopes of finding the owner." The Journal-Constitution adds that "security experts say just plugging in a USB drive can allow hackers to attack you." The Journal-Constitution says the study placed 300 USB sticks throughout UIUC's campus, and found that "ninety-eight percent of the drives were moved, and at least 45 percent were connected to computers."

We hope you are enjoying the **LEIU Daily** and you are deriving a great deal of value from this report. You can count on **LEIU Daily** for comprehensive coverage. I am glad we can share this member benefit with you as I believe it will help us all stay abreast of rapidly developing stories, issues, and regulations in our field.

On another note -- I encourage you to look around in your geographical area and look to see if there are law enforcement agencies in your area who are not members of LEIU and do your best to recruit them to this great organization. If you want to let us know who to contact or if you need

recruiting materials (an application, etc.) let us know at the LEIU e-mail address of leiu@doj.ca.gov.

Bob Morehouse, Executive Director
LEIU

LEGAL ISSUES

Baltimore Judge Excludes Murder Evidence Obtained Following Use Of Stingray Tracking Device.

The [Baltimore Sun](#) (4/25) reports Baltimore Circuit Judge Yolanda Tanner “threw out key evidence in the 2014 killing of a woman in Northwest Baltimore because police obtained it after using a powerful cellphone tracking device.” The Sun says Investigators found the blood of the victim in the suspect’s apartment after using a stingray cellphone tracking device to trace the victim’s phone to the apartment. The Sun adds that the suspect, Robert Copes, let law enforcement inside the apartment. The Sun reports that Judge Tanner “said she believed police investigators acted in good faith,” however the search was unconstitutional because the stingray device was used without a warrant.

ICE Proposes Fingerprinting All Unaccompanied Minor Guardians.

[Reuters](#) (4/26, Edwards) reports that ICE officials propose in an internal memo the taking of fingerprints from all people who claim custody over unaccompanied minors. The proposal would expand fingerprinting, currently limited to non-parents, to include the children’s parents.

TECHNOLOGY

Company Plans To Introduce High Security Android Phone.

[CNBC](#) (4/25) reports online that a “A Swiss-based start-up has raised \$72 million and is planning to launch a high-security smartphone next month that could cost up to \$15,000.” The company, Sirin Labs, plans to release the Android smartphone in London next month. “You should expect to see almost in every aspect, very high specs on the product, higher than all of the great mass market phones, combined with software and security features,” said Sirin Labs co-founder Moshe Hogeg. Sirin Labs, CNBC says, is attempting “to tap into the growing consumer concern over privacy just weeks after the end of the high-profile tussle between Apple and the U.S. Federal Bureau of Investigation.”

DHS Using “White Hat” Hackers To Test Agency Cybersecurity.

[Federal News Radio \(DC\)](#) (4/25, Miller) reports DHS is using “white hat” hackers to test the networks of three unnamed government agencies “to improve their network security.” NCCIC director John Felker said the “white hat” hackers “owned those agencies from top to bottom and side-to-side” in a matter of days. SANS Institute director of research Alan Paller “said DHS moving to conduct penetration testing from just vulnerability testing is a big change,” and “said the key to any red team exercise is to ensure the organization continues to analyze and review its security controls every hour, every day.”

Researchers Use Amplified Radio To Unlock Cars.

[Digital Trends](#) (4/25, Edelstein) reports researchers in Germany were able to successfully “unlock and start cars by tricking onboard systems into thinking a key fob was nearby.” Digital Trends says the researchers used a “simple radio amplifier” that is “placed near the fob, while a receiver is placed near the car.” Digital Trends adds that the “amplifier increases the signal from the key fob, meaning thieves can unlock a car even if the owner is up to 90 meters (295 feet) away.”

CRIMINAL INTELLIGENCE

Radiation-Detecting Helicopter Tests Boston Marathon Route.

[CBS News](#) (4/14) reports a federal government "radiation-detecting helicopter flew over the Boston Marathon route on Wednesday" as a precautionary measure ahead of the race. CBS News says the "helicopter flies about 150-feet off the ground" and uses "two pods on the sides of the helicopter [to] measure the radiation levels." CBS News adds that the data collected "will be used to make a map that tells scientists what are acceptable normal levels." CBS News quotes Boston Police Commissioner William Evans on the use of aircraft to keep marathon attendees safe by saying "the FAA has banned drones from coming into the area, obviously we are going to use some anti-drone technology out there...the public is going to see some technology out there that we haven't used before."

Thirty-Two Massachusetts Schools Receive Bomb Threats.

The [Springfield \(MA\) Republican](#) (4/14) reports that 32 Massachusetts schools on Thursday reported receiving robocalls containing bomb threats. "For each individual threat, a risk assessment is being

performed and local police and fire departments, with support from the State Police bomb squad, are responding accordingly," the Republican reports. The FBI is leading the investigation into the threats.

FBI Looking For "Can't Wait Bandit" After Phoenix Robberies.

The [Arizona Republic](#) (4/14, Woo) reports FBI Bank Robbery Task Force is looking for a man investigators call the "Can't Wait Bandit" for four Phoenix-area bank robberies in five days last week. He earned the nickname for robbing two banks within an hour of each other on Apr. 8.

[KPHO-TV](#) Phoenix (4/14, Hoey) reports the suspect is described as a white male between 25 and 35 years old, weighing 160 to 180 pounds, and having "light brown hair, a brown mustache and beard, and crooked teeth." In each robbery, the suspect threatened to use a weapon, though a weapon was never seen. The FBI's contact information is included for anyone with information on the suspect.

ISIL Threatens Michigan Muslim Cleric.

The [Detroit Free Press](#) (4/14, Warikoo) reports that ISIL has threatened to kill Shaykh Hisham Kabbani, a Flint-area moderate Muslim leader, the FBI's Detroit office has confirmed. In the most recent issue of ISIL's online magazine, the terror group lists Kabbani among other Muslim-American religious leaders who should be killed for apostasy. "We are aware of the information, but beyond that, we are not commenting at this time," said FBI Detroit spokeswoman Jill Washburn. "The 10 Muslim Americans whom ISIS put on its hit list...were strongly condemned by ISIS in its magazine for, ISIS alleged, not being true Muslims," the Free Press says.

FBI, DHS Brief DC Bars, Clubs On Terror Threat.

The [Washington Post](#) (4/14, Zak) reports that officials from the FBI and DHS in Washington, DC held a briefing for dozens of area nightclubs and bars about the terrorist threat to their establishments. During the briefing, "law enforcement officials shared images of Islamic State and al-Qaeda propaganda that encourage attacks on American social spots," the Post says. Despite the gravity of their message, officials say there are no known, specific threats to nightlife in the District of Columbia.

US Charges Chinese Citizen With Attempting To Illegally Export Carbon Fiber To China.

[Reuters](#) (4/14) reports that the Justice Department announced on Thursday that Fuyi Sun, a Chinese citizen, has been charged with attempting to illegally export high-grade carbon fiber that is primarily used in aerospace and military applications to China. Sun, 52, was arrested on Wednesday after

traveling to obtain the fiber from individuals working as undercover federal law enforcement agents, according to Reuters. Assistant Attorney General John Carlin said in a statement, "The carbon fiber – which has many aerospace and defense applications – is strictly controlled, and Sun expressed a willingness to pay a premium to skirt U.S. export laws."

US Indicts Engineer, Chinese Nuclear Firm For Conspiracy.

[Bloomberg News](#) (4/14, Strohm) reports the US government indicted Szuhsiung Ho, a nuclear engineer and an American citizen, and China General Nuclear Power and Energy Technology International for conspiracy to "illegally produce nuclear material outside the country without Energy Department authorization." According to the unsealed 17-page indictment, Ho and the Chinese nuclear company plotted since 1997 "to shrink the time and cost of designing nuclear reactor components by obtaining technical assistance from unidentified experts in the US." Assistant Attorney General John Carlin said Ho "allegedly approached and enlisted US based nuclear experts to provide integral assistance in developing and producing special nuclear material in China."

LEGAL ISSUES

ICE Director Pushes Back Against Proposed Mass Deportations.

The [Dallas Morning News](#) (4/14, SOLÍS) reports Immigration and Customs Enforcement Director Sarah R. Saldaña "pushed back Thursday on proposals for mass deportations and expansion of a border wall," calling it "highly impractical to think about loading up estimates of 11 [million] to 12 million-plus people in some form of transportation and sending them off." Instead, she called for Congress to simplify the nation's immigration laws and "set up a system by which" those who have been in the US for years "can be in this country without something hanging over their heads as to possible apprehension and removal from the country." Saldaña compared congressional inaction to "saying, 'OK, there is an Ebola crisis. It is too hard to work on that, and we are going to punt.'" She also said that ICE's message is clear: "Do not come into the country illegally, and if you choose to do so, you face the consequences of the immigration system."

Microsoft Sues US Over Secret Demands For Customer Data.

The [AP](#) (4/14, Bailey) reports from San Francisco that "in the latest clash over privacy rights in the digital age, Microsoft is suing the U.S. government over a federal law that allows authorities to examine customer emails or online files without the individual's knowledge." The lawsuit "comes as the tech industry is increasingly butting heads with U.S. officials over the right to view a wide range of

information – including emails, photos and financial records – that customers are storing on smartphones and in so-called ‘cloud’ computing centers.” Microsoft argues that the Justice Department “is abusing a decades-old law, the Electronic Communications Privacy Act, to obtain court orders requiring it to turn over customer files stored on its servers, while prohibiting it from notifying the customer,” and argues that this “violates its constitutional rights of free speech and customers’ protection against unreasonable searches.”

Stingray Privacy Act Seeks To Toughen Requirements For Cell Site Simulator Use.

[Fox News](#) (4/13, Corbin) reports on the cellular site simulator called the “StingRay,” produced by Harris Corp among other manufacturers, which “tricks” cellphones into revealing users’ locations, and is becoming a “key weapon” for law enforcement against criminals, according to Fox News. Fox News says Rep. Jason Chaffetz (UT-R) is sponsoring the Stingray Privacy Act that would “toughen” warrants needed, and “make their use without a court order illegal.”

TECHNOLOGY

DHS: Uninstall Apple’s QuickTime To Protect Computers.

[Reuters](#) (4/14) reports an alert from the Department of Homeland Security’s United States Computer Emergency Readiness Team (US-CERT) recommended PC users uninstall Apple’s QuickTime video player, as it has bugs that could be used to attack PCs and as Apple is ending support for the product. [CNET News](#) (4/15, Musil) reports TrendMicro, which discovered the bugs, said “they could be used to launch attacks on computers if users open a tainted file or visit a malicious Web site.”

IBM Discovers New Malware That Targets Bank Customers.

The [Wall Street Journal](#) (4/14, Sidel, Subscription Publication) reports IBM Corp. cybersecurity researchers announced on Thursday that they have discovered a new type of malware, dubbed GozNym, responsible for \$4 million dollars in theft in only the first few days of April, which targets customers of 22 US and Canadian Banks. The Journal says that customers with business accounts are being targeted through emails containing links with a virus that steals bank login information.

CRIMINAL INTELLIGENCE

US DOJ Launching Elder Justice Task Force To Address Allegations Of Abuse And Neglect In Nursing Homes.

The [Atlanta Journal-Constitution](#) (4/7, Norder) reports the US Department of Justice is assembling the Elder Justice Task Force to scrutinize skilled care facilities in 10 states where there have been allegations of abuse and neglect. The task force will bring together local, state, and other federal agencies, including HHS, with the aim of “quickly identifying and pursuing nursing homes jeopardizing the health and well-being of elderly residents.”

FBI, Scottsdale Police To Release Age-Enhanced Pictures Of Robert William Fisher.

[KNXV-TV](#) Phoenix (4/7) reports the FBI and the Scottsdale Police Department will release age-enhanced pictures of Robert William Fisher, one of the FBI’s Top Ten Most Wanted Fugitives, to coincide with the 15th anniversary of the murders of his wife and two young children. Fisher is wanted

on “three counts of first-degree murder, arson of an occupied structure and unlawful flight to avoid prosecution.” KNXV-TV says the pictures will be released on Friday.

Texas Police Department Given Nearly \$500,000 From ICE, HSI In Asset-Sharing Agreement.

[KRGV-TV](#) Harlingen, TX (4/7) reports the Pharr Police Department was given a check by ICE and HSI for \$485,379.82 for working a narcotics investigation. KRGV-TV reports the funds were given as part of HSI’s asset-sharing agreement that divides funds among agencies participating in an investigation.

FBI Milwaukee Division Issues Warning Over Phone Scam That Uses The Bureau’s Number.

[WITI-TV](#) Milwaukee (4/7, DeLong) reports the FBI Milwaukee Division is issuing a warning about a phone scam and is reminding the public that it doesn’t call private citizens requesting money. The warning is tied to a scam primarily targeting students at various universities in Wisconsin that uses the phone number for the FBI’s local office in the state. The caller claims to represent the government and threatens to arrest victims over “false claims ranging from money owed for student loans, to delinquent taxes and overdue parking tickets.”

IRS Warns Of Tax Scams Ahead Of Deadline.

The [CBS Evening News](#) (4/7, story 7, 2:20, Rose) reported that with the tax deadline looming, the IRS is warning about phone scans that “continue to be one of its top concerns.” Jeff Pegues said another “rapidly growing problem” is phishing and malware scams using fake IRS emails. Matt Leas, IRS Spokesman: “These are adaptive adversaries. We’ve seen this over a time where they continue to change their tactics, continue to go after honest taxpayers.” Pegues reported that the IRS “says it will never demand immediate payment over the phone, nor will the agency email you to solicit personal or financial information.”

LEGAL ISSUES

White House Denies It Has Decided To Withhold Support From Encryption Bill.

[The Hill](#) (4/7, Williams) reported that Deputy White House press secretary Eric Schultz yesterday “denied reports that it will not offer its support to a controversial” Senate bill, to be released by SSCI leaders Richard Burr and Dianne Feinstein, “that would give law enforcement access to encrypted

data.” Said Schultz, “I saw that [report](#) and I don’t know what it’s based [on]. ... The idea that we’re going to withhold support for a bill that’s not introduced yet is inaccurate.” Schultz “did not tip his hand on the administration’s official response to the bill.” [Vox](#) (4/7) reports that the Administration’s difficulty in dealing with the issue “is part of a much longer political history of encryption debate.” The Clinton administration “was having this same conversation in 1990s when [President Clinton] introduced the ‘Clipper Chip’ initiative to give the government the power to monitor encrypted phone conversations.”

Feinstein Sends Bill Back To White House For Review. [The Hill](#) (4/7, Bennett) reports Feinstein told reporters on Thursday “that the latest draft of the bill had been sent back to the White House for review.” Feinstein said, “Yesterday, I sent a copy to [White House chief of staff Denis McDonough]. He indicated to me that the staff is going to look at it, discuss it with the president next week. So we’ll see.”

Bill Would Require Companies To Provide “Technical Assistance.” [The Hill](#) (4/7, Bennett) reports that the bill “would force companies to provide ‘technical assistance’ to government investigators seeking locked data, according to a discussion draft obtained by The Hill.” The “nine-page discussion draft fits with its backers’ promise to produce a succinct bill. It’s also subject to change as it has not yet been introduced.”

FCC Pushing To Cut Off Prisoner Access To Cell Phones.

[CNN Money](#) (4/7, Goldman) reports FCC Commissioner Ajit Pai and South Carolina Gov. Nikki Haley “are pushing to cut off prisoners’ access to cell phones.” Pai said restricting inmate cell phones would prevent “incidents like one that happened in Georgia, when a woman was texted images of her incarcerated boyfriend being strangled,” and extorted for money to stop the beatings. The FCC also said a cell phone ban “might have been able to prevent the killing of a murder witness, who was shot three times after the incarcerated suspect called a gang member to pull the trigger.”

CNN Money says the FCC is looking into so-called “managed access systems,” which would allow “prisons to manage their own cell phone network access, allowing only a pre-approved list of phones to place calls on the network.” Such systems would allow a guard’s phones to get a full signal, and prevent smuggled phones from working within the facility. CNN Money adds that the FCC is also considering cell phone detection systems, and “is considering forcing wireless companies to block service for contraband cell phones found in prisons.”

TECHNOLOGY

Continuing Coverage: Comey Says FBI Bought Tool Used To Hack Farook's Phone.

[Bloomberg Politics](#) (4/7, Strohm) continues coverage of FBI Director Comey's Wednesday speech at Kenyon College in Ohio. According to Comey, the FBI "bought" the tool used to break into Syed Rizwan Farook's iPhone, though he did not provide details on the seller. Bloomberg adds that Comey said discussions are continuing "about whether to provide Apple with details about how the hack was carried out." Encryption, Bloomberg says, has led some members of Congress to push for legislation to establish a commission to probe the issue further. On Thursday, White House spokesman Eric Schultz, however, expressed skepticism that Congress could come up with a solution. "We're always willing to work with members of Congress on issues like this," he said. "We believe that this issue is complicated and that's why a national dialogue to help the American people understand it is important."

The [Wall Street Journal](#) (4/7, Barrett, Subscription Publication) reports that also in his Wednesday remarks, Comey said that the technique used by the FBI to hack Farook's phone does not work on newer iPhone models. "This doesn't work on the 6's, doesn't work on 5S's," Comey said. The [Washington Post](#) (4/7, Berman) reports that according to Comey, the method only "works on a narrow slice of phones. ...I can never be completely confident, but I'm pretty confident about that." "The world," Comey said, "has moved on to [iPhone] 6's." [USA Today](#) (4/7, Johnson) reports that Comey declined to say who provided the hacking tool to the FBI, but said the method would be "closely protected" and would be employed "lawfully and appropriately." "The FBI is very good at keeping secrets," he added. [Reuters](#) (4/7, Medhora, Volz) reports that according to a source, if the government continues to pursue a New York case similar to that in San Bernardino, Apple may be able to use legal discovery to force the FBI to divulge its method for hacking Farook's iPhone.

[The Guardian \(UK\)](#) (4/7, Gibbs) reports that Comey confirmed reports that the FBI could help state and local investigators by unlocking older iPhones. Evidence obtained from that process, however, could not be used in court. The hacking technique, Comey admitted, was "perishable" because Apple could update the iPhone 5C operating system at any moment and render the method ineffective.

WhatsApp Encryption Would Likely Still Allow Collection Of Metadata Information.

[MacNN](#) (4/7) reports that while WhatsApp's new end-to-end encryption will prevent surveillance of the content of message traffic, it will likely still allow the collection of "metadata."

FBI Approves 90-Minute DNA Test.

The [Boston Globe](#) (4/7, Conti) reports the FBI has given approval to a 90-minute DNA test created by NetBio. The Globe says the FBI's approval will allow the test to be used in accredited DNA labs. The Globe adds that the test, called DNAscan, "can read a DNA sample taken via cheek swab," and create a profile that "can be compared with profiles listed in national and state crime databases." The Globe points out that a congressional bill "has been introduced that would allow the system to be used in police stations, so law enforcement officials [could] get a full DNA profile of a person soon after they are arrested."

Federal Data Shows Victims Paid \$24 Million To Ransomware Criminals In 2015.

[Business Insider](#) (4/7, Turkel) reports DOJ and DHS sent a letter to members of the Senate Committee on Homeland Security and Governmental Affairs regarding ransomware statistics. Business Insider details the letter, which said that "victims paid over \$24 million across nearly 2,500 cases" in 2015. The letter cautions that the ransom statistics only reflect cases that have been reported.

Multi-State Information Sharing & Analysis Center (MS-ISAC) chair Tom Duffy gave a statement to Business Insider where he claimed that police departments are especially vulnerable to ransomware. Duffy "told Business Insider that local PDs are often the least likely to have off-site backups of their data, [and] those backups are a crucial fail-safe if you want to regain access to your maliciously encrypted data without paying."

FBI Alert Says Cyber Fraudsters Stole \$2.3 Billion Through Email Wire-Transfer Scams Since October 2013.

[Reuters](#) (4/7, Finkle) reports the FBI said hackers who engage in email wire-transfer scams have stolen \$2.3 billion since October 2013. Reuters says that the cybercriminals often impersonate company executives in emails to trick unsuspecting staff. Reuters adds that the FBI's data involved around 17,642 businesses in 79 countries. Reuters points out that the FBI alert, posted on their website Monday, says there has been a 270% increase in email wire-transfer scams since January 2015.

Good morning Lacy Craig

Thursday, April 7, 2016

CRIMINAL INTELLIGENCE

FBI Puts Woman Accused Of Killing Ex's Lover On Top Ten Most Wanted List.

The [New York Daily News](#) (4/6, Salinger) reports FBI officials said Wednesday that the bureau is offering a \$100,000 reward for information leading to the arrest of Brenda Delgado, who has been on the run since October after plotting the Sept. 2 murder of Dallas dentist Kendra Hatcher. The FBI elevated Delgado to its Top Ten Most Wanted list, making her the only woman currently on the list, "and only its ninth female on the list since the FBI began the program in 1950."

[Reuters](#) (4/6, Richter) reports FBI Special Agent Jason Ibrahim said in a statement, "Apparently [Delgado] was jealous" of Hatcher for dating her ex-boyfriend. Delgado is suspected of hiring two others to kill Hatcher. The [AP](#) (4/6) adds that police have already arrested "the alleged assassin."

[KYTX-TV](#) Tyler, TX (4/6, Kirst) reports the two co-conspirators, Kristopher Love and Crystal Cortes, are still in custody. The article says Delgado is charged with Capital Murder. Thomas Class Sr., special agent in charge of the FBI's Dallas field office, said, "Although she didn't pull the trigger

herself, she is still responsible for the murder of Dr. Kendra Hatcher, and through international publicity and significant reward offering, we intend to find her and bring her to justice.”

[KPRC-TV](#) Houston (4/6) reports FBI officials caution that Delgado is considered armed and dangerous.

CNBC Analysis: Hackers Using Phishing Scams To Steal Tax Returns.

[CNBC](#) (4/6, Taylor) analyzes the growing number of phishing scams that are resulting in the improper use of W-2 information to steal tax returns. CNBC details phishing attacks on several companies such as Seagate and Snapchat, both of which inadvertently turned over W-2 information to hackers after receiving fake emails from individuals purporting to be the company CEOs. CNBC points out “the surge in phishing email W-2 scams this year prompted the Internal Revenue Service to issue a warning to payroll and human resources professionals on March 1.” CNBC says victims have received “emails from addresses that look almost indistinguishable from legitimate email accounts within the company” that prompt them to turn over sensitive information. CNBC adds that experts interviewed say “the real solution lies in raising awareness.”

Law Enforcement Will Have Major Presence At Boston Marathon.

The [Boston Globe](#) (4/6, McCabe) reports authorities announced Wednesday some details of the security plans for the April 18 running of the Boston Marathon. The Globe says the plan “will involve nearly 5,000 federal, state and local law enforcement officers, who will patrol the 26.2-mile route by land and air.” The Globe adds that the plan, which took six months to craft, includes analyses of recent terror attacks in Paris, San Bernardino, and Brussels. Law enforcement officials say “the State Police Air Wing will fly over the course, while law enforcement officers — both in uniform and plainclothes — will be on patrol, [and] security cameras will be positioned along the way.” The Globe adds that law enforcement does not have information about any specific or articulable threat, but asks event-goers to be vigilant and report any suspicious activity.

Consumer UAS Prohibited At the Boston Marathon. The [AP](#) (4/6, Services) reports “security plans for this year’s Boston Marathon are being finalized,” and that backpacks and consumer drones will be prohibited. Other measures include “enhanced security checkpoints” and “dozens of surveillance cameras” installed along the route.

Terror Networks Rely On Fake IDs, Passports.

The [AP](#) (4/6, Ganley) reports terror networks are increasingly relying on lost or stolen passports, as well as fake documents, to plot and carry out attacks. The AP says ISIS is prioritizing the recovery of

“thousands of blank passports and equipment in towns it conquered” in order to become a player in the “underworld of document doctors.” The AP adds that US and European passports are especially valuable to terrorist networks because of the vast access to countries granted by said documents. The AP warns that document doctors range from “industrial-sized operations to artisans working from home on easily procured and increasingly refined equipment” to provide criminals with new identities.

Study Tracks FBI, DHS Surveillance Flights Over Four Month Period.

[The Verge](#) (4/6, Brandom) reports that the FBI and DHS have conducted more than 3,500 surveillance flights over US cities between August and December 2015, a BuzzFeed News study revealed. “The project looked at flight data collected from FlightRadar24, a public tracking service, then zeroed in on flight plans logged by planes registered to the two agencies,” The Verge Says. Flights by the agencies typically circled over populated areas, occasionally traveling as if to follow a more specific target. “The flights also drop more than 70 percent on the weekends and holidays, suggesting that flights are likely more than just an emergency measure,” The Verge says. [Tech Insider](#) (4/6, Muoio) reports that the FBI has said that its surveillance planes are only deployed in specific investigations.

I am pleased to announce the inaugural issue of the **LEIU Daily**. We hope this will provide you with the latest law enforcement news and include timely coverage of issues involving organized crime, terrorism, gambling, and legal news that may impact you. You can count on **LEIU Daily** for comprehensive coverage. I am eager to share this new member benefit with you as I believe it will help us all stay abreast of rapidly developing stories, issues, and regulations in our field.

On another note—I thought I could give you an update on the 2016 LEIU/IALEIA Annual Training Event that will be held in New Orleans, Louisiana from April 25-29, 2016. Our gracious host is long-time LEIU member—the Louisiana State Police. This great training is rapidly approaching and we are expecting over 700 attendees from around the world. In fact, this may prove to be our largest turnout in our history! [Get more information](#).

As we look ahead to 2017, I am also very excited to announce the 2017 LEIU/IALEIA Annual Training Event will be held in Bloomington, Minnesota from May 1-5. It will be at the Radisson Blu at the Mall of America. If you have never been there you will be amazed at this incredible location. If you have a chance to bring your family—you could not find a better location. We will, of course, be sending additional information about this training event later. For now, please mark your calendars!

LEGAL ISSUES

Wired Analysis: “Stingray” Litigation May Be Headed To Supreme Court.

[Wired](#) (4/6) reports that the decision by a Maryland state appeals court (State v. Andrews) that police use of a stingray cell-phone tracking device without a warrant was improper will result in additional cases argued on the issue and “could ultimately push the issue to the Supreme Court.” Wired says the “decision came from a state appellate court, not a federal appeals court, and is therefore not legally binding outside the Maryland state court system,” and the Supreme Court will be unlikely to hear a similar case until “another court in the country weighs in on stingrays and rules against the need for a warrant.”

White House Won’t Endorse Or Oppose Senate Encryption Legislation.

Citing unnamed sources, [Reuters](#) (4/6, Hosenball, Volz) reports that the White House will not support or oppose legislation sponsored by SSCI Chair Richard Burr and Ranking Member Dianne Feinstein giving Federal courts stronger authority to compel tech companies provide law enforcement access to encrypted data. The reason behind the White House’s decision is that Federal agencies remain at odds over the legislation.

Meanwhile, [The Hill](#) (4/6, Bennett, Williams) reports that the “midnight hour is nigh” for the Burr-Feinstein bill, as Burr told The Hill on Wednesday “that his panel could review a draft of the measure sometime Wednesday, and that he was targeting Thursday or Friday for a public release.” Burr said at a caucus meeting, “I think we closed the technical gaps last night. I’m hoping we get it out to our members in the committee today.”

San Francisco Bill Often Would Bar Notifying ICE Of Prisoner Releases.

The [San Francisco Chronicle](#) (4/6, Ho) reports a San Francisco Board of Supervisors committee will consider a bill that would further tighten a city law prohibiting “holding jail inmates flagged by immigration agents for hours or days past their release date.” The bill “would bar city law enforcement officials from notifying U.S. Immigration and Customs Enforcement agents when an individual will be released from local custody, except in very limited circumstances.” The current law drew criticism when “a man wanted for deportation by federal authorities was instead released from San Francisco County Jail and was then accused of killing a woman.”

Politico Analysis: Panama Papers Pose Ethics Issues For Prosecutors, Investigators.

[Politico](#) (4/6, Gerstein) reports that “the massive leak of confidential files from a Panamanian law firm catering to secrecy-focused wealthy elites is a field day for journalists around the globe, but U.S. prosecutors looking to plumb the Panama Papers for evidence of tax evasion and corruption face a series of potential pitfalls.” Politico notes that, “so far, only a tiny fraction of the 11.5 million documents from firm Mossack Fonseca have been made public, but as more of the records emerge, Justice Department lawyers will have to confront the possibility that many of the files are covered by attorney-client privilege or similar protections.” It is “not only an issue of whether the records could be admissible as evidence or used by investigators. In many states, it is considered unethical for attorneys to review what they know or suspect are attorney-client materials that have been unintentionally disclosed.”

TECHNOLOGY

Opinion: More Information Needed On Effectiveness Of Body Cameras Worn By Law Enforcement.

In an op-ed for The [Orange County \(CA\) Register](#) (4/7) professors Phillip M. Kopp and Christine Gardiner discuss available and upcoming studies of the effectiveness of body cameras worn by law enforcement. Kopp and Gardiner say “the adoption of the technology is currently outpacing research on the impact of the technology.” Kopp and Gardiner detail 12 available studies showing positive results that show “officers equipped with BWC generally have been involved in fewer incidents involving the use of force and/or that resulted in a complaint against the officer,” and “when a complaint has been filed against a BWC officer, the technology has hastened resolution of the matter.”

Kopp and Gardiner preview the general results of 40 upcoming studies and say the results are mixed. The studies will continue to look at “the effects of body-worn cameras on community

attitudes,” “the impact of this technology on the investigative process,” “the long-term impact of the technology on police agencies,” and the use of footage in other areas of the criminal justice system such as the courtroom. Kopp and Gardiner opine that one of the more interesting results from the studies is that “officers are using the technology to de-escalate situations by informing citizens of the camera’s presence.”

Senators Issue Clashing Statements On WhatsApp Encryption.

[The Hill](#) (4/6, McCabe) reports that Sen. Tom Cotton on Wednesday issued a statement criticizing messaging platform WhatsApp for enabling of end-to-end encryption for all its users. “The WhatsApp and Facebook decision to add end-to-end encryption to all of WhatsApp’s services with no secure method to comply with valid search warrants continues a dangerous trend in the tech and data world,” Cotton said. “We cannot allow companies to purposefully design applications that make it impossible to comply with court orders. I strongly urge WhatsApp and Facebook to reevaluate their decision before they help facilitate another terrorist attack.” For their part, WhatsApp founders Jan Koum and Brian Acton said on Tuesday that they believed strengthened encryption would help protect users from cybercrime.

Also Wednesday, Sen. Ron Wyden, [The Hill](#) (4/6, Bennett) reports, issued his own statement lauding WhatsApp’s move. “This is especially important for human rights activists, political dissidents and persecuted minorities around the world,” Wyden said. “While some continue to spread fear about modern technology, the fact is strong encryption is essential to Americans’ individual security.” According to Wyden, the desire of some lawmakers to regulate encryption is dangerous and unrealistic. “Attacking the use of strong encryption only empowers criminals, foreign hackers and predators who will take advantage of weak digital security,” Wyden said. The [Christian Science Monitor](#) (4/6, Hinckley) and [Vox](#) (4/6, Golshan) continue coverage of the WhatsApp encryption update.

As Bureau Struggled With Farook’s iPhone, Requests To Open Locked Phones Flooded In. [USA Today](#) (4/6, Johnson) reports that as the FBI worked to crack the iPhone of San Bernardino attacker Syed Rizwan Farook, the agency received a deluge of requests from state and local authorities seeking assistance in efforts to unlock hundreds of damaged or encrypted devices tied to unrelated criminal probes. “Requests involving more than 500 such devices streamed into the bureau’s Computer Analysis Response Team and the agency’s Regional Computer Forensic Laboratory programs during a four-month period beginning last October,” USA Today says, citing the FBI. In a statement the FBI said it was responding to requests for assistance “on a case by case basis,” but was “not always able to accommodate the requested assistance.”

Apple Officials: FBI iPhone Hacking Method Unlikely To Remain Secret. [Network World](#) (4/7, Heisler) reports in continued coverage that according to senior Apple engineers, the FBI's method for hacking iPhones is unlikely to remain secret. Once the method is exposed, Network World says, Apple will be able to patch the holes in iPhone security.

Rogers Warns China, Russia Can Launch Crippling Cyberattacks.

The [Washington Times](#) (4/7, Gertz) reports US Cyber Command Commander Rogers warned a Senate hearing this week "that Russia and China now can launch crippling cyberattacks on the electric grid and other critical infrastructures." Rogers told the panel, "We remain vigilant in preparing for future threats, as cyberattacks could cause catastrophic damage to portions of our power grid, communications networks and vital services." According to Rogers, "unlike other areas of military competition, Russia is equal to the United States in terms its cyberwarfare capabilities, with China a close second."

FBI Has Briefed Feinstein On Apple Hack, Offered Briefing To Burr.

[National Journal](#) (4/7, Sasso, Subscription Publication) reports that SSCI Ranking Member Dianne Feinstein "told National Journal this week that the FBI explained to her how agents were able to access the contents of the phone that was at the center of a high-profile court fight." Chairman Richard Burr "said he has been in touch with the FBI, but hasn't learned about its technique yet. 'I have been offered [a briefing], but I haven't taken it,' Burr said." Basing its report on the National Journal piece, [Yahoo! News](#) (4/6, Chokkattu) says that the FBI "may not be willing to share how it successfully cracked the San Bernardino shooter's iPhone with Apple or the general public, but that's not stopping the agency from disclosing the method to senators in Congress." [Engadget](#) (4/6) reports that the "briefings of Feinstein and Burr are likely no coincidence – both senators are working on an anti-encryption bill that would limit the technology's usage in consumer products like the iPhone." [CNET News](#) (4/6, Tibken) reports that National Journal piece says "both Feinstein and Burr believe Apple shouldn't be given information on how the FBI broke into the phone, which is an obvious stance given the bill they're planning to introduce as soon as this week."

[The Verge](#) (4/6, Brandon) and [Mac Rumors](#) (4/6) run reports based on the National Journal story.

Subject: UPDATE: 2016-2017 ORDER CUT-OFF AND START-UP DATES FOR CHEVROLET POLICE / FIRE VEHICLES

LAST DAY TO ORDER THE 2016 SILVERADO SSV POLICE IS APRIL 21

All,

Attached is the 2016 Order Cut-off and 2017 Start of Ordering dates for our General Motors vehicles. Please let your departments know about these important dates so they can order accordingly.

When you look at the attachment please look to the far right for the order cutoff and start-up dates. Dates in red have been updated from my last email. There are two tabs at the bottom – one is 2016 Build-out Matrix and the other is 2017 Start-up Matrix. Please click on the tab to see the information you want.

In the Build-out tab, SEO means Special Equipment Options. For example, back-up alarm, rear seat delete, etc.

I have highlighted in yellow the vehicles that represent our Chevrolet Police vehicles.

The 2016 Tahoe PPV is still TBD however we anticipate an unofficial order cutoff date of 6/2/16.

Below are your upcoming 2016 order cutoff police vehicle dates:

MODEL	2016 MY NON-SEO ORDER CUTOFF
Silverado SSV	4/21/16
Caprice PPV	5/5/16
Suburban	6/23/16
Tahoe Police (PPV / 5W4; Fleet Only)	TBD

I have also attached a comparison chart of our Silverado SSV Police Pick-up for your evaluation.

Please let me know if you have any questions

Thank you,

Rich Patterson

HEADLINE	02/23 US Marshals tracked 6K cellphones
SOURCE	http://www.kiro7.com/news/national-content/us-marshals-may-have-secretly-tracked6000-cellphones/108688222
GIST	<p>WASHINGTON, D.C. — A USA Today report has uncovered information that indicates federal marshals have secretly tracked almost 6,000 cellphones.</p> <p>U.S. Marshals use powerful cellphone surveillance tools called stingrays to track suspects across the country. Stingrays are mobile devices that look like cellphone towers and intercept cellphone signals. Those towers are mounted to police cars. Since cellphones are always seeking towers to connect to for signals, stingrays allow phones to connect to them and send data to it.</p> <p>A connected laptop in the police vehicle displays the data for police to understand. The data is then sent to a cellphone tower like normal.</p> <p>Data includes numbers dialed by the cellphone, out going texts and calls, the number of the connected cellphone, and the location of the phone. Cellphone users can not tell if their data has been sent to a stingray.</p> <p>U.S. Marshals have used stingrays in 5,975 cases.</p> <p>Compared to the NYPD, the number of times the U.S. Marshals have used stingrays is significantly higher.</p> <p>The NYPD told the New York Civil Liberties Union that they used the devices over thousands of times since 2008.</p> <p>The Baltimore Police Department, which has also controversially used the device, has used the technology over 4,300 times since 2007.</p> <p>"That sheer number is significant," American Civil Liberties Union lawyer Nathan Wessler said of the U.S. Marshal's number. "That's a lot of deployments of a very invasive surveillance tool."</p> <p>The agency would not name the suspects tracked, where they were arrested or the time period of the log, citing privacy.</p> <p>The report said that the Marshals Service confirmed the use of stingrays by rejecting a request the new organization made under the Freedom of Information Act.</p>

HEADLINE	02/23 SPD trains for mental health cases
SOURCE	http://kuow.org/post/seattle-cops-train-better-handle-mental-health-cases
GIST	<p>Seattle police come into contact with about 27 people every day who are experiencing a mental health crisis, including mental illness, dementia or drug-related issues.</p> <p>Sgt. Dan Nelson is in charge of coordinating the Seattle Police Department’s Crisis Intervention Program, which acts as a bridge between the criminal justice system and social services.</p> <p>“I say all the time, police and social workers are two completely different jobs while we're going towards the same common goal,” Nelson told KUOW’s David Hyde. “We want this person to not be relying on the emergency rooms and jails, not have to be such high utilizers of the system, and at the end of the day we want this person to have a nice productive life.”</p> <p>Nelson said interactions between people with mental illness and law enforcement have historically been negative, but with the Crisis Intervention Program, Seattle is getting a better police response.</p> <p>The program has also received praise from the federal monitor overseeing the department’s reforms. A report from Feb. 16 states, “There has been a real, tangible, and objective change in the way Seattle police are interacting – compassionately and with an eye towards treatment – with those in crisis.”</p> <p>To become certified in the program, an officer must complete 40 hours of training on subjects such as recognizing types of mental illness and communicating with people who may be experiencing mental illness.</p>

HEADLINE	02/23 Malheur Refuge back in federal hands
SOURCE	http://koin.com/2016/02/23/malheur-refuge-back-in-hands-of-us-fish-wildlife/
GIST	<p>PORTLAND, Ore. (KOIN) — Twelve days after the occupation of the Malheur National Wildlife Refuge ended, the FBI said they’ve finished collecting evidence and turned the facility back to the US Fish and Wildlife Service.</p> <p>However, the refuge is not open to the public or to the media, FBI officials said. It will stay closed until both the US Attorney’s Office and USFWS feels it’s OK to re-open.</p> <p>Militant occupied the refuge in Harney County for 41 days. Since the last occupiers left on February 11, the FBI cleared the refuge, checked for bombs or explosives, documented and collected evidence, used forensic teams to process computers and electronic devices and used an Art Crime team to check for any damage to artifacts from the Burns Paiute Tribe.</p>

	The forensic examinations will continue for months, authorities said.

HEADLINE	02/23 Israel: soldiers to take weapons home
SOURCE	https://news.yahoo.com/israeli-soldiers-ordered-guns-home-off-duty-102243164.html
GIST	<p>Jerusalem (AFP) - Israeli soldiers have been ordered to take their guns with them when off duty to allow them to intervene in the event of Palestinian attack, the military said on Tuesday.</p> <p>The decision comes after off-duty soldier Tuvia Weissman, 21, was stabbed to death at a supermarket in an Israeli industrial zone in the occupied West Bank on Thursday.</p> <p>His wife told Israeli media that Weissman, who was a dual Israeli-American citizen, had asked his superiors if he could carry his gun with him to protect himself, but they refused and required him to leave it at his base's armoury.</p> <p>Israeli military chief of staff Lieutenant General Gadi Eisenkot has now "ordered that soldiers carry their weapons even outside of their service," including while going home for leave, an army spokeswoman told AFP.</p>

HEADLINE	02/23 NKorea warns US, SKorea on exercises
SOURCE	https://news.yahoo.com/north-korea-warns-against-u-south-korea-military-124927417.html
GIST	<p>SEOUL (Reuters) - North Korea warned on Tuesday of harsh retaliation against South Korea and its ally the United States, which are preparing for annual joint military exercises next month amid heightened tensions following the North's nuclear test and rocket launch.</p> <p>The North calls the annual exercises preparations for war and routinely vows to retaliate.</p> <p>"All the powerful strategic and tactical strike means of our revolutionary armed forces will go into preemptive and just operation to beat back the enemy forces to the last man if there is a slight sign of their special operation forces and equipment moving to carry out the so-called 'beheading operation' and 'high-density strike,'" the Supreme Command of the Korean People's Army said in a statement carried by state media.</p> <p>It said its first target would be South Korea's presidential Blue House, while U.S. military bases in Asia and on the U.S. mainland would be its secondary targets. About 28,500 U.S. troops are based in South Korea.</p>

HEADLINE	02/23 Europe borders closing on migrants
SOURCE	https://www.washingtonpost.com/world/europe/migrants-find-doors-slamming-shut-across-europe/2016/02/23/056b0f78-d9a1-11e5-8210-f0bd8de915f6_story.html?hpid=hp_no-name_eumigrants-755pm_1%3Ahomepage%2Fstory
GIST	<p>BERLIN — Nations along Europe’s refugee route are taking the boldest steps yet to clamp down on migrant flows, trapping thousands of asylum seekers and potentially blocking countless war-weary families from finding sanctuary in the West.</p> <p>The crackdown in recent days, aid groups say, comes at the worst possible time — just as new arrivals are rapidly increasing and the majority of migrants, once single men, are now women and children. An even larger surge from the Middle East and beyond is expected in the coming weeks, with tens of thousands more migrants set to land in Greece and start the long trek northwest to Europe’s core.</p> <p>But crisis-weary countries from Austria to Macedonia are now moving to bar the doors. Since Sunday, Macedonia and Serbia, for instance, have blocked passage to virtually all Afghans — a group accounting for roughly a third of all migrants. Even many Syrians and Iraqis without proper documentation are being turned away, aid groups and U.N. officials say, leaving a quickly increasing number of desperate asylum seekers stranded in nearly bankrupt Greece.</p> <p>There were other signs that the main route traversed by more than 1 million migrants last year was breaking down, with aid groups saying Croatia and Slovenia are also refusing entry to more asylum seekers. Slovenia’s parliament voted late Monday to dispatch the army for border control. And in yet another blow to the cherished ideal of free movement in Europe, Belgium said Tuesday that it would set up border controls on its frontier with France to block migrants recently cleared from a sprawling camp in Calais from entering its territory.</p>

HEADLINE	02/23 Sheriff’s report on Scalia’s death
SOURCE	https://www.washingtonpost.com/world/national-security/texas-sheriff-releases-report-on-supreme-court-justice-scalias-death/2016/02/23/8c0bdb0c-da82-11e5-891a-4ed04f4213e8_story.html?hpid=hp_hp-more-top-stories_scaliareport-837pm%3Ahomepage%2Fstory
GIST	<p>A Texas sheriff’s department released an incident report late Tuesday that revealed new details of the discovery of Supreme Court Justice Antonin Scalia’s body, as well as the name of the friend who accompanied him on the hunting trip and the items found inside the ranch bedroom where the justice was found.</p> <p>In response to a public records request made by The Washington Post, the Presidio County Sheriff’s Office released an incident report from the sheriff’s investigation of Scalia’s death at the Cibolo Creek</p>

Ranch on Feb. 13. The report stated that the justice's body was found in bed with a pillowcase covering his eyes. A breathing apparatus was on the table next to the bed, but it was switched off. Scalia was lying on three pillows "stacked up to elevate his head."

[\[Read the incident report here\]](#)

Scalia's sheets and pillows "were still in the creased position from that day's room service, indicating that there was no struggle involved," the report said. The top pillowcase "appeared to have shifted at some point in the night due to the weight of his pillow, causing the pillow case to slide down and cover his eyes."

The sheriff noted that the position of the pillow "did not seem to have inhibited Scalia's breathing."

About 12:14 p.m., the owner of the ranch, John Poindexter, called Presidio County Sheriff Danny Dominguez to report the death but would not give him the name of the deceased person. There was then a disagreement between them about who should handle the death report. Poindexter told Dominguez that he wanted to report the death to the U.S. Marshals Service, but Dominguez said that it was under his jurisdiction.

"He then stated to me that this death was way beyond my authority and that it should go the Feds (USMS)," Dominguez said in the report. "I then replied it doesn't matter who it is, it was still under my jurisdiction."

Dominguez called U.S. Marshal Ken Roberts, and they agreed to meet at the ranch, south of Marfa, Tex. The sheriff arrived about 12:35 p.m.

When Dominguez arrived, he met Poindexter and Allen Foster, who is described in the report as "a close friend of Scalia" who had flown in with him the day before.

C. Allen Foster is a prominent Washington lawyer who has argued before the Supreme Court. It was not immediately clear whether C. Allen Foster was the Scalia friend referred to in the report. A representative from his law firm said that he was traveling and that she would try to reach him.

Since Scalia's death at the remote West Texas ranch, questions have been raised about how the death investigation was handled and why an autopsy wasn't performed on the 79-year-old Supreme Court justice.

The Presidio County judge and the manager of the funeral home that handled Scalia's body said Scalia's family insisted on not having an autopsy done.

	<p>Scalia suffered from coronary artery disease, obesity, diabetes and other ailments, according to a letter from his Supreme Court doctor.</p> <p>Presidio County District Attorney Rod Ponton told the Associated Press there was nothing suspicious about Scalia’s death and cited a letter from Rear Adm. Brian P. Monahan, the attending physician for members of Congress and the Supreme Court. The Feb. 16 letter said Scalia’s many “significant medical conditions led to his death,” Ponton said.</p>

HEADLINE	02/23 D.C. police challenged on ‘stingray’
SOURCE	http://www.washingtontimes.com/news/2016/feb/23/dc-police-use-of-secret-cellphone-tracking-technol/
GIST	<p>In the first known case to challenge the Metropolitan Police Department’s use of secret cellphone tracking technology, a D.C. man convicted of sexually assaulting two women he met through escort service ads is appealing his 66-year prison sentence on the grounds officers violated his Fourth Amendment rights by using the technology to locate him.</p> <p>Under nondisclosure agreements with federal law enforcement, local police departments in possession of such technology — known as cell site simulators, or often by the brand name Stingray — have fought to keep secret their use of the equipment.</p> <p>The Metropolitan Police Department has been no exception. Although the department is known to have had cell site simulators since at least 2003, civil liberties advocates who track law enforcement use of the technology say this case represents the first time that defense attorneys have uncovered the MPD’s use of the technology in a specific case and been able to challenge its use in court.</p>

HEADLINE	02/22 Tacoma gas prices average \$2.04
SOURCE	http://www.thenewstribune.com/news/business/article61786472.html
GIST	<p>Average retail gasoline prices in Tacoma have fallen 1.4 cents per gallon in the past week, averaging \$2.04 per gallon Monday, the petroleum industry monitor GasBuddy.com reported.</p> <p>That compares with the national average that has increased 1.9 cents per gallon in the past week to \$1.71 per gallon.</p> <p>Including the change in gas prices in Tacoma during the past week, prices are 48.2 cents per gallon lower than a year ago and are 21 cents per gallon lower than a month ago, GasBuddy reported. The national average has decreased 13.1 cents per gallon during the past month and stands 58.4 cents per gallon lower than one year ago.</p>

	According to GasBuddy historical data, gasoline prices for this period in Tacoma have ranged widely over the past five years, from \$2.52 per gallon in 2015 to \$3.38 in 2011.

HEADLINE	02/24 Europe cracks down on protests
SOURCE	http://www.nytimes.com/2016/02/25/world/europe/spain-europe-protest-free-speech.html?hpw&rref=world&action=click&pgtype=Homepage&module=well-region&region=bottom-well&WT.nav=bottom-well&r=0
GIST	<p>MADRID — A puppet show at an open square in Madrid during Carnival festivities in February featured a policeman who tried to entrap a witch. The puppet officer held up a little sign to falsely accuse her, using a play on words that combined Al Qaeda and ETA, the Basque separatist group.</p> <p>Angry parents complained, and the real police stepped in. They arrested two puppeteers, who could now face as many as seven years in prison on charges of glorifying terrorism and promoting hatred.</p> <p>Paradoxically, the puppeteers say in their defense, the police proved their point: that Spain’s antiterrorism laws are being misapplied, used for witch hunts.</p> <p>Far from an isolated episode, the arrests on Feb. 5 are part of a lengthening string of prosecutions, including two against a rap musician and a poet, that have fueled a debate over whether freedom of protest and speech are under threat in Spain and elsewhere in Europe because of fears of terrorism.</p> <p>Some European countries, with painful historical chapters of fascism and leftist extremism, have long placed stricter limits on political and hate speech than has the United States. For instance, denying the Holocaust can be prosecuted in Germany as well as France.</p> <p>But some civic associations and legal experts are growing increasingly alarmed at the broad ways such laws are being adapted as the specter of Islamic extremism becomes Europe’s new preoccupation. Once such prohibitions become law, even if in response to real security concerns, there is no telling how the statutes could be applied in the future, they say.</p> <p>The Spanish puppeteers are a case in point. They are being prosecuted under a law on the books in Spain for more than a decade and originally aimed at ETA. Responsible for the deaths of more than 800 Spaniards, the Basque separatist group declared a unilateral cease-fire in 2011.</p> <p>Last year, however, the conservative government of Prime Minister Mariano Rajoy overhauled and strengthened the law, aiming this time at Islamic terrorism. Among other things, the changes raised the maximum prison sentence for first-time offenders to three years from two to virtually guarantee jail time.</p>

	<p>Those steps coincided with the Rajoy government’s introduction of what has become known as a “gag law,” harshly penalizing unauthorized public demonstrations, which has drawn strong criticism at home and abroad.</p> <p>“This is the latest very serious attack on freedom of expression,” said Joaquim Bosch, a spokesman for Judges for Democracy, an association of about 600 judges that focuses on human rights. “During the Franco dictatorship, troublesome artists went to prison, but not in democratic Spain.”</p> <p>The widening application of antiterrorism laws related to speech extends beyond Spain, however, as countries across Europe struggle to balance civil liberties and security in the aftermath of two major terrorist attacks in Paris last year.</p> <p>Ambiguity about where exactly the legal line sits can have its own chilling effect in stifling speech, encouraging self-censorship.</p>

HEADLINE	02/23 ‘Super lice’ 25 states including Wash.
SOURCE	http://www.king5.com/story/news/health/2016/02/23/new-weapon/80809316/
GIST	<p>In 25 states, including Washington, scientists are finding super lice that can’t be killed with the chemical used in most over-the-counter treatments. Pyrethroids used to work 100 percent of the time back in 2000, but by 2013, it only worked in 25 percent of cases.</p> <p>But even super lice are no match for a new weapon used by the Lice Clinics of America. It’s called AirAllé.</p> <p>“We use heated air and we dehydrate the lice and the eggs in a single treatment,” Claire Roberts, CEO, Lice Clinics of America said. “It takes about an hour, and we guarantee it.”</p> <p>It’s FDA approved, costs about \$170 and may be covered by insurance. Prescription medication or nit-picking and combing can still get rid of these nasty creatures, but both options take time and multiple treatments. However the best treatment is prevention. Lice experts say parents should teach their kids a few basics.</p>

HEADLINE	02/23 Fitness program teams teens w/police
SOURCE	http://www.king5.com/story/news/local/2016/02/23/badges-and-barbells-teams-police-teens-afterschool-workouts/80804182/?csp=nbcnews

GIST	<p>Student athletes are teaming up with police, firefighters, paramedics, and other first responders for tough, afterschool workouts meant to build trust between teens and law enforcement and help everyone get in shape.</p> <p>The new program called Badges and Barbells was started by Sgt. Andrew McCurdy with the King Co. Sheriff's Office and takes place a few days a week at Evergreen Campus, a collection of three specialized high schools within Highline Public Schools.</p> <p>"We need to find more opportunities to build friendships when they're not in a crisis," McCurdy said while training about a dozen students in the Evergreen weight room Monday.</p> <p>The participants, mostly members of the football team, follow a training routine designed by McCurdy. He was an athletic training major in college and worked in a sports injury clinic.</p> <p>"I don't really talk to cops and stuff, but Andy's a pretty cool dude," said freshman Sione Moimoi while catching his breath after a set of deadlifts. "He's different."</p> <p>"Right now in our country, police officers are under a lot of scrutiny and I think a lot of that tension comes from our difficulty building relationships with the people we're working with," said McCurdy. He is also chief of the Covington Police Department under a contract between the sheriff's office and the city.</p> <p>McCurdy was joined Monday by Capt. Theodore Boe, also with the sheriff's office. Paramedics, firefighters, and corrections officers have also worked out with the teens since the program started in January.</p> <p>McCurdy is raising funds to open a similar gym at a middle school in Covington.</p>

HEADLINE	02/23 San Francisco: homeless camp hazard
SOURCE	http://abcnews.go.com/US/wireStory/san-francisco-declares-homeless-tent-city-health-hazard-37150959
GIST	<p>San Francisco health officials declared a tent city that has been growing along a city street a health hazard and gave homeless people living on the sidewalk 72 hours to clear the area.</p> <p>The Department of Public Health said notices declaring the area along Division Street a public nuisance and encouraging homeless people to move to city shelters would be posted Tuesday.</p> <p>"Unfortunately, conditions where multiple tents are congregated have become unsafe," said Barbara A. Garcia, the department's director of health. "People are living without access to running water, bathrooms, trash disposal or safe heating or cooking facilities."</p>

An inspection found that people in tents along Division Street between South Van Ness Avenue and 11th Street are living among garbage, human feces, hypodermic needles, urine and other insanitary conditions, the department said.

If people don't vacate by Friday, the department will recommend the San Francisco Department of Public Works and the San Francisco Police Department remove all encampments from the area, it said.

Mayor Ed Lee said at least two other encampments in the city would be cleared in the coming weeks.

HEADLINE	02/23 NAACP condemns SPD killing of man
SOURCE	http://abcnews.go.com/US/wireStory/police-killing-man-seattle-condemned-naACP-37151009
GIST	<p>Civil rights leaders are condemning the fatal shooting of a black man by Seattle police and said Tuesday they have hired a law firm to investigate.</p> <p>Seattle-King County NAACP President Gerald Hankerson disputed the police account of the shooting that killed Che Taylor, 47. Hankerson said Taylor was trying to comply with police orders when he was shot, the Seattle Times reported.</p> <p>"It was clear to me that they (police) came with the intent to kill, not arrest," he said at a news conference Tuesday.</p> <p>Taylor, who also went by the name Marvin Hunter, was a violent felon legally prohibited from possessing a handgun, police said. His criminal history includes convictions for assault, robbery and rape.</p> <p>Hankerson said whatever Taylor did "in his life before, this is irrelevant to us." He blasted the media for not mentioning Taylor was also a father and husband.</p> <p>Police have said they were conducting surveillance Sunday afternoon in north Seattle when they saw a man with a holstered handgun and determined it was Taylor. When an officer approached his vehicle to take Taylor into custody, authorities said he didn't obey commands to show his hands and get on the ground.</p> <p>Instead, officers and a civilian witness said he reached for his gun and officers fired on him.</p> <p>Police released a video from a patrol car that shows what happened during the shooting. But Taylor's movements are somewhat obscured by a white Ford Taurus.</p> <p>Police say detectives found Taylor's gun.</p>

	The two officers who fired their weapons were identified Tuesday as Michael Spaulding and Scott Miller. Both were hired in 2008 and are now on paid leave.

HEADLINE	02/23 Severe weather turns deadly; 3 killed
SOURCE	http://abcnews.go.com/US/severe-weather-kills-mississippi/story?id=37148018
GIST	<p>At least three people were killed when a series of severe storms and tornadoes ripped through the South today, injuring more than 30 people and leaving behind a trail of destruction.</p> <p>Lamar County, Mississippi, Coroner Cody Creel confirmed one fatality there this afternoon. The victim's identity has been withheld pending notification of next of kin.</p> <p>In Convent, Louisiana, St. James Parish Sheriff Willy Martin said a trailer park was demolished after a reported tornado struck the area. More than 300 people live in the trailer park, though it's not clear how many were home at the time.</p> <p>Martin confirmed that two people died as a result of the storms, while seven others were critically injured and more than 30 were wounded.</p> <p>And in Pensacola, Florida, there were three buildings reported with heavy damage and reports of six injuries, according to the Escambia County website.</p> <p>More than six million people in five different states are in the path of the storms, which have spawned tornadoes in Louisiana and golf ball-sized hail in Texas.</p>

HEADLINE	02/23 SR16 renamed for Trooper Radulescu
SOURCE	http://q13fox.com/2016/02/23/state-route-16-renamed-in-memory-of-trooper-radulescu/
GIST	<p>PORT ORCHARD, Wash. -- The Washington Department of Transportation is renaming State Route 16 in memory of State Trooper Tony Radulescu. He was killed four years ago Tuesday on that roadway.</p> <p>A rededication ceremony is planned for Tuesday morning in Port Orchard. The governor and other dignitaries are scheduled to speak.</p> <p>Radulescu was shot and killed while making a traffic stop in Gorst early in the morning of Feb. 23, 2012. The 44-year-old was a U.S. Army veteran and had served with the Washington State Patrol for 16 years.</p> <p>The man accused of the shooting later committed suicide and the passenger in his vehicle was sentenced to one year in prison.</p>

	The section of highway named after the trooper runs from Milepost 18 to Milepost 28.

HEADLINE	02/23 Bertha back to digging under Seattle
SOURCE	http://www.seattlepi.com/local/article/Bertha-back-to-digging-under-Seattle-6849708.php
GIST	<p>Seattle's massive tunneling machine Bertha is back to digging Tuesday after the state agreed to allow the contractor to begin again "conditionally."</p> <p>Contractor Seattle Tunnel Partners was given permission to dig roughly 160 feet forward, provided they update work quality plans and institute new quality assurance protocols, among other requirements, according to an announcement from the state Department of Transportation.</p> <p>"During this time, they (Seattle Tunnel Partners) must demonstrate that they have implemented a number of changes to ensure they can safely continue mining," the release said.</p> <p>The machine that's digging the tunnel meant to replace the Alaskan Way Viaduct has been stopped since Jan. 14, when the state halted its work after a sinkhole opened up in its wake.</p>

	<p>Bertha only began digging again in late December after a more than two-year delay due to damage to the machine.</p> <p>The contractor was asked to provide full explanation of why the sinkhole opened up and proof that such an event wouldn't happen again.</p> <p>Gov. Jay Inslee called for the halt, but agreed with WSDOT's decision to lift the suspension Tuesday, according to the release.</p>

HEADLINE	02/23 CDC: cancer risk from some floorings
SOURCE	http://www.foxnews.com/health/2016/02/23/cdc-cancer-risk-from-flooring-3-times-what-thought.html?intcmp=hplnws
GIST	<p>A certain type of laminate flooring made by Lumber Liquidators may up the risk of cancer, and the company's stocks are taking a beating, CNNMoney reports.</p> <p>Shares fell by up to 24 percent Monday morning, per Bloomberg and Reuters, after the CDC issued a revised report that found health effects from the formaldehyde in unnamed floor samples from China include increased risk of respiratory issues such as asthma or eye, nose, and throat irritation, as well as an estimated risk of six to 30 cases of cancer per every 100,000 people.</p> <p>The risk for both these issues was upped from an earlier version of the report that used the wrong measurement for ceiling height, which resulted in the formaldehyde concentration in the air coming in at about a third less than it should've been (that earlier report put the risk at two to nine cases per 100,000).</p> <p>"We sent the report to scientists at several universities and discovered the government forgot to convert feet to meters in some calculations," Anderson Cooper said during Sunday night's broadcast of 60 Minutes, per Reuters.</p>

HEADLINE	02/23 China fighter jets on contested island
-----------------	---

SOURCE	http://www.foxnews.com/world/2016/02/23/exclusive-china-sends-fighter-jets-to-contested-island-in-south-china-sea.html
GIST	<p>In a move likely to further increase already volatile tensions in the South China Sea, China has deployed fighter jets to a contested island in the South China Sea, the same island where China deployed surface-to-air missiles last week, two U.S. officials tell Fox News.</p> <p>The dramatic escalation came minutes before Secretary of State John Kerry was to host his Chinese counterpart, Foreign Minister Wang Yi, at the State Department.</p> <p>Chinese Shenyang J-11s (“Flanker”) and Xian JH-7s (“Flounder”) have been seen by U.S. intelligence on Woody Island in the past few days, the same island where Fox News reported exclusively last week that China had sent two batteries of HQ-9 surface-to-air missiles while President Obama was hosting 10 Southeast Asian leaders in Palm Springs.</p> <p>China has sent fighter jets to Woody Island before. In November, Chinese state media published images showing J-11 fighter jets on the island, but this was the first deployment of fighter jets since the Chinese sent commercial airliners to test the runway at one of its artificial islands in the South China Sea.</p> <p>The Pentagon sailed a guided-missile destroyer past a contested island in the South China Sea as a result. Late last year, the U.S. military conducted a flight of B-52 bombers and another warship to conduct a “freedom of navigation” exercise.</p> <p>The Chinese have protested the moves and vowed “consequences.”</p>

HEADLINE	02/23 Busted clutch shuts down Navy ship
SOURCE	http://www.cnn.com/2016/02/23/politics/navy-littoral-combat-ship-damaged/index.html
GIST	<p>Imagine you just got that brand-new top-of-the-line sports car and you take it out for that first road trip and -- you blow the clutch.</p> <p>Now imagine that your hot new ride is a \$360 million warship.</p> <p>Well, that's about what happened to the USS Milwaukee, one of the U.S. Navy's newest littoral combat ships.</p> <p>The 388-foot, 3,400-ton Milwaukee broke down in the Atlantic Ocean on December 10, less than a month after it was commissioned. The ship had to be towed 40 miles to Joint Expeditionary Base Little Creek-Fort Story in Virginia.</p> <p>The Navy said at the time that metallic debris was found in filter systems in the ship, causing a loss of pressure in lubricant to gears that transfer power from the ship's diesel and gas turbine engines to its water jet propulsion system.</p> <p>The Milwaukee "is designed to operate with gas turbine and diesel engines, which can operate in tandem or independently," Navy Lt. Rebecca Haggard said. "In the case of Milwaukee, when switching from one system to the other, a clutch failed to disengage as designed. Instead, the clutch remained spinning and some of the clutch gears were damaged."</p>

HEADLINE	02/23 Xbox Live service restored
SOURCE	http://www.inquisitr.com/2821559/xbox-live-service-restored-following-ddos-attack-hackers-say-they-can-knock-xbox-off-face-of-earth/
GIST	<p>Xbox One owners have had a rough 24 hours trying to play their games online due to a DDOS attack against Xbox LIVE. Service was finally restored early Tuesday afternoon amid complaints and the hacker group responsible crowing about their takedown of the service to Newsweek.</p> <p>Xbox Head Phil Spencer apologized to Xbox owners on Twitter by publicly stating he was “[v]ery sorry for the current issues.” The Xbox Support page now shows that all services have been restored with the exception of the Xbox Video and Music Stores for the Xbox 360.</p> <p>Those attempting to play games suffered from either not being able to launch their digitally purchased games, because the servers to verify the purchase were down or had problems connecting to online games when they were able to launch. For example, the population of the <i>ARK: Survival Evolved</i> official servers were the lowest seen since launch, while <i>Rocket League</i>’s matchmaking took forever because the number of people able to get in the playlists were barely over a thousand. That’s for a game that enjoyed a record 195,000 concurrent players across three platforms over the weekend.</p> <p>So what caused the Xbox LIVE outage over the past day? A hacking group launched a distributed denial of service (DDoS) attack against the service with the explicit purpose of taking it offline and disrupting gamers.</p>

HEADLINE	02/23 Era: industrialization of cybercrime
SOURCE	http://www.welivesecurity.com/2016/02/23/industrialization-cybercrime-may-upon-us/
GIST	<p>We are slowly seeing the “industrialization” of cybercrime according to an expert.</p> <p>Dr. Adrian Nish, head of cyber threat intelligence at BAE, said that cybercriminals are becoming more “professionalized”, the Telegraph reported.</p> <p>He explained: “They are running phone support scams, writing their own software that comes with service agreements and money-back guarantees if the code gets detected with the promise of a replacement.”</p>

The UK broadsheet newspaper also revealed that the defense group is facing relentless rounds of cyberattacks. The company said that this happens at least twice a week, with cybercriminals attempting to steal sensitive defense secrets.

BAE Systems, which is the world's third largest arms group in the world, claimed that foreign government-backed attackers are behind the attacks.

It added that those responsible for the breaches are what it describes as "unusual suspects".

These actors have been put into six categories – mules, professionals, nation state actors, activists, getaways and insiders.

Getaways, for example, are described as individuals "too young to be prosecuted", while mules are those "naïve opportunists who may not even realize they work for criminal gangs to launder money".

Kevin Taylor, head of applied intelligence business at BAE, told the Telegraph: "Behind every cyber attack is a real human with motivations and ways of operating.

"Understanding the threat such as what motivates them and how they work is one of the best ways of defending against them."

HEADLINE	02/23 DHS, DOJ cyber sharing guidelines
SOURCE	http://www.scmagazine.com/dhss-johnson-tackles-cybersecurity-act-of-2015-implementation/article/478101/
GIST	<p>The Department of Homeland Security (DHS), along with the Department of Justice, issued two sets of guidelines and procedures, required by the Cybersecurity Act of 2015, for federal agencies and the private sector to use regarding the sharing of cyber threat indicators.</p> <p>The department issued one set of guidelines to assist non-federal entities on how to share cyber threat indicators and defensive measures, and another set to detail how the federal government will share and use said information.</p> <p>The DHS also issued interim guidelines to define how the department will implement its own process to conduct a privacy review of received information and ensure compliance with the new law over time.</p> <p>Secretary Jeh C. Johnson said in a statement Tuesday that his department has improved its sharing system and added new capabilities to address the requirements of the new law.</p>

“We know many cyber intrusions can be prevented if we share cyber threat indicators,” Johnson said. “These can include, for example, the subject line of a spear phishing email, or the IP address of the computer from which it originated,” he said.

Johnson contended that by sharing this kind of information in real-time and by swiftly applying defensive measures, the government and private sector can work together to more effectively prevent attacks.

Johnson said he encourages companies to work with the DHS to set up the technical infrastructure needed to share and receive cyber threat indicators in real-time. He said that he welcomes feedback from privacy advocates and private sector participants in the Automated Indicator Sharing system.

HEADLINE	02/23 FBI warns of pro-ISIS hackers
SOURCE	http://motherboard.vice.com/read/fbi-warns-of-pro-isis-hackers-calls-methods-unsophisticated
GIST	<p>The Federal Bureau of Investigation has issued a warning about pro-Islamic State hackers carrying out cyberattacks against the US, but has stated that most of these hacktivist groups use relatively unsophisticated methods.</p> <p>“Over the past 18-24 months, an unknown number of online extremists have conducted ‘hacktivist’ cyber operations—primarily Web site defacements, denial-of-service attacks, and release of personally identifiable information (PII) in an effort to spread pro-Islamic State of Iraq and the Levant (ISIL) propaganda and to incite violence against the United States and the West,” the FBI document obtained by Motherboard reads. Warnings about threats like this are often sent to government agencies and contractors.</p> <p>The FBI explicitly names several apparent pro-Islamic State groups: “Elite Islamic State Hackers,” “Islamic Cyber Army,” and “Caliphate Cyber Army.”</p> <p>“In September 2015, group members began posting a series of messages via Twitter stating that they were conducting cyberattacks against the United States in commemoration of the September 11th terrorist attacks using the hashtag #AmericaUnderHacks for their Twitter postings,” the document continues.</p> <p>But these so-called cyberattacks are often nothing more than the republishing of already publicly available data. As Motherboard has previously reported, spreadsheets from an Italian educational institute “dumped” by the “Islamic Cyber Army” under the hashtag #WorldUnderHacks, with details of French government personnel, and a US Department of Defense spreadsheet, were all just a Google search away.</p> <p>Indeed, “the FBI assesses most pro-ISIL hacktivist groups use relatively unsophisticated methods and tools to scan for and exploit well-known Web site vulnerabilities,” the document continues. And when they do actually carry out some hacking, pro-Islamic State groups use common methods of attack, such as</p>

	Structured Query Language injection (SQLi), Cross Site Scripting (XSS), and social engineering to obtain account credentials, the document notes.

HEADLINE	02/24 Cybercriminals target IRS e-filing
SOURCE	http://www.bsminfo.com/doc/cybercriminals-target-irs-e-filing-pin-application-0001
GIST	<p>The Internal Revenue Service (IRS) has released details about a cyber attack upon its Electronic Filing PIN application. The IRS reported that it has stopped the cyber attack.</p> <p>IRS officials said they identified unauthorized attempts involving approximately 464,000 unique Social Security Numbers (SSNs), of which 101,000 were used to successfully access an E-file PIN. The automated attack used personal data stolen elsewhere outside the IRS to attempt to generate E-file PINs for the SSNs.</p> <p>“Using personal data stolen elsewhere outside the IRS, identity thieves used malware in an attempt to generate E-file PINs for SSNs,” the IRS said in a prepared statement. “No personal taxpayer data was compromised or disclosed by IRS systems. The IRS also is taking immediate steps to notify affected taxpayers by mail that their personal information was used in an attempt to access the IRS application.”</p> <p>All affected taxpayers will be notified by mail of the attack. “The IRS is also protecting their accounts by marking them to protect against tax-related identity theft,” the agency added.</p> <p>The IRS was also quick to assure that the attack was not related to the temporary shutdown of the e-filing system, during which time the IRS could not accept many returns due to a system-wide computer failure, according to Fortune.</p> <p>IRS cybersecurity experts are currently assessing the situation, and the IRS is working closely with other agencies and the Treasury Inspector General for Tax Administration. The IRS also is sharing information with its Security Summit state and industry partners.</p>

HEADLINE	02/23 Vulnerability: wireless dongles
SOURCE	http://www.bizjournals.com/atlanta/blog/atlantech/2016/02/atlantas-bastille-uncovers-vulnerabilitythat-could.html
GIST	<p>Atlanta-based Bastille has discovered a vulnerability in wireless mice and keyboards that leaves billions of PC's and millions of networks vulnerable to remote exploitation via radio frequencies.</p> <p>Using an attack which Bastille researchers have named “MouseJack,” malicious actors are able to take over a computer through a flaw in wireless dongles, the company said in a statement.</p>

	<p>Once paired, the MouseJack operator can insert keystrokes or malicious code with the full privileges of the PC owner and infiltrate networks to access sensitive data.</p> <p>The attack is at the keyboard level, therefore PC's, Macs, and Linux machines using wireless dongles can all be victims. Notable wireless keyboard and mouse manufacturers affected by the MouseJack discovery include: Logitech, Dell and Lenovo, but most non-Bluetooth wireless dongles are vulnerable, Bastille noted.</p> <p>“MouseJack is essentially a door to the host computer,” said Marc Newlin, Bastille’s engineer responsible for the MouseJack discovery. “Once infiltrated, which can be done with \$15 worth of hardware and a few lines of code, a hacker has the ability to insert malware that could potentially lead to devastating breaches.”</p>

HEADLINE	02/23 Growing target: critical infrastructure
SOURCE	https://defensesystems.com/articles/2016/02/23/trend-micro-critical-infrastructure-threats.aspx
GIST	<p>Eduardo Cabrera is Trend Micro’s vice-president for Cybersecurity Strategy. He directs studies into emerging cyber threats, and develops risk management strategies for the company’s strategic partners like Interpol, the FBI and others. Cabrera is a former Chief Information Security Officer of the U.S. Secret Service.</p> <p>In an interview with Defense Systems, he broadly addressed the critical infrastructure (CI) threat environment, and urged collaboration—getting governments and their commercial sectors on the same cybersecurity page.</p> <p>Defense Systems: With CI threats spiraling, there’s a ramped-up urgency to gear up for what some now call “cyberwar.”</p> <p>Eduardo Cabrera: Threats against all critical infrastructure have steadily been increasing over the last 10 years; however, the level of sophistication has been growing at a much higher pace. Attacks have also become more destructive [as our and the Organization of American States 2015 CI report on the Americas attests.]</p> <p>DS: And more common; recent assaults on Ukraine's critical infrastructure, for example.</p> <p>EC: [Such escalations] are more concerning with the increased level of digital connection and dependence. Converged corporate networks and ICS [Internal Control System] networks involved in business needs, such as real-time billing and remote support, have introduced systemic vulnerabilities. These significantly increase avenues of attack.</p> <p>DS: CI probes are still overwhelmingly digital versus physical. Why?</p>

EC: Cyber attacks against critical infrastructure are predominantly digital in nature, but are having physical consequences. Attacks have been primarily focused around targeted cyber-espionage campaigns. However ... advanced threat actors also focus on critical infrastructure supply chains. Threat research has linked Ukrainian CI companies in mining and rail to Ukraine's power attacks and outages.

DS: Which types of attackers and attacks pose the greatest dangers to the U.S. homeland's critical infrastructure - whether government or privately owned?

EC: Regardless of threat actor motivation, destructive malware attacks, from wiper malware to crypto-ransomware, represent the most clear and present danger to critical infrastructure. Cybercriminals, hactivists, and cyber espionage operatives all show a propensity [to include] destructive malware in their campaigns.

Whether as the primary aim or coupled with a ... multi-stage and multi-vector attack, there is probably no other attack that could so disrupt and degrade critical infrastructure operations in any sector.

HEADLINE	02/23 Cyber threats against energy networks
SOURCE	http://www.elp.com/articles/powergrid_international/print/volume-21/issue-2/features/cyber-threats-teaming-up-to-u-s-energy-networks.html
GIST	<p>Will the first major cyberattack on the U.S. energy infrastructure come as a big bang of coordinated events, or as a series of barely noticed intrusions that gradually cripple and isolate electric or gas networks?</p> <p>Whatever the plausible combination of these scenarios, preparing for a cybersecure future is proving to be one of the most difficult operational and organizational challenges to U.S. infrastructure in decades. With the responsibility of keeping the lights on while confronting new cybersecurity requirements, utilities are juggling multiple priorities: managing aging operational technology (OT) and information technology (IT) systems, dealing with growing data volume and complexity from an increasingly sensed smart grid, and monitoring new physical and cyberthreats to these networks.</p> <p>The level of cyberreadiness among utility operators varies widely because of the complexity of these responsibilities, but there is broad consensus that more coordinated policies, funding and actions on cybersecurity are required to safeguard utilities' operational and information technology networks. Operators are realizing that new technologies and business practices are needed, and have started to incorporate advancements such as big data analytics, cloud computing and machine learning into their toolsets. These technologies, including approaches that merge the cyberprotection of traditionally separate OT and IT networks, are becoming essential competencies for any utility's cybersecurity strategy.</p> <p>Two converging factors are creating a perfect storm for grid and infrastructure operators as they strive to securely administer their OT and IT networks.</p>

	<p>1. Rapidly growing numbers of interconnected sensors and control components-ranging from 10 to 100 million for a typical utility-that are remotely machine addressable and vulnerable to cyberattack; and,</p> <p>2. Proliferating cyber actors and threats that outpace the traditional regulatory processes and standards designed for a hardware-centric world.</p>

HEADLINE	02/23 Japan under 'escalating' attacks
SOURCE	http://www.zdnet.com/article/japans-critical-infrastructure-under-escalating-cyber-attack-says-report/
GIST	<p>The research arm of security company Cylance, SPEAR, has released a report entitled Operation Dust Storm that details cyber-attacks, starting in 2010 and spanning multiple years and vectors, against major industries spread across Japan, South Korea, the United States, Europe and several other Southeast Asian countries.</p> <p>The report includes SPEAR's most recent research, which suggests that the as-yet-unidentified attackers have shifted their focus to "specifically and exclusively target Japanese companies or Japanese subdivisions of larger foreign organisations."</p> <p>Attribution in cyber-attacks is complex, thanks to the ease with which hackers can lay false trails. However, in a briefing, Cylance's chief marketing officer Greg Fitzgerald noted that the attacks are "significantly financed, significantly resourced in terms of personnel and skillset, with a sustained presence, with the sole intention to be long-term espionage of these organisations."</p> <p>Choosing his words carefully, Fitzgerald said: "It's probably a nation state 'in the region'...and two particular countries, China and North Korea, both have an enormous amount of power, resources and skill in the cybersecurity arena. We, Cylance, do not have any indication as to either of those countries, and our position is that attribution, or the concept of blaming a country, is a very dangerous activity because it can be spoofed -- it can be made to look like a country when it's somebody else."</p> <p>Cylance has notified the Japanese arm of CERT (Computer Emergency Response Team), which is participating in the ongoing investigation, said Fitzgerald.</p> <p>"The attack that is happening is a current attack, in progress, that has sustained compromise of a variety of Japanese organisations -- in particular they include electric utility companies, oil companies, natural gas companies, transportation organisations, construction and even some finance organisations," said Fitzgerald.</p>

HEADLINE	02/23 Report: attackers use macros, trickery
-----------------	---

SOURCE	http://www.cso.com.au/article/594523/attackers-drop-web-exploits-macros-trickery/
GIST	<p>New research shows that old-fashioned spam and trickery is the most common way of infecting machines, driven largely by Dridex banking malware.</p> <p>Over the course of 2015 cybercriminals turned away from technically sophisticated software exploits towards cheaper and possibly more effective social engineering that tricks people to infecting their own machines, according to security firm Proofpoint.</p> <p>“The year 2014 was all about the technically sophisticated attacker. We saw levels of software coding and ingenuity that were very impressive. These were people that spent lots of time and money and the guys in the underground forums were offering bounties of millions of dollars for technical exploits.</p> <p>Over the past year the pendulum went all the way in the other direction. As humans, we’re a lot easier to exploit and cheaper,” Kevin Epstein, VP of threat operations at Proofpoint told CSO Australia.</p> <p>Analysing a subset of its own customers data, Proofpoint found that in 2015 99.7 percent of documents used in attachment-based campaigns contained malicious macros to compromise a target rather than automated exploits.</p> <p>Macros in Microsoft’s Word, for example, are disabled by default to reduce the risk of attackers exploiting them to install malware. Epstein said a typical method to convince people to undo that protection is by creating a document with a blurred image and instructions that tell the recipient the image was blurred for their protection and that to view it requires enabling macros.</p> <p>In instances where attacker email contained a URL, 74 percent led to pages designed to phish credentials while 26 percent sent victims to a page that encouraged them to run a malicious program, for example by downloading a Word document from Dropbox.</p> <p>According to Epstein, just two percent of the attack email linked to a web page hosting an exploit kit. In other words, very few attacks required no human interaction.</p> <p>The most common malware last year were banking Trojans, accounting for 74 percent of all payloads. Dridex banking malware, as measured by message volume, was ten times greater than the next most common malware.</p> <p>Despite efforts by law enforcement to take down Dridex’s infrastructure, the botnet emerged as one of the key sources of malware infections last year.</p>

HEADLINE	02/23 Russia banks under attack
----------	--

SOURCE	http://securityaffairs.co/wordpress/44706/cyber-crime/ratopak-trojan-russian-banks.html
GIST	<p>According to the Symantec security firm, a cyber criminal gang financially -motivated has targeted employees of Russian banks.</p> <p>The threat actors have been using a Trojan called Ratopak to gain control over the victim's machine and exfiltrate data. The experts spotted several attacks since October, the attack chain starts with fake Central Bank employment emails sent to the staff of Russian financial institutions. In the attempt to trick victims, the threat actors behind the malicious campaign have registered that domain cbr.com.ru that is similar to the official domain used by Russia's Central Bank cbr.ru.</p> <p>The domain is referenced by the content of the fake emails and it is used by the cyber criminals as a repository for the Ratopak Trojan.</p> <p>The Ratopak Trojan implements a number of backdoor features, including logging keystrokes and stealing clipboard data.</p>

HEADLINE	02/22 Germany: malware to 'spy' on citizens
SOURCE	http://www.dw.com/en/german-government-to-use-trojan-spyware-to-monitor-citizens/a-19066629
GIST	<p>A spokesman for the German interior ministry announced on Monday that the government had approved the usage of Trojans to monitor suspected citizens.</p> <p>The interior ministry spokesman defended the government's decision, saying "basically we now have the skills in an area where we did not have this kind of skill." The program was already endorsed by members of the government in autumn 2015, the ministry said.</p> <p>Trojans are software programs, also known as malware, specially designed to get into users' computers. They are often used by hackers and thieves to gain access to somebody else's data.</p> <p>In order to use the malware, government officials will have to get a court order, allowing authorities to hack into a citizen's system.</p> <p>The approval will help officials get access to the suspect's personal computer, laptop and smartphone. Once the spyware installs itself on the suspect's device, it can skim data on the computer's hard drive and monitor ongoing chats and conversations.</p> <p>Members of the Green party protested the launching of the Trojan, with the party's deputy head Konstantin von Notz saying, "We do understand the needs of security officials, but still, in a country under the rule of law, the means don't justify the end."</p>

HEADLINE	02/22 FrameWorkPOS alive and doing well
SOURCE	http://www.scmagazine.com/improved-frameworkpos-spotted-alive-and-well-in-the-wild/article/478402/
GIST	<p>It's alive! FrameWorkPOS is still in the wild and it's better than ever with a recent campaign stealing 43,000 credit cards, according to researchers at ThreatStream Labs.</p> <p>In a Thursday blog post, the researchers noted that a sample of the malware family, aimed at point-of-sale systems, indicated that bad actors have made improvements to the original iteration in subsequent versions.</p> <p>We were able to leverage passive DNS data to learn more about its scope and some of the victims. The data gave us insight to the following:</p> <p>“During the analysis of the data 3 different campaigns were observed,” the blog post said, noting that researchers leveraged passive DNS data to gain more insight about the scope of the campaigns and their victims. They noted one campaign to be “more active than others.” What the researchers referred to as the grp10 campaign infected the most hosts though its “running timeframe was 2.5 months which is very short compared to” another campaign, known as grp05. That latter campaign ran from August 2015 to February 2016. The third campaign, grp03, ran for two months but infected 10 IPs.</p> <p>The researchers noted a total of 67 unique IPs infected and distributed between the U.S. and Russia.</p>

HEADLINE	02/22 DHS: Einstein key to future big data
SOURCE	https://fcw.com/articles/2016/02/22/cyber-einstein-schneck.aspx
GIST	<p>Even if the Office of Personnel Management had the latest version of the Department of Homeland Security's multibillion-dollar firewall in place last year, it still would not have prevented the massive hack of OPM that compromised the data of some 22 million Americans. Phyllis Schneck, DHS' top cybersecurity official, readily admits this.</p> <p>Nonetheless, Schneck sees Einstein, an intrusion detection and prevention system for civilian agencies that is administered by DHS, as a foundational platform for a more sophisticated, data-driven cyber defense.</p> <p>In the coming months, the deputy undersecretary for cybersecurity and communications said, officials will pair Einstein 3A, the latest version of the firewall, with cyber intelligence to more quickly detect and thwart hackers like the OPM intruders. In other words, Schneck wants to use a signature-based system to do more than block threat signatures.</p> <p>DHS is currently piloting a "reputation scoring" system that works with Einstein to add more analytical color to adversaries' trademark cyber signatures. The pilot uses cyberthreat information from both the</p>

intelligence community and the private sector to flesh out a "credit score" of a cyber adversary, said Schneck, once an executive at cybersecurity vendor McAfee.

The reputation scoring system is "a subset of a larger direction we're going in data analytics," Schneck told FCW in a recent interview in her Arlington, Va., office.

Einstein, whose projected lifecycle cost is \$5.7 billion through fiscal 2018, according to the Government Accountability Office, came under fire in the aftermath of the OPM breach last summer. Hackers were in OPM networks for 10 months before their malware signatures were plugged into Einstein, according to a DHS timeline of the hack obtained by FCW.

A recently published GAO study offered further fodder for Einstein's critics.

The report found that Einstein provides a "limited ability to detect potentially malicious activity entering and exiting computer networks at federal agencies." Moreover, the program "does not monitor several types of network traffic, and its 'signatures' do not address threats that exploit many common security vulnerabilities and thus may be less effective."

HEADLINE	02/23 Judge's order could expose 10M kids?
SOURCE	http://www.foxnews.com/us/2016/02/23/judges-order-could-expose-10m-california-schoolkids-personal-info-say-critics.html?intcmp=hpbt2
GIST	<p>A federal judge's order earlier this month that California public schools turn a trove of personal information on millions of children over to two nonprofits has parents worried and privacy rights advocates outraged.</p> <p>The nonprofits, who advocate for special needs kids, say they need access to information on a state database to gauge compliance with federal law, but critics don't believe Social Security numbers, home addresses and other sensitive records should be included. The ruling by Judge Kimberly Mueller of the Eastern District of California, grants access to data on all students enrolled in Golden State public schools at any time since 2008, a number estimated at 10 million.</p> <p>"People are confused, worried and angry," said Bill Ainsworth, a spokesman for the California Department of Education.</p> <p>The order from Mueller, who sits in Sacramento, stems from a 2012 lawsuit filed by two special needs advocacy groups, the Morgan Hill Concerned Parents Association and the Concerned Parents Association, alleging local educational agencies have failed to accommodate children with disabilities in compliance with federal law.</p> <p>Critics say the ruling could also potentially expose statewide assessment results, progress reports, behavior and disciplinary information, special education evaluations and records pertaining to health, mental health and medical information.</p>

Terror Conditions

[Top of page](#)

HEADLINE	02/23 Houston terror evidence classified?
SOURCE	http://www.houstonchronicle.com/news/houston-texas/houston/article/Feds-say-terror-evidence-classified-6848804.php
GIST	<p>Federal prosecutors contend that some of the evidence against Houston's Omar Al Hardan, who is charged with trying to support the ISIS terrorist group, is so classified that Al Hardan himself should not be able to see it.</p> <p>U.S. District Judge Lynn N. Hughes, who is presiding over the case, has been asked by the Department of Justice to sign an order that requires Al Hardan's lawyer, David Adler, undergo a background check to obtain a security clearance for access to classified information.</p>

Hughes has already clashed with prosecutors in the case, as he tongue-lashed a prosecutor sent here from Washington, D.C. by questioning his professionalism and worth to the case.

The judge also recently took the extraordinary step of issuing a written "Order of Ineptitude" over how the attorney had not followed proper local procedures for requesting an official transcript of a hearing.

Hughes said if the "pretentious" prosecutors visiting from Washington, D.C., knew what they were doing, or had the humility to ask for help from their Houston-based federal counterparts, they would have known how to get transcripts from a hearing in the case.

"It would not have taken three days, seven telephone calls, three voice mail messages and one snippy electronic message for them to indirectly ask the court for assistance in ordering a transcript," the judge states in the order.

It remains to be seen how Hughes will address the prosecution's most recent request. He has asked the government to whittle down its trove of evidence that prosecutors have said is the equivalent of 250 million sheets of paper. It is unclear how many of those pages are classified.

Prosecutors also ask that Adler only be able to review the classified information at the courthouse and that he be forbidden to discuss the evidence over the phone or with anyone who is not approved by the government.

The transcript from a reportedly heated Feb. 12 conference behind closed doors that involved prosecutors, Adler and Hughes remains classified.

HEADLINE	02/23 Canada: rise in terror acts abroad
SOURCE	http://www.theglobeandmail.com/news/politics/sharp-rise-in-number-of-canadians-involved-in-terrorist-activities-abroad/article28864101/
GIST	<p>Canada's spy agencies have tracked 180 Canadians who are engaged with terrorist organizations abroad, while another 60 have returned home.</p> <p>The latest figures mark a significant increase from the findings of the 2014 Public Report on the Terrorist Threat to Can-ada, which identified about 130 people involved in terror-related activities overseas, including 30 taking an active role with the Islamic State in Syria and Iraq and the Nusra Front in Syria.</p> <p>"The total number of people overseas involved in threat-re-lated activities – and I'm not just talking about Iraq and Syria – is probably around 180," Canadian Security Intelligence Service director Michel Coulombe told The Globe and Mail after testifying before the House of Commons public safety committee. "In Iraq and Syria, we are probably talking close to 100."</p>

	<p>These people are involved in various activities, including direct combat, training, fundraising to support attacks, promoting radical views and planning terrorist violence.</p> <p>Mr. Coulombe said about 60 suspected foreign fighters have returned to Canada, although he stressed the numbers keep changing almost daily.</p> <p>The CSIS director said the greatest danger to this country remains terror suspects who have not managed to leave Canada.</p> <p>“By talking about the number of people who are overseas, we are not thinking about people who are either prevented from travelling or have no intention of travelling but are here in Canada and are actually involved in threat-related activities,” he said.</p> <p>RCMP Commissioner Bob Paulson said Canadian security agencies are keeping careful tabs on the 60 people who have returned home, even if they do not have enough evidence to charge them with terrorist activities.</p>

HEADLINE	02/23 ISIS losing ground around world
SOURCE	http://www.vox.com/2016/2/23/11099338/isis-global-problems

GIST	<p>Libyan fighters are celebrating a major victory on Tuesday: They've driven ISIS out of parts of Benghazi, eastern Libya's largest city, building on advances in and around the city on Sunday.</p> <p>ISIS isn't just losing in Benghazi. In its home base in Syria and Iraq, it's lost up to 30 percent of its territory from its peak in August 2014. And it's tried expanding abroad, officially declaring a wilayat — which literally means "province" and refers to ISIS's foreign franchises — in roughly a dozen countries.</p> <p>These ISIS franchises showed some initial successes, for example in Libya, but since mid-2015 they have been struggling. Many of ISIS's wilayat have stopped growing and begun shrinking. Some ISIS affiliates have been wiped out altogether.</p> <p>"The Islamic State has encountered one serious obstacle after another as it has tried to expand its presence beyond Syria and Iraq," Daveed Gartenstein-Ross, a fellow with the Foundation for Defense of Democracies and CEO of the consulting firm Valens Global, writes with threat analyst Nathaniel Barr in War on the Rocks on Tuesday. "These stumbles have gone largely unnoticed by the international media."</p> <p>Gartenstein-Ross and Barr examined seven ISIS expansion attempts and found that each had serious problems. In every case, the ISIS franchise they looked at has either suffered a major battlefield defeat, had members targeted and killed in significant numbers by rival jihadist groups, or was defeated outright.</p> <p>Despite ISIS's defeats in the Libyan cities of Benghazi and Derna, the group is still deeply entrenched in Sirte — and getting a number of new recruits. Its Egypt branch has withstood repeated assaults from the Egyptian government and has managed to pull off a number of high-profile terrorist attacks. And that's to say nothing of Boko Haram, which pledged itself to ISIS last year and is now recognized as Wilayat Nigeria.</p>

HEADLINE	02/24 Rescued teen: life under ISIS hard
SOURCE	http://www.torontosun.com/2016/02/24/rescued-swedish-girl-says-life-under-islamic-state-really-hard
GIST	<p>ERBIL, Iraq - A Swedish teenager rescued from Islamic State militants in Iraq has said life in the so-called caliphate was "really hard" and that she was duped into going there by her boyfriend.</p> <p>In her first interview since Kurdish special forces recovered her in northern Iraq, the 16-year old told a Kurdish TV channel she had met her boyfriend in mid-2014 after dropping out of school in Sweden.</p> <p>"First we were good but then he started to look at ISIS videos and speak about them and stuff like that," she told Kurdistan 24 in a brief interview, using another name for the Islamic State group.</p> <p>"Then he said he wanted to go to ISIS and I said ok, no problem, because I didn't know what ISIS means, what Islam is -- nothing," said the girl.</p>

	<p>The couple set off from Sweden in late May 2015 and made their way across Europe by bus and train until reaching the Turkish border province of Gaziantep, from which they crossed into Syria.</p> <p>From there, Islamic State militants ferried them by bus with other men and women to the city of Mosul in neighboring Iraq and provided them with a house. There was no electricity or running water.</p> <p>"I didn't have any money either - it was a really hard life," she said, looking relaxed and healthy. "When I had a phone I started to contact my mom and I said 'I want to go home'."</p> <p>The teenager, who was rescued on Feb. 17, is currently in Iraq's Kurdistan region and will be handed over to Swedish authorities.</p>

HEADLINE	02/24 DNA report: Ankara bomber Turkish
SOURCE	http://www.todayszaman.com/national_dna-report-suggests-ankara-bomber-was-turkish_413138.html
GIST	<p>A DNA report from a suicide bombing that killed 29 people in the Turkish capital Ankara last week suggests the main perpetrator was Turkish-born, not Syrian as initially stated by the government, a senior Turkish security official said on Tuesday.</p> <p>A car laden with explosives detonated next to military buses as they waited at traffic lights near Turkey's armed forces' headquarters, parliament and government buildings in the administrative heart of Ankara last Wednesday.</p> <p>The next day, Prime Minister Ahmet Davutoğlu blamed a Syrian Kurdish YPG militia fighter working with Kurdish militants inside Turkey for the attack, naming him as Salih Nekar, born in 1992, and from the Hasakah region of northern Syria.</p> <p>But the DNA report suggested the attack was carried out by Abdalbaki Somer, born in the eastern Turkish city of Van, said the security official and the state-run Anadolu news agency, which cited prosecution sources.</p> <p>That matches the name given by the Kurdistan Freedom Hawks (TAK), a Kurdish militant group, when it claimed responsibility for the attack in a statement on its website on Friday.</p>

HEADLINE	02/23 Captured militant: ISIS weakened
SOURCE	http://rudaw.net/english/kurdistan/230220163

GIST	<p>ERBIL, Kurdistan Region—The Islamic State (ISIS) has been weakened by months of air strikes and the death of many of its commanders, says a militant arrested in Kirkuk last week.</p> <p>“Everything is different from what it used to be. They are weakened now,” Saad Sulaiman Ali confirmed in an interview with Rudaw. “Hawija is disconnected from Mosul now. They are surrounded in both Hawija and Anbar,” noting that ISIS is lacking in weapons, ammunition and explosives.</p> <p>Ali said that ISIS has now relocated its training camps to wooded areas near Hawija.</p> <p>“Their training centers are also among those trees,” Ali claimed. “And they have camps in other places in the hills.”</p> <p>He says he joined ISIS in 2014, shortly before the group captured most of Iraq’s Sunni heartland and he underwent 40 days of training at a camp somewhere between Riyaz and Hawija.</p> <p>Ali’s first assignment was to join an attack unit led by Khaled Abush, nicknamed Abu Waleed from Nahrawan. His fellow militants included foreigners but he says that, now, the number of foreign fighters is dwindling, “Dozens of them have been killed.” His commanders were all Arabs.</p> <p>During his time with ISIS, he witnessed the executions of more than 300 security forces captured by the group in Kirkuk and Mosul. Their bodies were buried in a trench dug behind a checkpoint.</p> <p>Ali believes they were policemen and soldiers, killed for the sole reason that they were employees of the Iraqi government.</p> <p>Ali’s final mission was to join an undercover ISIS cell in Kirkuk, assigned to carry out bombings in the city. He carried out one car bombing near a group of police officers before being arrested by Kirkuk security forces.</p>

HEADLINE	02/23 Libya forces ‘liberate’ Benghazi
SOURCE	http://www.dw.com/en/libyan-forces-wrestle-benghazi-from-militant-grasp/a-19069316
GIST	<p>After a campaign to regain coastal Benghazi, government forces have seized control of the central neighborhood of al-Laithi. "Islamic State" and al Qaeda have gained traction in Libya following the 2011 uprising.</p> <p>In a video statement, General Khalifa Hifter, Libya's army chief, called the breakthrough in Benghazi the result of "much patience."</p> <p>"We have totally liberated the area of al-Laithi," said Fadel al-Hassi, a member of Libya's special forces.</p>

	<p>People took to the streets of al-Laithi - once Benghazi's most populous district - to celebrate the victory, carrying banners and Libyan flags.</p> <p>Residents were stopped from entering certain parts of the neighborhood as loyalist forces continued to comb buildings for booby traps.</p> <p>The victory comes as Brett McGurk, the US special envoy to the coalition fighting the "Islamic State," said the militant group is trying to recruit more fighters to join their campaign in the North African country.</p>

HEADLINE	02/23 German paper: 800 Islamists go to ISIS
SOURCE	http://www.dw.com/en/more-than-800-islamists-leave-germany-to-join-is-in-syria-and-iraq/a-19066880
GIST	<p>German daily "Die Welt" reported on Tuesday that more than 800 Islamists have left Germany to join jihadi groups such as the so-called "Islamic State" (IS) in Syria and Iraq.</p> <p>Around a third of Islamists who had joined up with the jihadi militants abroad had also returned to Germany, meaning the number of "jihadi travelers" has slightly increased since the beginning of the year, said a spokeswoman for the Federal Criminal Office (BKA). In January, BKA President Holger Münch said the criminal bureau had in fact seen a slight decline in travel by Islamists to the war zones.</p> <p>The report also said that German authorities now believe that more than 130 jihadis who have traveled to Syria or Iraq have as foreign fighters have died - some of them as suicide bombers.</p> <p>After studying the backgrounds of 677 Islamists who traveled to Syria and Iraq up until last June, the BKA found that most of the militants were men between the ages of 22 and 25. More than 60 percent of jihadi travelers had German citizenship, and one sixth had converted to Islam.</p> <p>Authorities in Germany and throughout Europe are currently working on how to contend with the problem of the hundreds of citizens who have left to fight alongside extremists in conflict regions and the danger they pose on their return.</p>

HEADLINE	02/23 Terms of Syria ceasefire agreement
SOURCE	http://www.voanews.com/content/terms-of-syria-cease-fire-agreement/3202930.html
GIST	A U.S.-Russia cease-fire plan for Syria is scheduled to take effect at midnight (local time) Friday in Syria.

	<p>The Syrian government accepted the plan Tuesday. Opposition groups have until midnight Friday to confirm their participation. The cease-fire agreement does not apply to Islamic State or al-Qaida-linked groups, and Syria said it will continue military operations against those groups.</p> <p>Syrian forces and other armed opposition groups must agree to the cease-fire terms, which include:</p> <ul style="list-style-type: none"> • Implementation of U.N. Security Council Resolution 2254, also known as the "Roadmap for Peace in Syria," which includes the readiness to participate in a U.N.-led political negotiation process. • Cessation of attacks by each side with any weapons, including rockets, mortars and anti-tank guided missiles. • Unhindered and immediate access to humanitarian groups delivering aid to besieged areas. • No land grabs. • Proportionate use of force by either side when responding in self-defense. • Any party to the cease-fire can bring allegations of violations to the International Syria Support Group (ISSG) and its cease-fire task force. A U.S. State Department spokesman said the group may also rely in part on non-government organizations and journalists in Syria for reports on possible cease-fire violations.

HEADLINE	02/23 Bomb attacks northern Afghanistan
SOURCE	http://www.upi.com/Top_News/World-News/2016/02/23/Bomb-attacks-kill-more-than-a-dozen-in-northern-Afghanistan/6711456262348/?spt=hs&or=tn_int

GIST	<p>KUNDUZ, Afghanistan, Feb. 23 (UPI) -- Two bomb attacks targeting police and a pro-government figures in northern Afghanistan killed at least 15 people and injured several others, authorities said Tuesday.</p> <p>One person was killed and seven others injured when a magnetic bomb, placed under a car in Kunduz, detonated Tuesday, China's Xinhua news agency reported.</p> <p>The vehicle belonged to Hajji Abdul Qadir, an influential figure in Kunduz province and an advocate for the Kabul government. It was not immediately clear if Qadir was killed or injured in the blast.</p> <p>The Taliban claimed responsibility for a separate bombing in the Parwan province on Monday. That suicide blast killed at least 14 people, including six local police officers, and appeared to have been targeted at a police commander who was among the dead.</p>

SOURCE	http://www.breitbart.com/national-security/2016/02/23/radical-canadian-imam-rome-will-be-conquered/
GIST	<p>A radical Canadian imam called for Muslims to “look forward” as “Rome will be conquered,” in a Friday sermon posted on the Internet on Feb. 16 and translated by the Middle East Monitoring Research Institute (MEMRI).</p> <p>“The prophecies of the Prophet Muhammad came true. But some prophecies have not come true yet. Look forward to it, because the Prophet Muhammad said that Rome would be conquered! It will be conquered,” preached Imam Shaban Sherif Mady.</p> <p>Mady, based in Edmonton, also spoke of restoring the “rightly-guided” Islamic Caliphate.</p> <p>His reference to conquering Rome mirrors a similar call by Islamic State leader Abu Bakr al-Baghdadi. “This is my advice to you. If you hold to it you will conquer Rome and own the world, if Allah wills,” Baghdadi preached in an attempt to garner more recruits to ISIS.</p> <p>Mady’s Facebook page reveals the extent of his radicalism, boasting a cover photo featuring Muslim Brotherhood leaders including ousted Egyptian President Mohammad Morsi and Turkish leader Recep Tayyip Erdogan.</p> <p>On Tuesday, Mady shared a Hamas propaganda video on his Facebook page depicting terrorists sniping and killing Israeli soldiers, issuing threats to Israelis in Hebrew and Arabic. Mady captioned the video by writing: “Qassam (Hamas’ terrorist wing), the earth’s best soldiers.”</p>

	<p>Moreover, on Feb. 13, Mady posted photos of Hamas terrorists celebrating “the martyrdom of Imam Hassan al Banna, founder of the Muslim Brotherhood,” according to an Investigative Project on Terrorism (IPT) translation.</p> <p>A day later, Mady shared a gruesome video of a wounded woman and called for the destruction of Israel.</p>

HEADLINE	02/23 ISIS attacks on rise in Syria
SOURCE	http://www.nbcnews.com/news/world/isis-attacks-are-rise-syria-despite-russian-airstrikes-n524186
GIST	<p>The Russians are playing Whack-A-Mole with ISIS — they hit the murderous militants in Iraq and the fanatics pop up in Syria.</p> <p>So says the IHS Jane's Terrorism and Insurgency Center, which has done a tally of ISIS attacks in 2015 since Moscow began bombing the militants.</p> <p>"Following the start of airstrikes and Russian intervention in September 2015, the number of Islamic State attacks in Iraq declined in the last quarter of the year, however, the number of attacks in Syria increased," said Matthew Henman, who heads the Jane's center.</p> <p>"This is somewhat a consequence of the growing pressure the Islamic State has come under in Iraq," he added. "Whereas in Syria the group has had more room to maneuver and, at least for the time being, retained the ability to relocate fighters between the different front lines."</p> <p>Hoping to make gains in Syria, ISIS has refocused on the cities of Homs and Deir ez Zour and moved forces away from key areas in Iraq that the Russians have been bombing, Henman said.</p>

HEADLINE	02/23 Detainees left at Gitmo
SOURCE	http://www.nbcnews.com/news/us-news/quantanamo-bay-who-are-detainees-left-prison-facility-n524196
GIST	<p>The number of detainees held at the U.S. prison at Guantanamo Bay, Cuba, has slowly shrunk from hundreds to the current count of 91.</p> <p>All would be transferred somewhere else under President Obama's plan to close the facility.</p> <p>Nearly 800 people have been held at the prison at one time or another, and nine have died there, including seven suicides.</p> <p>Of the 91 detainees still there, half are facing criminal charges, while 35 have been deemed eligible for transfer to other countries. Another 10 have been determined to be "unreleasable." Three have been</p>

convicted in the military commissions system, one of whom has been sentenced. Many have gone on hunger strikes to protest their confinement and the conditions at the prison.

The prisoners who remain there today are from more than a dozen countries, including 52 from Yemen.

The detainees include:

Khalid Shaikh Mohammed

Mohammed, a Pakistani citizen, is perhaps the most notorious of all Guantanamo detainees. He was "the principal architect" of the Sept. 11, 2001 terror attacks, according to the 9/11 Commission Report, and was captured in his home country in March 2003. He is one of a handful of al-Qaida operatives whom the CIA has admitted waterboarding during interrogations.

Mohammed has been at Guantanamo since 2006. After several months of detention there, he not only admitted organizing the 9/11 attacks, but also having a hand in the the 1993 World Trade Center bombing, the murder of Wall Street Journal correspondent Daniel Pearl, and Richard Reid's attempted shoebombing.

Abu Zubaydah

Zubaydah, suspected of being an al-Qaida operative and 9/11 plotter, is considered by human rights advocates as the poster boy of American torture, having been waterboarded and lost an eye while held by the CIA after his capture in 2002. The Pakistani citizen's attempts to challenge his detention, and see his case move through the legal system, have been stalled for years. He has been held at Guantanamo since 2006.

Ahmed Umar Abdullah al Hikimi

Hikimi, of Yemen, is suspected of being a bodyguard for Osama bin Laden, and of fighting for the Taliban against U.S. forces in Afghanistan. As a close bin Laden associate, he was known in Guantanamo as one of the so-called "Dirty 30," detainees who were the best potential sources of information about the al-Qaida leader and subject to some of the harshest interrogation methods.

Mohamedou Ould Slahi

Slahi, a citizen of Mauritania, has been held at Guantanamo since 2002. He has never been charged with a crime, although he has admitted loyalty to Al Qaeda in the early 1990s.

He was subject to harsh interrogation methods — including beatings, exposure to extreme heat and cold, and being blasted with heavy metal music while naked and under strobe lights,. He is famous for the publication of his memoir, "Guantanamo Diary," based on his writings from prison, which was critically praised and became a bestseller. He has never seen a copy of it.

Ali Hamza al Bahlul

	<p>A former al-Qaida propaganda chief from Yemen, Bahlul arrived in Guantanamo on the day it opened in January 2002. He was found guilty of terrorism charges by a military panel at Guantanamo that sentenced him to life at the prison. But that conviction was overturned by a civilian court.</p> <p>Mohammed al-Qahtani Qahtani, a Saudi, allegedly planned to participate in the 9/11 attacks as the so-called 20th hijacker, but was blocked from entering the United States. He was captured in Afghanistan and taken to Guantanamo when it opened in January 2002. His interrogation was so harsh — isolation, sleep deprivation, exposure to life threatening cold that — that the head of military commissions said he'd been tortured — the first such admission by a U.S. official. Because of that, he was not recommended for prosecution. But those charges may be refiled.</p>

HEADLINE	02/23 Official: ISIS losing foreign fighters
SOURCE	http://www.cbsnews.com/news/us-official-claims-isis-is-losing-foreign-fighters/
GIST	<p>A top Obama administration official says the Islamic State of Iraq and Syria (ISIS) ranks of foreign fighters have dropped to about 25,000 from a peak of 35,000.</p> <p>Brett McGurk is the U.S. special envoy for the global coalition to counter ISIS. He says fighters from 120 countries have joined ISIS.</p> <p>McGurk is touting progress in the U.S.-led effort to defeat ISIS. He says the extremist group is under pressure and has cut fighters' salaries by about half.</p> <p>The group -- which once bragged about minting its own currency -- is having trouble meeting expenses, thanks to coalition airstrikes and other measures that have eroded millions of dollars from its finances since last fall. Last year both the U.S.-led coalition, as well as Russian fighters, began targeting their oil production capabilities and cash stores.</p> <p>Those circumstances include the dramatic drop in global prices for oil - once a key source of income. Additionally, the targeted airstrikes have dramatically reduced cash stockpiles and oil infrastructure. And the Iraqi government has stopped paying civil servants in territory controlled by the extremists.</p>

HEADLINE	02/23 President's plan to close Gitmo
SOURCE	http://abcnews.go.com/Politics/obama-sends-plan-congress-close-guantanamo-bay-prison/story?id=37134529
GIST	<p>After sending a plan to Congress to close the Guantanamo Bay detention facility this morning, President Obama stressed that the prison "undermines" the country's national security and must be closed.</p>

"This is about closing a chapter in our history. It reflects the lessons we've learned since 9/11," Obama announced as he detailed his proposal from the Roosevelt Room at the White House.

The president's plan has four primary elements, including transferring to other countries detainees who are already designated for transfer. Although 91 detainees are now at Guantanamo, 35 are already eligible for transfer if the administration can find another country to take them. Officials anticipate getting the prison's population below 60 later this year.

The plan aims at accelerating periodic reviews of authority to detain an individual, prosecuting detainees who are facing charges, and working with Congress to establish a location in the homeland to securely hold detainees who cannot be transferred. Lastly, the president wants to move all remaining detainees to the United States.

"Our preferred option," Obama said, "must be our strong, proven federal courts."

The proposal does not specifically endorse any single facility, but the administration believes moving 30 to 60 detainees would cost between \$290 to \$475 million, upfront costs it believes would be recovered within years compared to keeping detainees at Guantanamo.

HEADLINE	02/23 Ex-detainee arrested over ISIS ties
SOURCE	http://news.yahoo.com/ex-guantanamo-detainee-among-suspected-jihadists-held-spain-170122749.html
GIST	<p>Madrid (AFP) - Spanish and Moroccan police on Tuesday detained four people suspected of recruiting jihadists for the Islamic State group, one of whom was a former Guantanamo prisoner who received military training in Afghanistan.</p> <p>The four -- three Spaniards and one Moroccan -- were "willing to commit terrorist acts on Spanish soil," police said, adding they had allegedly made contacts to acquire weapons and substances used to make explosives.</p> <p>They were detained in Spain's north African enclave of Ceuta and the Moroccan city of Nador, and police said the brother of one of the cell members had committed a suicide attack in Syria for the Islamic State group (IS).</p> <p>"One of the leaders of the cell received military and combat training in camps in Afghanistan under the authority of terrorist jihadist organisations," police added.</p> <p>"In 2002 he was detained and later put in the Guantanamo detention camp. The fact that this leader was trained in handling weapons, explosives and in military tactics makes this cell particularly dangerous."</p>

	Police said the main aim of the cell was to recruit people for IS, particularly minors.

HEADLINE	02/22 Chicago inmates literally eating jail
SOURCE	http://chicago.cbslocal.com/2016/02/22/2-investigators-inmates-eating-pieces-of-jail-costing-taxpayers-millions/
GIST	<p>Some Cook County jail inmates are literally eating parts of the jail, and taxpayers must pay their healthcare and other costs. CBS 2 Investigator Dave Savini reports.</p> <p>X-rays show pieces of metal swallowed by Cook County Jail inmates.</p> <p>“Who would ever think we’d be talking about this?” asks Sheriff Tom Dart, who was more concerned about stabbings, fights and fires when he first took office.</p> <p>Metal-swallowing inmate Lamont Cathey alone has cost Cook County taxpayers more than \$1 million, according to reports.</p> <p>“Oh my God, the amount of money we have spent — both in the hospital area and then in the staff having to watch these people — I couldn’t even calculate it,” Dart says. “I know it’s in the millions.”</p> <p>Cathey is currently in jail. His mother, Lorine Barber, says he has had 19 to 20 surgeries because of all the metal he has ingested, including screws and nails.</p> <p>Barber says her son needs psychological help. He is not the only inmate swallowing metal.</p> <p>Jail records show multiple inmates reported swallowing screws, unidentified metal and buttons. Two reported swallowing the contents of ice packs. One inmate, bleeding from the mouth, said he swallowed a pin. Another inmate put small parts of his wheelchair in his mouth.</p> <p>“I’m at a loss,” Dart says. “I don’t know how to prevent some of this stuff anymore.”</p>

HEADLINE	02/23 Commuting congestion to get worse
SOURCE	https://www.washingtonpost.com/news/wonk/wp/2016/02/23/how-cheap-gas-is-going-to-ruin-your-morning/?hpid=hp_hp-more-top-stories_cheapgas-610am%3Ahomepage%2Fstory
GIST	<p>American drivers put a record number of miles on their vehicles last year -- roughly 3.15 trillion miles, or enough to make roughly 337 round trips to Pluto.</p> <p>These figures were just released by the Federal Highway Administration, which says they mark an important milestone: The number of vehicle miles traveled in 2015 finally surpassed the highs last seen in 2007, before the Great Recession. The numbers encompass all types of road travel -- passenger vehicles, trucks and buses.</p> <p>But the population has grown since the recession. On a per-capita basis, vehicle miles still haven't caught up to the levels seen in the mid-2000s. Vehicle miles per capita topped out in 2004, at 10,105 miles per person. Last year, the per-capita tally stood at 9,794 miles.</p> <p>Still, last year was a big year for driving. Total vehicle miles increased by more than 4 percent, the biggest year-over-year jump since the late 1980s. And the reason why can be summed up in two simple words: cheap gas.</p> <p>With gas currently at \$1.71 per gallon, it hasn't been this affordable to drive since 2004. In places like Missouri and Oklahoma, gas costs less than \$1.50 per gallon, according to the American Automobile Association.</p> <p>If it's cheap to drive, people are going to drive. They're also going to be less worried about fuel efficiency. Back in October 2007, the average fuel efficiency of purchased new vehicles was about 20 miles per gallon, according to the University of Michigan. As gas prices rose, so did average fuel efficiency -- peaking at 25.8 miles per gallon in August 2014. Since then efficiency has plateaued and even declined slightly, down to 25.1 miles per gallon in January.</p>

More driving means more congested roads, and more wear and tear on those roads too. But as usual, infrastructure spending remains the forgotten stepchild of congressional budget battles. Total public spending on transportation and water infrastructure declined from 3 percent in 1959 to 2.4 percent of GDP in 2014, [according to the Congressional Budget Office](#).

At the federal level, the decline in infrastructure spending has been sharper, falling from close to 6 percent of all federal spending in the 1960s to less than 3 percent in 2014.

And if you drive to work -- or drive anywhere, for that matter -- this failure to fund infrastructure directly affects you on a daily basis. Consider that the typical urban commuter spends 42 hours a year stuck in traffic jams, according to [a report from the Texas Transportation Institute](#). That number has more than doubled since 1982, when the average time stuck in traffic was 16 hours a year.

HEADLINE	02/24 GAO: Healthcare.gov 'passive' on fraud
SOURCE	http://www.washingtontimes.com/news/2016/feb/24/ap-exclusive-healthcaregov-passive-on-heading-off/
GIST	<p>WASHINGTON (AP) — With billions in taxpayer dollars at stake, the Obama administration has taken a “passive” approach to identifying potential fraud involving the president’s health care law, nonpartisan congressional investigators say in a report due out Wednesday.</p> <p>While the Government Accountability Office stops short of alleging widespread cheating in President Barack Obama’s signature program, investigators found that the administration has struggled to resolve eligibility questions affecting millions of initial applications and hundreds of thousands of consumers who were actually approved for benefits.</p> <p>The agency administering the health law — the Centers for Medicaid and Medicare Services — “has assumed a passive approach to identifying and preventing fraud,” the GAO report said. In a formal written response, the administration agreed with eight GAO recommendations while maintaining that it applies “best practices” to fraud control.</p> <p>The report is being released by Republicans on the House Energy and Commerce Committee in connection with a hearing on the Department of Health and Human Services budget. A copy was provided to The Associated Press.</p> <p>GAO “raises many red flags,” said committee chairman Rep. Fred Upton of Michigan. “Perhaps the most unsettling is that while HHS agrees there are many vulnerabilities, the agency has no urgency or plan to fix these critical errors.”</p>

HEADLINE	02/23 Some Seattle shelter beds go empty
-----------------	---

SOURCE	http://www.seattletimes.com/seattle-news/some-shelter-beds-go-empty-even-right-next-to-seattles-jungle-encampment/
GIST	<p>In the debate about Seattle’s homelessness emergency, city officials have said repeatedly that the reason so many people are sleeping on the streets is that the network of shelters and beds for the indigent is overflowing.</p> <p>This talk drives Tim Rockey crazy.</p> <p>“I’ve got empty beds,” he says. “We haven’t been full since ... since I can’t remember when.”</p> <p>Rockey runs a residential rehab center for adult men and women in the Sodo neighborhood for the Salvation Army. His 100-bed facility on Fourth Avenue South and another Salvation Army shelter off Dearborn are the two closest help facilities to The Jungle, the illegal encampment under I-5 that saw a mass shooting last month.</p> <p>But he isn’t full. Despite an estimated 400 people in The Jungle, and dozens more tents and cardboard structures I counted in the two-block area around Rockey’s office near the football and baseball stadiums, he’s still got empty beds every night.</p> <p>“We range between about 60 to 70 percent full, up to 90 percent in the coldest months,” he said. “It used to be unheard of to have any vacancies.”</p> <p>How can this be? How can a homeless rehab center next to the city’s most notorious encampment have 10 to 30 empty beds?</p> <p>Now some of this may be because the Salvation Army has rules you have to follow. There’s a basic dress code. You have to work. It also provides addiction counseling and a spiritual component, through chapel services. But Rockey says they take anyone, of any belief system.</p> <p>The Salvation Army is convinced its beds are going empty in part due to Seattle’s permissive attitude toward letting people sleep on the streets.</p>

HEADLINE	02/23 Drugs flooding to Puget Sound and salmon
SOURCE	http://www.seattletimes.com/seattle-news/environment/drugs-flooding-into-puget-sound-and-its-salmon/
GIST	Puget Sound salmon are on drugs — Prozac, Advil, Benadryl, Lipitor, even cocaine. Those drugs and dozens of others are showing up in the tissues of juvenile chinook, researchers have found, thanks to tainted wastewater discharge.

The estuary waters near the outfalls of sewage-treatment plants, and effluent sampled at the plants, were cocktails of 81 drugs and personal-care products, with levels detected among the highest in the nation.

The medicine chest of common drugs also included Flonase, Aleve and Tylenol. Paxil, Valium and Zoloft. Tagamet, OxyContin and Darvon. Nicotine and caffeine. Fungicides, antiseptics and anticoagulants. And Cipro and other antibiotics galore.

Why are the levels so high?

It could be because people here use more of the drugs detected, or it could be related to wastewater-treatment plants' processes, said Jim Meador, an environmental toxicologist at NOAA's Northwest Fisheries Science Center in Seattle and lead author on a paper published this week in the journal Environmental Pollution.

"The concentrations in effluent were higher than we expected," Meador said. "We analyzed samples for 150 compounds and we had 61 percent of them detected in effluent. So we know these are going into the estuaries."

The samples were gathered over two days in September 2014 from Sinclair Inlet off Bremerton and near the mouth of Blair Waterway in Tacoma's Commencement Bay.

The chemicals turned up in both the water and the tissues of migratory juvenile chinook salmon and resident staghorn sculpin. If anything, the study probably underreports the amount of drugs in the water closer to outfall pipes, or in deeper water, researchers found.

Even fish tested in the intended control waters in the Nisqually estuary, which receives no direct municipal treatment-plant discharge, tested positive for an alphabet soup of chemicals in supposedly pristine waters.

"That was supposed to be our clean reference area," Meador said. He also was surprised that levels in many cases were higher than in many of the 50 largest wastewater-treatment plants around the nation. Those plants were sampled in another study by the EPA.

The findings are of concern because most of the chemicals detected are not monitored or regulated in wastewater, and there is little or no established science on the environmental toxicity for the vast majority of the compounds detected.

HEADLINE	02/24 Egypt military: toddler arrest mistake
SOURCE	http://www.upi.com/Top_News/World-News/2016/02/24/Egyptian-military-admits-mistake-in-sentencing-4-year-old-to-life-in-prison/8261456298307/?spt=hs&or=tn_int

GIST	<p>CAIRO, Feb. 24 (UPI) -- The Egyptian military admitted to making a mistake when they sentenced a four-year-old boy to life in prison last week.</p> <p>The court was supposed to sentence a 16-year-old for murder, but sentenced the four-year-old instead because he had a similar name, spokesman Col Mohammed Samir said on Facebook.</p> <p>Ahmed Mansour Qurani Ali was convicted in a group of 115 men who were said to be part of a Muslim Brotherhood riot in 2014, despite Ali's lawyer providing documents that proved Ali was only a year old at the time.</p> <p>The teen the military were intending to convict was Ahmed Mansour Qurani Sharara.</p> <p>The four-year-old's conviction is the latest embarrassment for a court that has already become an international laughing stock. The United Nations declared in 2014 the country had "a judicial system where international fair trial guarantees appear to be increasingly trampled upon" after more than 1,200 people were given death sentences in a pair of mass trials "rife with procedural irregularities."</p>

HEADLINE	02/23 US to fund NKorea defector groups?
SOURCE	http://www.breitbart.com/national-security/2016/02/23/as-tensions-grow-on-north-korean-border-u-s-to-fund-defector-groups/
GIST	<p>North Korean defector organizations say that the U.S. State Department is willing to fund projects to help liberalize North Korea's population, including information drops and agitating movements working within the communist country's borders.</p> <p>UPI is reporting that a number of representatives of North Korean defector groups operating out of South Korea believe they will soon receive financial support from the State Department. While UPI does not identify the individual organizations, it claims that representatives of these groups met with State Department officials in January and were told the White House was willing to "commit significant funds to defector organizations that can work toward internal regime change in the North."</p> <p>Among the programs that may be funded are airdrop operations using balloons, which provide information on the outside world to North Korea, as well as groups within the country that try to identify potential dissident leaders. UPI cites South Korean news agency Yonhap as confirming the meeting between the defector groups and the State Department.</p> <p>Pro-democracy groups have been working near the North Korean border for years, attempting to break the information wall set up by the Kim regime to block out the reality of the outside world. One such project expected to begin this year is called Flash Drives for Freedom. Run by the Human Rights Foundation (HRF), the program requests that American volunteers donate old, used flash drives to its offices. The</p>

	drives are then filled with news articles, South Korean soap operas, and Hollywood movies, then air-dropped into North Korea.

HEADLINE	02/23 Port Orchard explosion leaves 2 dead
SOURCE	http://www.seattletimes.com/seattle-news/explosion-levels-house-in-port-orchard/
GIST	<p>PORT ORCHARD — Two people are dead following an early morning explosion that leveled a Port Orchard home Tuesday morning.</p> <p>Kitsap County sheriff’s investigators said two sets of human remains were found in the rubble of the home’s bedroom, but their identities have not been confirmed. The sheriff’s office said they are believed to be the home’s owners, identified as William McDonald, 70, and his wife, Maria McDonald, 65.</p> <p>Confirmation of the identities will be made by the Kitsap County Coroner’s Office, said sheriff’s Deputy Scott Wilson.</p> <p>Meanwhile, fire officials continue to investigate the cause of the fiery blast that sent pieces of the triple-wide manufactured home over a wide area, shattered neighbors’ windows and was detected by seismograms.</p> <p>Kitsap County Fire Marshal David Lynam said it will take several days for investigators to “put the pieces of the puzzle together.”</p>

	“It’s going to be a tough investigation,” he said. “Pieces that were in the house are literally scattered over an acre.”

HEADLINE	02/23 Space rock burns up over Atlantic
SOURCE	http://www.bbc.com/news/science-environment-35645854
GIST	<p>The biggest fireball since the Chelyabinsk explosion has plunged through the atmosphere over the Atlantic Ocean.</p> <p>The event, which has only just come to light, occurred off the coast of Brazil at 13:55 GMT on 6 February. As it burned up, the space rock released the equivalent of 13,000 tonnes of TNT.</p> <p>This makes it the most powerful event of its kind since an object exploded over <u>Chelyabinsk in Russia in 2013</u>.</p> <p>That blast was much bigger, releasing the equivalent of 500,000 tonnes of TNT.</p> <p>But the fireball over the Atlantic probably went unnoticed; it burnt up about 30km above the ocean surface, 1,000km off the Brazilian coast.</p> <p>Nasa listed the event on its <u>Fireball and Bolide Reports web page</u>.</p> <p>Measurements suggest that about 30 small asteroids (between 1m and 20m in size) burn up in the Earth's atmosphere every year.</p>

HEADLINE	02/23 Half with more debt than savings
SOURCE	http://www.nbcnews.com/business/business-news/about-half-america-has-more-debts-savings-survey-n523671
GIST	<p>Barely half of Americans have bigger emergency funds than outstanding credit card balances, according to a new survey from Bankrate.com. The 52 percent of people who have more savings than debt is the exact same percentage as five years earlier, even though most measures of the country's economic health have improved since then.</p> <p>One bright spot is that millennials seem to be taking saving more seriously than older age brackets, with 57 percent of respondents younger than 30 indicating that their savings are greater than their debts.</p> <p>Respondents between 30 and 49 were most likely to have greater debt than savings, with 26 percent reporting that their credit card balances outweighed their savings.</p> <p>Roughly a third of those in the under-30 age bracket said their net worth is higher today than it was a year ago, compared to about a quarter of all respondents. This relatively upbeat assessment of their financial situation comes in spite of the fact that only 64 percent of millennials told Bankrate that they are employed, and one in four only work part-time.</p>

HEADLINE	02/23 Teen in killing to be charged as adult
SOURCE	http://q13fox.com/2016/02/23/16-year-old-accused-of-killing-wesley-gennings-charged-as-an-adult-with-first-degree-murder/
GIST	<p>FEDERAL WAY – The 16-year-old boy accused of killing 16-year-old Wesley Gennings in Federal Way last week is being charged as an adult with first-degree murder.</p> <p>Michael J. Rogers is also being charged with first-degree unlawful possession of a firearm in what police have said was a robbery targeting Gennings’ marijuana.</p> <p>A 14-year-old boy who police have said was also involved will likely be charged on Wednesday, prosecutors said.</p> <p>According to charging documents, Rogers was given a deferred disposition in juvenile court on Jan. 26 related to three separate incidents: attempted robbery, first-degree attempted theft, and fourth-degree assault. Prosecutors said he was offered “Option B” at that time – treatment in lieu of incarceration.</p> <p>As part of that deal, he agreed he couldn’t be in possession of a firearm.</p> <p>Less than three weeks later, prosecutors say, he and the 14-year-old planned the robbery that would lead to the shooting death of Gennings.</p>

HEADLINE	02/23 Sacramento: #1 FBI list violent crime
SOURCE	http://www.kcra.com/news/sacramento-sees-an-increase-violent-crimes-tops-fbi-list/38139118
GIST	<p>SACRAMENTO, Calif. (KCRA) —When it comes to an increase in violent crime, Sacramento ranks No. 1 among major cities in the United States. The new data comes from FBI statistics compiled by the Public Policy Institute of California.</p> <p>Researchers found Sacramento saw 76 more violent crimes per 100,000 people during the first half of 2015 compared to the same time in 2014.</p> <p>“Reducing crime rates, it’s a work in progress, but we need to do it together,” Sacramento Police Sergeant Justin Brown said.</p> <p>Brown compared the police department’s relationship with the community to a marriage - issues need to be worked out and the two sides need to talk.</p> <p>“The more you communicate, the stronger that marriage gets, and so we’re married to our community and we want the community to know we care,” Brown said.</p>

	<p>Sacramento police don't know why the numbers ticked up but point out that in 2014, the city enjoyed some of the lowest violent crime numbers since the early 2000s.</p> <p>The data only includes cities with large populations, ranging from New York City, with a population of 8.5 million, to Kansas City, Missouri, with a population of 468,000. Cities are only required to submit crime data to the FBI once per year, so several large cities were not included in the report which used data from the halfway point of the year.</p> <p>Of the cities that did submit data on violent, five of the top 10 are in California. Sacramento saw the largest increase, followed by Los Angeles (3), Long Beach (5), San Francisco (8) and San Diego (9).</p> <p>When it comes to property crimes, Sacramento saw the fifth greatest increase nationwide, but was outranked by three other California cities: San Francisco (1), Long Beach (2) and Los Angeles (3).</p> <p>Led by Detroit, 10 of the 25 cities ranked saw a decrease in violent crime. Sixteen cities saw a decrease in property crime, with Seattle seeing the greatest decrease.</p>

HEADLINE	02/23 Cartel drug leader pleads guilty
SOURCE	http://abcnews.go.com/Politics/wireStory/accused-leader-mexican-drug-cartel-pleads-guilty-us-37141656

GIST	<p>The accused leader of a Mexican drug trafficking cartel who authorities say once maintained close ties to Joaquin "El Chapo" Guzman pleaded guilty in federal court Tuesday, admitting that he helped ship tons of cocaine from South America to the United States.</p> <p>The plea from Alfredo Beltran Leyva, who was captured in Mexico in 2008 and extradited two years ago, comes weeks after Guzman, the notorious drug kingpin, was captured by Mexica authorities following a prison escape.</p> <p>Though the plea resolves the case without a full-blown airing of evidence, prosecutors said in court documents that they would have been prepared to show that Beltran Leyva sold drugs to U.S. gangs in exchange for weapons, commanded squads of hit men that tortured and murdered rivals, and paid bribes to Mexican government officials. One witness could have testified that he saw Beltran Leyva return from a meeting in the mountains with Guzman, wearing a tactical vest containing grenades, court filing show.</p> <p>"For decades, Alfredo Beltran Leyva helped to lead one of the world's most notorious drug cartels, causing widespread violence and disrupting lives," Attorney General Loretta Lynch said in a statement.</p> <p>The arrest of Beltran Leyva was among the early take-downs of cartel bosses by Mexican authorities in their fight against the criminal syndicates that started in the early days of former President Felipe Calderon's term.</p>

HEADLINE	02/24 New Zealand: school bomb threats
SOURCE	http://www.stuff.co.nz/national/77241421/bomb-threats-to-nz-schools-very-similar-to-global-robohoaxes-in-us-australia
GIST	<p>Bomb threats against schools in New Zealand may be the latest in a string of cyber-attacks on schools around the world.</p> <p>In most cases, schools receive coordinated calls with an automated, recorded message making a threat, often in a robot-like voice.</p> <p>So-called "robo-hoaxes" use technology similar to the automated systems used in call centres.</p> <p>In the United States, dozens of schools were evacuated in January and, in apparently co-ordinated calls, schools in Australia, England, Paris, Amsterdam and Tokyo were also affected.</p> <p>Malicious "robo-hoaxes" now appear to have spread to New Zealand, with police confirming investigators would be liaising with law enforcement agencies overseas.</p>

Police have not confirmed the calls to six schools were automated hoax calls, but the circumstances bear the hallmarks of a cyber attack. The anonymous calls appear to have originated overseas, police said, while staff at the affected schools described a voice as robotic, or robot-like.

New Zealand investigators will be working to establish whether the calls to six school were the latest in a string of global attacks.

One Twitter group that claimed responsibility for disruption to schools in Europe went by the name of "Evacuators 2KI6", offered a paid-for bomb hoax service and claimed six individuals who hated the United States operated anywhere.

That account was suspended.

In Australia, the calls started on January 29 and continued over the next few days.

Over the course of a week, dozens of schools in Victoria, New South Wales, Queensland and Canberra were evacuated, affecting thousands of students.

HEADLINE	02/23 Shootings, fires Phoenix home: 4 dead
SOURCE	http://www.cbsnews.com/news/four-dead-after-shootings-fires-at-phoenix-arizona-home/
GIST	<p>PHOENIX - Authorities have confirmed that four people died after a shooting and two fires at a Phoenix home Tuesday morning, according to CBS affiliate KPHO.</p> <p>According to the station, firefighters and police officers from Phoenix and Glendale responded to reports that a family of four had been shot at the home around 4:45 a.m. PST.</p> <p>Capt. Reda Bigler with the Phoenix Fire Department confirmed three people died at the scene. A woman approximately 20 years old and a girl who is 10 to 12 years old suffered life-threatening injuries and were transported to hospitals.</p> <p>The woman died at the hospital and the girl is in critical condition at a trauma center, reports the station.</p> <p>Meanwhile, crews were working a first-alarm fire at the home as well. Firefighters could not make entry right away to give aid to the victims because there was still an active shooter inside the house.</p> <p>Shortly before 7 a.m., police said the suspected shooter "is down."</p> <p>"Officers were getting shot at from the second floor of the home while they were trying to extinguish the fire and extract people from the house," Crump said.</p>

	The station also reports the fire was under control around 7:30 a.m.

HEADLINE	02/23 Leaders of polygamous sect arrested
SOURCE	http://www.cbsnews.com/news/leaders-of-utah-polygamous-sect-arrested-for-food-stamp-fraud/
GIST	<p>SALT LAKE CITY -- Several top leaders from Warren Jeffs' polygamous sect were arrested Tuesday on federal accusations of food stamp fraud and money laundering -- marking one of the biggest crackdowns on the group in years.</p> <p>The charges are the government's latest move targeting the sect based on the Utah-Arizona border, coinciding with legal battles in two states over child labor and discrimination against nonbelievers.</p> <p>Prosecutors accuse church leaders of orchestrating a yearslong fraud scheme instructing members how to use food-stamp benefits illegally for the benefit of the faith and avoid getting caught, according to an indictment from the U.S. Attorney's Office in Utah.</p> <p>One common tactic was buying groceries with the food stamps and giving the supplies to the church's communal storehouse for leaders to choose how to divvy up. Other times, members would give their cards to others who weren't supposed to use them, prosecutors said.</p> <p>They also would swipe the cards at church-run stores without walking away with foods or goods, leaving the money to the store owners. Some of those funds were then used to pay thousands for a tractor and a truck, the indictment shows.</p> <p>Eleven people were charged in the scheme, including Lyle Jeffs and Seth Jeffs, top-ranking leaders of the Fundamentalist Church of Jesus Christ of Latter Day Saints and brothers of imprisoned sect leader Warren Jeffs.</p>

HEADLINE	02/23 Arrests in D.C. commuter train shooting
SOURCE	http://www.cbsnews.com/news/police-washington-dc-commuter-train-passenger-shot-2-teens-arrested/
GIST	<p>Police say a man was shot on a commuter train in Washington, D.C., and two teenagers have been arrested.</p> <p>News media outlets report that a 24-year-old man was shot on a Green Line train Tuesday as it approached the Anacostia Metro station. Police say the victim was conscious and breathing when he was found on the platform about 12:45 p.m.</p>

	<p>Metro Transit Police said on Twitter that two other "persons of interest" were being sought in connection with the shooting, which they said was not an act of terrorism.</p> <p>Metro spokesman Dan Stessel said there were other people on the train, but it wasn't packed at the time of the shooting. He said video surveillance helped police quickly apprehend two suspects, ages 15 and 19. Police said the 15-year-old was the shooter.</p>

HEADLINE	02/23 Police: Uber driver switched cars
SOURCE	http://www.cnn.com/2016/02/23/us/kalamazoo-michigan-shootings/index.html
GIST	<p>A strange phone call. An inquiry for a mysterious person. A heavy duty jacket. Piecing together these scant clues in search of a motive for this weekend's shooting spree in Kalamazoo, Michigan, has not yet produced an answer.</p> <p>Jason Brian Dalton is charged with six counts of murder. According to detectives, Dalton told them he "took people's lives."</p> <p>On Tuesday, police said Dalton did not have a history of mental health issues.</p> <p>Dalton was a driver for Uber, and picked up fares between the shootings, a source close to the investigation said.</p> <p>Matt Mellen was one of the passengers Dalton picked up before the bloodshed started.</p> <p>About 1 mile into the trip, Mellen told CNN's "AC360," Dalton received a phone call. Mellen heard Dalton tell the caller he had a rider at the moment, and that he would call back after dropping him off.</p>

Dalton hung up, and then started driving erratically, Mellen said.

Dalton ran red lights, squealed the tires and nearly side-swiped another vehicle, Mellen said. Mellen pleaded for Dalton to stop and let him get out of the car, but he initially refused to stop. Once Dalton slammed on the brakes, Mellen jumped out of the car and called police, he said.

"I was actually picked up in a different vehicle than the vehicle he was apprehended in," Mellen said. "I was picked up in a Chevy Equinox -- silver Equinox -- and he was apprehended in a darker colored HHR."

During the hourslong search for the gunman Saturday night, authorities said they were looking for a silver or dark blue car.

Kalamazoo Police Chief Jeff Hadley confirmed that Dalton switched cars. Dalton allegedly committed the first shooting in the Equinox, then went home and started driving the HHR, Hadley told CNN.

Subject: 2016-2017 ORDER CUTOFF AND START UP DATES FOR CHEVROLET POLICE / FIRE VEHICLES

All,

Attached is the 2016 Order Cutoff and 2017 Start of Ordering dates for Chevrolet Police vehicles. Please let your departments know about these important dates so they can order accordingly.

Please continue to order Tahoe PPV/SSV's. We have not announced an order cutoff date yet for that vehicle. I will provide an updated Order Cutoff version when available.

When you look at the attachment there are 2 tabs. One is Buildout Matrix for 2016 MY and the other is Start up Matrix for 2017 MY. I have highlighted in yellow the vehicles that represent our Chevrolet Police vehicles:

Caprice PPV

Tahoe PPV or SSV

Silverado LD Crew which includes our Silverado SSV

Suburban 1500 & 3500 HD (see attached spec sheet)

Express Van which includes our Express Prisoner Transport Van

Also for 2017 MY we will have an Impala Municipal sedan for police & fire.

A couple of notes:

The **Silverado SSV** is the only true police pickup on the market for the following reasons:

Auxiliary Battery	Standard
High Capacity Air Cleaner	Standard
Upfitter Connection - Speed, Battery, etc.	Standard

Spot lamp Driver or Driver & Passenger	Available
Grille & Siren Wiring	Available
Horn / Siren Circuit Wiring	Available
Upfitter Switches	Available
4G Connectivity	Available
Common Fleet Key	Available

In the Buildout Matrix tab under Fleet there are two columns, one is SEO and the other Non-SEO. SEO means Special Equipment Options. For example, back up alarm, special paint, rear seat delete, ship thru's, etc.

Also, attached is information on our **Suburban HD** for both Police & Fire. This vehicle has a 4405 lbs. payload. This is a great vehicle for Police & Fire Command Centers, SWAT, etc.

Please let me know if you have any questions

The vendor for our siren amps called to let me know about production delays at Federal Signal. We will have nine units in two weeks, then twenty more in April and another twenty in late May. This is coming through my personal email because his emails to my ISP account keep bouncing.

Hi, Lissa. I just got word from procurement that there is an issue with the (49) Siren's on order (our item #1016). It looks like our vendor is running behind. They have assured us that they are going to do all that they can to speed these dates up. Please take a look at the following and let me know if you would like me to ship these complete or ship partial, as we receive them.

Total	Approximate delivery date to Harris	Approximate delivery date to White Cloud
(9)	2/17/2016	2/24/2016
(20)	3/31/2016	4/07/2016
(20)	5/19/2016	5/26/2016

I apologize for the inconvenience.

Thank you.

Kind Regards,

Martha E. Moore

Subject: 2016-2017 ORDER CUTOFF AND START UP DATES FOR CHEVROLET POLICE / FIRE VEHICLES

All,

Attached is the 2016 Order Cutoff and 2017 Start of Ordering dates for Chevrolet Police vehicles. Please let your departments know about these important dates so they can order accordingly.

Please continue to order Tahoe PPV/SSV's. We have not announced an order cutoff date yet for that vehicle. I will provide an updated Order Cutoff version when available.

When you look at the attachment there are 2 tabs. One is Buildout Matrix for 2016 MY and the other is Start up Matrix for 2017 MY. I have highlighted in yellow the vehicles that represent our Chevrolet Police vehicles:

Caprice PPV

Tahoe PPV or SSV

Silverado LD Crew which includes our Silverado SSV

Suburban 1500 & 3500 HD (see attached spec sheet)

Express Van which includes our Express Prisoner Transport Van

Also for 2017 MY we will have an Impala Municipal sedan for police & fire.

A couple of notes:

The **Silverado SSV** is the only true police pickup on the market for the following reasons:

Auxiliary Battery	Standard
High Capacity Air Cleaner	Standard
Upfitter Connection - Speed, Battery, etc.	Standard
Spot lamp Driver or Driver & Passenger	Available
Grille & Siren Wiring	Available
Horn / Siren Circuit Wiring	Available
Upfitter Switches	Available
4G Connectivity	Available
Common Fleet Key	Available

In the Buildout Matrix tab under Fleet there are two columns, one is SEO and the other Non-SEO. SEO means Special Equipment Options. For example, back up alarm, special paint, rear seat delete, ship thru's, etc.

Also, attached is information on our **Suburban HD** for both Police & Fire. This vehicle has a 4405 lbs. payload. This is a great vehicle for Police & Fire Command Centers, SWAT, etc.

Please let me know if you have any questions

Thank you,

THE OFFICIAL NEWSLETTER OF SPRING MOUNTAIN
MOTOR RESORT & COUNTRY CLUB

FALL 2015

Live the Dream at Spring Mountain Motor Resort

Motorsports enthusiasts' paradise in the desert

Welcome to autumn at [Spring Mountain Motor Resort & Country Club](#), a 332-acre driver paradise near Las Vegas with 6.1-miles of challenging road course and over 30 track configurations. Spring Mountain is home to the exclusive [Ron Fellows Performance Driving School](#) for Corvettes, with multi-level driving programs available. We also offer the [Cadillac V-Series Academy](#) with a fleet of Cadillac vehicles to test on the track. If Formula 1 racing is right up your alley, check out the our [Wolf Racing Cars](#) from Italy. For sports car racing fans, we announced the [Michelin Corvette Challenge](#) with 15 races in 2016.

Photo by Todd Crutcher

Photo by Todd Crutcher

Spring Mountain is a destination resort offering extreme sports activities with the comforts of home, designed for fun on the land or in the water. If you prefer adrenaline highs on the track there are a variety of driving circuits available for all skill levels. Water sports enthusiasts will appreciate our **sparkling lake** with paddle-boarding, pedal-boating, canoeing, water-propelled jet packing, and now featuring our white-sand volleyball court! Visit us this season and discover the changes made to the facility, including the completion of the **Aquatic Center** for water activities at Lake Spring Mountain. Our beautiful lake is surrounded by white-sand beaches, a center

island with palm trees, music and night lighting for evening activities. Finish your day with dinner in our luxurious Clubhouse and stay in our convenient trackside condominiums.

Spring Mountain Estates, our residential development, is moving along with our final parcel map expected in January 2016. The commercial property in front of the facility will also be developed in 2016, with restaurants, hotels and retail stores opening for our students, visitors and Club members' convenience.

We are proud of our glowing reviews on Yelp and Trip Advisor.

Making our customers happy is our number one priority, and we are dedicated to providing you with the most innovative and exciting programs and services available in the motorsports industry. Find out why a trip to Spring Mountain should be on the top of your wish list. **Call us TOLL FREE at 800.391.6891 for a tour of the facility or to reserve your space in class TODAY.**

We'll see you at the Track!

Michelin Corvette Challenge to Debut at Spring Mountain

Stingray-based spec-racing series launches with 15-race season

This month Spring Mountain Motor Resort & Country Club announced a new spec-racing series based around the award-winning 7th generation Corvette, the Corvette Stingray. The Michelin Corvette Challenge race series kicks off its inaugural season February 20, 2016 at Spring Mountain.

Composed of identically prepared, track-ready Corvette Stingray models, the series will feature 15 races over 8 weekends, utilizing multiple configurations of Spring Mountain's 6.1-mile race track. With a unique season-long payment plan, competitors will simply arrive and drive for each event and take delivery of their Corvette Stingray following the season finale on December 10, 2016. The Ron Fellows Performance Driving School, based at Spring Mountain, will serve as the technical race partner for the series.

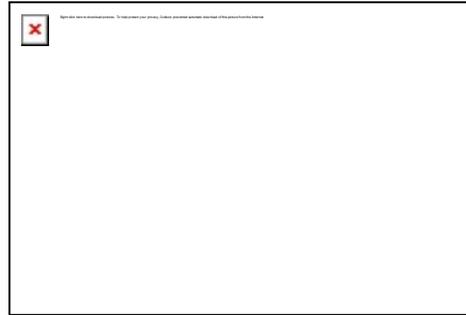

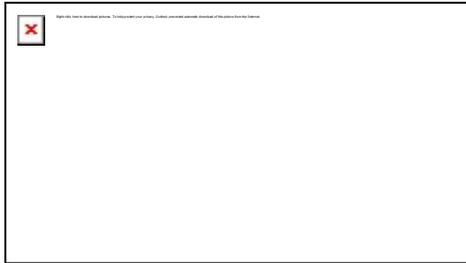

Photo by Ken Melgoza

"The Corvette Stingray is one of the most track-capable production cars available and our enhancements simply augment the production specs to help ensure durability for a dedicated racing life," said Ron Fellows. "With the cars mechanically on equal footing, driver skill will be the determining factor in the rankings, which should make it a very exciting series."

The Ron Fellows Performance Driving School collaborated with Chevrolet and Michelin to develop the series, as well as the package of performance and safety equipment required for each participating race car. Many of the performance components are derived from a new portfolio of Corvette Z06-based parts from Chevrolet. They're designed to enhance the handling, braking, cooling and downforce performance of the Stingray. Chevrolet displayed a Corvette Stingray Z51-based concept race car featuring the new Z06-based parts at the SEMA Show, in Las Vegas.

More information on the racing series is available at: <http://michelincorvettechallenge.com>.

Wolf Racing Cars

Bellisima! Stunning Italian beauties have arrived at Spring Mountain

We recently announced the execution of an exclusive distributor agreement for the US with [Wolf Racing Cars](#) and the **Wolf GB08**. Wolf Racing Cars is an Italian racing car manufacturer based in the Province of Brescia, Italy. The track debut of the GB08 took place in April 2010 at the Misano World Circuit during the opening round of the Italian Prototypes Championship. Ivan Bellarosa dominated the whole weekend securing the pole position and the first of a long string of victories.

Since its winner debut in 2010, the **Wolf GB08** proved to be the best CN 2 car, winning the Italian championship in 2010, and triumphing in the Speed Euroseries in 2011 and

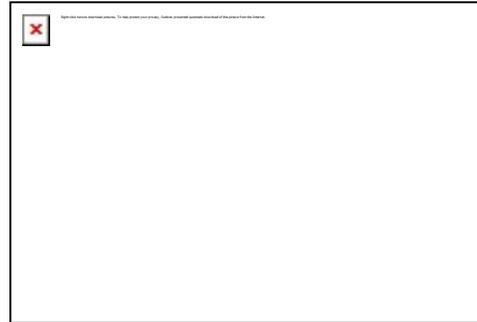

Photo by Todd Crutcher

Wolf Racing Cars Staff with CEO John Morris

2012. The Wolf GB08 had major aerodynamic upgrades in 2013, and the new car has won competitions all over Europe and in the USA. With a Honda K20-A 2.000cc, 255 hp engine, the GB08 features lightning-fast acceleration, nimble cornering and excellent braking.

Spring Mountain CEO John Morris recently visited the Wolf Racing Cars factory in Verona, Italy where he had the opportunity to tour their remarkable facility and to meet the proprietors.

For more information about the Wolf GB08 please contact **Sean McGray**, Spring Mountain Racing, via email or phone: sean@springmountainracing.com or 702-420-

3317.

Grand Opening of the Aquatic Center

Jetpack America hosts a Fund Raiser for the Susan G. Komen Foundation

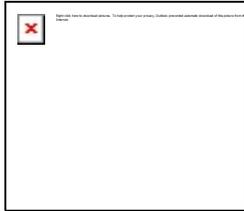

Water sports enthusiasts celebrated the grand opening of the Lake Spring Mountain Aquatic Center on Sunday, October 25th.

Photo by Ken Melgoza

Jetpack America offered jetpack/jetboard flights, paddle boarding, kayaks, food and drinks, all while helping to fight breast cancer. Jetpack America partnered with **Susan G. Komen of Southern Nevada** to raise money for Breast Cancer Awareness Month. All donations for flights were donated to this worthy cause.

News 3 from Las Vegas was on hand to provide live coverage of the event. Two Susan G. Komen representatives

Leah Pritchett

attended to watch the festivities, and everyone involved considered the Grand Opening a huge success.

A few weeks earlier we welcomed drag racing star and NHRA Top Fuel Driver **Leah Pritchett** to Lake Spring Mountain as she took a break from flying in the fast lane to flying in the sky with Jetpack America. Leah tried both the Jetpack and the Jetboard, and as she describes her experience, **"This place rocks!"**

Holiday Gift Ideas

Gift Certificates for Products and Services in all Denominations

Give the gift of adrenaline fun with Spring Mountain Gift Certificates! Are you searching for holiday gift ideas for your friends or loved ones? Do you need to find a token of your appreciation to present to a colleague for a job well done? Show your loved ones you care with a gift certificate from Spring Mountain Motor Resort & Country Club. We offer personalized certificates for driving schools, merchandise and services in all denominations for your convenience. Buy a holiday gift certificate for a friend or loved one today! **Call TOLL FREE 800.391-3891** for more information.

Thank You for your Support

Happy Holidays from the staff at Spring Mountain

At Spring Mountain Motor Resort & Country Club, we sincerely appreciate your business and support. Your enthusiasm and participation has made our progress possible. On behalf of the management and staff, we THANK YOU for reading the latest edition of the Spring Mountain e-News, and look forward to seeing you at one of our many upcoming events! For up-to-the minute information, "Like" us on Facebook, or follow us on Twitter. Best wishes to you and your family for a meaningful holiday season.

HSIN-INTEL PORTAL

Please check the recently-updated HSIN-Intel portal for new homeland security related products. HSIN-Intel functions as part of the Homeland Security Information Network (HSIN), and functions as the successor to HS-SLIC (Homeland Security State and Local Intelligence Community of Interest). Fusion center personnel who do not have a membership with this Community of Interest (COI), contact the I&A Intelligence Officer that is assigned to your Fusion Center to request access. Joining this COI will provide you with access to a consolidated location for homeland security information, including P/CRCL issues.

TECHNICAL ASSISTANCE

The CRCL Institute Provides Ongoing Technical Assistance and Training Support for Fusion Center P/CRCL Officers.

The DHS Office for Civil Rights and Civil Liberties and the DHS Privacy Office support the P/CRCL Officers at the primary and recognized State and Major Urban Area Fusion Centers through a technical assistance and training (TAT) program. Assistance is offered directly to the Officers and also support the Officers in their own local training efforts. The TAT program includes a bi-weekly open source newsletter on p/crcl issues of interest to Fusion Centers, periodic webinars, training design and materials support, over-the-phone assistance and web-based resources.

DISCLAIMER: The above open source news links cover a range of topics from a variety of perspectives that may be of interest to personnel at State and major urban area fusion centers and related Federal partners. The DHS Office for Civil Rights and Civil Liberties (CRCL) does not necessarily endorse any of the viewpoints expressed nor can CRCL attest to the accuracy of any of the linked information or materials. The links are offered as situational awareness and in support of the DHS training on privacy, civil rights, and civil liberties issues in the Information Sharing Environment (ISE).

Subject: The 500-hp Corvette That Chevrolet Didn't Talk About

Rarely does a manufacturer make a point to not advertise one of its products, particularly one that is its peak performance offering. An exception to the rule was this 1969 Chevrolet Corvette Stingray L88. And that intentionally low profile when new is part of what makes this car so valuable today. The brainchild of Zora [...]

HEADLINE	08/23 Cougar Creek fire burns 30,000 acres
SOURCE	http://www.yakimaherald.com/news/local/cougar-creek-fire-grows-acres-as-containment-shrinks/article_ef25456a-49c9-11e5-9a16-57433f9680bc.html
GIST	<p>The Cougar Creek Fire near Mount Adams grew 5,000 acres Saturday, reducing containment from 25 percent Saturday morning to 15 percent Sunday morning, fire officials reported.</p> <p>The fire, now burning on 30,421 acres, was very active on its north, northeast and west flanks Saturday, the official update said this morning. A spot fire north of Cunningham Creek merged into the main fire, keeping crews busy as they try to keep it west of the 255 road.</p> <p>On the west side, firefighters were working on improving containment lines built for the Cascade Creek Fire in 2012.</p> <p>Containment lines along the south and southeast flanks of the fire are holding up well, and mop-up operations will continue. Portions of those flanks will go into patrol status.</p>

HEADLINE	08/23 Chelan area fires burn 140,000 acres
SOURCE	http://www.khq.com/story/29805853/chelan-area-fires-nowover-140000-acres
GIST	<p>CHELAN, Wash. –</p> <p>UPDATE: 10:30 a.m. Sunday: Fire crews in Chelan fighting the Chelan Complex fire and other area fires say the fires burned a combined 140,703 acres as of Sunday morning.</p>

	<p>The Chelan Complex fire has burned an estimated 87,412 acres and is 35 percent contained. The Wolverine fire has burned 49,570 acres and is 30 percent contained. The First Creek fire has burned about 3,541 acres and is 2 percent contained and the Blankenship fire has burned 180 acres with zero percent containment.</p> <p>Fire crews continue to battle active fire behavior and warm and dry conditions over the weekend.</p>

HEADLINE	08/23 Ferry Co. fires grow to 59,000 acres
SOURCE	http://www.khq.com/story/29842923/kettle-complex-fire-now-59000-acres
GIST	<p>FERRY COUNTY, Wash. –</p> <p>UPDATE: 1:30 p.m. Sunday: Fire crews working on the three fires burning in Ferry County that make up the Kettle Complex fire, say that fire is a combined 59,321 acres as of Sunday afternoon.</p> <p>Support teams from the Washington National Guard are assisting fire managers to ensure safety of the public and firefighters on the Kettle Complex. There are firefighters from 24 states and one Canadian province fighting these fires.</p> <p>The Stickpin Fire is now 47,544 acres. The fire is 15 percent contained. Firelines constructed along the western edge of the perimeter are holding. Crews continue to strengthen the lines Sunday.</p> <p>The Roy Road Fire west of Republic is 120 acres and 45 percent contained.</p> <p>The Renner Lake Fire is approximately 7,006 acres and is zero percent contained. Firefighters continue to be shifted off of other areas to assist local fire district personnel. Highway 395 has reopened and drivers are urged to use caution and be aware of firefighters in the area.</p> <p>Evacuations haven't changed since Saturday and are being reevaluated Sunday.</p>

SOURCE	http://www.khq.com/story/29803831/north-star-fire-now-140000-acres-in-size-city-of-republic-on-level-ii-notice
GIST	<p>NESPELEM, Wash. –</p> <p>UPDATE: Sunday 1:40 p.m: Fire crews continue to battle the North Star Fire north of Neselem Sunday. The fire has grown to about 140,000 acres as of Sunday and remains 2 percent contained.</p>

	<p>Crews will continue protection of critical communications sites and reinforce firelines to enhance community protection during the day and night shifts. Structure assessment continues in the surrounding areas. Smoke is still impacting local communities. Smoke sensitive individuals should take precautionary measures and stay inside when possible.</p> <p>Fire behavior was moderate overnight Saturday, The National Guard arrived Saturday to help with firefighting efforts.</p>

HEADLINE	08/23 Carpenter Road fire continues to grow
SOURCE	http://www.khq.com/story/29843088/carpenter-road-fire-now-at-35000-acres-15-contained
GIST	<p>FRUITLAND, Wash –</p> <p>UPDATE: 2:20 p.m. Sunday: As the Carpenter Road fire continues to grow 20 miles west of Springdale, the Spokane Tribe has declared a State of Emergency for the reservation. The entire Spokane Reservation is under a level 2 evacuation notice. A level 3 evacuation notice is in effect for Drum Road and Cottonwood Road on the Spokane Reservation.</p> <p>The fire has grown to 35,198 acres Sunday afternoon with 15 percent containment.</p> <p>Containment was increased as more line was constructed and successful burn-out operations were conducted. Firefighters continue to patrol secure areas, mop-up recently constructed line, and continue to extend fire line on both the northern and southern edges of the fire. Containment lines have been started on the eastern edge of the fire. Firefighters also continue to patrol and mop-up around structures.</p>

HEADLINE	08/23 Okanogan fires grow to 244,453 acres
SOURCE	http://www.khq.com/story/29834926/okanogan-complex-fire-244453-acres-10-percent-contained
GIST	<p>OKANOGAN COUNTY, Wash. –</p> <p>Update: August 23, 11:45 a.m.: At a press conference Sunday, fire officials reported the Okanogan Complex has grown to a combined acreage of 244,453 acres. Incident Commander Todd Pechota said the entire complex is now 10 percent contained.</p> <p>Pechota says Saturday was a much better day, but there is still much work to be done.</p> <p>Air quality in the area is poor Sunday. Pechota calls the smoky air "a blessing and a curse," because the smoke reduces fire behavior, but aircraft can't be used to fight the blaze. He says National Guard helicopters were called in Sunday morning, but had to turn around because of poor visibility.</p> <p>Officials say about 1,000 firefighters are on the scene of the complex now. Additionally, 50 National Guard troops have been called in to fight this fire and additional fire crews are expected to arrive at the fire as early as Tuesday.</p> <p>Crews are making progress, but Pechota called the fire "unrelenting."</p>

HEADLINE	08/24 NOAA: July hottest month on record
SOURCE	http://www.homelandsecuritynewswire.com/dr20150824-july-2015-the-hottest-month-on-record-since-measurements-began-in-1880
GIST	<p>Global warming continues unabated. The latest NOAA report notes that July 2015 was warmest month ever recorded for the globe – that is, the warmest month since 1880, when temperature measurements were taken in a systematic fashion for the first time.</p> <p>The July globally averaged land surface temperature was 1.73°F (0.96°C) above the twentieth century average. The year-to-date temperature combined across global land and ocean surfaces was 1.53°F (0.85°C) above the twentieth century average. This was the highest for January–July in the 1880–2015 record, surpassing the previous record set in 2010 by 0.16°F (0.09°C).</p>

HEADLINE	08/23 REAL ID enforcement federal bldgs.
SOURCE	http://qsnmagazine.com/node/45080?c=access_control_identification
GIST	Washington, DC, Aug. 20 - Beginning October 10, security screeners in roughly 200,000 federal buildings may deny access to visitors who present a driver's license or identification card from a state

non-compliant with REAL ID rules. Alternatively, a passport or ID specially approved by the federal government can be used as proof of identity. Yesterday, the U.S. Department of Homeland Security (DHS) released guidance for federal agencies for this phase of REAL ID enforcement.

The document is "REAL ID Act of 2005 Implementation: An Interagency Security Committee Guide," and contains a list of approved federal and state issued IDs (<http://www.dhs.gov/publication/isc-real-id-guide#>).

The 2005 REAL ID Act prohibits federal agencies from accepting driver's licenses and IDs that do not meet standards set by DHS. One purpose of the REAL ID Act was to better safeguard federal facilities from terrorist attacks. The guide clarifies how identity card clearances are to be uniformly applied to protect federal employees and private citizens who work within and visit these buildings.

According the Government Services Administration, there are 275,195 buildings that are owned and leased by the federal government as of 2014. To date, enforcement of the REAL ID Act has been limited to only 217 of these buildings. This next phase of enforcement will include "semi-restricted" federal facilities with Federal Security Levels 3, 4, or 5. Federal buildings where no ID checks currently occur, such as museums, benefits offices and government hospitals will not be among those covered by the increased enforcement.

HEADLINE	08/23 Fallen firefighters remembered
SOURCE	http://www.komonews.com/news/local/Fallen-firefighters-remembered-during-tribute-to-first-responders-322639911.html
GIST	<p>FIFE, Wash. -- Dozens of people gathered in Fife Sunday for an emotional tribute to all first responders.</p> <p>The 3 firefighters who died and the 4 others who were hurt battling a major wildfire near Twisp were on many people's minds during the event, which was sponsored by the Puyallup Tribal Police Department, Pacific Knight Emblem & Insignia, and the Restored Emergency Vehicle Association.</p> <p>Police cars and fire engines were on display, including one from 1964. It was a chance to get an up-close look at how emergency equipment has evolved.</p> <p>"You've got retired law enforcement out here showing their grandkids, 'Hey, Grandpa drove this car back in 1970,'" said Patrick Dooley, Chairman of the Restored Emergency Vehicle Association.</p> <p>The event, which was held at the Emerald Queen Hotel and Casino, came several days after the deaths of firefighters Tom Zbyszewski, Richard Wheeler, and Andrew Zajac near Twisp.</p>

	Daniel Lyon was one of four firefighters who were hurt battling the fire. He suffered burns to over 60 percent of his body.

HEADLINE	08/23 Less smoke could mean more fires
SOURCE	http://www.seattlepi.com/news/science/article/Less-smoke-could-mean-more-fire-in-Washington-6460689.php
GIST	<p>OKANOGAN, Wash. (AP) — The massive cloud of smoke began to lift over Washington wildfires on Sunday. But as air quality improves, the fire's behavior could become more erratic and intense, fire officials said.</p> <p>"It's like a flue opening in a fireplace," said Suzanne Flory, spokeswoman for the U.S. Forest Service and the Rocky Mountain Incident Management Team. "Smoke serves as a cap on the fire."</p> <p>The Okanogan Complex of wildfires was measured at 374 square miles as of Sunday morning. Once the smoke lifts, humidity drops, heat rises and fires can flare up.</p> <p>Flory said they would not know until Sunday night or early Monday how much the fire had grown on Sunday, but as of late afternoon, fire activity had been relatively quiet. Visibility and air quality improved Sunday.</p> <p>The complex of fires was estimated to be about 10 percent contained as of Sunday morning, fire spokesman Dan Omdal said.</p> <p>Containment does not mean the fire has stopped burning. It means it has run out of fuel to burn in that area, either because it has hit a man-made fire line, a drop from airplanes of fire retardant, a road or a lake.</p> <p>Some of the land within the fire lines is still burning, but other sections have burned out.</p> <p>"We call it a wildfire, but much of the fire has been tamed," Omdal said. "We are making progress," The good news for Sunday is that less smoke means restrictions on air travel will be lifted and more fire tankers can drop water and chemical retardant, Flory said.</p> <p>Air quality, which has been dangerously bad, will also improve when the smoke cloud lifts, but firefighters won't be able to take a breather. "We tell firefighters, if you see blue sky, heads up," Flory said.</p> <p>Meanwhile, local officials have downgraded some evacuation notices, allowing some people to return to their homes. Thousands remain under evacuation notices.</p>

HEADLINE	08/23 Beirut protests violent second night
-----------------	---

SOURCE	http://www.newsmax.com/World/GlobalTalk/ML-Lebanon/2015/08/23/id/671496/
GIST	<p>BEIRUT — Lebanese riot police battled in the streets of downtown Beirut for a second night Sunday after demonstrators rallied over government corruption and an ongoing trash crisis, violence that wounded at least 44 people and 30 police officers, authorities said.</p> <p>The violence came hours after Prime Minister Tammam Salam hinted he might step down following violent protests Saturday that injured more than 100 people. The demonstrations, the largest in years to shake tiny Lebanon, seek to upend what protesters see as a corrupt and dysfunctional political system that has no functional Cabinet or parliament, nor a president for more than a year.</p> <p>Protest organizers said they pulled their supporters out of the area after men they described as political thugs began fighting with police, trying to tear down a barbed wire fence separating the crowds from the Lebanese government building.</p> <p>Sporadic gunfire could be heard in the capital's commercial district into the night as police fired in the air to disperse those who remained after officers used tear gas and water cannons against the crowds.</p>

HEADLINE	08/24 Global stocks fall sharply
SOURCE	http://www.foxbusiness.com/markets/2015/08/24/global-stocks-fall-sharply-amid-china-fears/?intcmp=hpbt1
GIST	A selloff in global stocks gathered pace Monday, hot on the heels of the steepest one-week decline in years for many major markets.

European stocks and U.S. stock futures fell sharply as a rout in Chinese shares gathered pace, wiping out gains for the year. Oil prices continued to drop, while Treasuries surged as investors sought the relative safety of government bonds.

Fears that China's economy is slowing dramatically have sparked the heavy selling around the globe in recent days. Beijing's unexpected move to devalue its currency two weeks ago raised the alarm that the world's second-largest economy may be in worse shape than many investors had thought. Since then, weak economic data have fueled worries that a drop-off in Chinese growth could cause a global slowdown.

The Shanghai Composite sank 8.5%, entering negative territory for 2015, having risen as much as 60% to its June peak. Japan's Nikkei benchmark tumbled 4.6%.

Investors were further rattled Monday by the lack of fresh steps to stem the selloff over the weekend from Chinese authorities. The Wall Street Journal reported that the central bank is preparing to flood the banking system with liquidity to increase lending.

HEADLINE	08/23 Seattle homebuyers eye parking spots
SOURCE	http://www.king5.com/story/news/local/seattle/2015/08/23/seattle-homebuyers-weighing-value--parking-spots/32233929/?csp=nbcnews
GIST	<p>SEATTLE - When Brooks Hall started looking for a condo in Seattle's Belltown and Queen Anne neighborhoods, she figured out quickly that "no parking spot" was a deal-breaker.</p> <p>"I have a free parking space at work and I kind of tested out how it would work if I just used that parking space," Hall said. "It didn't work. It was not convenient. It was not fun walking 2 miles after work."</p> <p>Hall, who purchased a condo about a month ago after moving from California kept her Ford. She bought a place that included a parking spot.</p> <p>"I love living here and just being able to get in my car and take a drive to the Cascades knowing I have a parking space to come back to," she said. "To me it's worth it."</p> <p>Demand for housing isn't the only thing homebuyers have been paying attention to in Seattle. For people like Hall, parking has become a premium as well.</p> <p>"It's purely a function of convenience so people pay for that," said Edward Krigsman, an agent with Windermere Real Estate, who's been selling in-city homes in Seattle for nearly two decades now.</p> <p>"In Seattle ... there were 6 or 7 sells of deeded parking spaces in the last 12 months and they've sold anywhere from \$20,000 to \$50,000 depending on the location."</p>

HEADLINE	08/24 Frustration mounts as Koreas talk
SOURCE	http://abcnews.go.com/International/wireStory/rival-koreas-restart-talks-pull-back-brink-now-33258126
GIST	<p>South Korea's president on Monday vowed a hard line and signaled Seoul's mounting frustration as marathon negotiations by senior officials from the rival Koreas stretched into a third day.</p>

Park Geun-hye said that without a clear North Korean apology for a land mine attack that maimed two soldiers, anti-Pyongyang propaganda broadcasts will continue. Her strong words provide a good hint at why the talks, which started Saturday evening and whose second session began Sunday afternoon and was still going Monday afternoon, have dragged on.

For now, the try at diplomacy has pushed aside previous heated warnings of imminent war, but South Korea's military said North Korea has continued to prepare for a fight, moving unusual numbers of troops and submarines to the border.

North Korea has denied involvement in the land mine explosions earlier this month and rejected Seoul's report that Pyongyang launched an artillery barrage last week — so winning an apology will be difficult work. Pyongyang demands that Seoul stop the propaganda broadcasts started in retaliation for the land mine attack.

These are the highest-level talks between the two Koreas in a year. And just the fact that senior officials from countries that have spent recent days vowing to destroy each other are sitting together at a table in Panmunjom, the border enclave where the 1953 armistice ending fighting in the Korean War was agreed to, is something of a victory.

HEADLINE	08/24 Second cancers on rise in US
SOURCE	http://abcnews.go.com/Health/wireStory/cancers-rise-us-cases-repeat-33272087
GIST	<p>Second cancers are on the rise. Nearly 1 in 5 new cases in the U.S. now involves someone who has had the disease before.</p> <p>When doctors talk about second cancers, they mean a different tissue type or a different site, not a recurrence or spread of the original tumor.</p> <p>About 19 percent of cancers in the United States now are second-or-more cases, a recent study found. In the 1970s, it was only 9 percent. Over that period, the number of first cancers rose 70 percent while the number of second cancers rose 300 percent.</p> <p>Strange as it may sound, this is partly a success story: More people are surviving cancer and living long enough to get it again, because the risk of cancer rises with age.</p> <p>Second cancers also can arise from the same gene mutations or risk factors, such as smoking, that spurred the first one. And some of the very treatments that help people survive their first cancer, such as radiation, can raise the risk of a new cancer forming later in life, although treatments have greatly improved in recent years to minimize this problem.</p>

	Psychologically, a second cancer often is more traumatizing than the first.

HEADLINE	08/23 Recall: Apple iPhone 6 Plus
SOURCE	http://money.cnn.com/2015/08/23/technology/apple-iphone-6-plus-camera-recall/index.html
GIST	<p>The company's website says the issue applies mostly to phones sold between September 2014, when they were released for sale, and January 2015. Apple said these phones may have a defective component in the camera and will take fuzzy pictures.</p> <p>The issue is with the iSight camera on the back of the iPhone 6 Plus -- and not the "selfie" camera -- according to the company.</p> <p>Apple said it will replace the cameras for free. Affected customers can go to an authorized service provider, any Apple store, or contact technical support to set up a swap. The company noted wireless carriers are not able to fix the issue.</p> <p>Owners can check if their phone is included in the recall by entering a serial number on this website. Serial numbers can be found under "Settings > General > About" on an iPhone. It's also on the device's original box and can be looked up on iTunes.</p>

HEADLINE	08/22 Firefighters deal w/lack of resources
SOURCE	http://www.khq.com/story/29858582/firefighters-still-dealing-with-lack-of-resources
GIST	CUSICK, Wash. - The Tower Fire is burning at 8,685 acres and is 2 percent contained. It's burning east of the Pend Oreille River.

While things are a little calmer Saturday, firefighters are still facing many challenges. The main one being the lack of resources.

Because of the many fires burning in our region, Pete Buist, public information officer, says they're just in line like everyone else hoping for more resources.

The Tower Fire will be getting more help though. An army battalion came in from St. Louis Saturday and will be trained up and put on the fire lines in three days. They're also getting another aircraft and some more supplies. Even so, they don't have everything they would have for a fire of this complexity.

Buist says the firefighters they do have on the lines are talented, and have been effective with the bare minimum of resources.

"If resources get freed up, things will get better," Buist says. "If the weather moderates some things will get better. None of those things are things we can foretell. And so we hope that people will listen to what the firefighters and fire managers are putting out for public information."

GIST	<p>SEATTLE (AP) - Efforts by Washington state health officials to shorten the amount of time mentally ill people wait in jails for competency services are failing to keep up with a growing demand and urgent measures are needed to deal with the backlogs, according to a court-ordered monitor.</p> <p>U.S. District Judge Marsha Pechman issued a permanent injunction in April, ordering the Washington Department of Social and Health Services to cut the wait times to seven days, saying that holding mentally ill people in jails for months while awaiting competency services is unconstitutional.</p> <p>She set a January deadline and appointed Danna Mauch, an expert in public mental health systems, to monitor the state's progress.</p> <p>In her first quarterly report, Mauch said the state should be commended for taking steps to address the waitlists, but the measures have not provided relief for those waiting for services.</p> <p>"The critical conditions in the jails suggest that interim urgent measures to clear backlogs are in order," Mauch said in her report filed with the court Tuesday.</p> <p>She also questioned if the state's long term plan will meet the judge's deadline.</p>

	Messages sent to state health officials seeking a response to Mauch's findings were not immediately returned.

GIST	<p>Food shortages and price hikes caused by extreme weather will be three times more likely over the coming decades, according to a new report.</p> <p>The U.K.-U.S. Taskforce on Extreme Weather and Global Food System Resilience found that unless better planning, modeling and trade arrangements are put in place, massive disruptions to our food supply — the kind that usually only occur once a century — will happen every 30 years.</p> <p>Extreme weather in areas that produce our most important crops is largely the cause. A massive drought is already underway in California — the world's richest food-producing region — causing a loss of 30% of its cropland at a value of nearly \$2 billion.</p> <p>The U.S. isn't alone in feeling the impact of extreme weather. Venezuela is undergoing beer shortages because of a heat wave. Violence has even struck food lines there.</p> <p>The U.S. and European Union will likely be sheltered from widespread impacts because of strong economies and the ability to outbid other countries for food supplies, the report found. Still, it says global cooperation needs to happen to prevent large food shocks. That means policy and trade agreements that take into account sharing water resources and banning restrictions on certain staple crops.</p>

HEADLINE	08/23 Violent crime vigil on Capitol Hill
SOURCE	http://www.king5.com/story/news/local/seattle/2015/08/23/capitol-hill-crime/32220345/
GIST	<p>After he was beat up a little more than a week ago, Daniel Goodman knew it was time to stand up to violent crime. Goodman organized a vigil on Seattle's Capitol Hill Saturday to remember Ramon Mitchell man who was murdered on the hill last weekend, but also to raise awareness for an increase in serious crimes against persons in Seattle's East Precinct.</p> <p>Seattle Police say there's been a 13% increase compared to this same time last year. Serious crimes against persons include homicide, rape, robbery, domestic violence, and other forms of assault.</p> <p>Goodman handed out fliers prior to the event and spoke about why he helped coordinate Saturday's event.</p>

	<p>"Getting beat up and becoming a victim made me want to help the community so other people don't have to become victims," Goodman said. "I hope we can change this so other people don't have to be the victim of violent crime."</p> <p>According to the Seattle Police and their new numbers published on their website this week, aggravated assault (excluding DV) is up 26%, robbery 8%, and rape is up 20% in the east precinct compared to a year ago. Overall serious crimes against persons is up 13%.</p>

HEADLINE	08/23 TSA requires 'clean' gun ranges
SOURCE	http://www.seattletimes.com/seattle-news/tsa-now-requires-proof-gun-ranges-are-clean-for-air-marshals/
GIST	<p>The Transportation Security Administration (TSA) is now requiring commercial gun ranges seeking contracts to help train federal air marshals and other officers to first prove the facilities are not tainted with lead.</p> <p>The changes come after a Seattle Times investigation in April revealed indoor-gun ranges in Washington and elsewhere had exposed hundreds of air marshals and federal Bureau of Prisons employees to dangerous levels of the poisonous metal.</p> <p>Two Seattle-area gun ranges each had outstanding violations for inadequate ventilation and lead-contaminated surfaces while benefiting from federal contracts. The two ranges also had repeatedly violated lead-safety regulations and ended up sickening their own workers.</p> <p>Firing lead-based ammunition emits lead vapor and dust, causing shooters to be overexposed to the toxic metal if a range doesn't have proper ventilation or adequate cleanup.</p> <p>The TSA inserted new lead-safety language in two recently issued proposals seeking bids for firing-range services in Houston and suburban Detroit.</p>

HEADLINE	08/22 Military exercises in South China Sea
SOURCE	http://www.usatoday.com/story/news/world/2015/08/22/us-adds-muscle-seeks-friends-south-china-sea-standoff/31921703/
GIST	<p>ABOARD USS FORT WORTH IN THE JAVA SEA – Cmdr. Chris Brown looked at the line of warships behind him and didn't like what he saw.</p> <p>An Indonesian ship, KRI John Lie, had crept too close in an attempt to spot an "enemy" submarine lurking nearby. But when Brown relayed directions for the John Lie to ease back, the ship cut speed too quickly and forced others in line to veer off in all directions.</p>

“Well, that’s why we practice these things,” Brown said, assessing the ragged formation.

The drill was part of a recent four-day exercise in which American and Indonesian forces stormed beaches, boarded ships, hunted submarines and practiced the wide range of skills they’d need if called upon to fight together in wartime.

While no one mentioned China by name, the increasing number and complexity of joint exercises with friendly countries in the region forms a key part of the U.S. response to China’s growing military strength and assertiveness.

“(The) exercises help to build skills among Southeast Asian navies, and importantly build relationships between the U.S. and Southeast Asian countries. They help participating Southeast Asian navies exercise and prepare for real-world scenarios,” said Bonnie Glaser, senior adviser for Asia at the Center for Strategic and International Studies.

So far this year, the U.S. has conducted joint exercises with naval forces in Singapore, Vietnam, the Philippines, Malaysia and Indonesia. All those countries have territory that borders the disputed South China Sea. Other joint exercises are planned later this year.

China has asserted ownership of nearly all of the South China Sea and is building at least seven artificial islands in the key waterway. Parts of the region are also claimed by five other countries, including three of this year’s training partners.

“These exercises allow the U.S. to show its flag and maintain access to the South China Sea, building capacity for regional partners. It sends a political signal to China, but more importantly, to the region as a whole,” said Tetsuo Kotani, senior fellow and maritime security specialist at the Japan Institute of International Affairs in Tokyo.

HEADLINE	08/23 Growing wildfires across Western states
SOURCE	http://www.foxnews.com/us/2015/08/23/deadly-wildfires-charge-across-western-states/?intcmp=hpbt1
GIST	<p>Wildfires raging in Washington, Idaho, Oregon and California have officials in the drought-plagued Western states struggling to contain the flames that have forced thousands from their homes and led to the deaths of three firefighters.</p> <p>In northern Washington, officials are hoping a break in the weather will allow firefighters to gain control of a series of wildfires in the northern part of the state that have left three firefighters dead and injured several others.</p>

The crews fighting the massive Okanogan Complex wildfires are under such tremendous pressure that fire officials are training volunteers with heavy equipment to help extinguish the giant fires that currently cover 355 square miles. It is the first time in state history that residents are being asked to help operate backhoes and bulldozers to dig fire lines, KING-TV reported.

Thousands of area residents remain under evacuation orders, while some were escorted back to their homes Saturday, according to officials cited the station.

In California, more than 12,000 firefighters are battling 17 wildfires across the state.

A fire that has burned for nearly three weeks on the western slope of the Sierra Nevada grew to 73 ½ square miles near Kings Canyon National Park and was bearing down on popular Hume Lake.

Firefighters focused on defending Hume Lake Christian Camps on Saturday. More than 2,500 campers, hikers, employees and residents have been evacuated this week.

A wildfire on the eastern outskirts of the San Francisco Bay Area scorched nearly 4 square miles of dry brush near Livermore. Evacuations have been ordered in the rural area as the fire moves toward Tracy. It was two-thirds contained.

In San Luis Obispo County, about 800 people returned to their homes after firefighters stopped the growth of a wildfire that had charred more than 5 square miles.

In Oregon, Gov. Kate Brown is activating an additional 250 Oregon National Guard members to help fight destructive wildfires raging across the state.

Brown's decision on Saturday comes days after she activated an initial 125 guard members, who began training in Salem on Saturday and were scheduled to be dispatched on Wednesday to the front lines.

Meanwhile, evacuations have been ordered in northern Idaho as a group of wildfires that has already destroyed 42 homes threatened more residences Friday. Nearly 800 firefighters were trying to beat back the flames that have already scorched 63 square miles of mostly timber.

Idaho had 17 large fires.

In Montana, residents and firefighters alike are welcoming much improved weather conditions that have calmed wildfires burning in the western part of the state.

However, firefighters cautioned that conditions were expected to become more favorable for active fire early this week.

HEADLINE	08/23 Analysis: Pell Grants costly
SOURCE	http://www.nbcnews.com/feature/freshman-year/billions-taxpayer-dollars-go-students-who-dont-graduate-analysis-finds-n412431
GIST	<p>Billions of taxpayer dollars go to college students who never end up with a diploma in their hands, a new report found.</p> <p>Pell grants — which are given to low-income families and, unlike student loans, do not need to be paid back — are the costliest education initiative in the nation. But little official data exists on whether they are a good investment, according to the education watchdog Hechinger Report.</p> <p>Education Department Undersecretary Ted Mitchell last month lauded Pell grants as "one of the key levers that we have" to increase college completion rates. But an analysis published Monday by Hechinger revealed that Pell recipient graduation rates are often considerably lower than the overall graduation rate — even six years after a student starts college.</p> <p>To make matters worse, the government keeps no official tally of what proportion of those who receive the grants end up getting degrees — despite the fact that money spent on Pell grants has quadrupled since 2000.</p> <p>"There's two scandals here. We have spent over the last decade one quarter of a trillion dollars on Pell grants, and if you ask the federal government what percentage of those kids graduate from college, they can't tell you," said Richard Vedder, director of the non-profit Center for College Affordability and Productivity. "The second scandal is as far as we can estimate, that graduation rate is embarrassingly low."</p> <p>Vedder has done research on Pell recipient graduation rates, which concluded that only about 40 percent Pell recipients graduate, significantly lower than the national average of about 60 percent.</p>

HEADLINE	08/23 Raging wildfires grow by 100sq. miles
SOURCE	http://abcnews.go.com/US/wireStory/raging-washington-wildfires-grow-100-square-miles-33251131
GIST	<p>Reduced winds on Saturday helped firefighters gain the upper hand against a series of giant wildfires in north-central Washington that earlier left three firefighters dead.</p> <p>The Okanogan Complex of wildfires was measured at 355 square miles on Saturday, about 100 miles larger than Friday, fire spokesman Rick Isaacson said.</p> <p>But the flames were moving away from population centers in Okanogan County, which by land area is the largest in Washington state. Thousands of people in the county remained under evacuation orders of various levels after strong winds drove flames across parched ground earlier this week.</p> <p>Sheriff Frank Rogers said it was too early to say how many homes had burned in the county of 5,300 square miles. The official tally of three homes and 33 other structures lost was very preliminary, he said.</p> <p>"That'll take weeks," Rogers said. "I know we are going to have quite a few."</p> <p>These fires are burning only one or a handful of homes at a time, not entire neighborhoods, Rogers said. "It's not 45 or 50 in one spot," he said.</p>

HEADLINE	08/24 France bestows 4 w/Legion of Honor
SOURCE	http://www.theguardian.com/world/2015/aug/24/legion-dhonneur-for-men-who-prevented-carnage-on-french-train
GIST	<p>Three young American tourists and a Briton who tackled a heavily armed gunman on a high-speed train from Paris to Amsterdam have been awarded France's highest honour by François Hollande, who praised them as an example of the need for action when faced with terrorism.</p> <p>The French president said the men showed that "faced with terror, we have the power to resist" and that they "gave us a lesson in courage, in will, and therefore in hope". He added that their actions had averted a</p>

tragedy and massacre by a determined gunman carrying large amounts of ammunition and 300 bullet rounds.

Two off-duty American soldiers, Spencer Stone and Alek Skarlatos, as well as their childhood friend, student Anthony Sadler, were travelling in the first-class carriage on Friday night when Ayoub El-Khazzani, a 25-year-old Moroccan national, reportedly burst out of the toilet carrying an AK47 and ran into their carriage, firing. Stone and his friends tackled and subdued him.

Chris Norman, 62, a British IT consultant living in France, helped restrain the man and tie his hands using his necktie.

The train was carrying around 500 passengers.

Awarding them the Légion d'honneur, Hollande said: "The whole world admires your sangfroid. With your bare hands, unarmed, you were able to overcome a heavily armed individual, resolved to do anything."

Hollande praised the soldiers, saying: "In France you behaved as soldiers but also as responsible men. You put your life in danger to defend the idea of freedom."

HEADLINE	08/23 Sequestration looms over D.C. region
SOURCE	http://www.washingtonpost.com/news/digger/wp/2015/08/23/cloud-of-sequestration-looms-over-d-c-region/
GIST	<p>Five weeks before another round of deep Defense Department cuts is set to go into effect absent action from Congress, budget analysts and elected leaders throughout the region are renewing concerns about the Washington area's reliance on Pentagon spending and the need to advance private sector growth in its place.</p> <p>No state is more reliant on defense spending than Virginia, where it affects nearly 13 percent of the commonwealth's economic output, tops nationwide, and provides the basis for 11 percent of jobs, third in the nation.</p> <p>D.C. and Maryland also rank in the top 10 in Defense Department spending among states, with 6.9 percent and 5.8 percent of their output relying on defense respectively, according to a department report released last year.</p> <p>In some ways Virginia is still reeling from automatic spending cuts known as sequestration that took place in 2013. The state's gross domestic product had zero growth in 2014, according to a recent Department of Commerce report, third worst among states.</p>

	<p>Though the unemployment rate remains below the national average, office parks in Northern Virginia have emptied while defense contractors consolidated or closed locations, and developers of some new buildings have had trouble finding companies willing to sign deals.</p> <p>According to the Defense Department research, things are likely to worsen over the next four years. From 2010 to 2012, Virginia experienced \$9.8 billion in defense cuts, with the vast majority of losses in Northern Virginia. Direct defense spending in the state is projected to drop from \$64 billion this year to under \$62 billion in 2019.</p>

HEADLINE	08/22 Judge orders detained families release
SOURCE	http://www.foxnews.com/politics/2015/08/22/california-judge-orders-immigrant-families-released-from-detention/?intcmp=hplnws
GIST	<p>A federal judge in California on Friday ordered the government to release immigrant children from family detention centers “without unnecessary delay,” and with their mothers when possible, according to court papers.</p> <p>California U.S. District Judge Dolly Gee refused the government’s request to reconsider her ruling in late July that children held in family detention centers after cross the US-Mexico border illegally must be released quickly.</p> <p>Gee called the government’s latest arguments “repackaged and reheated.’ She found Homeland Security in beach of a longstanding legal agreement stipulating that immigrant children cannot be held in unlicensed facilities, and gave agency officials until October 23 to comply.</p> <p>Homeland Security lawyers asked the judge to reconsider her ruling, arguing that the agency was already doing its best to move families through detention quickly and that the facilities had been converted into short-term processing centers.</p> <p>This is the second time Gee has ruled that detaining children violates parts of a 1997 settlement from an earlier case. The settlement requires minors to be placed with a relative or in appropriate non-secure custody within five days. If there is a large influx of minors, times may be longer, but children still must be released as expeditiously as possible, under the terms of the law.</p>

HEADLINE	08/21 President declares emergency in Wash.
SOURCE	http://www.nbcnews.com/storyline/western-wildfires/western-wildfires-president-obama-declares-emergency-washington-n414111
GIST	<p>President Barack Obama on Friday signed an emergency declaration for Washington state as firefighters there struggled to tame at least a dozen wildfires, which had already consumed hundred of thousands of acres.</p> <p>The declaration, which mobilizes FEMA and provides federal resources "is welcome news for the communities on the front lines battling the wildfires," said Gov. Jay Inslee in a statement. "The large</p>

	<p>number of wildfires in the Western United States has created a large scale fuel supply shortage for firefighting activities in Eastern Washington."</p> <p>At least 16 massive fires have swept through 400,000 acres of Washington, according to the governor's office. More than 100 homes have been destroyed, and 5,000 remained under threat in eastern Washington alone.</p> <p>In central Washington, three Washington firefighters were killed battling the Okanogan Complex Wednesday.</p> <p>More than 800 firefighters continued the efforts Friday as the fire, near the towns of Twisp and Winthrop, continued to swell, reaching 124,083 acres, according to state officials. Firefighters feared the fire would continue to spread rapidly and erratically as winds were expected to gust up to 30 mph.</p>

HEADLINE	08/21 New US embassies come w/hefty price
SOURCE	http://www.cbsnews.com/news/new-u-s-embassies-come-at-a-hefty-price/
GIST	<p>As Congress studies ways to save money, U.S. Embassies around the world are getting a closer look. The embassy in Afghanistan is expected to cost American taxpayers nearly \$900 million. And then, there's the plan to build a new embassy in Mexico.</p> <p>Everyone agrees that 55-year-old U.S. Embassy in downtown Mexico City is cramped, outdated and needs to be replaced. But finding new property in the world's fifth most populated city can be difficult.</p> <p>In 2011, the State Department settled on a 15 acre plot that came with strings attached. It was the site of a Colgate Palmolive factory. And needed a full environmental cleanup before building could begin.</p> <p>Four years later, construction is still in limbo.</p> <p>The State Department's Head of Embassy Construction, Lydia Muniz, visited the site in May. She told CBS News the cost increases aren't due to delays, but to an increase in the size of the planned embassy from approximately 890 desks to 1,335 desks.</p>

HEADLINE	08/24 Porn sites next after Ashley Madison?
SOURCE	http://www.reuters.com/article/2015/08/24/us-ashleymadison-cybersecurity-idUSKCN0QT0DF20150824
GIST	<p>Larry Flynt, a defender of free speech and sexual freedom if there ever was one, has this advice for anyone worried by the hack of infidelity site Ashley Madison: Muzzle yourself.</p> <p>"Don't do or say anything you wouldn't want to read about on the front page of the New York Times," said the founder of Hustler magazine and owner of businesses that sell sexually explicit videos online.</p> <p>It might be too late for many people who, lured by a supposed cloak of digital anonymity, have shared their innermost wishes, fetishes and fantasies on hook-up and porn sites. And those companies know that their digital troves of secrets are exactly what make them a target for emboldened hackers.</p> <p>In exposing the Ashley Madison accounts of as many as 37 million users, hackers released a cache of potentially embarrassing and damaging data. The dump contained email addresses for U.S. government officials, UK civil servants, and workers at European and North American corporations, taking already deep-seated fears about Internet security and data protection to a new level.</p> <p>"This represents a scary precedent" because of the scope and depth of intrusion into people's private lives, said Ajay Sood, Canada general manager at cyber security company FireEye/Mandiant. "Ashley Madison wasn't the first, but it's the one."</p> <p>The data dump made good on the hackers' threat last month to leak customers' nude photos, sexual fantasies, names and credit card information from the Canadian website with the slogan, "Life is short. Have an affair."</p> <p>The hackers, who have not been identified, appear to bear a grudge against the company and want to undermine it by exposing users to public scrutiny.</p> <p>The prospect of attacks by non-financially driven hackers pursuing publicity, blackmail or moral judgments sends shivers through the online dating and sex industry.</p>

GIST	<p>The Office of Personnel Management and the Department of Homeland Security have created a timeline of cyber attack that exposed data on approximately 22 million former and current federal employees, FCW reported Friday.</p> <p>Sean Lyngaas writes the official OPM breach chronology obtained by FCW indicates that hackers performed “one sustained assault rather than two separate intrusions” to access government personnel and background investigation records.</p> <p>Federal investigators determined that hackers initially accessed the local area network of the agency May 7, 2014, and that the actual data exfiltration from the agency’s background checking system occurred from July 3 through the month of August, the publication reports.</p> <p>The timeline showed OPM officials did not discover the malicious activity until April 15, 2015, and immediately reported the incident to DHS’ U.S. Computer Emergency Readiness Team, the report said.</p> <p>Lyngaas said US-CERT then uncovered a threat to the personnel database April 17 through the <i>Einstein</i> intrusion detection system.</p> <p>After that, OPM implemented predictive malware prevention and host-based security tools and by April 30, the agency confirmed that malware left its network, according to FCW.</p>

HEADLINE	08/24 Cyberattacks target tourist hot spots
SOURCE	http://securitywatch.co.nz/story/cyber-attacks-target-tourist-hot-spots/
GIST	<p>Cyber crime is concentrated in areas of high traffic, according to a new study from security defence firm Skycure, who says the world’s top tourist destinations are particularly vulnerable to attack.</p> <p>The research found that SSL decryption was the most common type of attack at hot tourist destinations, while Android devices have a 2x higher monthly likelihood of a network exposure compared to iOS devices.</p> <p>“The most frequent threat that we identified at the Top 15 Danger Destinations was a WiFi-based attack called SSL decryption, which allows cyber criminals to capture personal and work information, such as mobile banking logins/passwords and corporate credentials, the company explains.</p> <p>The study found Times Square in New York was the leading dangerous spot for cyber attacks, followed by the Notre Dame Cathedral and Disneyland in France. Other notable tourist spots that were vulnerable were the Las Vegas Strip, the Hollywood Walk of Fame and Golden Gate Park, all in the United States.</p>

	<p>Safe hot spots included the Taj Mahal in India, Universal Studios in Japan, the Great Wall of China, and the Sydney Opera House.</p> <p>The study found iOS devices connect to more Wi-Fi networks, but Android devices connect more to malicious ones.</p>

HEADLINE	08/22 Google reveals Jupiter network
SOURCE	http://techfrag.com/2015/08/22/google-reveals-secrets-behind-its-servers-and-massive-jupiter-network/
GIST	<p>Google recently released a 15-page document at SIGCOMM 2015, in which it explained the networking technologies used in its servers, tracing the evolution over the years.</p> <p>To date, Google has the largest network of data centers around the world, connected by the infrastructure that the company called Jupiter. According to Google Fellow Amin Vadat, Jupiter can deliver a bisection bandwidth of 1 petabit per second (1 million gigabits).</p> <p>That means each of its 100,000 servers in a data center can communicate to each other at a speed of 10Gb/s. It is the rate one hundred times faster than the first-generation network granted by the technologies used in 2005. Google considers Jupiter as one of the main advantages it has over rivals like Microsoft and Amazon.</p> <p>One of the major reasons Google is speaking about its network now is that the company is opening up its infrastructure and offering cloud services to other companies.</p>

HEADLINE	08/22 Data hack exposes thousands in UK
-----------------	--

SOURCE	http://www.dailymail.co.uk/news/article-3207396/Thousands-exposed-massive-new-data-hack-s-not-just-adulterers-outed-web-PC-hard-drive-risk-Google-hackers.html
GIST	<p>Thousands of Britons have been made vulnerable to cyber crime after the secret contents of their computers were exposed on the internet by a vast website dubbed the ‘Google for hackers’.</p> <p>Family photographs, medical records and bank statements can all be easily downloaded from the site because of glaring security flaws in hard drives used to back up and store personal and business data, a Mail on Sunday investigation has found.</p> <p>Highly confidential files belonging to a High Street law firm were also freely available on the website, called Shodan, including full details of their clients’ financial affairs, passports and driving licences.</p> <p>Last night, security experts said millions more British companies and internet users are also at risk of being hacked because the US-based Shodan website provides crucial information about their web-connected devices.</p> <p>Even private servers run by the world’s biggest and most expensive science lab, CERN, can be viewed and potentially tampered with.</p>

HEADLINE	08/21 China’s massive cybercrime crackdown
SOURCE	http://www.breitbart.com/national-security/2015/08/21/china-follows-crackdown-on-tianjin-reports-with-15000-cybercrime-arrests/
GIST	<p>China’s government announced earlier this week that it had arrested 15,000 people for an assortment of cybercrimes, the result of a project announced in July titled “Cleaning the Internet.” The announcement of these arrests follows a major crackdown on social media sharing stories of the devastation following a massive chemical explosion in the harbor city of Tianjin.</p> <p>Reuters reported on the statement, released by Chinese police, claiming that around 15,000 people were identified as suspects who “jeopardized Internet security” and thus were taken off the streets. The police did not identify what type of cybercrime they were arresting these people for—in addition to identity theft and hacking, pornography, some political speech, and other anti-communist expressive material is illegal in China—but only that those arrested were involved in 7,400 individual cases of crime. To find these crimes, the government noted it had “investigated” 66,000 websites.</p> <p>The arrests are part of “Operation Clean Internet,” a move by the administration of President Xi Jinping to take full control of China’s Internet structure. The program is aimed at curbing hacking and identity theft, but also activism against the communist government. The announcement of these arrests follows a series of website shutdowns related to the chemical explosion that has left dozens dead in Tianjin, a port city. State media outlet Xinhua reported this week that 50 websites had been “punished” for spreading rumors</p>

	about the Tianjin blast, namely that dangerous chemical gases were still surrounding the affected areas beyond where the government had evacuated individuals.

HEADLINE	08/22 IRS data breach more widespread
SOURCE	http://www.tjcnewspaper.com/irs-cyber-attacks-on-taxpayers-much-worse-than-thought-19758/
GIST	<p>A computer breach at the IRS in which thieves stole tax information from thousands of taxpayers is much bigger than the agency originally disclosed. This included information like Social Security Numbers, dates of birth, and street address, all of which were used as authenticators for logging into the system.</p> <p>Based on Koskinen’s congressional testimony, the suit adds, the security breach was not related to the financial resources available to the agency, but rather a deliberate decision to not implement the security measures recommended by GAO and TIGTA and, reportedly, by its own employees.</p> <p>An additional 220,000 potential victims had information stolen from an IRS website as part of a sophisticated scheme to use stolen identities to claim fraudulent tax refunds, the IRS said Monday.</p> <p>The IRS said in late May the tax return information of about 114,000 U.S. taxpayers had been illegally accessed by cyber criminals over the preceding four months, with another 111,000 unsuccessful attempts made. It identified another 170,000 suspected failed attempts by third parties to gain access to taxpayer data.</p>

HEADLINE	08/20 ISIS: American bomber in attacks
SOURCE	http://www.hstoday.us/briefings/daily-news-analysis/single-article/isis-names-american-bomber-in-four-suicide-attacks-in-iraq/6fee1133c374b3d8545c9e7981e65df1.html
GIST	<p>An American named Abu Abdallah Al Amriki was among four ISIS suicide bombers who targeted the Iraqi Army barricades near the city of Baiji north of Baghdad, the media office of the Islamic State (ISIS) in Iraq’s Salah Al Din province announced Wednesday, including a photo of Al Amriki.</p> <p>The operation was part of a raid named after Sheikh Abu Khattab Al Shihawi.</p> <p>US officials were aware that Al Amriki, who they identified as Moner Mohammad Abusalha, had been fighting with ISIS since earlier this year. He appeared in an ISIS video, “Turning Point,” which the jihadi organization released on July 16 featuring jihadists from around the world who’d traveled to Syria to engage in jihad.</p>

	<p>The Middle East Media Research Institute (MEMRI), which monitors jihadi social media, said, “The statement, released on the ISIS-affiliated forum Shumoukh Al Islam, noted that Al Amriki had detonated his explosive-packed four-wheel-drive vehicle against the barricade set up by the ‘rejectionist’ army near the Hyundai area, southwest of the city.”</p> <p>According to the statement, another attacker, Abu Muawiyya Al Iraqi, had targeted the same barricade with a booby-trapped Hummer.</p> <p>The other two bombers, Abu Ali Al Tajiki and Abu Muhammad Al Tajiki used motorcycles to target the Iraqi army in the Al Sakak area west of Baiji, MEMRI said the statement declared.</p>

HEADLINE	08/24 Yemen: Houthi rockets kill 14 civilians
SOURCE	http://www.reuters.com/article/2015/08/24/us-yemen-security-idUSKCN0QT0X620150824
GIST	<p>Rockets fired by Houthi militiamen killed 14 civilians, most of them children, as fighting intensified for control of Yemen's third largest city, Taiz, residents said on Monday.</p> <p>The Saudi-led coalition opposing the Houthis also launched air raids on military bases and Houthi positions in the southwestern city during the fighting, residents said, but no casualties were reported.</p> <p>Fighters loyal to Yemen's exiled government have been contesting control of Taiz -- known as Yemen's cultural capital -- with the Houthis since April. Hundreds of combatants and civilians have been killed.</p> <p>"The situation is awful and the fighting is happening on many fronts. All the hospitals have closed except for one, so there's a shortage of medical care. Two rockets fell on the Deluxe neighborhood, killing 14 people, among them women and children," Taiz resident Abdul Aziz Mohammed said.</p> <p>"Taiz is being devastated."</p>

HEADLINE	08/24 Europe terror threats to soft targets
SOURCE	http://www.nytimes.com/2015/08/24/world/europe/europe-ponders-terror-threat-to-soft-targets.html? r=0
GIST	<p>PARIS — Two days after a young Moroccan man was thwarted from an apparent plan to cause carnage on a Paris-bound express train, European officials confronted the deepening quandary of what additional steps they could take in the face of such attacks on soft targets, short of paralyzing public spaces or even more intrusive surveillance.</p>

Enhanced security and surveillance measures had already filtered out the young man, Ayoub El Khazzani, 26. But he was one of thousands of Europeans who had come on the radar of authorities as potential threats after traveling to Syria.

The sheer number of militant suspects combined with a widening field of potential targets have presented European officials with what they concede is a nearly insurmountable surveillance task. The scale of the challenge, security experts fear, may leave the Continent entering a new climate of uncertainty, with added risk attached to seemingly mundane endeavors, like taking a train.

In fact, the authorities in at least two countries already knew quite a lot about Mr. Khazzani before he surged into notoriety on Friday afternoon: He was on a French list as a security threat, and Spanish officials told news media there that he had traveled to Syria — not in itself an offense, unless he went there for jihad. Had he been living in France, a tough new surveillance law, approved at the end of July by France’s constitutional council, would have likely turned up even more on him.

Yet with all that the authorities already knew about him, he managed to board unhindered the heavily traveled Amsterdam-to-Paris high-speed train with a sack of weaponry, probably in Belgium, and was ready to inflict serious damage, with dozens of rounds of ammunition, an AK-47, an automatic pistol and a box cutter. If not for the fortuitous presence of three Americans, and the help of a British and a French passenger in the train car, many could have died.

“We are now faced with unpredictable terrorism,” said Jean-Charles Brisard, a French security consultant and terrorism expert. “Terrorists henceforth will be choosing soft targets, those where there is little security,” he said. “And that’s why he chose a train — because there is little security.”

HEADLINE	08/23 France train attacker terror links?
SOURCE	http://www.mcclatchydc.com/news/nation-world/world/article31980162.html
GIST	<p>BERLIN - The suspect in Friday’s thwarted attack of a high-speed train bound for Paris flew to Istanbul from Berlin on May 10, following a path that has been used hundreds of times by Islamist militants seeking to join the Islamic State.</p> <p>French authorities said German intelligence alerted them to the trip by Ayoub El-Khazzani, the 25-year-old suspect in the train incident, which was prevented from becoming a tragedy by the actions of three Americans who subdued El-Khazzani before he could unjam the automatic rifle and pistol he was carrying.</p> <p>Little is known about the trip, which authorities said lasted 16 days. But the fact that police in three countries were tracking El-Khazzani prior to Friday’s train attack makes the Turkey excursion even more suspicious.</p>

A Moroccan national, El-Khazzani had lived in Spain, France and Belgium, according to reports.

But European newspapers and police statements are full of accounts noting that Friday was not the first time El-Khazzani had popped up in regards to possible ties to terrorism.

Spanish anti-terror police believe that between May 2014 and May 2015 he traveled to Syria and they passed a file on him to French anti-terror police in 2014 when he left Spain for France. French police said in a statement that El-Khazzani was included on their “S” list of about 5,000 people believed to have terror connections. That list included Said and Cherif Kouachi, the two men believed to have killed 11 at the offices of the Parisian satirical newspaper Charlie Hebdo in January.

The Frankfurter Allgemeine newspaper reported Sunday, citing German and Spanish intelligence officials, that El-Khazzani had returned to Belgium May 26 after his flight to Istanbul.

The newspaper quoted Spanish officials saying he had lived in Madrid, and that he is believed at some point in the last 16 months to have traveled to Syria, where, the newspaper said, “he possibly participated in the activities of the Islamic State.”

The Spanish newspaper El Mundo reported that he had moved from Madrid and until 2014 had lived in Algeciras, Spain, and that his mother attends what is considered the most radical mosque in that city.

Algeciras has been in the news for radical Islam before. There was a thwarted attack on a shopping center, and small weapons cache was found in an abandoned farm house. That weapons cache included an AK-47 officials say matched the type used on the train Friday.

If he were homeless, it wouldn’t remove him from the possibility of terror ties. In Germany, social workers have become worried in recent months that the Islamic State has been targeting the homeless for recruiting, especially for suicide attacks.

HEADLINE	08/24 ISIS blows up ancient temple
SOURCE	http://www.cnn.com/2015/08/24/middleeast/syria-isis-palmyra-ruins-temple/index.html
GIST	<p>The already burgeoning list of appalling acts by ISIS appears to have grown even longer: the Islamic extremist group has reportedly blown up a nearly 2,000-year-old temple in the historic ruins of Palmyra in Syria.</p> <p>Maamoun Abdulkarim, Syria's director-general of antiquities and museums, told the Syrian state news agency SANA that local sources in Palmyra informed him that ISIS members rigged the Temple of Baalshamin with large quantities of explosives and detonated them.</p>

	<p>There was uncertainty -- not unusual amid the chaos of the Syrian conflict -- over when exactly the damage was done to the temple, which dates from the first century AD.</p> <p>The SANA report Sunday didn't specify when the explosion took place. The UK-based Syrian Observatory for Human Rights, which monitors the conflict, reported on the same day that its sources said ISIS blew up the temple about a month ago.</p>

HEADLINE	08/23 UAE: British hostage freed in Yemen
SOURCE	http://abcnews.go.com/International/wireStory/uae-army-frees-british-hostage-held-yemen-33258378
GIST	<p>The United Arab Emirates said Sunday that its military freed a British hostage who was kidnapped 18 months ago by al-Qaida in Yemen, which has expanded its reach amid fighting between Shiite rebels and their opponents.</p> <p>A statement carried by the UAE's official WAM news agency identified the British hostage as Robert Douglas Semple, after initially referring to him as Douglas Robert Semple. It said Semple, 64, had been working as a petroleum engineer in the Yemeni province of Hadramawt when he was kidnapped in February 2014. The statement did not say where Semple had been held in Yemen or provide any details on the rescue.</p> <p>Yemeni security officials contacted by The Associated Press said they were not aware of any Yemeni forces assisting in the operation and did not have details about how Semple was released, suggesting his handover may have been negotiated among local tribesmen before the involvement of Emirati forces.</p>

HEADLINE	08/23 Rail security in spotlight
SOURCE	http://news.yahoo.com/france-train-attack-puts-rail-security-spotlight-150139658.html; ylt=AwrXnCDS6tIVx3AAZGfQtDMD; ylu=X3oDMTByc3RzMXFjBGNvbG8DZ3ExBHBvcwM0BHZ0aWQDBHNIYwNzcg-
GIST	<p>Paris (AFP) - Since 9/11, airports around the world have implemented tougher security checks for travellers, but the foiled attack on a packed high-speed train in Europe raises questions whether railway stations should also follow suit.</p> <p>The suspected gunman, named as 25-year-old Moroccan national Ayob El Khazzani, boarded the Amsterdam-Paris express in Brussels on Friday with a Kalashnikov assault rifle, a Luger automatic pistol, nine cartridge clips and a box-cutter, investigators say.</p> <p>Courageous intervention by a trio of young Americans who overwhelmed the attacker prevented a possible massacre.</p> <p>In the wake of the episode, Belgium said it would increase baggage checks and patrols on high-speed trains. And France said its state-run rail firm, the SNCF, would introduce an emergency hotline to report "abnormal situations".</p> <p>Experts say these are valuable tools in the fight against terrorism. But at the same time, these fast-track measures also highlight an underlying problem: applying airport-style security to railway stations is almost impossible.</p> <p>"The idea of extending the airport system to railway stations today isn't something that I can call realistic," SNCF head Guillaume Pepy, said.</p>

	<p>"There's a choice -- you either have comprehensive security or low (transport) efficiency."</p> <p>"Airplanes leave from a specific place -- you can build a security apparatus around it," said Raffaello Pantucci, of the Royal United Services Institute in London.</p> <p>"It's just not possible to do that with trains. You would have to do that at every station."</p> <p>Retrofitting the railway network -- nationally and internationally -- so that it meets airport-style criteria would be astronomically costly, said Marc Ivaldi at the IDEI research institute in Toulouse, southwestern France.</p> <p>"The task is strictly impossible in the immediate future," he said.</p>

HEADLINE	08/24 The other France
SOURCE	http://www.newyorker.com/magazine/2015/08/31/the-other-france
GIST	<p>Fouad Ben Ahmed never paid much attention to Charlie Hebdo. He found the satirical magazine to be vulgar and not funny, and to him it seemed fixated on Islam, but he didn't think that its contributors did real harm.</p> <p>One of its cartoonists, Stéphane Charbonnier, also drew for Le Petit Quotidien, a children's paper to which Ben Ahmed subscribed for his two kids. On January 7th, upon hearing that two French brothers with Algerian names, Saïd and Chérif Kouachi, had executed twelve people at the Charlie Hebdo offices—including Charbonnier—in revenge for covers caricaturing Muhammad, Ben Ahmed wrote on Facebook, "My French heart bleeds, my Muslim soul weeps. Nothing, ABSOLUTELY NOTHING, can justify these barbaric acts. Don't talk to me about media or politicians who would play such-and-such a game, because there's no excuse for barbarism. #JeSuisCharlie."</p> <p>That night, Ben Ahmed left his house, in the suburbs outside Paris, and went into the city to join tens of thousands of people at a vigil. He is of Algerian and Tunisian descent, with dark skin, and a few white extremists spat threats at him, but Ben Ahmed ignored them—France was his country, too.</p> <p>On January 11th, he joined the one and a half million citizens who marched in unity from the Place de la République.</p> <p>Ben Ahmed's Facebook page became a forum for others, mostly French Muslims, to discuss the attacks. Many expressed simple grief and outrage; a few aired conspiracy theories, suggesting a plot to stigmatize Muslims.</p> <p>"Let the investigators shed light on this massacre," Ben Ahmed advised. One woman wrote, "I fear for the Muslims of France. The narrow-minded or frightened are going to dig in their heels and make an amalgame"—conflate terrorists with all Muslims. Ben Ahmed agreed: "Our country is going to be more divided." He defended his use of #JeSuisCharlie, arguing that critiques of Charlie's content, however</p>

legitimate before the attack, had no place afterward. “If we have a debate on the editorial line, it’s like saying, ‘Yes—but,’ ” he later told me. “In these conditions, that is unthinkable.”

Ben Ahmed, who is thirty-nine, works as a liaison between residents and the local government in Bondy—a suburb, northeast of Paris, in an area called Department 93. For decades a bastion of the old working class and the Communist Party, the 93 is now known for its residents of Arab and African origin.

To many Parisians, the 93 signifies decayed housing projects, crime, unemployment, and Muslims. France has all kinds of suburbs, but the word for them, *banlieues*, has become pejorative, meaning slums dominated by immigrants. Inside the *banlieues* are the *cités*: colossal concrete housing projects built during the postwar decades, in the Brutalist style of Le Corbusier. Conceived as utopias for workers, they have become concentrations of poverty and social isolation. The *cités* and their occupants are the subject of anxious and angry discussion in France. Two recent books by the eminent political scientist Gilles Kepel, “*Banlieue de la République*” and “*Quatre-vingt-treize*” (“Ninety-three”), are studies in industrial decline and growing segregation by group identity. There’s a French pejorative for that, too: *communautarisme*.

After the Charlie massacre—and after a third terrorist, Amedy Coulibaly, gunned down a black policewoman outside a Jewish school and four Jews at a kosher supermarket—there was a widespread feeling, in France and elsewhere, that the killings were somehow related to the *banlieues*. But an exact connection is not easy to establish. Although these alienated communities are increasingly prone to anti-Semitism, the profiles of French jihadists don’t track closely with class; many have come from bourgeois families. The sense of exclusion in the *banlieues* is an acute problem that the republic has neglected for decades, but more jobs and better housing won’t put an end to French jihadism.

For all their vitality, the *banlieues* feel isolated from the city, and from France itself. Parisians and tourists rarely visit them, and residents complain that journalists drop in only to report on car burnings and drug shootings. The suburb Clichy-sous-Bois—the scene, in 2005, of youth riots that spread across the country—has tried to raise revenue by offering a tour de *banlieue* for curious outsiders. Many suburban residents, meanwhile, never even think of going to Paris.

Compared with American slums, the *banlieues* have relatively decent standards of housing and safety, but the psychological distance between the 93 and the Champs-Élysées can feel insuperable—much greater than that between the Bronx and Times Square. The apartment blocks in the *cités*, often arranged around a pharmacy, a convenience store, and a fast-food joint, look inward. Many have no street addresses, obvious points of entry, or places to park. The sense of separation is heightened by the names of the surrounding streets and schools, preserved from a historical France that has little connection to residents’ lives. The roads around Gros Saule—a drug-ridden *cité* where the police dare not enter—include Rue Henri Matisse and Rue Claude Debussy.

HEADLINE	08/22 Americans subdue gunman in France
SOURCE	http://www.kval.com/news/local/Oregon-Army-National-Guard-soldier-subdues-gunman-in-France-322562971.html
GIST	<p>An active duty Oregon Army National Guard and an Air Force member were able to jump on an active shooter in France. They subdued and held the Islamist gunman until authorities were notified and arrived on scene.</p> <p>Three people were injured before the shooter was taken down. The gunman was taken into police custody.</p> <p>Sources say Alek Skarlatos and another member from the U.S. Air Force saw a man, later identified as an Islamist militant, loading a gun in a train bathroom.</p> <p>Nick Choy, a spokesperson for the Oregon Military Department confirmed Skarlatos is an active member of the Oregon Army National Guard.</p> <p>“Obviously these military members reverted to their training, their military training and experience and they were able to drop on that and utilize it to save countless lives today,” Choy said.</p>

HEADLINE	08/22 Police: al Shabaab steps up attacks
SOURCE	http://ca.reuters.com/article/topNews/idCAKCN0QR0LT20150822
GIST	<p>MOGADISHU (Reuters) - At least 21 people were killed in two separate suicide car attacks in Somalia on Saturday, one in Mogadishu and another at a military training base in the southern port city of Kismayu, police and military sources said.</p> <p>Islamist militant group al Shabaab has lost control of most of their territories to African Union troops in recent years but they stepped up attacks in Mogadishu and elsewhere.</p> <p>Sheikh Abdiasis Abu Musab, al Shabaab's spokesman for military operations, said his group was behind the car bomb in Kismayu.</p> <p>The attack at Kismayu University, which is being used as a base for training government troops, was launched as soldiers were lining up for training, military officials said.</p> <p>Colonel Ahmed Ato told Reuters at least 16 Somali soldiers were killed and 21 others were wounded in the blast.</p> <p>The second car exploded in the capital Mogadishu at a busy junction in the evening. There was no immediate claim of responsibility for the Mogadishu attack.</p>

HEADLINE	08/22 Afghan bomb attack kills 3 Americans
SOURCE	https://www.washingtonpost.com/world/asia_pacific/bomb-attack-kills-12-including-three-americans-in-afghan-capital/2015/08/22/a67496ac-48d6-11e5-9f53-d1e3ddfd0cda_story.html
GIST	<p>KABUL — A massive car bomb targeting a U.S.-led NATO mission convoy killed at least 12 people, including three Virginia-based American civilian contractors, near a hospital during rush hour Saturday, the latest in a series of deadly attacks that have struck the capital in recent weeks.</p> <p>The assault unfolded at 4:20 p.m. outside Shinozada Hospital in a middle-class enclave of the capital, a few miles from the heavily fortified American Embassy. The blast was so powerful that it could be heard in far-away neighborhoods and prompted the embassy to blare its emergency sirens. Nearby vehicles, including a school minivan, were severely mangled, some in flames.</p> <p>In addition to those killed, as many as 66 people were wounded in the attack, said Wahidullah Mayar, a Health Ministry spokesman.</p>

HEADLINE	08/22 Vocabulary of militancy widespread
SOURCE	http://www.theguardian.com/world/2015/aug/22/disturbing-pattern-emerging-latest-terrorist-attack-narrowly-averted-france-train
GIST	<p>A new attack, a young man who would be a killer and a tragedy narrowly averted. The media attention is currently on the identity of the have-a-go heroes who prevented carnage in France. It will shift eventually to the man who tried to open fire with an automatic weapon in a crowded European train.</p> <p>From what we know already, he fits a classic type: young, of north African origins, with a possible recent visit to Syria and known to security services. This profile is very similar to that of the men who attacked satirical magazine Charlie Hebdo in January this year, to Mohamed Merah, a 23-year-old who killed 12 in a shooting spree in south-west France in 2012, and to that of Mehdi Nemmouche, who shot at a Jewish Museum in Brussels last year.</p> <p>The two shocking French attacks underlined the nature of the wave of violence emerging in the country.</p> <p>This latest attacker too is now being described as a lone wolf, with people asking how he was radicalised. Both terms, however, are deeply misleading. Few lone wolves exist, certainly in the recent history of Islamic militancy, and to insist that they do is to fail to understand how Islamic militancy works.</p> <p>Furthermore the idea of radicalisation is not particularly useful either.</p> <p>Of the hundreds of Islamic militants who have been involved in attacks in Europe over recent years, only a tiny minority have acted alone. Most have been involved in broader networks of activism, some violent, some less so.</p> <p>Many have travelled overseas and spent time with major militant groups. A high proportion – possibly two-thirds, recent research tells us – have told others of their plans to commit violence.</p> <p>Most importantly perhaps, a very large number of them have been in prison with others who are steeped in extremist thinking, have peer groups who share much of their extremist worldview, know other people who have travelled to Iraq, Syria or Afghanistan, or even grew up in families where casual prejudice against non-believers, Jews or the west in general was part of everyday conversation.</p> <p>Terrorism is a social activity and so-called lone wolves are often a product of a much broader environment. All the militants today speak the same phrases, repeating the same tired, familiar tropes of jihadi thinking.</p> <p>If there is one key marker of a community it is a shared language, and the vocabulary of militancy – whether that of the al-Qaida dialect or that of the newer Islamic State – is more widespread than ever before. If true lone wolves exist, they are extremely rare.</p>

HEADLINE	08/22 Gunman in France a suspected militant
SOURCE	http://www.newsweek.com/france-gunman-suspected-islamist-militant-365207
GIST	<p>PARIS/ARRAS, France (Reuters) - A gunman overpowered by passengers on a train in France on Friday was known to European authorities as a suspected Islamist militant, provided the identity he has given interrogators is correct, France's interior minister said.</p>

Two people were wounded in the struggle to subdue the Kalashnikov-toting attacker aboard the high-speed train from Amsterdam to Paris. Two U.S. servicemen, one of whom suffered knife wounds, were among passengers who stopped the gunman.

"It is important to be careful about his identity which is not yet established with certainty," Cazeneuve said.

"If the identity he has declared is confirmed, he is a 26-year-old man of Moroccan nationality identified by the Spanish authorities to French intelligence services in February 2014 because of his connections to the radical Islamist movement."

He said inquiries in collaboration with other European authorities "should establish precisely the activities and travels of this terrorist."

Spain's interior ministry could not immediately be reached for comment.

HEADLINE	08/24 Spike in fatal crashes w/legal pot
SOURCE	http://www.heraldnet.com/article/20150824/NEWS01/150829662/With-legalization-fatal-crashes-involving-marijuana-spiked
GIST	<p>EVERETT — Marijuana increasingly plays a role in fatal crashes on Washington's roadways, according to a recent state study.</p> <p>The number of drivers involved in deadly crashes who tested positive for marijuana increased 48 percent from 2013 to 2014, according to the Washington State Traffic Safety Commission report.</p> <p>"We have seen marijuana involvement in fatal crashes remain steady over the years, and then it just spiked in 2014," said Staci Hoff, the traffic commission's data and research director.</p> <p>A total of 99 drivers involved in fatal accidents tested positive for marijuana in 2014. By contrast, that number was 56 in 2011.</p> <p>"It certainly seems there has been a real uptick in cases where it was at least partially a factor," said Tobin Darrow, a Snohomish County deputy prosecutor who handles many vehicular homicide cases.</p>

	Statewide, marijuana was found in 28 percent of blood samples taken in impaired driving cases in 2014, according to data provided by the Washington State Patrol. That number has gone up and down over the past five years but was higher last year than in 2012 or 2013.

HEADLINE	08/23 Capitol Hill's mystery soda machine
SOURCE	http://www.seattletimes.com/seattle-news/capitol-hills-magical-pop-machine-stays-stocked-and-a-mystery/
GIST	<p>There's a Coke machine on Capitol Hill with a history that's just as mysterious as what's inside.</p> <p>It's within earshot of the neighborhood's new light-rail station and Broadway's posh eateries and shops, right in front of a locksmith business at East John Street and 10th Avenue East. The graffiti-covered soda-pop dispenser has been reportedly spitting out cans of "mystery" soda for decades — right now, for a retro price of 75 cents a pop.</p> <p>And beyond the rusting machine's clashing look with a neighborhood that's become known for its modern gleam, the unanswered questions surrounding its history and upkeep have generated online popularity.</p> <p>More than 20,000 people support the Seattle "landmark's" Facebook page, and its story has gained attention from a wide variety of media sources around the globe for more than a decade.</p> <p>"I've heard supernatural stories about how sometimes you'll press a button and you'll get a soda that was discontinued like 20 years ago," said Kyle Cosoleto-Miller of Bloomsburg, Pa. While on vacation in Seattle last week, he posed for photos in front of the crusty box before it ate his dollar bill and he scrounged up three quarters to eventually score a Sierra Mist.</p> <p>But the identity of who owns the machine's keys and is refilling it with stacks of random beverages is unknown, even to the employees of Broadway Locksmith, which lends electrical power and property to keep the mystery going.</p>

HEADLINE	08/22 Mystery lights in space increasing
SOURCE	http://www.seattlepi.com/science/article/Mystery-lights-in-space-could-warn-of-global-6458563.php
GIST	<p>Strange blue lights glowing on the edge of space first appeared over polar regions in 1885 and today, sightings are becoming increasingly common, and now the phenomenon is moving into lower latitudes including Northern California.</p> <p>Like the proverbial canary in the coal mine, these glowing space clouds may be a celestial siren, warning of Earth's global warming, according to some scientists.</p>

They're called "noctilucent clouds" or NLCs, basically, clouds that glow at night. They appear mainly in northern latitudes, about 50 miles above earth as miniscule droplets of water reflect the sun on the other side of the globe.

Now, they're moving farther south.

"Public interest in noctilucent clouds is definitely growing as they spread to mid-latitudes," said SpaceWeather.com's Tony Phillips, who tracks the appearances and reports from astronomers.

Never before in human history had they been reported until two years after the eruption of the Krakatoa super volcano, throwing plumes of ash dozens of miles high and affecting the global atmosphere.

Since then, spacecraft exhaust has created tiny ephemeral clouds, and there is even research that meteorite particles may increase them. The sights were noticed increasingly again after the Tunguska meteor event over Siberia in 1908.

Phillips said the ties to global warming are still being explored.

HEADLINE	08/23 Legal pot industry have race problem?
SOURCE	http://blog.seattlepi.com/marijuana/2015/08/23/does-the-legal-marijuana-industry-have-a-race-problem/#35048101=0
GIST	<p>For decades, people of color have paid a heavy price for the war on drugs. It's well known that minorities are arrested and jailed at disproportionate rates on marijuana-related charges. But, now that recreational weed is legal in Washington, are those same people who were once likely to be racially profiled reaping the benefits of the industry of legal pot?</p> <p>What we found</p> <p>We cold-called 270 marijuana producers, processors and recreational retailers in Washington state to determine who exactly is running and being employed by these pot shops, and who is actually benefitting.</p> <p>Out of the producers and processors we were able to make contact with, 110 provided employee demographic information consistent with what could be expected: The marijuana industry is mostly saturated with white males, many of whom are not only employed by businesses but also run them.</p> <p>Despite marijuana's newfound legality, for some people of color entering this business is understandably wary territory, if not entirely out of the question. The American Civil Liberty Union's War on Marijuana report found that, "a Black person is 3.73 times more likely to be arrested for marijuana possession than a white person, even though Blacks and whites use marijuana at similar rates."</p>

However, out of the several retailers we were able to speak with in the Seattle area, 40 percent of their employees are people of color (defined as non-Caucasian, but included mixed-race individuals), as compared to about 9 percent for producers and processors across the state.

Racial disparities?

Minority employment in legal weed actually seems to be consistent with statewide racial statistics. About 30 percent of Washington’s population is nonwhite, and about 4 percent is black, according to the 2013 US Census. Seattle also happens to rank as the fourth city with the lowest number of black-owned businesses, according to the Census Survey of Business Owners.

“When they did the lottery [for recreational licenses] there wasn’t one African American as a winner,” said Michael Gordon, who is black, and a partial owner at White Center’s Bud Nation. “Then it kinda set a precedent for becoming a predominantly white male culture.”

Marijuana retailers from I-502 shops seemed to consistently have more diverse staff, and more women employees than production and processing operations. However, many of the producers and processors said their minority employment increases during harvest season, with more women and Hispanics being seasonally employed.

A Liquor and Cannabis Board spokesman said the state does not keep any racial demographic information on marijuana business owners or applicants.

HEADLINE	08/23 Request for all Sno. Co. phone data
SOURCE	http://www.heraldnet.com/article/20150823/NEWS01/150829711/Anonymous-records-request-seeks-data-from-1000-county-phones
GIST	<p>EVERETT — A new anonymous records request has left Snohomish County grappling yet again with technological challenges and huge demands on staff time.</p> <p>A person using the name Mr. Public Requestor emailed in June to demand all data from all active government cellphones being used by county employees. Audio, video and pictures were sought, along with applications, operating system data and everything else that makes a smart phone work.</p> <p>Extracting all of that information could take up to four hours for each of the county's 1,000 cell phones, tech employees estimate. That's not counting time to redact personal information, computer passwords and other details exempt from public disclosure.</p> <p>In the meantime, county workers have been told not to delete anything from their work phones.</p> <p>“You have to look at every picture, you have to look at every text,” said Teri Lawrie, a public records assistant in the county's tech department. “I wouldn't be comfortable with saying how many hours of work.”</p> <p>Mr. Public Requestor's demand is the largest active request for government records at the county. But it's only the latest in a series of increasingly numerous and complex requests for public records that have left state agencies and local governments throughout Washington playing catch-up.</p>

HEADLINE	08/21 Seattle seawall delayed; over budget
SOURCE	http://www.king5.com/story/news/local/seattle/2015/08/21/seattle-seawall-delayed-millions-over-budget/32104647/?csp=nbcnews
GIST	<p>SEATTLE - The new Alaskan Way Seawall will not be done on time nor on budget.</p> <p>That's the word from the Seattle Department of Transportation which, for months, had hailed the project as a shining example of how it can handle major projects. It was scheduled to be completed by 2016, on time and on budget, leaders said.</p> <p>But, SDOT Director Scott Kubly admits the department underestimated the true cost and time needed to make the repair.</p> <p>"We had a project. For us to work within our budget, we were going to have to have everything go right. And you know what? Not everything has gone right. We've had a lot of risk items materialize," said Kubly.</p> <p>Voters approved a bond measure in 2012 to pay for \$290 million of repair to the quake-prone seawall and for waterfront improvements. It was promised that the measure would fully fund the first phase of the seawall. But soon thereafter the project was budgeted at \$300 million. Quietly, that number rose in 2013 to a bit more than \$330 million.</p> <p>Now Kubly says it will take \$409 million -- more than 33% over the original budget -- to complete. He also says it will take an additional year to build and won't be completed until 2017.</p>

Crime, Criminals

[Top of page](#)

HEADLINE	08/23 Tracking cellphones to solve crimes
SOURCE	http://www.usatoday.com/story/news/2015/08/23/baltimore-police-stingray-cell-surveillance/31994181/
GIST	<p>BALTIMORE — The crime itself was ordinary: Someone smashed the back window of a parked car one evening and ran off with a cellphone. What was unusual was how the police hunted the thief.</p> <p>Detectives did it by secretly using one of the government's most powerful phone surveillance tools — capable of intercepting data from hundreds of people's cellphones at a time — to track the phone, and with it their suspect, to the doorway of a public housing complex. They used it to search for a car thief, too. And a woman who made a string of harassing phone calls.</p> <p>In one case after another, USA TODAY found police in Baltimore and other cities used the phone tracker, commonly known as a stingray, to locate the perpetrators of routine street crimes and frequently concealed that fact from the suspects, their lawyers and even judges. In the process, they quietly transformed a form of surveillance billed as a tool to hunt terrorists and kidnappers into a staple of everyday policing.</p> <p>The suitcase-size tracking systems, which can cost as much as \$400,000, allow the police to pinpoint a phone's location within a few yards by posing as a cell tower. In the process, they can intercept information from the phones of nearly everyone else who happens to be nearby, including innocent bystanders. They do not intercept the content of any communications.</p> <p>Dozens of police departments from Miami to Los Angeles own similar devices. A USA TODAY Media Network investigation identified more than 35 of them in 2013 and 2014, and the American Civil Liberties</p>

Union has found 18 more. When and how the police have used those devices is mostly a mystery, in part because the FBI swore them to secrecy.

Police and court records in Baltimore offer a partial answer. USA TODAY obtained a police surveillance log and matched it with court files to paint the broadest picture yet of how those devices have been used. The records show that the city's police used stingrays to catch everyone from killers to petty thieves, that the authorities regularly hid or obscured that surveillance once suspects got to court and that many of those they arrested were never prosecuted.

Defense attorneys assigned to many of those cases said they did not know a stingray had been used until USA TODAY contacted them, even though state law requires that they be told about electronic surveillance.

"I am astounded at the extent to which police have been so aggressively using this technology, how long they've been using it and the extent to which they have gone to create ruses to shield that use," Stephen Mercer, the chief of forensics for Maryland's public defenders, said.

Prosecutors said they, too, are sometimes left in the dark. "When our prosecutors are made aware that a detective used a cell-site stimulator, it is disclosed; however we rely upon the Police Department to provide us with that information," said Tammy Brown, a spokeswoman for the Baltimore's State's Attorney. "We are currently working with the Police Department to improve upon the process to better obtain this information in order to comply with the law."

Baltimore is hardly alone. Police in Tallahassee used their stingray to track a woman wanted for check forging, according to records provided to the ACLU last year. Tacoma, Wash., police used theirs to try to find a stolen city laptop, according to records released to the website Muckrock. Other departments have acknowledged that they planned to use their stingrays for solving street crimes.

HEADLINE	08/24 NYC mayor security officer 'shot'
SOURCE	http://www.foxnews.com/us/2015/08/24/nyc-police-officer-assigned-to-guard-mayor-shot-with-pellet-gun/
GIST	<p>NEW YORK – Authorities say a police officer assigned to New York City Mayor Bill de Blasio's security detail was shot with a pellet gun in front of the mayor's home.</p> <p>It happened at Gracie Mansion, the mayor's official residence in Manhattan, around 7:15 p.m. Sunday. A police spokesman says the officer was exiting an unmarked police vehicle when she "felt pain in the lower back."</p> <p>Investigators believe she was shot with a pellet gun. She was taken to the hospital for treatment and released.</p>

	<p>Police say the mayor was not home at the time.</p> <p>An 18-year-old boy and a 17-year-old girl were taken into custody for questioning. No charges have been filed.</p>

HEADLINE	08/23 Calif. music festival shooting; 1 dead
SOURCE	http://www.nbcnews.com/news/us-news/after-california-music-festival-shooting-leaves-1-dead-7-injured-n414561
GIST	<p>A gunman shot eight people and killed one early Sunday morning after a sprawling music festival in California that featured Waka Flocka Flame, Tech N9ne and dozens of other performers, Modesto police said Sunday.</p> <p>The shooting occurred outside a warehouse a few miles from the festival, in an industrial section of Modesto, the police said in a release.</p> <p>"While attendees were waiting to get into the party, a black male adult walked into the parking lot and started shooting," police said.</p> <p>The gunman was not identified, and it was unclear why he opened fire.</p> <p>Zachary McGee, 25, died at the hospital, the release said. Two unidentified victims — a 23-year-old woman and a 25-year-old man — remained in critical and serious but stable condition, while five others were treated and released.</p> <p>The concert, called the X Fest, bills itself as the "biggest party" in California's Central Valley. This was its 15th year, and its lineup included 120 bands on 13 stages across 15 city blocks, drawing 20,000 people, according to the festival's Facebook page.</p>

HEADLINE	08/23 La. state trooper shot; suspect arrested
SOURCE	http://www.kplctv.com/story/29860967/lsp-trooper-shot-in-head-after-responding-to-traffic-incident-suspect-in-custody
GIST	<p>CALCASIEU PARISH, LA (KPLC) - A Louisiana State Trooper was shot in the head with a shotgun Sunday afternoon near Bell City, authorities said.</p> <p>Trooper Steven Vincent, 43, a 13-year veteran of the state police force, was airlifted to Lake Charles Memorial Hospital, where he is in critical condition, Col. Mike Edmonson said at a news conference</p>

	<p>Sunday evening. Vincent, a veteran, is married with a 9-year-old son. Both of his brothers are in law enforcement — Keith Vincent is the Chief of Police in Iowa and Terrell Vincent is a fellow state trooper.</p> <p>A suspect, Kevin Daigle, 54, was arrested. Edmonson said Daigle is to be charged with first-degree attempted murder of a police officer.</p>

HEADLINE	08/23 Ex-whistleblower in NYC shooting
SOURCE	http://www.cnn.com/2015/08/23/us/manhattan-shooting-whistleblower/index.html
GIST	<p>The man who authorities say shot and killed a security guard at a federal building in lower Manhattan on Friday had blown the whistle on a government agency housed in the building when he was an employee there 16 years ago, according to the shooter's New Jersey congressman.</p> <p>Kevin Downing was fired by the U.S. Department of Labor in 1999 in what he had said was retaliation for being a whistleblower, federal documents show. He had fought the termination ever since, most recently through Rep. Bill Pascrell Jr., the congressman's office said.</p> <p>Documents filed with the U.S. Merit Systems Protection Board, the government agency responsible for federal workforce issues, show that Downing, 68, alleged he was fired "based on his whistleblowing activities," which included complaining to members of Congress about the closing of the Bureau of Labor Statistics' New York regional office.</p> <p>Just after 5 p.m. Friday, Downing walked into the lobby of the building housing that office with a handgun and shot and killed 53-year-old security guard Idrissa Camara, authorities said. Moments later, Downing shot himself in the head.</p> <p>NYPD Chief of Department James O'Neill said Friday that a motive for the shooting was still under investigation, but that there was no indication the incident was linked to terrorism.</p>

HEADLINE	08/23 Mobile forensics lab key to Fogle bust
SOURCE	http://www.mlive.com/news/us-world/index.ssf/2015/08/post_47.html
GIST	<p>INDIANAPOLIS — When they arrived at Jared Fogle's home last month, law enforcement officials were armed with more than a search warrant: They rolled up with a mobile forensics laboratory that has revolutionized how Indiana investigates child-exploitation and pornography crimes and helped make the state a national model.</p>

	<p>While one investigator questioned the longtime Subway pitchman in one of the vehicle's two rooms, others watched the interview unfold on a screen in another room. At the same time, authorities searched computers, mobile devices and other media recovered from the suburban Indianapolis home.</p> <p>The custom-built lab allows investigators to feed real-time questions to interviewers based on what they find or what is missing. It also lets them preview data before computers or devices are shut off or erased. It helps identify other devices to look for inside the home. And it saves days, weeks or months of time compared with the old method of copying their contents.</p> <p>Indianapolis police detective Darin Odier said it's imperative that authorities develop new tools to keep up with changing technology, like the way that some people are using streaming video to show sexual abuse rather than storing the footage.</p> <p>"Just when we think we have some idea of what's going on, the bad guys change the game," Odier said.</p>

HEADLINE	08/23 Driver killed dragging cop w/vehicle
SOURCE	http://www.cbsnews.com/news/driver-killed-after-dragging-officer-in-wichita-kansas/
GIST	<p>Police said a driver was shot and killed after dragging an officer with his car during a routine traffic stop Saturday night in Wichita, Kansas.</p> <p>CBS affiliate KWCH reported the incident occurred around 10:10 p.m. in a parking lot on Kellogg Drive. "As the officer approached, at this time we believe a struggle did ensue, at which point the officer was dragged by the suspect's vehicle," police Lt. James Espinoza told the Wichita Eagle.</p>

	<p>Espinoza said the driver dragged the officer for "a very long distance... at which point shots were fired."</p> <p>While dragging the officer, the suspect attempted to drive east in the westbound lanes of traffic and hit another car head-on, according to Espinoza.</p> <p>The suspect, a white male, died at the scene. The officer was taken to a local hospital in serious condition.</p>

HEADLINE	08/23 Juror issued challenge in cop's trial
SOURCE	http://abcnews.go.com/US/wireStory/juror-issued-challenge-talks-officers-trial-33258124
GIST	<p>A juror who heard evidence in the trial of a white North Carolina police officer said he challenged his colleagues to determine what an unarmed black man did to lead the defendant to fatally shoot him.</p> <p>"I wrote on the board: 'What did Jonathan Ferrell do, and I underlined "do," to warrant death: 10 shots.' I had done this because there was nothing that I had seen in the weeks preceding that showed me what he had done," said juror Moses Wilson, who was one of the jurors who chose to convict Officer Randall Kerrick of voluntary manslaughter.</p> <p>"And I said that if anyone can show me what he did, I might change my vote — which is going to be for conviction — to acquittal, and every day, that was my challenge," he said.</p> <p>After four days of deliberations, the jury was deadlocked, 7-5 on an initial vote and 8-4 on the succeeding three votes. And when Judge Robert C. Ervin asked the jury foreman last Friday if further deliberations</p>

would resolve the impasse, the response was no. Ervin then declared a mistrial — a move that sparked protests outside the courthouse and elsewhere. At least two people were arrested.

Kerrick, who is suspended without pay from the force, fired 12 shots at Ferrell, hitting him 10 times. Prosecutors said nonlethal force should have been used to subdue Ferrell, a former Florida A&M football player, in September 2013. Two officers with Kerrick didn't fire their guns. One of those officers did use a Taser.

But Kerrick's attorneys said the officer feared for his life when he shot and killed Ferrell while responding to a breaking-and-entering call.

HEADLINE	08/23 Anti-kidnapping units Mexico border
SOURCE	http://www.breitbart.com/texas/2015/08/23/anti-kidnapping-unit-started-in-mexican-border-cities/
GIST	<p>MATAMOROS, Tamaulipas — In response to the rising number of kidnapping in the border city of Matamoros, authorities kicked off new anti-kidnapping units that is supposed to investigate and prosecute the crime. The units were also created to calm the public's anger at the continued lack of security conditions.</p> <p>With the group in Matamoros, there will be three anti-kidnapping units in Tamaulipas. One will be headquartered in Ciudad Victoria, one in Reynosa and the third in Matamoros. Their goal will be to highlight the high crime rate in the border cities despite the all too common speeches by public officials claiming that the border area is safe.</p> <p>Since February, the border cities of Matamoros and Reynosa have been ground zero for a bloody war between two rival factions of the Gulf Cartel. The conflict led to violent gun battles in broad daylight as well as a sharp spike in the number of kidnappings.</p> <p>According to government officials, the units is made up of trained investigators. They are equipped with state of the art equipment to allow them to target the criminal activity which has deeply hurt many citizens in this border area.</p> <p>In the border city of Reynosa, State officials have confirmed that there are more than 800 individuals who have been reported as missing or kidnapped. It remains unclear how many cases have gone unreported, Breitbart Texas reported.</p> <p>The goal of the units are to bring back a sense of peace to the area. They will attempt to learn the fate of the hundreds of travelers who went missing while travelling along the highways to and from this border city.</p>

HEADLINE	08/23 Police dog 'sniffs out' key evidence
SOURCE	http://www.ctvnews.ca/world/electronics-sniffing-police-dog-uncovered-key-evidence-in-jared-fogle-child-porn-case-1.2529927
GIST	<p>A police dog trained to sniff out electronics helped find a key piece of evidence in the Jared Fogle child pornography investigation, prosecutors said.</p> <p>“When somebody first told me there was a dog that could find storage media, I laughed. I didn’t believe them,” said Steven Debrot, the assistant district attorney in the case.</p> <p>But Bear, a two-year-old black Labrador retriever, recovered a USB thumb drive hidden in the former Subway pitchman’s home that human investigators had missed when they searched the property in July.</p> <p>The device, officials said, contained information crucial to the investigation and, ultimately, Fogle’s guilty plea.</p> <p>Bear is one of only four dogs in the U.S. trained to sniff out data storage devices such as USB drives and hard drives.</p> <p>Fogle, also known as “the Subway guy,” became known for his role in the sandwich chain’s advertising campaigns over more than a decade. On Wednesday, Fogle pleaded guilty to possessing and distributing child pornography charges as well as having sex with underage girls.</p> <p>With his job in the investigation done, Bear left for Seattle, Wash., on Friday to help with another case.</p>

HEADLINE	08/21 Tacoma skinheads get long jail terms
SOURCE	http://www.thenewstribune.com/news/local/crime/article31851942.html
GIST	Before he left the Cowlitz County city of Kalama for a trip to Tacoma in November 2013, Derek Wagner told his mother he'd be back soon to celebrate her birthday, promising it would be one she'd never forget.

On Friday in Pierce County Superior Court, Kristi Koethe told Shanne McKittrick and Eric Elliser they'd turned Wagner's promise into a horrifying reality.

"I'll never forget it because that was the last time I spoke to him," Koethe said at the sentencing hearing for the two men, who were convicted of second-degree murder in Wagner's death.

"I want you boys to know what you took from me. You took my life. You took all of me."

A jury in April convicted McKittrick and Elliser of murdering Wagner, 27, on a Tacoma street in a dispute involving an acquaintance's wife. Wagner's death came late Nov. 16 or early Nov. 17, a few days before Koethe's birthday.

On Friday, Judge Jack Nevin sentenced McKittrick, 33, to a high-end sentence of 24 years, 11 months in prison and Elliser, 35, to life without parole under the state's three-strikes law.

Deputy prosecutors James Schacht and Angelica Williams argued at trial that McKittrick and Elliser were upholding a skinhead code when they attacked Wagner, with McKittrick stabbing him multiple times.

Wagner, who had ties to the skinhead movement, had shown disrespect to another white supremacist by starting an affair with his wife, a transgression punishable by violence, the prosecutors argued.

McKittrick had goaded Wagner into a confrontation and used it as an excuse to kill him, the prosecutors said.

HEADLINE	08/21 Cocaine corridor into Ontario, Canada
SOURCE	http://www.stcatharinesstandard.ca/2015/08/21/cocaine-corridor-uses-busy-border-crossings
GIST	<p>With some of North America's busiest border crossings, and geography that pokes finger-like deep into the densely-populated U.S. mid-Atlantic and Midwest states, Southwestern Ontario is a major cocaine corridor to Canada, a smuggler's alley for vast amounts of the drug that blow through the region to markets in the nation's heartland, often on a route that begins thousands of kilometres away in Mexico.</p> <p>Snow, dust, nose candy -- the drug with many nicknames moves up the area's Highway 401 spine to the rest of Canada, following the same routes that make Southwestern Ontario a major gateway for legal trade.</p> <p>"A lot of the drugs -- particularly when we are referring to cocaine coming through the border -- do not remain in Southwestern Ontario, it transits to other major urban centres," said Staff Sgt. Peter Koersvelt of the RCMP in Windsor, who investigates drug-smuggling into Ontario from Michigan.</p>

While police-reported drug crimes in Windsor and London run more than four times higher for pot than for cocaine, according to Statistics Canada figures, down along the region's U.S. borders -- from its remote southwestern tip in Windsor, to the Niagara Peninsula -- cocaine dominates the illegal drug mountain.

An analysis of seven years of federal port-of-entry data, obtained under a freedom-of-information request, shows Canadian border guards seized cocaine worth \$207 million on the street at the region's six international bridges from 2007 to 2013, making it by far and away the top drug smuggled in.

SOURCE	http://fusion.net/story/180188/international-student-workers-summer-in-america/
GIST	<p>The beach is big business. The roughly 3.5 million trips per year to Delaware's Rehoboth Beach generate around \$630 million for the local economy according to Southern Delaware Tourism, a travel agency in nearby Georgetown, Del. And as the popular summer destination swells with D.C.-area beachgoers, so too does it fill up with international students in the U.S. on a J-1 visa.</p> <p>Over the weekend, Fusion spoke to some of the students who fry your fries, run your ring toss, swirl your soft serve, and secure you a beachside table. They come from Bulgaria, Russia, Poland, Lithuania, and Moldova, among other places, through a State Department program that "offers exchange participants a hands-on experience to learn about U.S. society and culture while sharing their own culture and perspectives with Americans."</p>

In fact, Ireland still sends more J-1 visa participants than any other country in the world. Nearly 275,000 students come to the United States on a J-1 visa every year, and, over the past 50 years, more than 150,000 of those participants have come from Ireland.

Though the point of the J-1 visa is to facilitate cultural exchange, Moldovan student Livia Lupu says that she has really only experienced one facet of American culture so far. “People yes, places no. When I finish working, I’ll go to Washington. Maybe New York.” Until then, she has her one day off a week. “I sleep,” she says.

Maria Kostadinova manages the Ice Cream Store on Rehoboth Avenue. She’s not a J-1 visa participant, but she used to be. She first came to Rehoboth two summers ago from Varna, Bulgaria. Now, she’s an international affairs major at the University of Virginia.

“I just decided that I loved it here,” Kostadinova said. “You meet different people every day, you meet different people every summer.” She’s come back to work at the Ice Cream Store every summer since she first arrived in May 2013.

“My first year here I got 40, 45 hours a week. We were probably 25 people working here. Now the kids are getting between 50-60 hours a week because there are less people,” she said.

Kostadinova estimates around 70 percent of the summer workers at the Ice Cream Store are there on J-1 visas. “I really don’t know,” she said when asked who they would hire without J-1 students. This year they have workers from Bulgaria, Lithuania, Turkey, Ecuador, and Serbia. Their employer provides them with housing, but they have to pay \$100 a week. Kostadinova said that most jobs also offer housing, but it depends on the employer.

The J-1 visa program has come under increased scrutiny in recent years.

Four years ago, 200 international students walked out of a Hershey packaging plant in Palmyra, Pa. They accused the agencies that arranged for their employment, as well as their employers, of misrepresenting the opportunity (there is not much cultural exchange to be had in overnight factory shifts. They also accused them of underpayment and abusive working conditions.

In a deal struck with the U.S. Labor Department in 2013, the students won \$213,000 in back wages and an additional \$143,000 for the health and safety violations present at the packing facility.

“I don’t know if I’m coming back or not,” Bulgarian student Vasilena Mitrova said in the back dining room of Gus & Gus. “We’ll see. I’m not going to think about next summer yet.”

HEADLINE	08/10 Japan to restart nuclear reactor
SOURCE	http://www.seattletimes.com/nation-world/world/japan-to-restart-1st-reactor-under-new-rules-since-crisis/
GIST	<p>TOKYO (AP) — A power plant operator said it will restart a reactor in southern Japan on Tuesday, the first restart under new safety requirements following the Fukushima disaster and a milestone for the nation's return to nuclear power.</p>

	<p>Kyushu Electric Power Co. said Monday that it will restart the No. 1 reactor at its Sendai nuclear plant Tuesday morning.</p> <p>The restart marks Japan's return to nuclear energy, breaking a four-and-half-year nuclear power impasse since the 2011 meltdowns at the Fukushima Dai-ichi nuclear power plant in northeastern Japan following an earthquake and tsunami. The disaster displaced more than 100,000 people due to radioactive contamination in the area.</p> <p>The Nuclear Regulation Authority affirmed the safety of the Sendai reactor and another one at the plant last September under stricter safety rules imposed after the accident, the worst since the 1986 Chernobyl explosion. The plans call for the second reactor to be restarted in October.</p> <p>The Sendai No. 1 reactor is scheduled to start generating power on Friday and reach full capacity next month.</p> <p>All of Japan's 43 operable reactors are currently offline. Of those, 23 others, including the other Sendai reactor, have applied for safety inspections and are in the process of restart approvals. Abe's government wants as many of them as possible to be put online to sustain the nation's economy, which now relies on imported energy.</p>

HEADLINE	08/09 Lake Chelan fire continues to grow
SOURCE	http://www.seattletimes.com/seattle-news/northwest/wolverine-fire-expands-crews-fight-to-protect-communities/
GIST	<p>Firefighters continued to keep Lake Chelan's Wolverine fire away from populated areas Sunday even as the fire grew about two square miles.</p> <p>The fire expanded to about 45 square miles (28,725 acres) by Sunday morning, and is 20 percent contained, according to the Northwest Interagency Coordination Center.</p> <p>Controlled burns in the fire's path Friday stalled its progress toward the resort area of Stehekin to the north and the retreat site, Holden Village, to the west in Chelan County. The blaze is about two miles east of Holden Village and a mile and a half southwest of Stehekin.</p> <p>"Crews were able to keep those under control and we are feeling better and better all the time that we are getting this thing stopped on the north end," fire-information officer Wayne Patterson said Saturday. "If we can hold onto that for another day, or two days, we'll be thinking we've got that northern end pretty well knocked down."</p>

HEADLINE	08/10 Drones getting in way of fire crews
SOURCE	http://www.stripes.com/news/us/drones-getting-in-way-of-emergency-responders-grounding-fire-crews-1.362252
GIST	SAN DIEGO — As Jason Thrasher lowered his helicopter to a park with seven firefighters aboard, he saw what he thought was another firefighting chopper battling a blaze that was threatening homes.

The California Department of Forestry and Fire Protection pilot suddenly identified the object as a four-rotor drone only 10 feet from his windshield, forcing him to make a hard left to avoid a collision about 500 feet above ground, according to a report he filed the next day.

"If that drone came through my windshield, I have no idea what could have happened," Thrasher said in a phone interview. "If that drone hits my tail rotor, for sure it's going to be catastrophic."

The near-miss last September in Nevada City, about 60 miles northeast of Sacramento, explains why drones have quickly become a serious nuisance and concern for firefighting pilots and other first responders, fueling calls for more oversight and self-policing in the skies.

The U.S. Forest Service has tallied 13 wildfires in which suspected drones interfered with firefighting aircraft this year — 11 since late June — up from four fires last year and only scattered incidents before.

Last month, the sighting of five drones in a wildfire that closed Interstate 15 in Southern California and destroyed numerous vehicles grounded crews for 20 minutes as flames spread.

Firefighting agencies have introduced public service announcements to warn drone hobbyists, while lawmakers are seeking stiffer penalties for interfering.

"When you can't support firefighters on the ground, fires get bigger," said Ken Pimlott, director of the California Department of Forestry and Fire Protection. "It's significant, and it's a huge issue."

HEADLINE	08/10 Questions of flight in damaging storm
SOURCE	http://www.cbsnews.com/news/delta-flight-hit-hail-lightning-storm-boston-salt-lake-city-lands-safely/
GIST	<p>Large hailstones slammed into the windshield of a Delta flight heading from Boston to Salt Lake City. Lightning also struck the plane before it made an emergency landing in Denver Friday night.</p> <p>It is the third time this summer an airliner has been damaged in a hailstorm, and now there are questions about why the pilots couldn't see the storms coming, but passengers could on their wireless devices, reports CBS News correspondent Kris Van Cleave.</p> <p>"The irony is that pilots flying small planes or sometimes passengers in the cabin with a personal electronic device have the ability to see weather information that the airline pilots flying their flight don't," CBS News aviation and safety expert Sully Sullenberger said.</p> <p>He said unlike passengers, pilots don't have access to the Internet in the cockpit, and their radar systems sometimes aren't able to detect weather patterns like hail storms.</p>

HEADLINE	08/09 DHS: don't make perilous journey
SOURCE	http://www.washingtontimes.com/news/2015/aug/9/immigration-campaign-tells-central-americans-not-t/
GIST	<p>The Department of Homeland Security is ramping up a new campaign to try to persuade Central American families not to make the perilous journey to jump the U.S. border, as new statistics suggest that last summer's surge could be happening again.</p> <p>The effort comes as the administration fights a federal judge who is trying to severely limit detention of illegal immigrant families, once again testing President Obama's standing in the Hispanic- and immigrant rights communities</p> <p>In a court filing last week, Border Patrol Deputy Chief Ronald Vitiello said they saw a rise in illegal immigrant families crossing into the U.S. in July, which was surprising as it breaks the usual pattern in which a decrease occurs as the year wears on and the immigrants' journey through the late-summer heat becomes more difficult.</p> <p>The Obama administration said things could get even worse should Judge Dolly M. Gee's decision to curtail detention of illegal immigrants stand, because it will serve as an invitation for more people to try — and to “incentivize” them to bring their children along on the dangerous trip, using them as human shields, of sorts, to avoid deportation.</p> <p>Hoping to head off a surge now, the administration kicked off a public relations campaign last week to send the message to would-be immigrants in Honduras, El Salvador, Guatemala and Mexico — and to their relatives already here in the U.S. who might encourage them — that there is no legal status awaiting them.</p>

HEADLINE	08/09 Spokane officers' shooting review
SOURCE	http://www.komonews.com/news/local/Officials-review-Spokane-officers-shooting-of-suspect-321197181.html
GIST	<p>SPOKANE, Wash. (AP) - The Spokane County Sheriff's Office says a team will review a fatal police shooting of a suspect during a gunfight over the weekend.</p> <p>Authorities say Spokane Police Department officers were trying to arrest a man who was wanted for a probation violation related to federal firearms charges on Saturday when they followed him to a home. The officers tried to talk to him, and additional officers arrived and set up a perimeter to keep him contained.</p> <p>The sheriff's office says the suspect shot at officers repeatedly, and the officers returned fire. Medics treated him at the scene and took him to a hospital, where he died. No one else was injured.</p> <p>The sheriff's office says the Spokane Investigate Regional Response Team and Spokane County Forensic Unit technicians will process evidence, interview witnesses and interview the officers involved. The regional response team comprises representatives of several Eastern Washington law enforcement agencies.</p> <p>Once the investigation is complete, the case will be forwarded to the Spokane County prosecutor for review.</p>

HEADLINE	08/09 Claim: how local cops score military gear
SOURCE	http://www.motherjones.com/politics/2015/08/new-documents-reveal-fearmongering-local-cops-use-score-military-gear-pentagon
GIST	<p><i>Mother Jones</i> obtained more than 450 local requests, filed over two years, for what may be the most iconic piece of equipment in the debate over militarizing local police: the mine resistant ambush protected vehicle, or MRAP.* And an analysis of these documents reveals that in justifying their requests, very few sheriffs and police chiefs cite active shooters, hostage situations, or terrorism, as police advocates do in public.</p> <p>Instead, the single most common reason agencies requested a mine-resistant vehicle was to combat drugs. Fully a quarter of the 465 requests projected using the vehicles for drug enforcement. Almost half of all departments indicated that they sit within a region designated by the federal government as a High Intensity Drug Trafficking Area. (Nationwide, only 17 percent of counties are HIDTAs.) One out of six</p>

departments were prepared to use the vehicles to serve search or arrest warrants on individuals who had yet to be convicted of a crime. And more than half of the departments indicated they were willing to deploy armored vehicles in a broad range of Special Weapons and Tactics (SWAT) raids.

By contrast, out of the total 465 requests, only 8 percent mention the possibility of a barricaded gunman. For hostage situations, the number is 7 percent, for active shooters, 6 percent. Only a handful mentioned downed officers or the possibility of terrorism.

"This is a great example of how police as an institution talk to each other privately, versus how they talk to the public and journalists who might raise questions about what they're doing with this equipment," says Peter Kraska, a professor at Eastern Kentucky University who has studied police militarization for decades. When police are pressured in public, Kraska says, "They're going to say, 'How about Columbine?' or point to all these extremely rare circumstances."

The requests flowed to a massive Pentagon program—known as the 1033 program—that has given communities across the country a total of \$5.6 billion in combat equipment left over from the wars in Iraq and Afghanistan, including, a spokeswoman for the Pentagon said, 625 MRAPs. A 2014 NPR analysis found that the Pentagon has also doled out 80,000 assault rifles, 200 grenade launchers, and 12,000 bayonets. In 2012, the program began making MRAPs available. The vehicles weigh around 14 tons, and feature armored hulls and tiny, blast-proof windows. "Nothing short of a rocket-propelled grenade will trouble this powerhouse," one manufacturer boasted.

The focus on drugs may owe partly to the fact that the Pentagon originally launched the 1033 program to help local agencies fight the domestic war on drugs. But starting with the terrorist attacks of September 11, 2001, the federal government vastly expanded the program, and created new, larger funding streams that help agencies purchase new combat equipment, under the guise of readying local police forces for future attacks.

Law enforcement advocates today dispute that police are using their heavy combat equipment primarily for drug enforcement. Jim Pasco, the director of the Fraternal Order of Police, suggests that police departments were probably just writing down what they thought the Pentagon wanted to hear. "In reality, they're almost exclusively used as defensive tools," Pasco says. It's a rare drug enforcement case that would require an MRAP, he adds. "We're talking barricaded shooters and downed officers."

But civil rights advocates have observed that SWAT teams—the specialized officers who use these vehicles—are now overwhelmingly deployed for drug raids and search warrants. In a 2014 report examining 800 raids, the American Civil Liberties Union found that SWAT teams replaced regular uniformed police officers in executing search warrants, mostly on private homes, in 80 percent of cases.

The raids disproportionately targeted minority residences, and evidence that the raid would be dangerous for the officers was often scarce. Sixty percent of the raids involved a drug search—meaning the subject of

	<p>the search warrant had not yet been convicted of a crime—and 36 percent of the raids turned up no contraband at all. Raids for minor drugs charges, the report continued, have frequently resulted in officers killing and maiming unsuspecting residents and even children—including a 19-month-old boy who was injured when an officer chucked a flash-bang grenade into his crib.</p> <p>"Most will agree that the line between military and local law enforcement needs to be clear," says Kanya Bennett, an attorney with the ACLU. "And when you're incorporating military weapons and equipment into day-to-day policing, that line becomes blurred, and it undermines the trust that previously existed between communities and police."</p>

HEADLINE	08/09 Social Security facing major problems
SOURCE	http://www.newsmax.com/Newsfront/social-security-turns-80/2015/08/09/id/669208/
GIST	As Social Security approaches its 80th birthday Friday, the federal government's largest benefit program stands at a pivotal point in its history.

Relatively modest changes to taxes and benefits could still save it for generations of Americans to come, but Congress must act quickly, and even limited changes are politically difficult.

The longer lawmakers wait, the harder it will become to maintain Social Security as a program that pays for itself, a key feature since President Franklin Roosevelt signed the Social Security Act on Aug. 14, 1935.

"The more time that they take, the less acceptable the changes will be because there needs to be adequate time for the public to prepare and to adjust to whatever changes Congress will make," Carolyn Colvin, acting commissioner of the Social Security Administration, said in an interview.

Social Security's long-term financial problems are largely a result of demographic changes. As baby boomers swell the ranks of retirees, relatively fewer workers are left to pay taxes.

In 1960, there were more than five workers for every person receiving Social Security. Today there are fewer than three. In 20 years, there will be about two workers for every person getting benefits.

"Remember, these are our most vulnerable population," Colvin said. "These are the elderly who helped to build this country. These are the disabled who certainly did not wish to become disabled."

The options fall into broad categories: benefit cuts, tax increases or a combination of both.

None is popular.

HEADLINE	08/07 Armed guards for Navy reserve centers
SOURCE	http://www.nbcnews.com/storyline/chattanooga-shooting/chattanooga-shooting-navy-plans-armed-guards-reserve-centers-n405931
GIST	<p>After a gunman killed four Marines and a sailor at a Navy Reserve Center in Chattanooga last month, the Navy plans to station armed guards at all of its reserve centers across the country, NBC News has learned.</p> <p>An email sent to Naval Reservists nine days after the attack, and obtained by NBC News, says "VOLUNTEERS NEEDED IMMEDIATELY!" to provide 45 days of "armed sentry watchstander duty" at 53 "NOSCs," or Navy Reserve Centers, beginning Aug. 17, and also asks for volunteers to provide a full year of armed sentry duty at 70 reserve centers starting Oct. 17.</p> <p>The Navy confirmed to NBC News that it plans to station armed personnel at all 70 reserve centers that are not located on military bases. The guards would be reservists called to active duty on an all-volunteer basis.</p>

HEADLINE	08/09 Israel cracks down Jewish extremists
SOURCE	http://abcnews.go.com/International/wireStory/israel-carries-interrogations-settlement-outposts-32972688
GIST	<p>Israel intensified its crackdown on Jewish extremists Sunday, imprisoning two high-profile ultranationalist Israelis for six months without charge and arresting additional suspects in West Bank settlement outposts, security authorities said.</p> <p>The crackdown comes after a deadly July 31 firebomb attack on a Palestinian home in the West Bank that killed an 18-month-old boy and his father and severely wounded his mother and brother.</p> <p>Tensions have soared since that attack and on Sunday, Israeli troops shot and killed a Palestinian who had stabbed an Israeli in the West Bank, wounding him lightly.</p>

	Authorities called the arson attack an act of "Jewish terrorism," and Israel's Security Cabinet approved the use of harsh measures to combat the trend, including administrative detention, which allows suspects to be held for lengthy periods without charge.

HEADLINE	08/09 Firefighter killed battling Calif. blaze
SOURCE	http://abcnews.go.com/US/wireStory/us-forest-service-firefighter-killed-battling-blaze-32972924
GIST	<p>The U.S. Forest Service says one of its firefighters was killed Saturday evening in the Lake Tahoe area after he was struck by a tree while battling a wildfire.</p> <p>The agency says in a news release that the firefighter was hit about 5:30 p.m. while working in a remote area between the Lake Tahoe Basin Management Unit and Eldorado National Forest. The release did not identify him or provide an age.</p> <p>The Forest Service says a second male firefighter who was also injured in the incident has been treated and released from a nearby hospital.</p> <p>On July 30, a firefighter was killed by a wildfire in the Modoc National Forest while he scouted the area for ways to fight the blaze, officials said Saturday.</p>

HEADLINE	08/08 Protestors shutdown political rally
SOURCE	http://thehill.com/blogs/blog-briefing-room/news/250667-protesters-interrupt-bernie-sanders-rally
GIST	<p>Protesters who claimed affiliation with the Black Lives Matter movement stormed the stage during a rally for Sen. Bernie Sanders (I-Vt.) in Seattle on Saturday, taking over the microphone and forcing Sanders to leave without ever speaking.</p> <p>Moments after Sanders took the stage at Westlake Park, two women and one man climbed the stage and confronted the Democratic presidential candidate, demanding a chance to speak.</p> <p>After several moments of confusion and confrontation, an event organizer took the microphone and said the protesters would be allowed to speak before Sanders. Some in the crowd booed.</p> <p>After the protesters and organizers continued the confrontation on stage, Sanders waved to the crowd and walked off the stage.</p> <p>He entered the crowd to greet supporters, who chanted his name as he shook hands.</p>

	<p>The event, entitled "Social Security Works," was organized to celebrate the 80th anniversary of Social Security and the 50th anniversary of Medicare. Rep. Adam Smith (D-Wash.) and Seattle council-member Kshama Sawant spoke earlier at the event.</p> <p>During the NetRoots Nation interruption, Sanders still attempted to speak to the crowd and mentioned the issues facing the criminal justice system.</p> <p>"Black lives, of course, matter. I spent 50 years of my life fighting for civil rights and for dignity," he said. "But if you don't want me to be here, that's OK. I don't want to outstream people."</p> <p>He has also talked about policing issues on other occasions during his bid for the White House.</p> <p>The event supporting Social Security and Medicare is one of a sweep of campaign stops Sanders has on the calendar for his swing through Seattle.</p>

HEADLINE	08/08 Cops kill 24 unarmed black men 2015
SOURCE	http://www.washingtonpost.com/sf/national/2015/08/08/black-and-unarmed/
GIST	<p>It begins with a relatively minor incident: A traffic stop. A burglary. A disturbance. Police arrive and tensions escalate. It ends with an unarmed black man shot dead.</p> <p>That pattern played out in March in Madison, Wis., where police responded to reports of a man yelling and jumping in traffic.</p> <p>It was repeated two months later in Los Angeles, where beachgoers complained that a homeless man was harassing people on the Venice boardwalk.</p> <p>It surfaced again in Cleveland, where police were called to a burglary at a corner store. And in Tallahassee, where a man was reported banging on someone's door. And last month in Cincinnati, where Samuel DuBose, 43, wound up with a bullet in his head after being pulled over for driving without a front tag.</p> <p>Perhaps most infamously, the pattern played out one year ago Sunday in Ferguson, Mo., where a white police officer searching for a convenience-store robber shot and killed an unarmed black teenager. That incident sparked a national movement to protest police treatment of African Americans and turned 18-year-old Michael Brown into a putative symbol of racial inequality in America.</p> <p>So far this year, 24 unarmed black men have been shot and killed by police - one every nine days, according to a Washington Post database of fatal police shootings. During a single two-week period in</p>

	<p>April, three unarmed black men were shot and killed. All three shootings were either captured on video or, in one case, broadcast live on local TV.</p> <p>Those 24 cases constitute a surprisingly small fraction of the 585 people shot and killed by police through Friday evening, according to The Post database. Most of those killed were white or Hispanic, and the vast majority of victims of all races were armed.</p> <p>However, black men accounted for 40 percent of the 60 unarmed deaths, even though they make up just 6 percent of the U.S. population. The Post's analysis shows that black men were seven times more likely than white men to die by police gunfire while unarmed.</p>

HEADLINE	08/09 Super typhoon kills 12 in China
SOURCE	http://www.cnn.com/2015/08/09/asia/china-taiwan-typhoon-soudelor/index.html
GIST	<p>At least a dozen people have died and five are missing in the eastern Chinese city of Wenzhou in the wake of Typhoon Soudelor, according to the state-run Xinhua news agency, which cited local disaster management officials.</p> <p>It was one of the strongest storms anywhere in the world so far this year, with peak winds at 180 miles per hour, according to the Joint Typhoon Warning Center. The West Pacific Basin has seen 10 typhoons so far this year.</p> <p>Soudelor made landfall Saturday night in the city of Putian, in China's southern Fujian province. More than 185,000 people moved to higher ground, Xinhua reported. The typhoon weakened as it moved inland toward the northwest.</p> <p>Earlier Saturday, it hit Taiwan north of the city of Hualien. One city in northern Taiwan saw a wind gust measured at 210 kilometers per hour (130 miles per hour).</p> <p>Soudelor pounded Taiwan on Saturday with sustained winds of 52 miles per hour, the center said. Meteorologists said that Taipingshan received 40 inches of rain in two days.</p>

HEADLINE	08/08 Not just cops; bad prosecutors as well
SOURCE	http://www.thedailybeast.com/articles/2015/08/08/it-s-not-just-cops-prosecutors-run-wild.html
GIST	<p>One year ago, Michael Brown was shot dead by a police officer. Since then, the nation has debated the justice system more feverishly than any other period in recent memory. Most of the scrutiny has rightly fallen upon the police, which is where the justice system meets the people viscerally and sometimes</p>

fatally. Cops only have the power to arrest, though; the power to prosecute and put millions of Americans in prison—and more than a few to death—rests with prosecutors.

And too many are abusing that power.

Suppressing evidence, coddling informants, even outright lying are some of the instances of prosecutorial misconduct that sent away nearly half the 1,621 people convicted for crimes they didn't commit since 1989, according to the University of Michigan Law School's National Registry of Exonerations. These are only the cases we know about, and they are surely only a fraction of the wrongly convicted. Even so, the figure is stunning—especially when you consider that 115 of them were people condemned to die.

The punishment for bad prosecutorial misconduct is virtually nil. In a 2011 report on 707 such cases, only six prosecutors were disciplined. Almost all still have their licenses, and are still practicing law.

Almost nothing is being done to systematically fix prosecutorial misconduct despite multiple avenues available for reform and bipartisan agreement that there's an epidemic on our hands. But, let's face it, convicted criminals (even wrongfully convicted ones) don't play well at the polls.

America is the only country in the world in which many prosecutors are elected—and many of them run as being “tough on crime.” The disciplinary commission that sanctioned Durham County, North Carolina District Attorney Michael Nifong—prosecutor of the Duke lacross team on false rape charges—noted his upcoming primary election as a motivating factor for his misconduct. The pressure to produce wins has led to a “win-at-all-costs” mentality in some offices, especially when voters reward such behavior.

Perhaps most importantly, prosecutors are granted immunity for most kinds of misconduct. It's easy to see the reasons for this policy: otherwise, every well-heeled convict would sue, clogging the system and making it impossible for prosecutors to do their jobs. At the same time, that immunity is so absolute that prosecutors simply get off scot-free, even when misconduct is established. Even worse, most states lack any meaningful oversight of prosecutors: no commissions, no review boards, nothing.

Then there's race. Ninety-five percent of elected prosecutors are white, and two-thirds of the states that elect prosecutors have no black ones. Yet 40 percent of the incarcerated population is black and one in three black men will have spent time in prison. How is the justice system supposed to be seen as fair when this crucial element of it is almost exclusively run by white people?

HEADLINE	08/07 Hot temps kill trout in hatchery
SOURCE	http://www.komonews.com/news/local/Hot-temperatures-kills-5400-trout-in-state-hatchery-321103781.html
GIST	<p>BELLINGHAM, Wash. -- Washington State's record high temperatures and low water levels are causing yet another massive fish die off -- this time at a state fish hatchery near Bellingham.</p> <p>Fish hatcheries help counter the human impact on natural fish populations. People have had to rely on them more and more. But at a hatchery near Bellingham, more than 5,000 trout are dead. Some can still be seen dying. Only a few hundred trout survive.</p> <p>"It's always a kick to the stomach," said Washington Department of Fish and Wildlife Regional Hatchery Manager Kevin Clark. "I mean these are fish that we've cultured for over a year."</p> <p>Because the hatchery uses surface water from nearby Whatcom Lake, it's coming in hotter than normal and then further bakes under the summer sun in cement ponds.</p> <p>Regional hatchery manager Kevin Park said they tried shading with tarps, but it didn't work. He says he may resort to shutting down this hatchery during summer and moving some of the operation to hatcheries that are fed with cooler well water.</p> <p>The die off means nearby lakes in Whatcom County will not get the normal stock of trout. But the bigger question: Are higher temperatures, lower water levels and warmer water likely to be part of a new normal for not just fisheries but a myriad of other environmental issues?</p>

HEADLINE	08/07 District water wells running dry
-----------------	---

SOURCE	http://www.kirotv.com/news/news/water-districts-wells-across-washington-running-dr/nnF26/
GIST	<p>The Startup Water District declared a water emergency; one of the district's only two wells went dry and now the water district is charging customers extra for using more than 7,500 gallons of water a month.</p> <p>A bar can't exactly stop serving drinks so they are trying to conserve elsewhere. One place they're taking the hit is the lawn; Hughes says they've stopped watering the grass. It now looks a lot like the Skykomish River-- bone dry.</p> <p>"This is as low as I've ever seen this river in 16 years that I've lived up here," Dano Drinnin told us, standing on the bank.</p> <p>But what may be most concerning-- 1,400 water districts are in the same boat as Startup with one water source, many 50 feet deep or shallower, and when the water runs dry in one district, they often have to buy from another. In Snohomish County that's typically the city of Everett and already dangerously low Spada Lake.</p> <p>"There's going to be more draw on that lake, not only because people are using more water but because more people are using water," explained Snohomish County Fire District 5 Chief Merlin Halverson.</p> <p>With fires up 12 percent, that's a very scary concept for Halverson. When fighting a fire in Startup he takes this tender carrying 3,000 gallons of Sultan's water.</p> <p>"The reason we fight fire with water, one of the reasons is, it's plentiful and easily accessed," says Halverson-- or at least WAS.</p>

HEADLINE	08/07 Drought driving down lakes levels
SOURCE	http://www.king5.com/story/news/local/seattle/2015/08/07/drought-driving-down-seattle-lake-levels/31325693/?csp=nbcnews
GIST	<p>SEATTLE - The U.S Army Corps of Engineers says because of the drought, the official water level in Lake Union, Lake Washington, the Ship Canal and connected waters is already nearly two feet below the spring peak in April.</p> <p>It is now forecast to drop about another foot before fall rains kick in. That's a three foot drop. A four foot drop would exceed the official record low set back in 1958 of 18.3 feet. That's the height above mean sea level when the locks were completed in the early 1900s.</p> <p>Because of conservation measures, the Corps does not expect to meet or exceed the old record, even though this is considered a record drought for the state.</p>

	<p>The Corps of Engineers tries to keep the lake within a two-foot range. But levels are set to exceed that range because the amount of rainfall and runoff coming into the lake won't match the amount of water evaporating and the water needed to run the locks in Ballard.</p> <p>Conservation measures have been in place since spring, including an increased reliance on the smaller of the two locks and filling those locks with as many boats as possible. Waits for pleasure boats at the locks can run up to an hour.</p> <p>For the Washington State Department of Transportation, the lake level would have to drop six feet or more before the floating bridges would be impacted. But Seattle's large houseboat community could be at greater risk, particularly homes floating near shore.</p>

HEADLINE	08/07 Australia turns back asylum seekers
SOURCE	http://www.cnn.com/2015/08/07/world/australia-boat-turnbacks/index.html
GIST	The government of Prime Minister Tony Abbott has revealed Australia has turned back 633 asylum seekers on 20 boats as part of a strict but highly contentious migration policy.

	<p>Minister for Immigration and Border Protection Peter Dutton revealed the numbers in a statement on Thursday, which marked the one-year anniversary of the last boat to arrive on Australian shores. Canberra usually declines to provide specific details on boat turn-backs.</p> <p>"We have had 20 successful turn-back operations," he told reporters. "We have had 633 people that would have arrived otherwise on those ventures."</p> <p>Australia started turning boats backs in December of 2013, under the controversial Operation Sovereign Borders, shortly after Abbott was elected to power.</p> <p>However, Australia has faced mounting international criticism after the U.N. refugee agency reported in May that it had paid human smugglers to turn back, and over its treatment of refugees in offshore detention centers.</p>

HEADLINE	08/09 FBI intensifies Twitter monitoring
SOURCE	http://news.softpedia.com/news/retweeting-an-isis-tweet-will-get-you-on-the-fbi-s-watchlist-488851.shtml
GIST	<p>In an interview for The Huffington Post, FBI director James Comey has made it pretty clear that any ISIS-friendly action on Twitter will get US residents onto their watchlist, or even worse.</p> <p>Talking about the fine line between free speech and actual intentions, Mr. Comey has said, "You have to manifest a criminal intent to further the aims prohibited by the statute."</p>

This doesn't mean that one random tweet, a news story, or an academic performing research and then sharing it on Twitter will put anyone on a no-fly list, but having a clear intention to aid the terrorist group will get them in serious trouble.

And by serious trouble he means a legal inquiry like the ones facing Keonna Thomas, Arafat Nagi, Bilal Abood, or Ali Shukri Amin.

Mrs. Thomas is now charged with attempting to provide material support for ISIS after constantly re-posting ISIS tweets to her followers.

Mr. Nagi is currently arrested after lying to FBI agents. A search of his Twitter account showed he was following and was followed by official ISIS members.

Mr. Abood actually went on to pledge obedience via Twitter to Abu Bakr al-Baghdadi, the leader of the Islamic State. He was also arrested by the FBI after lying about the incident.

All of these are scenarios that show the FBI's interest in the social network, which has recently become a watering hole for all kinds of terrorist groups, not just ISIS.

HEADLINE	08/10 Industrial hacking: the untold story
SOURCE	http://www.computerweekly.com/news/4500251365/BlackHat-2015-Industrial-hacking-the-untold-story
GIST	<p>Hacking of industrial plants for extortion is one of the biggest untold stories because such attacks are seldom reported, according to Marina Krotofil, a researcher at Hamburg University of Technology.</p> <p>Hackers have been penetrating industrial control systems of utility companies on a large scale for extortion since at least 2006, she told visitors to BlackHat USA 2015 security conference in Las Vegas.</p> <p>“Yet, almost 10 years later, we still know almost nothing about how the attackers are doing that because targeted companies are unwilling to make any information available,” she said.</p> <p>Most of the attacks on operational technologies in the past 20 years have not been reported, which means exactly how attackers interact with industrial control systems remains unknown.</p> <p>While the hacking of industrial control systems, including Scada systems, is commonly associated with causing physical damage, Krotofil said extortion is the most prevalent motivation.</p> <p>“The most common goal is to be able to cause persistent economic damage,” she said, adding that targeted companies will be willing to pay large sums of money to stop it from happening.</p>

	<p>Alternatively, attackers want to remain in the system undetected to cause as much economic damage as possible on behalf of competitors or any other hostile parties. The most common goal of attackers, therefore, is to impact the industrial production process so it affects the quality of the end product or raises operational and maintenance costs.</p> <p>“However, most of these cases are not reported because if there is no compliance violation companies are not legally required to do so, and they are usually unwilling to risk damage to the reputation of the brand by going public,” said Krotofil.</p>

HEADLINE	08/09 Ashley Madison site linked to spam
SOURCE	http://www.christiantoday.com/article/ashley.madison.hack.update.spam.links.promising.access.hacked.database.surface/61405.htm
GIST	<p>One of the most recent cyber hacks was, surprisingly, not to a government installation with hackers trying to gain access to highly classified information. Rather, a group of hackers decided to raid the servers of one adult date finder site, get all of the personal data of the customers, and threaten to release the information online if the website does not shut down.</p> <p>Ashley Madison is an adult date finder site that seeks to partner couples online. However, unlike other dating sites, Ashley Madison is one of those who cater to the married ones, enticing customers to have an extramarital affair.</p> <p>The attack on Ashley Madison exposed at least 37 million customers, with their personal data in danger of being released online. Currently, the hackers who did the breaching, calling themselves the Impact Team, are still threatening to release the data to the online world.</p> <p>Meanwhile, the attack on the website is also being used to spam unsuspecting curious readers. According to the reports, spam sites and links promising access to the hacked database are currently appearing online. Different links are flourishing in the wake of the attack, encouraging readers to take a sneak peek at the hacked customer database. These spam range from email correspondences to expertly camouflaged news links on social media sites.</p>

	Experts warn of these spam links, as aside from exposing themselves to malware, these links can also pose as phishing clickbaits and get personal information about the user. Some news sites have also investigated the spam links and other than false data and malware, no sign of the hacked database can be seen.

SOURCE	http://www.arabianbusiness.com/-no-emails-no-phones-nothing-how-saudi-aramcoworld-s-biggest-oil-company-survived-debilitating-cyber-attack-602094.html#.Vch3RvIVhBc
GIST	<p>An independent cyber security consultant has described how Saudi Aramco had to get by on typewriters and paper, after the August 2012 cyber-attack that disabled more than 30,000 of the company's workstations for almost two weeks.</p> <p>A cyber cabal calling itself "Cutting Sword of Justice" launched the hacktivist campaign against the state-controlled oil company in protest against the ruling Al Saud family. The gang's Shamoon virus hit systems for several hours on 15 August, 2012, before admin staff shut down machines as a mitigating measure.</p> <p>Aramco's public statements at the time claimed oil production had not been affected, but in December 2012 the company admitted that critical infrastructure had been the intended target.</p>

	<p>Speaking at this week's Black Hat conference in Las Vegas, Chris Kubecka, who was tasked with securing Aramco's EMEA satellite offices in the wake of the attack, said the oil giant initially had, "No emails, no phones, nothing", according to a report from the darkreading.com website.</p> <p>Aramco, which claims on its website to have maximum sustainable capacity of 12 million barrels per day, had invested heavily in protecting the production infrastructure itself, but Shamoon targeted PCs, email servers and other, less critical systems.</p> <p>The company "got pwned [owned]", Kubecka said, employing a phrase used by hackers and gamers to denote victory over a target. She said the attack was traced to an Aramco employee's errant click on a malicious link in a spear-phishing email, but the precise time the email was sent remains a mystery.</p>

HEADLINE	08/07 Firm claims victim of \$47M cyber scam
SOURCE	http://www.nbcnews.com/tech/security/ubiquiti-networks-says-it-was-victim-47-million-cyber-scam-n406201
GIST	<p>Ubiquiti Networks, a Silicon Valley computer networking company, says it was scammed of nearly \$47 million by cyber thieves. In an SEC filing this week, Ubiquiti said it expects to recoup about \$15 million of that amount and is working with law enforcement to recover the remainder.</p> <p>The company said it determined on June 5 that it was the victim of "criminal fraud" involving "employee impersonation and fraudulent requests from an outside entity targeting the Company's finance department." The scam led to the transfer of \$46.7 million held by a Ubiquiti subsidiary incorporated in Hong Kong to other overseas accounts held by third parties, the company said.</p> <p>Ubiquiti, whose founder and CEO is Robert Pera, owner of the Memphis Grizzlies basketball team, didn't disclose details of the scam. Cybersecurity blogger Brian Krebs said the swindle that hit the company is commonly known as "CEO Fraud," or the "Business Email Compromise," in which cybercriminals use "phishing" and other email spoofs to target businesses that regularly perform foreign wire transfers.</p>

HEADLINE	08/08 Survey: 88% adults engage in sexting
SOURCE	http://www.cnn.com/2015/08/08/health/sexting-adults-online-survey-feat/index.html
GIST	<p>Think sexting is just for carefree (or careless) teens? Think again.</p> <p>Researchers at Drexel University's Women's Health Psychology Lab conducted an online survey to explore the potential benefits of sharing sexually explicit messages or images through electronic means, cell phones in particular.</p>

	<p>Preliminary findings suggest some correlation between sexting and relationship satisfaction, the researchers said.</p> <p>Among 870 respondents surveyed online who identified as adults in the United States between the ages of 18 and 82, 88% reported having sexted at least once. A slightly lower number of respondents, 82%, reported sexting in the past year, according to an abstract published on the American Psychological Association's website.</p> <p>The research, which was presented Saturday at the APA's annual convention, is in the process of being submitted for publication in peer-reviewed journals, said co-author Emily C. Stasko, a clinical psychology PhD student at Drexel.</p>

HEADLINE	08/09 Gas pumps not safe from hackers
SOURCE	http://www.techtimes.com/articles/75107/20150809/u-s-gas-pumps-are-not-safe-from-hackers-what-to-know.htm
GIST	<p>If you thought hackers could only wreak havoc in certain areas, think again. Gas stations in the U.S. too are vulnerable to cyberattacks as researchers at Trend Micro show.</p> <p>Post the hacking of a monitoring system of a gas station earlier in January 2015, where the system's name was changed to "We Are Legion" from "Diesel," Stephen Hilt and Kyle Wilhoit - both researchers at Trend Micro who call themselves the FTR or Forward-Looking Threat Research team - thought of delving deeper into the area.</p> <p>The researchers created a fake Internet-connected system dubbed GasPots in countries around the world in a bid to track the movements of the hackers. The 10 fraud GasPots or monitoring systems acted as online honeypots and any person (including cybercriminals) who sought them out would think they were the real deal as they resembled the authentic Guardian AST, which are gas monitoring devices. The AST basically controls and keeps a check of the fuel levels in the tanks at a gas station. When the level of fuel decreased the operators are alerted.</p> <p>During a period of six months, the FRT team saw several attacks on the planted GasPots, most of which were harmless. Interestingly, the U.S.-based honeypots were the ones which were targeted more when compared to other countries.</p>

HEADLINE	08/09 UK cellphone provider hacked
SOURCE	http://www.bloomberg.com/news/articles/2015-08-09/u-k-data-agency-looking-into-cyber-attack-at-carphone-warehouse

GIST	<p>The U.K.'s data protection watchdog said it is looking into a cyber-attack on mobile phone retailer Carphone Warehouse.</p> <p>"The ICO is aware of an incident at Carphone Warehouse and is making inquiries," Robert Parker, a spokesman for the Information Commissioner's Office, said by phone on Sunday. The retailer, owned by Dixons Carphone Plc, took immediate action to secure its systems, it said in a statement on Saturday.</p> <p>The personal details and bank information for as many as 2.4 million customers may have been accessed in a breach detected at a division of the company on Aug. 5, according to the retailer. Encrypted credit card data of up to 90,000 clients may also have been accessed.</p> <p>The business affected by the breach operates OneStopPhoneShop.com, e2save.com and Mobiles.co.uk while also providing a number of services to iD Mobile, TalkTalk Mobile and Talk Mobile, it said. The company and its partners will inform customers who may be affected and offer advice to minimize inconvenience, Carphone Warehouse said.</p>

HEADLINE	08/08 Online death records easy to be hacked
SOURCE	http://news.yahoo.com/rush-put-death-records-online-lets-anyone-killed-074408319.html
GIST	<p>Las Vegas (AFP) - Hackers at an infamous annual Def Con gathering in Las Vegas got schooled in how to be online killers.</p> <p>A rush to go digital with the process of registering deaths has made it simple for maliciously minded folks to have someone who is alive declared dead by the authorities.</p> <p>"This is a global problem," Australian computer security specialist Chris Rock said as he launched a presentation titled "I Will Kill You."</p> <p>The process of having someone officially stamped dead by getting a death certificate issued typically involves a doctor filling out one form and a funeral home filling out another, according to Rock's research.</p> <p>Once forms are submitted online, certificates declaring the listed person legally dead are generated.</p> <p>A fatal flaw in the system is that people can easily pose as real doctors and funeral directors, Rock demonstrated to a rapt audience. Doctors practising general medicine often don't bother setting up accounts at online portals for filling out information for death certificates.</p> <p>An aspiring online assassin can step into that void, and borrow the identity of a doctor.</p>

HEADLINE	08/09 Oil dispute threatens a divided Iraq
SOURCE	https://www.washingtonpost.com/world/middle_east/a-new-fight-over-oil-shows-why-its-so-hard-to-keep-iraq-from-splintering/2015/08/09/a17fd04e-240a-11e5-b621-b55e495e9b78_story.html?hpid=z1
GIST	<p>BAGHDAD — Iraq's Kurdish region has begun to sell oil independently of the central government, a move that is exacerbating divisions in the country as it struggles to turn back Islamic State militants.</p> <p>The Kurdish region last month stopped transferring oil to the state as it had promised to do under a landmark deal in 2014. Kurdish officials argued that payments from Baghdad had not been sufficient. Instead, the region exported more than 600,000 barrels a day itself, Kurdish and Iraqi officials said, a step that Baghdad considers illegal.</p> <p>The dispute threatens to widen differences in a country already effectively split into three parts: the Kurdish north, areas in southern and central Iraq controlled by the Shiite-led government, and territory in the north and west seized by the Islamic State.</p>

HEADLINE	08/10 Leftist group in US consulate attack?
SOURCE	http://abcnews.go.com/International/wireStory/report-assailants-fire-shot-us-consulate-istanbul-32983742
GIST	<p>Two assailants opened fire at the heavily protected U.S. Consulate building in Istanbul on Monday, touching off a gunfight with police before fleeing the scene, Turkish media reports said.</p> <p>One of the assailants, a woman, was later captured at a nearby building and hospitalized. Turkey's state-run Anadolu Agency, quoting unnamed police sources, said she has been identified as a member of a banned leftist group. The Istanbul governor's office said police were searching for a second woman involved in the attack.</p> <p>Anadolu named the captured assailant as 42-year-old Hatice Asik and said she is a member of the far-left Revolutionary People's Liberation Army-Front, or DHKP-C. The group claimed responsibility for a 2013 suicide attack on the U.S. Embassy in Ankara, which killed a Turkish security guard.</p>

HEADLINE	08/10 Study: Iran terror funding gets boost
SOURCE	http://freebeacon.com/national-security/study-iran-terror-funding-gets-4-8-billion-boost-under-uke-deal/
GIST	<p>Sanctions relief provided to Iran under a recently inked nuclear accord is expected to boost the Islamic Republic's military spending by nearly \$5 billion dollars, with much of that money going to fund Iran's terror forces, according to a new study by a Washington, D.C.-based think-tank.</p> <p>Under the parameters of the deal, Iran will receive nearly \$150 billion in sanctions relief and cash assets. Because the money comes with no strings attached, it is expected that Iran will spend the money to fund its global terrorism operation, as well as its defense sector.</p> <p>The cash windfall will allow Iran to put another \$4.8 billion into its defense budget if current spending trends remain the same, according to a new study by the American Action Forum (AAF).</p> <p>The study comes amid multiple reports indicating that Iran is building a series of new weaponized drones, missile defense shields, and other types of military hardware meant to deter an attack from Western forces in the region.</p> <p>Iran is currently spending about 3.4 percent of its total public budget on defense, according to AAF, which used official documents published by Iran to conduct its study.</p> <p>About 65 percent of the money budgeted for defense is spent on Iran's Revolutionary Guard Corps (IRGC), the elite paramilitary fighting force that is known to coordinate and conduct terror activities across the globe.</p> <p>"If current budget trends persist, the Iran deal would mean at least \$4.8 billion in additional Iranian defense spending and a 50 percent budget increase for the IRGC," AAF concludes.</p>

HEADLINE	08/08 Afghanistan getting more violent
SOURCE	http://www.nbcnews.com/news/world/u-s-legacy-afghanistan-culture-guns-arbaki-police-drive-violence-n405736
GIST	<p>KABUL, Afghanistan — What started as a wedding with hundreds of guests eating and dancing ended in tragedy when armed men took out their AK-47s and fired into the crowd of revelers.</p> <p>The bride and groom survived, but 22 others died in the Afghan village of Shashan on July 26 — 16 of them relatives of Mohammad Ghani, a police officer who witnessed the massacre firsthand. Powerless to prevent the attack, Ghani says he doesn't know what prompted onslaught.</p> <p>"There was no reason for these guys to shoot except that they had guns and could," the 44-year-old said. "None of the culprits have been caught even though they are part of a well-known band of outlaws."</p> <p>The massacre is part of a much larger problem that he says is growing throughout the country.</p> <p>"The culture of guns disappeared for a few years, but it is coming back and it is causing insecurity in areas that were safe and secure a year or two ago," he said.</p> <p>Afghanistan is becoming more violent. Armed groups — some supported by the U.S.-backed government in Kabul and who act as local police forces known as "Arbaki," others fighting to overthrow that government, and some that are just gangs of bandits — are wreaking havoc in parts of Afghanistan.</p>

	<p>So despite some \$110 billion the U.S. has spent on relief, reconstruction and military aid to Afghanistan, the country is arguably more dangerous than it has been since the Taliban fell to American-backed forces nearly 15 years ago.</p> <p>Afghan civilian casualties are hitting their highest levels on record, with 1,592 killed and 3,329 injured during the first six months of the year, according to the United Nations. When the U.N. began to systematically compile casualty statistics in 2009, they recorded 1,052 deaths and 1,439 injured over the same period.</p> <p>As foreign troops continue to draw down sharply with plans to leave completely in 2016, the government says that an average of between 10 and 15 Afghan national army and police members are being killed every day.</p>

SOURCE	http://abcnews.go.com/International/wireStory/top-command-dominated-officers-saddams-army-32962309
GIST	<p>While attending the Iraqi army's artillery school nearly 20 years ago, Ali Omran remembers one major well. An Islamic hard-liner, he once chided Omran for wearing an Iraqi flag pin into the bathroom because it included the words "God is great."</p> <p>"It is forbidden by religion to bring the name of the Almighty into a defiled place like this," Omran recalled being told by Maj. Taha Taher al-Ani.</p> <p>Omran didn't see al-Ani again until years later, in 2003. The Americans had invaded Iraq and were storming toward Baghdad. Saddam Hussein's fall was imminent. At a sprawling military base north of the capital, al-Ani was directing the loading of weapons, ammunition and ordnance into trucks to spirit away. He took those weapons with him when he joined Tawhid wa'l-Jihad, a forerunner of al-Qaida's branch in Iraq.</p> <p>Now al-Ani is a commander in the Islamic State group, said Omran, who rose to become a major general in the Iraqi army and now commands its 5th Division fighting IS. He kept track of his former comrade through Iraq's tribal networks and intelligence gathered by the government's main counterterrorism service, of which he is a member.</p> <p>It's a common trajectory.</p> <p>Under its leader, Iraqi jihadi Abu Bakr al-Baghdadi, the Islamic State group's top command is dominated by former officers from Saddam's military and intelligence agencies, according to senior Iraqi officers on the front lines of the fight against the group, as well as top intelligence officials, including the chief of a key counterterrorism intelligence unit.</p>

HEADLINE	08/08 American killed in Taliban attack
-----------------	--

SOURCE	http://abcnews.go.com/International/us-service-member-killed-attack-base-kabul/story?id=32963983
GIST	<p>An American service member and eight Afghan civilian contractors were killed in a Taliban attack on Camp Integrity, a coalition base near Kabul's airport, culminating a series of high-profile insurgent attacks in the Afghan capital that killed at least 50 people and injured hundreds more Friday.</p> <p>A suicide bomber at the base's entrance started the attack late Friday. It ended with a gun battle that raged for hours before the four attackers were killed.</p> <p>Several other coalition service members and civilians were also wounded in the attack. Officials haven't identified the U.S. service member killed in the attack.</p> <p>The coalition base, close to Kabul's airport, supports Afghanistan's counter-narcotics efforts and houses U.S. special operations forces, coalition and Afghan personnel.</p>

HEADLINE	08/08 Mali hotel siege ends with 12 dead
SOURCE	http://www.cnn.com/2015/08/08/africa/mali-hotel-siege/index.html
GIST	<p>Twelve people -- including five Malian soldiers -- died as a result of a hostage situation and ensuing battle between the attackers and soldiers at a Mali hotel, Malian state-run broadcaster ORTM reported Saturday.</p> <p>Five foreigners have been evacuated from the hotel in Sevare, in central Mali, the broadcaster said.</p> <p>Earlier, a spokesman for Mali's President told CNN that officials believed the dead included five soldiers, four attackers and three civilians, but that the toll had yet to be confirmed.</p> <p>Army spokesman Col. Souleymane Maiga said at least one foreigner had been killed, among other casualties, but did not specify the foreigner's nationality.</p> <p>The soldiers stormed the hotel to end a daylong siege that started Friday when gunmen raided the hotel after attacking a military site nearby, witnesses said.</p> <p>"The land operation was solely operated by the Malian forces," Radhia Achour, a spokeswoman for MINUSMA, said after the siege ended.</p>

HEADLINE	08/07 Intel: ISIS planning a mass attack
SOURCE	http://www.cnn.com/2015/08/07/politics/isis-mass-casualty-strategy/index.html
GIST	<p>Some in the U.S. intelligence community warn that ISIS may be working to build the capability to carry out mass casualty attacks, a significant departure from the terror group's current focus on encouraging lone wolf attacks, a senior U.S. intelligence official told CNN on Friday.</p> <p>To date, the intelligence view has been that ISIS is focused on less ambitious attacks, involving one or a small group of attackers armed with simple weapons. In contrast, al Qaeda in the Arabian Peninsula, or AQAP, has been viewed as both more focused on -- and more capable of -- mass casualty attacks, such as plots on commercial aviation. Now the intelligence community is divided.</p> <p>The potential change within ISIS itself is driven -- in part -- by a broadening competition between ISIS and AQAP for attention and recruits.</p> <p>"I think they're taking a lot of the new recruits that don't have time to train, who have not been brought up in their systems, and they're using them to create the type of mass casualty which produces the media attention, which is exactly what they want, that shows they're still powerful," said CNN Military analysts Lt. Gen. Mark Hertling. Meanwhile, ISIS is continuing to draw large numbers of new foreign recruits.</p> <p>U.S. intelligence assesses that the formidable flow of foreign fighters to Syria and Iraq has not abated.</p>

HEADLINE	08/09 Mystery fungus killing snakes
SOURCE	http://www.cbsnews.com/news/mystery-fungus-killing-snakes-in-several-different-states/
GIST	<p>Hidden on hillsides in a remote part of western Vermont, a small number of venomous timber rattlesnakes slither among the rocks, but their isolation can't protect them from a mysterious fungus spreading across the eastern half of the country that threatens to wipe them out.</p> <p>In less than a decade, the fungus has been identified in at least nine Eastern states, and although it affects a number of species, it's especially threatening to rattlesnakes that live in small, isolated populations with little genetic diversity, such as those found in Vermont, New Hampshire, Massachusetts and New York.</p>

	<p>In Illinois the malady threatens the eastern massasauga rattlesnake, which was a candidate for the federal endangered species list even before the fungus appeared.</p> <p>Biologists have compared its appearance to the fungus that causes white nose syndrome in bats, which since 2006 has killed millions of the creatures and continues to spread across North America.</p> <p>It's unclear, though, if snake fungal disease, "ophidiomyces ophiodiicola" was brought to the United States from elsewhere, as was white nose fungus, or if it has always been present in the environment and for some unknown reason is now infecting snakes, biologists say.</p>

HEADLINE	08/09 Seniors seeking dentists in Mexico
SOURCE	http://abcnews.go.com/Health/wireStory/facing-rising-dental-costs-seniors-head-mexico-32976085
GIST	<p>Mark Bolzern traveled 3,700 miles to go to the dentist. The 56-year-old Anchorage, Alaska, native left home this spring, made a pit stop in Las Vegas to pick up a friend, and kept heading south, all the way to Los Algodones, Mexico, a small border town teeming with dental offices.</p> <p>About 60 percent of Americans have dental insurance coverage, the highest it has been in decades. But even so, the nation's older population has been largely left behind. Nearly 70 percent of seniors are not insured, according to a study compiled by Oral Health America. A major reason is because dental care is not covered by Medicare and many employers no longer offer post-retirement health benefits. What's more, the Affordable Care Act allows enrollees to get dental coverage only if they purchase general health coverage first, which many seniors don't need. At the same time, seniors often require the most costly dental work, like crowns, implants and false teeth.</p> <p>As a result, many are seeking cheaper care in places like Los Algodones, where Mexican dentists who speak English and sometimes accept U.S. insurance offer rock-bottom prices for everything from a cleaning to implants. Dentists in Los Algodones say a large portion of their clients are seniors.</p> <p>In the desert outpost near the border of California and Arizona, men in white shirts stand outside of offices with signs advertising root canals and teeth cleanings. Other signs advertise prescription drugs like muscle relaxers at low rates — no prescription needed.</p> <p>For Bolzern, seeing a dentist in Los Algodones meant a savings of up to \$62,000. He was told the extensive dental work he needed — his teeth needed to be raised and he needed a crown on every molar — would cost \$65,000 at a private dentist. He looked for lower rates, finding a dental school where the work was less expensive because it was performed by students. But it still cost \$35,000.</p>

HEADLINE	08/09 Advent of artisanal cash
SOURCE	http://www.nytimes.com/2015/08/09/fashion/change-for-a-bowie-the-advent-of-artisanal-cash.html? r=0
GIST	<p>LONDON — Though paper money here typically bears the visage of Queen Elizabeth, the Brixton district of the city last month released a new 5-pound note designed by Jeremy Deller, an artist who won the prestigious Turner Prize in 2004. It features a fuzzy, psychedelic image of an androgynous face surrounded by rainbow clouds and coruscating, swirling etchings.</p> <p>“I wanted something old-fashioned looking,” Mr. Deller said. “Something almost pre-currency.”</p> <p>One hundred and twenty miles west of Brixton, in the city of Bristol, a pound note issued after a design competition that was open to locals displays a colorful lemur striding atop a vibrant cityscape. The back has magenta-hued, hand-cut stencil illustrations of accomplished denizens, including the author J. K. Rowling and Dr. Elizabeth Blackwell, the first woman to receive a medical degree in the United States.</p> <p>As Bitcoin, PayPal and other electronic forms of payment grow in popularity in the global economy, cash in a growing number of places — not only Bristol and Brixton, but also Amsterdam; Ithaca, N.Y.; and elsewhere — is becoming quite literally an artisanal object.</p> <p>Many of the new alternative currencies have the look and feel of the regular legal tender accepted at such places. Most include anticounterfeiting measures like holograms and serial numbers. But they are more eye-catching.</p>

	The local currency, though, is intended not as collectible but to encourage trade at the community businesses where they are accepted, rather than chain stores, where money taken in tends to flow out of town and into the coffers of multinational corporations.

HEADLINE	08/06 Ferguson pumping out arrest warrants
SOURCE	http://money.cnn.com/2015/08/06/news/ferguson-arrest-warrants/index.html?iid=ob_homepage_deskrecommended_pool&iid=obnetwork
GIST	<p>A year after the fatal shooting of Michael Brown sparked a firestorm in Ferguson, the city is still pumping out thousands of new arrest warrants and jailing people over minor offenses, according to an exclusive CNNMoney analysis.</p> <p>This practice continues despite a scathing report from the Department of Justice in March that found that Ferguson's police department and municipal court were unconstitutionally targeting low-income and minority residents with tickets and fines for minor offenses -- often in pursuit of revenue. The report noted that there were more than 16,000 people (residents and non-residents alike) with outstanding arrest warrants as of the end of last year, equivalent to around 75% of the town's population.</p> <p>While the police were the ones giving out the tickets, the DOJ slammed the city's court for using arrest warrants to squeeze money out of the people least able to afford the fines. Even though there need to be repercussions for people who break the law and ignore their tickets, the DOJ says jail time is far too harsh a punishment for infractions that rarely pose a major threat to public safety.</p>

HEADLINE	08/09 Extremist denied citizenship but stays
SOURCE	http://www.telegraph.co.uk/news/uknews/terrorism-in-the-uk/11792257/Jihadi-preacher-linked-to-bin-laden-allowed-to-stay-in-UK-despite-extremist-views.html
GIST	<p>The Yemeni-born imam has spent more than a decade fighting for UK citizenship in a case that has cost the British taxpayer tens of thousands of pounds in court bills.</p> <p>The Telegraph is prevented from naming the preacher under protection given him by the Special Immigration Appeals Commission (SIAC).</p> <p>The special court has ruled that the 50-year-old preacher - known in documents as FM - is not entitled to a British passport because of his extremist views and connections to bin Laden.</p> <p>He has been detained between four and five times at British airports under terror laws and his home searched by Special Branch officers and 'items' seized. He frequently travels to Yemen, a known hotspot for al-Qaeda linked terrorist groups.</p>

	<p>But incredibly, the Home Office cannot deport the imam, who preaches at a large mosque in the north of England, because it would be a breach of his human rights to do so.</p> <p>Under Article 3 of both the European Convention on Human Rights and the Human Rights Act, individuals are protected against torture and inhuman or degrading treatment.</p> <p>SIAC has ruled that FM must not be given British nationality. The commission, made up of two senior judges and the former head of MI5 Sir Stephen Lander, agreed with the Home Office that the imam had preached extremist views and was not of 'good character' needed to become a UK citizen.</p>

HEADLINE	08/08 Supply freeze hits Russia military
SOURCE	http://www.bbc.com/news/world-europe-33822821

GIST	<p>Russia's defence firms have been hit not only by Western sanctions but also by a breakdown in business ties with Ukraine.</p> <p>For decades under Soviet rule, Russia's strategic industries had close links with partners in Ukraine, all centrally controlled from Moscow. But relations soured last year, with Ukraine's pivot to the West, Russia's annexation of Crimea and the pro-Russian insurgency in eastern Ukraine.</p> <p>The EU and US banned military exports to Russia, saying Moscow was supplying the insurgents with sophisticated heavy weapons and regular troops. Moscow denied the allegations.</p> <p>Last month, Russian Deputy Prime Minister Dmitry Rogozin told parliament that Ukrainian components were used in the production of 186 types of Russian military equipment.</p> <p>That is a serious problem, he admitted, and Moscow could resolve it only by 2018.</p> <p>Back in June 2014, Ukrainian President Petro Poroshenko ordered a halt to military co-operation with Russia - and that has shut down several projects.</p> <p>Ukraine hosts the design bureau of Antonov military transport planes. The economic freeze has blocked plans to deliver a new heavy transport plane, the An-70. And this month, Russia stopped producing another transport plane - the An-140.</p> <p>In February, Russia closed another programme - Rokot space rockets, which had been putting military satellites into orbit.</p> <p>The Russian navy has suffered too. It was awaiting three Project 22350 frigates (Admiral Gorshkov-class), but they did not arrive because Ukraine did not deliver the turbines for them.</p>

HEADLINE	08/07 Hepatitis linked with heroin abuse
SOURCE	http://www.aol.com/article/2015/08/07/hepatitis-increasingly-goes-hand-in-hand-with-heroin-abuse/21219975/?icid=maing-fluid%257Cbon1-t%257Cdl5%257Csec1_Ink2%2526pLid%253D-1735803110&intcmp=hplnws
GIST	<p>MACHIAS, Maine (AP) — Public health agencies and drug treatment centers nationwide are scrambling to battle an explosive increase in cases of hepatitis C, a scourge they believe stems at least in part from a surge in intravenous heroin use.</p> <p>In response, authorities are instituting or considering needle exchange programs but are often stymied by geography — many cases are in rural areas — and the cost of treatment in tight times.</p>

	In Washington County, at the nation's eastern edge, the rate of the acute form of hepatitis C last year was the highest in a state that was already more than triple the national average. The problem, health officials there agree, is spurred by the surge in the use of heroin and other injectable drugs and the sharing of needles to get high.

HEADLINE	08/07 EPA accidentally pollutes river
SOURCE	http://www.cnn.com/2015/08/07/us/colorado-epa-mine-river-spill-irpt/index.html
GIST	<p>A federal cleanup crew accidentally caused a big, and potentially hazardous, mess in Colorado, according to the Environmental Protection Agency.</p> <p>An estimated 1 million gallons of wastewater spilled out of an abandoned mine area in the southern part of the state on Wednesday, turning the Animas River orange and prompting the EPA to tell locals to avoid it.</p> <p>"When I first saw it, I was speechless, [the river] didn't look real," said Durango, Colorado, resident Ian Lucier. "But in person, it truly looks like the river was turned into carrot juice."</p> <p>Officials said they believe the spill carried heavy metals, mainly iron, zinc and copper, from the mine into a creek that feeds into the Animas River. From there, the orange water plugged steadily along through the small stretch of winding river in southern Colorado and across the state border to New Mexico where the Animas meets the San Juan River. The EPA said it will continue to sample water downstream from the mine until the contamination has passed and it determines there are "no additional concerns for aquatic life or water users." When asked if the spill could affect drinking water, the EPA spokesperson said she did not yet know.</p>

HEADLINE	08/10 Recession downside: career criminals
SOURCE	http://www.cbsnews.com/news/another-downside-of-recession-career-criminals/
GIST	<p>How costly are recessions? To answer that question, analysts often calculate the lost GDP due to the higher levels of unemployment and idle capital during economic slumps. For example, during the Great Recession, the Dallas Fed estimates the loss was between \$6 trillion and \$14 trillion, or \$50,000 to \$120,000 for every person in the U.S.</p> <p>However, the economic costs of recessions encompass far more than simply the goods and services that could have been produced, but weren't. They also include the psychological costs of being unable to provide for one's family, health costs due to increased stress, drug problems, higher suicide rates, family conflict and so on.</p> <p>Evidence also shows that new entrants into the labor market during recessions have a lower lifetime earnings trajectory than those who enter during better times.</p> <p>That may explain new research results showing that young people who leave school during recessions have a much higher chance of becoming career criminals. Why does this happen? Of course, one reason is the higher unemployment rates and diminished job prospects that occur during recessions.</p> <p>But "feedback effects" can also reinforce the choice to engage in crime. First, as the researchers Brian Bell, Anna Bindler and Stephen Machin noted, involvement in crime may lead to an increase in "criminal knowhow" that raises the "expected net benefit of crime" -- the difference between the expected gain and the chance of getting caught. This makes it more likely that an individual will choose to commit a crime.</p> <p>Second, those who do get caught may have difficulty finding a job because of their criminal record.</p>

	How large are these effects? The researchers "find that the average arrest rate for a cohort entering the labor market during a recession is 10.2% higher than for an otherwise similar cohort entering a more buoyant labor market." In addition, "entering the labor market during a recession increases the probability of being incarcerated at some point over the next two decades by 5.5%." Thus, the effects are relatively large.

SOURCE	http://www.nbcphiladelphia.com/news/local/Philadelphia-Triple-Shooting-1-Dead-1-Critical-321140781.html
GIST	Police on Sunday morning were still searching for a gunman shown on surveillance video running out of a Kensington, Philadelphia, barbershop armed with a rifle and opening fire. One man was killed in the shooting, police said, and two others were injured. In surveillance video obtained by NBC10, the gunman, wearing a white T-shirt, can be seen running on E Street just north of Allegheny Avenue firing a black rifle. A witness told NBC10 the unidentified suspect walked into a barbershop on the block Saturday afternoon carrying a large box. The man sat down as if he was going to get a haircut but pulled out a rifle from the box minutes later, according to the witness. The man then allegedly started an argument, ran outside the barbershop and opened fire.

HEADLINE	08/09 Random attacks hit Minn. cyclists
SOURCE	http://minnesota.cbslocal.com/2015/08/09/police-issue-warning-after-cyclists-randomly-attacked-in-minneapolis/
GIST	Random attacks against bicyclists in Minneapolis are prompting warnings Sunday from police.

	<p>We'll warn you, there are disturbing photos with this story as someone's been throwing chunks of concrete at bikers. Two people were hit on Friday in separate incidents, including 20-year-old Mackenzie Jensen of south Minneapolis.</p> <p>He was biking on a quiet south Minneapolis block of 41st Street when officers say he was attacked out of the blue. A woman who was hit was in the same area.</p> <p>The female victim was grazed with the chunk of cinder block but the other victim, avid bicyclist Mackenzie Jensen, is in rough shape.</p> <p>Officers say they have a list of similar reports from around south Minneapolis, Mackenzie was hurt the worst.</p>

HEADLINE	08/08 Rwandan peacekeeper kills soldiers
SOURCE	http://www.cnn.com/2015/08/08/africa/central-african-republic-rwanda-soldiers-killed/index.html
GIST	<p>A Rwandan soldier working as a U.N. peacekeeper in the Central African Republic turned a gun on his colleagues early Saturday, killing four and injuring eight others before killing himself, the Rwandan military said.</p> <p>The shooting happened at the Rwandan peacekeepers' headquarters in the Central African Republic's capital of Bangui at about 5:45 a.m.</p> <p>Like the gunman, all 12 of those killed or hurt in the shooting were members of the Rwandan military, serving as U.N. peacekeepers in Bangui.</p> <p>"Investigations have immediately commenced to establish the motive behind this deplorable shooting of his ... colleagues," said Brig. Gen. Joseph Nzabamwita, a spokesman for the Rwandan military.</p>

HEADLINE	08/10 Police: man cuffed 8 then killed them
SOURCE	http://www.cnn.com/2015/08/10/us/houston-killings/index.html
GIST	<p>A suspect in the killing of eight people in Texas broke into the house and handcuffed the victims in their bedrooms before he shot them, authorities said.</p> <p>David Conley was charged with capital murder after deputies discovered the bodies of two adults and their six children in their Houston-area home early Sunday.</p> <p>Conley, 48, forcibly entered the home because the owners had changed their locks, authorities said.</p>

	<p>His motive appears to be related to the mother of the children, who had a past relationship with him, Harris County Sheriff's Chief Deputy Tim Cannon said.</p> <p>One -- and possibly two -- of the children killed might have been the suspect's, authorities said.</p> <p>"Once again, a senseless tragedy has struck our community," Cannon said. "Our hearts go out to the family and friends of those lost."</p>

HEADLINE	08/09 Vocal Mexico activist found slain
SOURCE	http://www.cnn.com/2015/08/09/americas/mexico-missing-students-activist-killed/index.html
GIST	<p>When he felt authorities weren't doing enough to protect his hometown, he organized more than 100 women to police the streets.</p> <p>When 43 students went missing in a controversial case that drew global attention to Mexico's struggles with violence and corruption, he led search parties trying to find them.</p> <p>And when more families in his state came forward reporting that their loved ones had disappeared, he organized searches for them, too.</p> <p>Saturday night, investigators in Mexico's Guerrero state say Miguel Ángel Jiménez Blanco was found dead inside a taxi he owned, with two gunshot wounds. Authorities haven't said whether there are any suspects in the slaying.</p> <p>Jiménez was a vocal leader of citizen self-defense groups in Guerrero and a sharp critic of local officials, who he accused of hiding evidence tied to the students' disappearance.</p>

HEADLINE	08/08 Woman is suspect in Vt. slayings
SOURCE	http://www.cbsnews.com/news/3-deaths-linked-to-vermont-woman-accused-of-killing-social-worker/
GIST	<p>The woman charged in the slaying of a Vermont social worker is also "the alleged perpetrator" of the deaths of three relatives whose bodies were found Saturday, Gov. Peter Shumlin said.</p> <p>The three women found dead at a Berlin home Saturday morning were an aunt and two cousins of 40-year-old Jody Herring, the governor said at a news conference Saturday night after returning from vacation in Nova Scotia upon hearing of the deaths.</p>

	<p>Lara Sobel was gunned down after work Friday outside a state office building in Barre. She handled a case for the state Department for Children and Families in which Herring lost custody of her nine-year-old daughter, authorities said.</p> <p>CBS affiliate WCAX reported that Herring was officially charged with first degree homicide in Sobel's death Saturday, according to Vermont State Police. She was scheduled to be arraigned Monday. It wasn't clear if she had a lawyer who could comment on her behalf.</p>

HEADLINE	08/09 Sex abuse scandal rocks Pakistan
SOURCE	http://www.cbsnews.com/news/massive-child-sex-abuse-scandal-rocks-pakistan/
GIST	<p>Police in eastern Pakistan say they've arrested seven men accused of sexually abusing children and distributing videos of the abuse.</p> <p>Kasur district regional police chief Shahzad Sultan says investigators are sifting through evidence Sunday, including 18 or 19 videos seized so far. It was not yet known how many children were abused or if there were other videos.</p> <p>Al Jazeera reports 400 video recordings of more than 280 children being forced to have sex have been discovered. They also claim that a gang of 25 men has been involved in the crime, coordinating it.</p> <p>Officer Babar Saeed says it's not clear how long the suspects were allegedly sexually abusing the children.</p> <p>The allegations became public after victims' families clashed with police last Tuesday, complaining authorities were ignoring their cases.</p> <p>Some in Pakistan are calling this the biggest scandal of its sort in the country's history, even worse than the infamous serial killer Javed Iqbal, who is reported to have killed and abused 100 teenage boys.</p>

HEADLINE	08/09 Police kill North Carolina gunman
SOURCE	http://abcnews.go.com/US/wireStory/police-dead-hurt-including-officers-shootout-32972462
GIST	<p>Police responding to a call about a man killing his neighbor in North Carolina shot and killed the gunman, authorities said Sunday. Two officers and a bystander were wounded.</p> <p>The injuries to the officers didn't appear to be life-threatening, Gaston County Assistant Police Chief Joseph Ramey said at a late-night news conference Saturday. A woman was also wounded during the incident, but she is expected to survive, Ramey said.</p>

	<p>A number of officers rushed to the neighborhood around 9:30 p.m. Saturday after getting several 911 calls about a man shot to death and another man still in the area with a gun, the assistant chief said.</p> <p>The suspected gunman was on a street corner armed with a pistol and a rifle and fired on officers. He was killed when several officers fired back, Ramey said.</p> <p>The names of the officers and the people killed have not been released.</p> <p>Gaston County Police are investigating the death of the neighbor, while the State Bureau of Investigation is investigating the police shooting. The officers involved have been put on administrative duty, authorities said.</p>

HEADLINE	08/08 SPD searches for shooting suspect
SOURCE	http://www.kirotv.com/news/news/police-suspect-fires-shots-ground-3-injured-ricoch/nnGDC/
GIST	<p>Seattle police are looking for a man who is suspected of firing several shots during an attempted robbery early Saturday morning in the Ballard neighborhood.</p> <p>The incident happened at about 12:15 a.m. near Northwest Market Street and Ballard Avenue Northwest. According to police, witnesses said a man approached a woman on the street and tried to take her necklace.</p> <p>Police said the woman struggled with the suspect and a doorman from a nearby club intervened. The suspect then pulled out gun and fired shots into the ground before fleeing the scene.</p> <p>When officers arrived, they found three people with minor injuries. The victims had been struck by ricocheting fragments from the suspect's bullets. They were taken to a nearby hospital for treatment.</p> <p>Police searched the area for the suspect but couldn't find him. Authorities described the man as black and in his 20s.</p>

HEADLINE	08/09 Texas police: 8 slain in home
SOURCE	http://www.seattletimes.com/nation-world/texas-police-5-children-3-adults-found-dead-inside-home/
GIST	<p>HOUSTON (AP) — Eight people — including five children and three adults — were found slain inside a Houston-area home and a man who exchanged gunfire with police has been charged with three counts of capital murder, according to Texas authorities and court records.</p>

	<p>Court records show that one capital murder count against David Conley covers multiple deaths. Another capital murder count is for a person under six years of age. He was being held Sunday in the Harris County Jail. Bond had not yet been set for him. An attorney is not yet listed for him.</p> <p>The Harris County Sheriff's Office said in a statement that the eight people were found slain after a welfare check was conducted at the home. The suspect was taken into custody after members of the Harris County Sheriff's Office High Risk Operations Unit and Hostage Negotiation Team negotiated his surrender.</p>

HEADLINE	08/07 Prolific identity thief gets 7yrs
SOURCE	http://www.seattlepi.com/local/komo/article/Prolific-identity-thief-sentenced-to-7-years-in-6432198.php
GIST	<p>SEATTLE -- A prolific identity thief was sentenced Friday to seven years in prison for stealing personal information from 44 people and using it to make counterfeit checks and credit cards.</p> <p>Junette A. Short used the fake credit cards and checks to go on shopping sprees in King and Pierce counties. Prosecutors say the 34-year-old got the personal information by burglarizing homes, prowling cars and stealing mail from as many as 100 people.</p> <p>Short pleaded guilty in June to nine counts of identity theft. Because the crimes were considered a "major economic offense," prosecutors recommended Short be sentenced to 10 years in prison, according to prosecutors.</p> <p>Instead, a King County judge sentenced the Pierce County woman to seven years. She was also sentenced for possession of a stolen vehicle, possession of stolen property, and two separate identity theft cases from 2014.</p>

HEADLINE	08/07 Burglaries hit Ballard apartment
SOURCE	http://q13fox.com/2015/08/07/ballard-apartment-residents-on-alert-after-series-of-burglaries/
GIST	<p>SEATTLE – Another Seattle neighborhood is on alert after an increase in thefts. Police are investigating after several apartments in Ballard were broken into.</p> <p>Thomas Kelly wasn't that surprised to hear that thieves had found a way to break into AVA Ballard, even though residents are given electronic key fobs to get into the building and into their individual apartments.</p> <p>"There's no lock that can't be picked," he says. "Clever people, if they want something bad enough."</p>

	Apartment managers sent notices to all residents this week, letting them know about a series of burglaries. They say the thieves were caught on surveillance camera, and police are now investigating. They also say the locks that were affected have been replaced.

HEADLINE	08/08 NYC: surge in synthetic pot use
SOURCE	http://www.newsmax.com/Newsfront/US-Synthetic-Pot-Scare/2015/08/08/id/669184/
GIST	<p>Ignoring the police officers standing down the block and the disingenuous fine print on the foil packet peeking out of his front pocket — "Warning: Don't Smoke" — a homeless man openly lit up a synthetic marijuana joint and explained why it's not like the real thing.</p> <p>"It's a zero-to-60 high," said the 47-year-old, who gave his name only as J.C. because of his frequent run-ins with the law. "I've done plenty of drugs in my life, and it only compares to dust," he said, referring to PCP. "But it doesn't last as long."</p> <p>The tutorial was offered in broad daylight on a bustling street corner in East Harlem, one the neighborhoods where the New York Police Department says it's seen an alarming increase in consumption — mainly by homeless men — of the leafy substance known as "K2." The cheap knock-off weed is spiked with unknown chemicals that are supposed to mimic the more mellow effects of pot, but often comes with harsh side effects that have created a quandary for authorities already grappling with how to deal with the city's homeless population.</p> <p>"When people talk about synthetic marijuana, it's kind of bad misnomer because we don't know what these chemicals are," said Robert Messner, a police official in charge of civil enforcement.</p>

	What's known is that in recent months, there's been a spike in emergency room visits in New York City by users suffering from high blood pressure, hallucinations, hot flashes and psychotic meltdowns that can turn violent or deadly.

HEADLINE	08/07 Nightclub hit by arson again
SOURCE	http://www.king5.com/story/news/local/seattle/2015/08/07/neighbours-nightclub-hit-arson-again/31323153/?csp=nbcnews
GIST	<p>SEATTLE -- An iconic gay nightclub in Seattle's Capitol Hill neighborhood has been hit by arson again.</p> <p>Seattle police say someone set fire to Neighbours nightclub late Friday morning. The fire caused about \$350 in damage to a door at the back of the club.</p> <p>"This was caught on camera. Multiple cameras," said Shaun Knittel, the spokesperson for Neighbours. "And there's no question this was an arson."</p> <p>The club was closed at the time of the incident. No one was injured.</p> <p>Police say a man had walked into an alleyway behind Neighbours shortly before the fire was set. Detectives were working to identify him.</p> <p>"It is a very dangerous crime," said Sean Whitcomb with SPD. "It can lead to extensive loss of property and in the worse case scenarios injury or loss of life."</p> <p>Whitcomb said SPD could not yet rule out the possibility that the arson was a hate crime.</p>

HEADLINE	08/08 Illegal alien crime wave hits states
SOURCE	http://www.breitbart.com/big-journalism/2015/08/08/illegal-alien-crime-accounts-for-over-30-of-murders-in-some-states/
GIST	<p>The mainstream media – including, sadly, major segments of the presumably conservative media, like the <i>Wall Street Journal</i> — are working overtime to keep the American public and the American voters in the dark on the scope of illegal alien crime. The murder of Kate Steinle in San Francisco exposed only the tip of a massive iceberg, and the media establishment is desperate to avoid dealing with the iceberg underneath.</p> <p>Let’s look at a few numbers. You haven’t seen them in the <i>New York Times</i>, <i>Atlanta Constitution</i>, or the <i>Miami Herald</i>, nor have they been featured on <i>NBC Nightly</i> news or CNN. So, the average American is blissfully unaware of them.</p> <ul style="list-style-type: none"> • Between 2008 and 2014, 40% of all murder convictions in Florida were criminal aliens. In New York it was 34% and Arizona 17.8%. • During those years, criminal aliens accounted for 38% of all murder convictions in the five states of California, Texas, Arizona, Florida and New York, while illegal aliens constitute only 5.6% of the total population in those states. • That 38% represents 7,085 murders out of the total of 18,643. <p>That 5.6% figure for the average illegal alien population in those five states comes from US Census estimates. We know the real number is double that official estimate. Yet, even if it is 11%, it is still shameful that the percentage of murders by criminal aliens is more than triple the illegal population in those states.</p> <p>Those astounding numbers were compiled by the Government Accountability Office (GAO) using official Department of Justice data on criminal aliens in the nation’s correctional system. The numbers were the basis for a presentation at a recent New Hampshire conference sponsored by the highly respected Center for Security Policy.</p>

HEADLINE	08/07 Aurora gunman avoids death penalty
SOURCE	http://www.cnn.com/2015/08/07/us/james-holmes-movie-theater-shooting-jury/index.html
GIST	<p>James Holmes will spend the rest of his life in prison for killing 12 people and wounding 70 more at an Aurora, Colorado, movie theater.</p> <p>A jury was unable Friday to reach a unanimous sentencing verdict, which results in life in prison without parole instead of the death penalty for Holmes, who had pleaded not guilty by reason of insanity in the</p>

2012 shootings. He was convicted last month of 24 counts of first-degree murder -- two for each of the slain victims.

The 12-member jury reached a decision after deliberating almost seven hours since late Thursday. As they walked back into the courtroom shortly after 5 p.m. (7 p.m. ET), they made no eye contact with anyone. Some had a grim face. Some were ashen.

Holmes stood with his hands in his pockets as Judge Carlos Samour read the sentencing verdicts.

One female juror later told reporters that there was no way to resolve the disagreement on what the sentence should be.

Subject: The military tech President Obama didn't ban is also the most dangerous

 After the protests turned into riots in Ferguson, Mo., last summer, it became abundantly clear that the surplus of military vehicles and weaponry from the wars in Iraq and Afghanistan had found their way onto the streets of middle America. Americans watched in awe as Ferguson police responded to protests and minor looting with armored vehicles and the same kind of tear gas used in war zones. Jackboots and assault rifles seemed to be the official uniform of what should have been a measured response by a mid-range police force. For many protesters, this widely circulated imagery of a military encampment was enough to incite deep-seated rage about what was already a tortured relationship between police and civilians. As many news reports following Ferguson would make clear, the spread of military gear throughout America's police forces was widespread and trickling down from the federal government itself. A 2014 story from ABC's Luis Martinez and Colleen Curry referred to Ferguson police as a "small army," tying it to the historic relationship between the government and the military. Jackboots and assault rifles seemed to be the official uniform of what should have been a measured response by a mid-range police force. "The distribution of military equipment to local law enforcement began in the 1990s to help agencies fight the so-called War on Drugs," Martinez and Curry explain. "It was expanded after 9/11, with the creation of the Department of Homeland Security, to help law enforcement fight terror threats." As part of a long overdue effort to demilitarize America's police force, President Obama announced new policies this week that will place heavy regulations and restrictions on what kinds of vehicles, armor, and weaponry the military is allowed to sell at a discount to state and local police departments. Banned equipment now includes camouflaged vehicles, grenades, high-scale weaponry, and even bayonets. Restrictions have also been placed on aircrafts, riot gear, and mobile command units, forcing police to seek federal permission before obtaining or selling such equipment. These restrictions are an important step in healing the rift between police and the communities they swear to protect; however, they ignore a rather gaping loophole in federal security equipment that has quickly spread through local police departments. While Americans have become more wary of the federal government abusing their right to privacy, local police have been arming themselves with technology just as worrisome as a tank rolling down the street. In all, police in 21 states have used Stingray devices to track and locate cell phones without the phone's owner aware. The devices—roughly the size of a suitcase—locate cell phones by intercepting the signal that phone would normally send to a cell tower. Stingrays convince the phone it is talking with a secure cell network in order to collect information from the cell signal, including the phone's precise location. They collect the cell signals of phones within a given range, meaning police can collect bulk data from entire city blocks. They ignore a rather gaping loophole in federal security equipment that has quickly spread through local police departments. If that sounds familiar, it's because the technology is eerily similar to the kinds of privacy-violating tactics we've become used to hearing from leaked documents about the National Security Agency. Just as the Pentagon has regifted their devices to small-town cops, the Federal Bureau of Investigation and various

branches of the United States intelligence sector have begun shipping Stingray devices to police departments across the country, along with non-disclosure agreements protecting police from defending these tools' use against the public, lawmakers, and even judges. In fact, the FBI and police have even offered criminals plea deals in order to prevent their lawyers from demanding to see recorded use of Stingrays. In Florida, two small-time crooks who robbed a weed dealer with a BB gun were offered a cushy probation-only deal in February; the catch was that the pair had to halt their lawyers' investigation into whether or not police had used Stingrays to capture them. According to a CNN story in March, one federal judge in Erie County, N.Y., reported an attempted deal between the FBI and local police to drop criminal charges against a suspect entirely rather than reveal any details about the Stingray program. It's this intense level of secrecy that has likely protected the device from becoming the target of public derision like the military gear cited by Obama in his new regulations. As President Obama said, the armored vehicles and heavy artillery seen in Ferguson last year is "made for the battlefield" and might "alienate and intimidate local residents and may send the wrong message." But that's only because of the visibility of such equipment. While that should never be ignored, the hidden encroachment on our daily privacy has been totally ignored by the president's restrictions; this is likely because it's out-of-sight, out-of-mind even for the few Americans that know of its existence. It's this intense level of secrecy that has likely protected the device from becoming the target of public derision. It's perhaps absurd to believe a president who has spied on more American phone records than any before him would care to implement restrictions on how local and state law enforcement should go about doing the same thing. According to a report from the ACLU, Stingrays are in use by the FBI, the NSA, the Drug Enforcement Administration, the Secret Service, and all five branches of the military. Thus, it's abundantly clear the warrantless use of these devices isn't keeping Barack Obama awake at night as a moral or legal quandary. Why should he feel the need to justify or restrict their use among police? Typically, any electronic surveillance conducted by a police department requires judicial oversight and a warrant granted by a judge. And while the program has been justified by police and federal agents as a tool for finding and preventing terrorism, Stingrays have become a regular part of policing in just about any case wherein it could make the cops' jobs easier. In Tallahassee, police confessed to using Stingrays over 200 times in a four-year period. According to LA Weekly, the Los Angeles Police Department uses Stingrays for 13 percent of every investigation they encounter. In only one of the 21 states wherein Stingrays have been used by police have any restrictions been implemented—the Florida Supreme Court ruled in 2014 that police must obtain a warrant before using Stingrays. As has recently been the case for privacy advocates, the judicial branch may be our last, best hope. Although the president is concerned about turning America's streets into a battlefield, his policies have shown that he's fine with keeping the war alive behind the scenes. Unfortunately, the best chance we have to see Stingray finally get the regulation Americans deserve is the power of those on the bench, rather than the makeshift leadership of our president. "The distribution of military equipment to local law enforcement began in the 1990s to help agencies fight the so-called War on Drugs," Martinez and Curry explain. "It was expanded after 9/11, with the creation of the Department of Homeland Security, to help law enforcement fight terror threats." As part of a long overdue effort to demilitarize America's police force, President Obama announced new policies this week that will place heavy regulations and restrictions on what kinds of vehicles, armor, and weaponry the military is allowed to sell at a discount to state and local police departments. Banned equipment now includes camouflaged vehicles, grenades, high-scale weaponry, and even bayonets. Restrictions have also been placed on aircrafts, riot gear, and mobile command units, forcing police to seek federal permission before obtaining or selling such equipment. These restrictions are an important step in healing the rift between police and the communities they swear to protect; however, they ignore a rather gaping loophole in federal security equipment that has quickly spread through local police departments. While Americans have become more wary of the federal government abusing their right to privacy, local police have been arming themselves with technology just as worrisome as a tank rolling down the street. In all, police in 21 states have used Stingray devices to track and locate cell phones without the phone's owner aware. The devices—roughly the size of a suitcase—locate cell phones by intercepting the signal that phone would normally send to a cell tower. Stingrays convince the phone it is talking with a secure cell network in order to collect information from the cell signal, including the phone's precise location. They collect the cell signals of phones within a given range, meaning police can collect bulk data from entire city blocks. They ignore a rather gaping loophole in federal security equipment that has quickly spread through local police departments. If that sounds familiar, it's because the technology is eerily similar to the kinds of privacy-violating tactics we've become used to hearing from leaked documents about the National Security Agency. Just as the Pentagon has regifted their devices to small-town cops, the Federal Bureau of Investigation and various

branches of the United States intelligence sector have begun shipping Stingray devices to police departments across the country, along with non-disclosure agreements protecting police from defending these tools' use against the public, lawmakers, and even judges. In fact, the FBI and police have even offered criminals plea deals in order to prevent their lawyers from demanding to see recorded use of Stingrays. In Florida, two small-time crooks who robbed a weed dealer with a BB gun were offered a cushy probation-only deal in February; the catch was that the pair had to halt their lawyers' investigation into whether or not police had used Stingrays to capture them. According to a CNN story in March, one federal judge in Erie County, N.Y., reported an attempted deal between the FBI and local police to drop criminal charges against a suspect entirely rather than reveal any details about the Stingray program. It's this intense level of secrecy that has likely protected the device from becoming the target of public derision like the military gear cited by Obama in his new regulations. As President Obama said, the armored vehicles and heavy artillery seen in Ferguson last year is "made for the battlefield" and might "alienate and intimidate local residents and may send the wrong message." But that's only because of the visibility of such equipment. While that should never be ignored, the hidden encroachment on our daily privacy has been totally ignored by the president's restrictions; this is likely because it's out-of-sight, out-of-mind even for the few Americans that know of its existence. It's this intense level of secrecy that has likely protected the device from becoming the target of public derision. It's perhaps absurd to believe a president who has spied on more American phone records than any before him would care to implement restrictions on how local and state law enforcement should go about doing the same thing. According to a report from the ACLU, Stingrays are in use by the FBI, the NSA, the Drug Enforcement Administration, the Secret Service, and all five branches of the military. Thus, it's abundantly clear the warrantless use of these devices isn't keeping Barack Obama awake at night as a moral or legal quandary. Why should he feel the need to justify or restrict their use among police? Typically, any electronic surveillance conducted by a police department requires judicial oversight and a warrant granted by a judge. And while the program has been justified by police and federal agents as a tool for finding and preventing terrorism, Stingrays have become a regular part of policing in just about any case wherein it could make the cops' jobs easier. In Tallahassee, police confessed to using Stingrays over 200 times in a four-year period. According to LA Weekly, the Los Angeles Police Department uses Stingrays for 13 percent of every investigation they encounter. In only one of the 21 states wherein Stingrays have been used by police have any restrictions been implemented—the Florida Supreme Court ruled in 2014 that police must obtain a warrant before using Stingrays. As has recently been the case for privacy advocates, the judicial branch may be our last, best hope. Although the president is concerned about turning America's streets into a battlefield, his policies have shown that he's fine with keeping the war alive behind the scenes. Unfortunately, the best chance we have to see Stingray finally get the regulation Americans deserve is the power of those on the bench, rather than the makeshift leadership of our president. Subject: The military tech President Obama didn't ban is also the most dangerous

 After the protests turned into riots in Ferguson, Mo., last summer, it became abundantly clear that the surplus of military vehicles and weaponry from the wars in Iraq and Afghanistan had found their way onto the streets of middle America. Americans watched in awe as Ferguson police responded to protests and minor looting with armored vehicles and the same kind of tear gas used in war zones. Jackboots and assault rifles seemed to be the official uniform of what should have been a measured response by a mid-range police force. For many protesters, this widely circulated imagery of a military encampment was enough to incite deep-seated rage about what was already a tortured relationship between police and civilians. As many news reports following Ferguson would make clear, the spread of military gear throughout America's police forces was widespread and trickling down from the federal government itself. A 2014 story from ABC's Luis Martinez and Colleen Curry referred to Ferguson police as a "small army," tying it to the historic relationship between the government and the military. Jackboots and assault rifles seemed to be the official uniform of what should have been a measured response by a mid-range police force. "The distribution of military equipment to local law enforcement began in the 1990s to help agencies fight the so-called War on Drugs," Martinez and Curry explain. "The distribution of military equipment to local law enforcement began in the 1990s to help agencies fight the so-called War on Drugs," Martinez and Curry explain. "It was expanded after 9/11, with the creation of the Department of Homeland Security, to help law enforcement fight terror threats." As part of a long overdue effort to demilitarize America's police force, President Obama announced new policies this week that will place heavy regulations and restrictions on what kinds of vehicles, armor, and weaponry the military is allowed to sell at a discount to state and local police departments. Banned equipment now includes camouflaged vehicles, grenades, high-scale weaponry, and even bayonets. Restrictions have also been placed on aircrafts, riot gear, and mobile command units, forcing police to seek federal permission before obtaining or selling such equipment. These restrictions are an important step in healing the rift between police and the communities they swear to protect; however, they ignore a rather gaping loophole in federal security equipment that has quickly spread through local police departments. While Americans have become more wary of the federal government abusing their right to privacy, local police have been arming themselves with technology just as worrisome as a tank rolling down the street. In all, police in 21 states have used Stingray devices to track and locate cell phones without the phone's owner aware. The devices—roughly the size of a suitcase—locate cell phones by intercepting the signal that phone would normally send to a cell tower. Stingrays convince the phone it is talking with a secure cell network in order to collect information from the cell signal, including the phone's precise location. They collect the cell signals of phones within a given range, meaning police can collect bulk data from entire city blocks. They ignore a rather gaping loophole in federal security equipment that has quickly spread through local police departments. If that sounds familiar, it's because the technology is eerily similar to the kinds of privacy-violating tactics we've become used to hearing from leaked documents about the National Security Agency. Just as the Pentagon has regifted their devices to small-town cops, the Federal Bureau of Investigation and various

branches of the United States intelligence sector have begun shipping Stingray devices to police departments across the country, along with non-disclosure agreements protecting police from defending these tools' use against the public, lawmakers, and even judges. In fact, the FBI and police have even offered criminals plea deals in order to prevent their lawyers from demanding to see recorded use of Stingrays. In Florida, two small-time crooks who robbed a weed dealer with a BB gun were offered a cushy probation-only deal in February; the catch was that the pair had to halt their lawyers' investigation into whether or not police had used Stingrays to capture them. According to a CNN story in March, one federal judge in Erie County, N.Y., reported an attempted deal between the FBI and local police to drop criminal charges against a suspect entirely rather than reveal any details about the Stingray program. It's this intense level of secrecy that has likely protected the device from becoming the target of public derision like the military gear cited by Obama in his new regulations. As President Obama said, the armored vehicles and heavy artillery seen in Ferguson last year is "made for the battlefield" and might "alienate and intimidate local residents and may send the wrong message." But that's only because of the visibility of such equipment. While that should never be ignored, the hidden encroachment on our daily privacy has been totally ignored by the president's restrictions; this is likely because it's out-of-sight, out-of-mind even for the few Americans that know of its existence. It's this intense level of secrecy that has likely protected the device from becoming the target of public derision. It's perhaps absurd to believe a president who has spied on more American phone records than any before him would care to implement restrictions on how local and state law enforcement should go about doing the same thing. According to a report from the ACLU, Stingrays are in use by the FBI, the NSA, the Drug Enforcement Administration, the Secret Service, and all five branches of the military. Thus, it's abundantly clear the warrantless use of these devices isn't keeping Barack Obama awake at night as a moral or legal quandary. Why should he feel the need to justify or restrict their use among police? Typically, any electronic surveillance conducted by a police department requires judicial oversight and a warrant granted by a judge. And while the program has been justified by police and federal agents as a tool for finding and preventing terrorism, Stingrays have become a regular part of policing in just about any case wherein it could make the cops' jobs easier. In Tallahassee, police confessed to using Stingrays over 200 times in a four-year period. According to LA Weekly, the Los Angeles Police Department uses Stingrays for 13 percent of every investigation they encounter. In only one of the 21 states wherein Stingrays have been used by police have any restrictions been implemented—the Florida Supreme Court ruled in 2014 that police must obtain a warrant before using Stingrays. As has recently been the case for privacy advocates, the judicial branch may be our last, best hope. Although the president is concerned about turning America's streets into a battlefield, his policies have shown that he's fine with keeping the war alive behind the scenes. Unfortunately, the best chance we have to see Stingray finally get the regulation Americans deserve is the power of those on the bench, rather than the makeshift leadership of our president. Subject: The military tech President Obama didn't ban is also the most dangerous

 After the protests turned into riots in Ferguson, Mo., last summer, it became abundantly clear that the surplus of military vehicles and weaponry from the wars in Iraq and Afghanistan had found their way onto the streets of middle America. Americans watched in awe as Ferguson police responded to protests and minor looting with armored vehicles and the same kind of tear gas used in war zones. Jackboots and assault rifles seemed to be the official uniform of what should have been a measured response by a mid-range police force. For many protesters, this widely circulated imagery of a military encampment was enough to incite deep-seated rage about what was already a tortured relationship between police and civilians. As many news reports following Ferguson would make clear, the spread of military gear throughout America's police forces was widespread and trickling down from the federal government itself. A 2014 story from ABC's Luis Martinez and Colleen Curry referred to Ferguson police as a "small army," tying it to the historic relationship between the government and the military. Jackboots and assault rifles seemed to be the official uniform of what should have been a measured response by a mid-range police force. "The distribution of military equipment to local law enforcement began in the 1990s to help agencies fight the so-called War on Drugs," Martinez and Curry explain. Idaho State Police
District 5 5205 South 5th Ave.
Pocatello, Idaho 83204-2299
(208) 236-6466 FAX: (208) 236-6068

For Immediate Release: 5/18/2015 at 8:20 p.m.
Please direct questions to the District Office

On May 18, 2015, at approximately 5:21 p.m., Idaho State Police investigated a two-vehicle injury crash on Interstate 15, near milepost 78, south of Ft. Hall, ID.

Amelia Brown-Olea, 37, of Pocatello, ID., was stopped on the left shoulder of Interstate 15 in a 2014 Chevrolet Traverse, waiting for a sudden hailstorm to subside. Valeria Martinez, 28, of Blackfoot, ID., was driving northbound in the left lane of Interstate 15, in a 2011 Buick Regal. When Martinez encountered the hailstorm, she lost control of her vehicle and crashed into Brown-Olea's vehicle.

Both drivers were wearing seatbelts at the time of the crash. Martinez was transported by ground ambulance to Portneuf Medical Center in Pocatello, ID.

HEADLINE	05/18 Activists vow massive protest today
SOURCE	http://www.kirotv.com/news/news/activists-vow-disrupt-shell-oil-massive-protest/nmJM6/
GIST	<p>SEATTLE — Hundreds of protestors are vowing to stop Shell oil operations at Terminal 5 Monday morning as another Shell ship rolls into Elliott Bay.</p> <p>Quick Facts:</p> <ul style="list-style-type: none"> • Drydock Vigilant being towed into Elliott Bay • More than 900 protesters say they will participate • Protesters will try to block Terminal 5 workers • Flotilla of kayaks surrounded oil rig on Saturday <p>The 528-foot long drydock Vigilant is being towed past Magnolia, headed for the Port of Seattle.</p> <p>More than 900 people have said they will take part in one of the biggest environmental protests ever in Seattle. They'll meet at the Duwamish Fishing Dock at 7 a.m.</p>

	<p>Currently, Seattle police are on Harbor Island setting up barricades to ensure the protest doesn't spill into nearby streets.</p> <p>They'll try to ensure that people can get to work at Terminal 5 and the protesters are given their space.</p> <p>The protests are the latest that started when the Shell Oil rig, the Polar Pioneer, showed up in Elliot Bay on Thursday.</p> <p>On Saturday, a flotilla of kayaks surrounded the rig.</p> <p>Activists say the drilling could lead to oil spills, while Shell has said more than 400 people will be employed by the jobs created.</p> <p>Protesters said their plans are to disrupt Shell Oil operations at Terminal 5. They told KIRO 7 over the weekend this is only the beginning.</p> <p>The protests when the rig arrived and over the weekend were peaceful, but Monday may be a different story.</p>

HEADLINE	05/17 Tacoma's new bike lane campaign
SOURCE	http://www.king5.com/story/news/local/tacoma/2015/05/17/this-lane-is-your-lane-bike-safety/27480237/
GIST	<p>More and more bikeways are popping up in Tacoma. They're a big hit with cyclists, but for drivers it's a bit confusing.</p> <p>The city hopes a new safety campaign with a familiar slogan can get everyone on board. Instead of "This land is your land, this land is my land" the city is telling people "This lane is your lane."</p> <p>After adding more than 13 miles of bikeways the city is now working to educate everyone on how to share the road. The improvements include a bike boulevard along Park Avenue, which is marked by sharrows, letting cars and bikes know they share the lane.</p> <p>"A lot of people don't understand why you're on the road and they're not used to it" cyclist Noah Struthers says. Struthers is the Executive Director of the Second Cycle community bike shop, it's a non-profit that tries to get more Tacoma residents to choose two wheels instead of four.</p> <p>"We're just working to demystify the bike here, take away the smoke and mirrors of bike mechanics and make it more accessible and understandable" he said. Struthers believes both the extra lanes and the education are making a difference.</p>

HEADLINE	05/17 Officials probe airplane hack claim
SOURCE	http://www.king5.com/story/tech/2015/05/17/hacker-sideways-chris-roberts-fbi-united/27492409/
GIST	<p>SAN FRANCISCO — U.S. authorities are probing whether a computer security expert was actually able to hack into the computer system of a plane he flew aboard and cause it to bank sideways for a brief time.</p> <p>Chris Roberts, a well-known cybersecurity researcher, had previously alerted authorities to what he said were security flaws in several common airliners.</p> <p>He told FBI agents in April that he had hacked into the in-flight entertainment systems on numerous planes and, in one case, made a plane briefly fly sideways by telling one of the engines to go into climb mode.</p> <p>Senior law enforcement officials said Sunday that no evidence gathered thus far suggests that such a capability, as outlined by Roberts, exists. The official was not authorized to speak publicly.</p> <p>"While we will not comment on specific allegations, there is no credible information to suggest an airplane's flight control system can be accessed or manipulated from its in flight entertainment system. Nevertheless, attempting to tamper with the flight control systems of aircraft is illegal and any such attempts will be taken seriously by law enforcement."</p> <p>Roberts did not respond to requests for comment, but did tweet on Saturday that he's been advised to keep quiet on the topic. "There's a whole five years of stuff that the affidavit incorrectly compressed into 1 paragraph....lots to untangle," he tweeted.</p>

HEADLINE	05/16 'Paddle in Seattle' gather against oil rig
SOURCE	http://www.seattletimes.com/seattle-news/environment/paddle-in-seattle-protesters-gather-against-shell-oil-rig/
GIST	<p>Conrad Ely drove from Olympia with three friends, a double kayak and a canoe. Amy McKendry arrived with her family and a canoe she's had since she was 8. Brandon Juhl came in from Snohomish without a boat, but was able to launch into Elliott Bay with an extra kayak another donated to the cause.</p> <p>They joined more than 200 other boats Saturday for Paddle in Seattle, a flotilla organized by a coalition of environmental groups, activists and tribal leaders from around the country to demonstrate concern about the impact of fossil-fuel consumption on climate change and to show disappointment in the Port of Seattle's decision to host Shell's offshore Arctic oil-drilling fleet.</p>

The coalition, Shell No! Action Council, has said the protests will culminate Monday with a day of peaceful civil disobedience that will attempt to shut down Shell operations at the Port. That protest is to start at 7 a.m. at the Duwamish Fishing Dock.

“We are building a movement, and this is how it starts,” said Renny Reep, one of Seattle’s Raging Grannies, who stayed on land with hundreds of other activists for Saturday’s events.

“We just have to stop Shell Oil,” she said.

The Port of Seattle’s Terminal 5 has been the center of an environmental and political standoff since the Port commission announced in January that Foss Maritime would lease the vacant terminal to use as a home base for Shell’s fleet during the winter months.

The 307-foot-tall Polar Pioneer oil rig arrived Thursday despite a request by the Port commission that it and support vessels stay away while the Port challenges a city ruling aimed at keeping them out.

The rig is the biggest piece of Shell’s 25-vessel fleet in the Pacific Northwest that is set to resume its controversial oil exploration in the Chukchi Sea off Alaska’s North Slope. Company officials view that area as one of the world’s top prospects for a major oil find.

Terminal 5 offers a deep-water berth, and has enough space to handle the big equipment needed to load a drilling rig.

Even if the environmental community can’t change the Port’s mind and send the rig on its way, many on Saturday simply wanted to take a stand.

HEADLINE	05/18 Ukraine: 2 Russian officers caught
SOURCE	http://www.foxnews.com/world/2015/05/18/ukraine-forces-claim-theyve-captured-2-russian-officers-near-rebel-held-area/?intcmp=latestnews
GIST	<p>KIEV, Ukraine – The Ukrainian government on Sunday claimed to have captured two Russian officers who were operating in the rebel-controlled area.</p> <p>Ukrainian military spokesman Andriy Lysenko said on Sunday the two Russian officers have been taken prisoner by the volunteer Aidar battalion in the town of Shchastia, not far from the front line. He would not provide further details and said investigators were questioning the men.</p> <p>Aidar said on its Facebook page that the two officers were wounded and taken captive in a skirmish in the area early on Sunday.</p>

	A year-long conflict between Russia-backed separatists and government troops in eastern Ukraine has killed more than 6,100 people. Russia has repeatedly denied that it was supplying the separatists with rebels or recruits despite the mounting evidence testifying to the contrary.

HEADLINE	05/18 NE corridor Amtrak service restored
SOURCE	http://www.foxnews.com/us/2015/05/18/amtrak-service-between-philadelphia-and-new-york-restored-after-deadly-crash/
GIST	<p>PHILADELPHIA – Amtrak trains began rolling on the busy Northeast Corridor early Monday, the first time in almost a week following a deadly crash in Philadelphia, and officials vowed to have safer trains and tracks while investigators worked to determine the cause of the derailment.</p> <p>Amtrak resumed service along the corridor with a 5:30 a.m. southbound train leaving New York City. The first northbound train, scheduled to leave Philadelphia at 5:53 a.m., was delayed and pulled out of 30th Street Station at 6:07 a.m.</p> <p>About three dozen passengers boarded the New York City-bound train in Philadelphia, and Mayor Michael Nutter was on hand to see the passengers and train off.</p> <p>All Acela Express, Northeast Regional and other services were to also resume.</p>

HEADLINE	05/18 Record number air travelers expected
SOURCE	http://www.foxnews.com/travel/2015/05/18/us-airlines-expect-record-number-travelers-this-summer/?intcmp=latestnews
GIST	<p>NEW YORK – A record number of travelers are expected to take to the skies this summer thanks to a rebounding economy.</p> <p>U.S. airlines will carry 222 million passengers between June 1 and Aug. 31, topping the summer of 2007 when 217.6 million people flew, Airlines for America, the industry's trade and lobbying group, predicted Monday. That figure includes 31 million travelers on international flights, also a record.</p> <p>On average, there will be 2.4 million passengers a day, 4.5 percent more than last summer.</p> <p>After several years of limiting their expansion, U.S. airlines are now quickly adding more seats, including 4.6 percent more this summer. Those added seats are mostly the result of airlines flying larger planes and packing in extra rows to existing jets.</p>

	<p>Those extra seats have given pause to some Wall Street analysts who worry that airlines might have to discount fares to fill them. That hasn't happened yet, but after years of steadily rising airfares, there is a tiny bit of relief for fliers this summer — \$2.01 in savings to be exact.</p> <p>The average roundtrip domestic ticket this summer, including taxes, now stands at \$454, down less than a percent from last summer. Vacationers to Europe will fare better, with the average ticket down 3 percent to \$1,619, about \$50 less than last summer, according to the Airlines Reporting Corp., which processes ticket transactions for airlines and travel agencies.</p> <p>Summer can be one of the most difficult times to fly. While airlines can plan days in advance for blizzards, it is hard to know exactly when a thunderstorm will roll through an airport, shutting down all baggage handling and flights. Add into that extremely crowded airports: 13 of the 15 busiest days to travel fall in the summer, according to the airline trade group.</p> <p>Passengers on planes aren't going to have much spare space.</p>

HEADLINE	05/18 Cracking down police 'militarization'
SOURCE	http://www.nbcnews.com/news/us-news/u-s-cracking-down-militarization-local-police-n360381
GIST	<p>The federal government will no longer provide heavy military equipment like tanks and grenade launchers to local cops following weeks of backlash against officers who confronted protesters in Ferguson, Missouri, in armored vehicles and camouflage last year, President Barack Obama will announce Monday.</p>

And if they want other, less-imposing military equipment, local law enforcement agencies will have to submit to stringent federal oversight and restrictions, according to guidelines Obama will outline during a visit to discuss police reform in Camden, New Jersey, for years one of the most dangerous cities in America.

A White House official told NBC News that the Justice Department is seeking to strike a balance by making only appropriate equipment available, and with clear operating standards, training and safety procedures.

The measures are the follow up to an executive measure Obama issued in January to crack down on the intimidating image presented by local agencies patrolling the streets bristling with advanced military weaponry.

The controversy was fueled when Ferguson police took to the streets in camouflage with military gear after the police shooting of 18-year-old Michael Brown, who was unarmed. But complaints about paramilitary-style equipping of local police have been widespread at least since protests over the World Trade Organization exploded into riots in Seattle in 1999.

Local law enforcement agencies have been eligible to receive surplus military equipment through a Defense Department program enacted in 1997.

The equipment that's being banned Monday includes tanks and other tracked armored vehicles, weaponized aircraft and vehicles, firearms and ammunition measuring .50-caliber and larger, grenade launchers and bayonets, the Justice Department said.

Restrictions and conditions will be put on other types of equipment — including armored tactical vehicles like those used in Ferguson, as well as many types of firearms, ammunition and explosives.

The conditions are likely to rankle some local agencies.

HEADLINE	05/18 Kerry vows security for SKorea
SOURCE	http://abcnews.go.com/International/wireStory/kerry-south-korea-talk-security-cyber-issues-31101445
GIST	<p>U.S. Secretary of State John Kerry on Monday accused North Korea of a litany of crimes and atrocities while reassuring South Korea of America's "ironclad" security commitments.</p> <p>Kerry blamed North Korea for continuing to break promises, make threats and "show flagrant disregard for international law" by continuing provocative nuclear and missile activity while oppressing its own people. He said North Korea's "horrific conduct" must be exposed and vowed to ratchet up pressure on</p>

Pyongyang to change its behavior, particularly since it has rebuffed repeated attempts to restart denuclearization negotiations.

"They have grown the threat of their program and have acted with a kind of reckless abandon," Kerry said, referring to North Korea and its leadership, less than a week after South Korea's spy agency said North Korean leader Kim Jong Un ordered his defense chief executed with an anti-aircraft gun for complaining about the young ruler, talking back to him and sleeping during a meeting Kim presided over.

That allegation, if true, adds to concerns about the erratic nature of Kim's rule, particularly after Pyongyang claimed last weekend it had successfully test-fired a newly developed ballistic missile from a submarine.

Kerry called the reported killing just the latest in a series of "grotesque, grisly, horrendous, public displays of executions on a whim and fancy." He said that if such behavior continued, calls would grow in the international community for North Korea to be referred to the International Criminal Court.

South Korean Foreign Minister Yun Byung-se said "the severity of recent threats and provocations" made it essential to bolster the security relationship.

HEADLINE	05/17 Whistleblower: Trident subs 'unsafe'
SOURCE	http://www.heraldscotland.com/news/home-news/trident-whistleblower-says-nuclear-submarines-are-insecure-unsafe-and-a-disaster-wait.1431860917
GIST	<p>TRIDENT submarines are plagued by serious security lapses, beset by multiple safety blunders and are "a disaster waiting to happen", according to a nuclear weapons engineer turned whistleblower who is now being hunted by the police.</p> <p>William McNeilly, who says he was on patrol with HMS Victorious from January to April this year, alleges that the Trident missiles it carries are vulnerable to a terrorist attack that "would kill our people and destroy our land". Infiltrators have "the perfect opportunity to send nuclear warheads crashing down on the UK", he claims.</p> <p>He has written a detailed 18-page report called The Nuclear Secrets, which claims to lift the lid on the alarming state of the UK's ageing and short-staffed nuclear deterrent. He went absent without leave from the Royal Navy last week, is on the run and expects to be arrested. "This is bigger than me, it's bigger than all of us," he says. "We are so close to a nuclear disaster it is shocking, and yet everybody is accepting the risk to the public. If we don't act now lives could be lost for generations."</p> <p>The risk was "extremely high", he told the Sunday Herald. "My information comes from good sources and I have no reason to lie. If change isn't made, a nuclear catastrophe almost certainly will happen."</p> <p>McNeilly's report alleges 30 safety and security flaws on Trident submarines, based at Faslane on the Clyde. They include failures in testing whether missiles could be safely launched, burning toilet rolls starting a fire in a missile compartment, and security passes and bags going unchecked.</p> <p>He also reports alarms being muted because they went off so often, missile safety procedures being ignored and top secret information left unguarded.</p> <p>"It's just a matter of time before we're infiltrated by a psychopath or a terrorist," he says. "There were some people that I served with on that patrol who showed clear psychopathic tendencies."</p>

HEADLINE	05/18 Hamas rebuilding tunnels to Israel
-----------------	---

SOURCE	http://www.i24news.tv/en/news/israel/diplomacy-defense/71593-150518-hamas-rebuilding-tunnels-with-at-least-one-crossing-into-israel
GIST	<p> Hamas is making alarming strides in rebuilding the tunnels leading into Israeli territory from the Gaza Strip, with at least one crossing into Israel.</p> <p> Zionist Union MK Omer Bar-Lev, member of the Foreign Affairs and Defense Committee, speaking at an Israel Bar Association conference said that " Hamas has returned to digging tunnels and one or more of them have crossed the border fence, attacking the sovereignty of the State of Israel. We can't default to (the situation) on the eve of Protective Edge. The hesitancy in government and security of the Prime Minister harms the IDF's deterrence capabilities and abandons the fate of the residents who live near Gaza to the whims of Hamas."</p> <p> During Operation Protective Edge last summer, it was revealed that Hamas has an extensive network of tunnels that they could use to get into Israel.</p> <p> Last month Ya'alon said that the IDF has not yet seen any tunnels which have crossed into Israel but that "we are prepared for the possibility that somebody will try to come out of an opening and the ground and we will have to discover him."</p> <p> Nevertheless, Gaza Division officers have reported seeing digging close to the Israeli border, some just a kilometer and a half from the border.</p> <p> The officers are unsure whether the digging is to reconstruct the tunnels destroyed during the summer war or "preparations for the next round," a senior officer told Haaretz that "Operation Protective Edge began with the goal of destroying the tunnels, and now they are saying – here we are, building again."</p> <p> Since the end of Operation Protective Edge on August 26 with an open-ended truce agreement the militant group has claimed that the terrorist group still has access to Israel via its tunnel network, and that there will be "no security" in Israel as long as there is none in Gaza.</p> <p> However in an interview with the terror group's mouthpiece the Al Risala in October, the military chief said that his men are busy reconstructing the tunnels, adding that "we have no time to lose. We have plenty of work ahead of us, which necessitates great human resources."</p>

HEADLINE	05/17 Gas prices rise nationwide \$.22/gallon
SOURCE	http://www.bellinghamherald.com/2015/05/17/4298985_us-gas-prices-rise-22-cents-per.html?rh=1
GIST	CAMARILLO, Calif. — The average national price of a regular gallon of gasoline has jumped 22 cents in the past three weeks to \$2.80.

	<p>Industry analyst Trilby Lundberg said Sunday that higher crude prices caused by a weaker U.S. dollar and strong gasoline demand drove the increase. However, she says the price was 93 cents lower than a year ago.</p> <p>The average national price for midgrade was \$3.00 and premium was \$3.16. Diesel was \$2.97.</p> <p>In a survey of cities in the Lower 48 states, Los Angeles had the highest-priced gasoline at \$3.95 a gallon. Baton Rouge, Louisiana, had the lowest at \$2.32. The average price in California was up 53 cents to \$3.76 a gallon.</p> <p>Lundberg says gasoline price hikes will likely slow or stop because of an expected increase in supplies.</p>

HEADLINE	05/17 Critics: Canada 'rent-a-cop' programs
SOURCE	http://www.cbc.ca/news/canada/toronto/critics-want-to-see-changes-to-rent-a-cop-programs-in-canadian-cities-1.3077503
GIST	<p>Police officers across Canada have been getting paid for years to stand around manholes and construction sites during off-hours.</p> <p>But no one seems to know just when the practice first started, or where — not even those who reap millions of dollars every year from so-called "paid duty," a program that allows companies and individuals to hire off-duty officers for various events.</p> <p>"When we tried to pin down where these requirements came from, nobody could tell us," says Alok Mukherjee, chair of the Toronto Police Services Board, which oversees the force.</p> <p>From a thick binder labelled "Paid Duty," he pulls a copy of a document from 1957 — minutes from a police board meeting that references setting the rate for paid duty.</p> <p>As far back as the 1920s, Toronto's then-police chief criticized paid duty, saying it would likely be rescinded.</p> <p>But today, the practice has become a funding source for cash-strapped police forces, and a lightning rod for criticism.</p> <p>In cities that include Montreal, Waterloo, Ont., and Calgary, critics are raising concerns that the system grants better protection to those with the means to pay for it, and questioning whether officers can remain impartial towards those who offer lucrative contracts.</p>

In Toronto, where the program has been a political hot potato for decades, city officials are eager to cut back the funds doled out each year for paid duty supervision of municipal projects.

Mukherjee also worries about what he calls the "reputational" cost.

"When people talk about police officers these days, it is interesting how frequently they talk about the police officer who is standing guard over a sewage drain doing nothing, slouching, holding a cup of coffee," he said.

Base salaries of police constables in Toronto range from \$63,436 to \$90,623, the force's website shows. Meanwhile, paid-duty earnings amount to an average of \$8,909 per officer, according to Ontario's so-called sunshine list.

Mukherjee wants to overhaul the program, including eliminating what he calls "rent-a-cops," where officers are hired for events that aren't required by law to have a police presence, such as Maple Leafs and Blue Jays games.

He also wants the city and the province to change rules that mandate when an officer must be on scene, usually to guide traffic, on larger roads that are under construction.

"I'd rather see a combination of special constables, paid duty and private security," he said.

In 2014, Toronto police officers made more than \$27 million for performing paid duties, with the service raking in another \$4 million from a 15-per-cent "administration fee" and another \$1 million for equipment.

More than 80 per cent of that cost is paid for by private individuals or organizations, which is why the head of the police union said the debate is not about finances since it doesn't affect the police budget.

A recent report by the Association of Municipalities of Ontario recommended that some of the specific functions of paid-duty officers should be transferred to civilians or other security providers.

"This could include court security and prisoner transportation, data entry, accident reporting, burglary investigations (provided the burglary is no longer in progress), and forensics, among other functions," the report states.

HEADLINE	05/15 State AG: \$63M consumer settlement
SOURCE	http://q13fox.com/2015/05/15/63-million-settlement-coming-to-washington-consumers/
GIST	SEATTLE — If you purchased a smart phone, television or a computer in the past several years, you could have some money coming.

The state attorney general announced a \$63 million settlement Friday, some of which could be finding its way back into your pocket.

“We make sure powerful interests play by the rules,” said state Attorney General Bob Ferguson.

The settlement is one of the biggest recoveries for the state, seeking money from nine overseas companies.

Ferguson said big-time electronics manufacturers conspired to squeeze Washingtonians out of big bucks.

“The price of virtually every television, LCD computer monitor, TV, cell phone and laptop was inflated because of a conspiracy,” he said.

Ferguson said popular companies such as Sharp, Epson, Toshiba, LG, Hitachi and Samsung worked to fix the price of LCD panels to avoid competing with one another.

The bottom line? Consumers paid nearly 20% more for the electronic devices.

“If you bought multiple of these items,” said Ferguson, “You could have been adversely affected multiple times.”

Now the electronic giants have agreed to fork over \$63 million to Washington state consumers who bought their products between 1998 and 2006.

HEADLINE	05/17 Mount St. Helens 35yrs later
SOURCE	http://www.komonews.com/news/local/A-look-back-35-years-after-Mount-St-Helens-deadly-eruption-304008531.html
GIST	<p>SEATTLE (AP) - Thirty-five years ago, Mount St. Helens in southwest Washington state erupted, killing 57 people, blasting more than 1,300 feet off the top and raining volcanic ash for miles around. Today, the volcano has become a world-class outdoor laboratory for the study of volcanoes, ecosystems and forestry, as well as a major recreational and tourist destination.</p> <p>THE DAY IT BLEW</p> <p>Within minutes of a 5.1 earthquake that hit at 8:32 a.m. on May 18, 1980, the volcano's north flank collapsed, triggering the largest landslide in recorded history. That set off powerful explosions that sent ash, steam, rocks and volcanic gas upward and outward. The lateral blast scorched and flattened about 230 square miles of dense forest.</p>

Soon after, a plume of volcanic ash rose over 80,000 feet and rained down as far as 250 miles away in Spokane. Pushed by winds over the next few days, the ash cloud traveled east across the U.S. and encircled the globe in 15 days.

The eruption blew about 1,314 feet off the volcano and created a horseshoe-shaped crater in the mountain, which now stands at 8,363 feet.

MOST ACTIVE VOLCANO IN THE CASCADE RANGE

Yes, the volcano is still active. "But it's not erupting now," said Carolyn Driedger with the U.S. Geological Survey.

Scientists, however, are constantly recording activity in and around the mountain, including tiny temblors and gas releases.

In September 2004, after 18 quiet years, the volcano rumbled back to life with a swarm of tiny, shallow quakes. The first of a series of small explosions on Oct. 1 shot volcanic ash and gases into the air. A lava dome began to rise in the volcano's crater, building slowly over three years during the eruption period that lasted from 2004 to 2008.

The volcano hasn't erupted since 2008, but it has been changing very subtly. Last year, scientists confirmed suspicions that fresh molten rock has been recharging the volcano since 2008. The magma reservoir about 5 miles beneath the volcano has been slowly re-pressurizing since 2008.

The uplift is slow, steady and subtle, measuring about the length of a thumbnail over six years, scientists said in 2014.

HEADLINE	05/16 Kayaktivists protest Shell oil rig
SOURCE	http://www.kirotv.com/news/news/anti-arctic-drilling-kayaktivists-hold-shell-no-pr/nmHn7/
GIST	<p>SEATTLE — What a sight it was. A flotilla of kayaks and canoes surrounding Shell Oil's controversial Polar Pioneer. There, they said, to protest the oil giant's plan to drill for oil in that pristine wilderness.</p> <p>"For everybody here this feels like a moral decision, a moral choice," said Florence Case, who brought her kayak from Port Townsend.</p> <p>"I think it sends a message to people that we've got to start thinking seriously about this and draw the line somewhere," said Seattle kayaker Tony Case.</p>

	<p>That line was made clearer still when the Polar Pioneer made its way into Elliot Bay on Thursday. Shell and its host, Foss Maritime, defied 11th hour attempts by the city of Seattle and its Port Commissioners to keep the massive oil rig out of Terminal 5.</p> <p>Former Seattle Mayor Mike McGinn, who joined the protest in his own kayak, called those efforts too little, too late.</p> <p>"The port commissioners knew it would be controversial and they kept it secret until the very last minute," McGinn said. "They briefed other elected officials, including our mayor, who also helped keep it a secret until really, it's too late."</p> <p>Efforts to get a reaction from current Seattle Mayor Ed Murray proved fruitless.</p>

HEADLINE	05/16 China reworking long range missiles
SOURCE	http://www.newsmax.com/Newsfront/china-adding-long-range/2015/05/16/id/645091/
GIST	<p>China is now re-working many of its long-range ballistic missiles to carry multiple warheads — a move federal officials and experts say may be aimed at back-stopping the United States as it moves to send stronger missile defense systems into the Pacific, according to a recent Pentagon report to Congress.</p> <p>Though the Chinese have had the capability for years, President President Xi Jinping has reversed the course of many predecessors and has initiated efforts to utilize technology that would miniaturize warheads and put three or more on a single missile, according to a report by The New York Times on the Pentagon document.</p> <p>"This is obviously part of an effort to prepare for long-term competition with the United States," Ashley Tellis, a senior associate at the Carnegie Endowment for International Peace, told the Times. He served as a senior national security official in the George W. Bush administration. "The Chinese are always fearful of American nuclear advantage."</p> <p>The Pentagon document was released on May 8, the Times reports. Beijing's stepped-up nuclear efforts were detailed deep in the document — catching many American officials by surprise, according to the report.</p> <p>In addition, the disclosure came as Secretary of State John Kerry arrived in Beijing on Saturday for discussions on a wide variety of issues, though the Times reports that it was not clear whether this weapons development was on his agenda.</p>

HEADLINE	05/15 Self-driving cars hit roads this summer
-----------------	--

SOURCE	http://www.nbcnews.com/tech/innovation/googles-self-driving-cars-approved-hit-public-roads-summer-n359586
GIST	<p>Google's self-driving cars are cruising off the closed campus tracks and rolling onto public California roads.</p> <p>"This summer, a few of the prototype vehicles we've created will leave the test track and hit the familiar roads of Mountain View, Calif., with our safety drivers aboard," Google wrote in a blog post published Friday.</p> <p>Each prototype car's speed is capped at 25 miles per hour, Google added, and the safety drivers will also have the ability to use a steering wheel, accelerator pedal and brake pedal -- likely in an effort to appease regulators. Google has already been testing the self-driving technology with software the company put in a fleet of Lexus RX450h SUVs that have been on public roads, but this summer will be the first public-road test of cars Google built itself.</p> <p>On Monday, Google defended the driverless car program after the Associated Press published an article stating four of the cars had been involved in accidents in California. Google said in a blog post the cars have been involved in 11 minor accidents over the years, but none of the incidents were the car's fault.</p>

HEADLINE	05/15 Governor declares statewide drought
SOURCE	http://www.king5.com/story/news/local/2015/05/15/washington-statewide-drought-governor-jay-inslee/27376697/?csp=nbcnews
GIST	<p>OLYMPIA, Wash. -- Governor Jay Inslee declared a drought emergency for the entire state on Friday.</p> <p>"We're really starting to feel the pain from this snowpack drought," Inslee said. "Impacts are already severe in several areas of the state. Difficult decisions are being made about what crops get priority water and how best to save fish."</p> <p>The state expects the "snowpack" drought to have the biggest impact on farmers and fish. The Washington Department of Agriculture projects a \$1.2 billion crop loss for this year.</p> <p>"This drought is unlike any we've ever experienced," said Washington Department of Ecology Director Maia Bellon. "Rain amounts have been normal but snow has been scarce. And we're watching what little snow we have quickly disappear."</p> <p>Statewide, the snowpack is just 16% of normal. In April, the U.S. Geological Survey found that 78% of streams around Washington were running below normal and some were at record lows.</p>

HEADLINE	05/17 Twisters from Minnesota to Texas
SOURCE	http://www.nbcnews.com/news/weather/tornadoes-hail-floods-hit-plains-texas-minnesota-n360206
GIST	<p>A powerful storm system stretching from Texas to Minnesota brought flash flood warnings early Sunday after kicking up at least 29 damaging tornadoes overnight and pounding the region with baseball-sized hail.</p> <p>Thousands of customers were without power but there were no immediate reports of any deaths or injuries.</p> <p>Forecasters said the system was continuing its march eastward as radar showed storms across Iowa, Missouri and a large area of Texas. Twenty-seven of the tornadoes were a part of the large, violent weather system covering the Plains, according to the Weather Channel. Two others — one each in Louisiana and Wyoming — were unrelated.</p>

	Severe storms were likely Sunday for the Upper Midwest and mid-Mississippi Valley, including the possibility of isolated tornadoes. Flash flood warnings were also in effect in many areas, including north Texas, NBC DFW reported.

HEADLINE	05/17 NTSB investigator dispels bullet theory
SOURCE	http://www.cbsnews.com/news/amtrak-crash-investigator-skeptical-train-came-under-fire/
GIST	<p>Robert Sumwalt, a member of the National Transportation Safety Board Investigator (NTSB) investigating last week's Amtrak derailment that killed eight people, expressed skepticism that someone shot at the train before it came off the tracks last Tuesday night.</p> <p>"I'd like to downplay that part. I've now seen the fracture pattern. It looks like something about the size of a grapefruit, if you will. And it did not even penetrate the entire windshield," Sumwalt said in an interview on CBS' "Face the Nation" Sunday.</p> <p>The NTSB said last week that a projectile appears to have hit the windshield of the train prior to the crash. The FBI is helping the agency analyze the fractural pattern of crack in the windshield, but Sumwalt cautioned that there is still not enough information to determine whether it was related to the train derailment.</p> <p>"It could be completely coincidental or it could be causal. And that's exactly what we intend to find out," he said.</p> <p>Sumwalt said the train's engineer, Brandon Bostian, has been cooperating with the investigation and met with the NTSB on Friday. He said that Bostian's claims not to remember anything about the crash are plausible, likening his situation to victims of automobile crashes who also don't remember what happened during a traumatic event.</p>

HEADLINE	05/17 Severe weather pummels plains
SOURCE	http://abcnews.go.com/US/severe-weather-heavy-rain-continue-pummel-plains/story?id=31101246
GIST	<p>Another round of severe weather hit the central plains Saturday night, downing power lines and destroying several homes.</p> <p>More than 25 tornadoes were reported on Saturday with Oklahoma and northern Texas receiving the bulk of the storms.</p> <p>Power lines and trees were downed by up to 80 mile per hour wind gusts stretching from Texas to Missouri, and there were homes damaged - or completely destroyed - in Oklahoma.</p>

	<p>Six to 12 homes were damaged in Rogers County, Oklahoma, with two or three completely demolished, Sgt. Logan Eller told ABC news overnight. He said one family was trapped in their home but that the sheriff's office was able to get them out safely.</p> <p>Earlier in the day a tornado in Elmer, Oklahoma also caused heavy structural damage. At times during the storm more than 13,000 were without power in Tulsa, Oklahoma, and 11,000 in Oklahoma City.</p> <p>In Kansas City, the severe thunderstorms brought heavy rains that caused flash flooding, with up to four inches of rain falling in the Kansas City metro area, causing impassable roads and water rescues.</p>

HEADLINE	05/15 Bird flu to disrupt US egg supply?
SOURCE	https://ca.news.yahoo.com/exclusive-sysco-sees-u-bird-flu-hurting-egg-031251016--finance.html
GIST	<p>NEW YORK (Reuters) - Food distributor Sysco Corp said on Friday that a record U.S. outbreak of avian flu would limit its supply of eggs and chickens that lay them for nine to 18 months, based on information provided to the company by its suppliers.</p> <p>Sysco is the biggest U.S. food distributor, whose clients include restaurants, hotels and hospitals. The company is discussing options with its customers, including creating alternative menu items during the period, a Sysco spokesman said in an email.</p>

It is too soon to tell whether the supply squeeze will have a material impact on financial results, spokesman Charley Wilson said. Eggs represent a small portion of the company's dairy products segment, which accounted for 11 percent of revenue in 2014.

The U.S. poultry and egg industry is grappling with the country's biggest outbreak on record of avian influenza, which has proven highly infectious and deadly for poultry. Governors in Nebraska, Wisconsin, Minnesota and Iowa have declared a state of emergency, and the outbreak has shown few signs of waning.

Meanwhile, on Thursday, Post Holdings Inc, calling the flu a "force majeure event," said it now estimates that 25 percent of its egg supply has been affected. Sysco is a major customer for Post's Michael Foods business, which sells egg products, according to filings.

Stifel Nicolaus analyst Christopher Growe expects Post's previous estimate of a \$20 million financial impact in 2015 to at least double, according to a research note.

HEADLINE	05/17 Conflicting reports object hitting train
SOURCE	http://hosted.ap.org/dynamic/stories/U/US_AMTRAK_CRASH?SITE=AP&SECTION=HOME&TEMPLATE=DEFAULT&CTIME=2015-05-17-12-50-08
GIST	<p>PHILADELPHIA (AP) -- As repair crews work to restore rail service following the deadly Amtrak derailment in Philadelphia, investigators are trying to determine the reason for the train's acceleration and sorting through conflicting reports about an object striking its windshield.</p> <p>National Transportation Safety Board member Robert Sumwalt said on CBS's "Face the Nation" program on Sunday that he wanted to "downplay" the idea that damage to the windshield might have come from someone firing a shot at the train shortly before it flew off the tracks, killing eight people and injuring more than 200 others.</p> <p>"I've seen the fracture pattern; it looks like something about the size of a grapefruit, if you will, and it did not even penetrate the entire windshield," Sumwalt said.</p> <p>Officials said an assistant conductor on the derailed train said she heard the Amtrak engineer talking with a regional train engineer and both said their trains had been hit by objects. But Sumwalt said the regional train engineer recalls no such conversation, and investigators had listened to the dispatch tape and heard no communications from the Amtrak engineer to the dispatch center to say that something had struck the train.</p> <p>"But, nevertheless, we do have this mark on the windshield of the Amtrak train, so we certainly want to trace that lead down," he told CNN's "State of the Union."</p> <p>Sumwalt acknowledged, however, in an interview on Fox News Sunday that train engines are routinely struck by various projectiles without catastrophic consequences.</p>

HEADLINE	05/16 Nepal struck by third major quake
SOURCE	http://abcnews.go.com/US/nepal-struck-63-magnitude-earthquake/story?id=31089979
GIST	<p>A 6.3-magnitude earthquake hit Nepal Saturday as the country was still recovering from previous earthquakes in recent weeks.</p> <p>The tremor occurred 15 miles north of Ramechhap, about 50 miles east of the capital of Kathmandu and south of Mount Everest, according to the United States Geological Survey. There was no immediate word on damages.</p> <p>The earthquake follows the deadly 7.8-magnitude earthquake from April 25 that killed over 8,200 people. Further activity, including a 7.3-magnitude earthquake, happened Tuesday, killing 117 people.</p>

HEADLINE	05/16 Immigration court backlog record high
SOURCE	http://touch.latimes.com/#section/-1/article/p2p-8355578/
GIST	<p>Driven by last summer's surge of illegal immigration from Central America, the already large backlog in federal immigration courts has reached an all-time high with more than 445,000 pending cases, according to a new report.</p> <p>As of April, the backlog hit 445,706 cases, a nearly 30% increase since the start of the last fiscal year, according to the Transactional Records Access Clearinghouse at Syracuse University.</p> <p>Immigration courts have been overwhelmed since last summer's influx of more than 68,500 unaccompanied children and about as many family units across the southern border, most from Central America.</p> <p>During the summer surge, unaccompanied children's cases were given priority in the courts, with expedited or "rocket dockets" in Los Angeles and other cities.</p> <p>Even so, they make up a small proportion of the backlog: 70,035 cases, about 16% of the total as of April. But the juvenile case backlog is still 68% larger than it was before the summer surge last June, when there was a backlog of 41,641 juvenile cases.</p> <p>While most backlogged cases involved Mexican immigrants, their backlog has increased only about 4% since the start of last fiscal year, while the backlog has skyrocketed for Central Americans — up about 63% for Guatemalans, about 92% for Salvadorans and 143% for Hondurans.</p>

	The report, based on federal data, found that California, Texas, and New York lead the nation with the largest immigration backlogs, followed by Florida and New Jersey.

HEADLINE	05/16 Italy's Coast Guard rescues 2,452
SOURCE	http://www.cnn.com/2015/05/16/world/italy-migrant-rescues/index.html
GIST	<p>Italy's coast guard says it rescued 2,452 migrants in the Mediterranean Sea on Thursday. The rescues were conducted through 11 operations that were coordinated by a central office in Rome, the coast guard said Friday via Twitter.</p> <p>Italy has been coping with a wave of desperate migrants from Africa and the Middle East. There has been an upsurge in migrant boats crossing the Mediterranean in an attempt to reach the country, and a corresponding increase in rescues performed by the Italian Coast Guard.</p> <p>Some 34,570 migrants arrived in Italy between January 1 and May 7, according to the International Organization for Migration. The same group says 1,780 migrants died while trying to reach Italian shores.</p>

HEADLINE	05/16 NASA: Antarctica ice shelf disappearing
SOURCE	http://www.cnn.com/2015/05/16/us/antarctica-larsen-b-ice-shelf-to-disappear/index.html

GIST	<p>One of the last remaining sections of Antarctica's Larsen B Ice Shelf is dramatically weakening, according to a new NASA study.</p> <p>The study predicts that what remains of the once-prominent ice shelf, a thick floating platform of ice, most likely will "disintegrate completely" before the end of this decade.</p> <p>Ice shelves are extensions of glaciers and function as barriers. Their disappearance means glaciers potentially will diminish more quickly, as well, increasing the pace at which global sea levels rise.</p> <p>A team led by Ala Khazendar of NASA's Jet Propulsion Laboratory in Pasadena, California, found evidence of the ice shelf flowing faster and becoming more fragmented. The flow is creating large cracks in the ice shelf.</p> <p>"These are warning signs that the remnant is disintegrating," Khazendar said in a NASA press release. "Although it's fascinating scientifically to have a front-row seat to watch the ice shelf becoming unstable and breaking up, it's bad news for our planet."</p> <p>The Larsen B Ice Shelf has existed for at least 10,000 years.</p>

HEADLINE	05/16 KCSO fires deputy for behavior
SOURCE	http://www.seattletimes.com/seattle-news/urquhart-fires-deputy-over-day-of-drunken-misbehavior/
GIST	<p>A King County sheriff's deputy has been fired after he reportedly passed out drunk while boating in the Tacoma Narrows and left his holstered gun behind on the dock, where it was found by teenagers.</p> <p>Deputy Christopher Dearth, assigned to the SeaTac Police Department, was terminated May 1 over the off-duty incident, according to records released to The Associated Press, The Seattle Times and other news organizations under a public-records request.</p> <p>At a news briefing Friday, Sheriff John Urquhart said he fired Dearth after sustaining two allegations — conduct unbecoming a deputy and conduct that was criminal in nature.</p> <p>Urquhart said Dearth had been a good deputy during about nine years with the sheriff's office.</p> <p>"But there are some things as a police officer that you do that you can't walk away from," Urquhart said. "And this was one of those."</p> <p>In recommending Dearth's termination, Chief Deputy Jim Pugel wrote that it was clear Dearth, 28, not only operated a vessel under the influence on Jan. 19, but also left his department-issued identification and firearm on the dock at the Narrows Marina — and assaulted the Tacoma police officers who responded.</p>

	<p>They nevertheless appeared to give him preferential treatment because he was a deputy, Pugel said. The gun was turned over to police by marina staff.</p> <p>“Additionally, there is ample evidence that the primary reason Deputy Dearth was not arrested and booked into jail for assault, obstructing and boating under the influence was because of his employment,” Pugel wrote, adding, “Anyone else who behaved in such a way and was not a police officer would most probably have been.”</p>

HEADLINE	05/16 Ousted Egypt president faces death
SOURCE	http://touch.latimes.com/#section/-1/article/p2p-83556887/
GIST	<p>An Egyptian court Saturday issued a preliminary death sentence against Egypt's ousted Islamist President Mohamed Morsi, making him the first president in the country's history to face the possibility of public hanging.</p>

The ruling, involving a deadly 2011 jailbreak in which some 20,000 inmates were set free, was sent to Egypt's grand mufti for a non-binding review. The action is a compulsory step under Egyptian law before the court returns its final verdict. The next hearing in the case is set for June 2.

More than 100 other defendants, including fellow former leaders of the Muslim Brotherhood, were also sentenced to death Saturday.

GIST	<p>SAN FRANCISCO -- Some Starbucks customers have had money siphoned out of their Starbucks mobile app by thieves using a clever new attack, but Starbucks itself hasn't been hacked, the company said Friday.</p> <p>The attack, which first appeared this week, takes advantage of three things: consumers who use the same ID and password across multiple accounts, the Starbucks' app auto-load function, and the fact that Starbucks doesn't appear to have a limit on the number of password attempts before it locks a customer out.</p> <p>Any threat to its app could add up to big numbers. In 2014 Starbucks processed \$2 billion in mobile payment transactions. Currently about 18% of its transactions are done on the company's app, Starbucks says.</p>

HEADLINE	05/18 Pakistan firm behind fake diplomas
SOURCE	http://www.nytimes.com/2015/05/18/world/asia/fake-diplomas-real-cash-pakistani-company-axact-reaps-millions-columbiana-barkley.html?hp&action=click&pgtype=Homepage&module=a-lede-package-region&region=top-news&WT.nav=top-news&r=0
GIST	<p>Seen from the Internet, it is a vast education empire: hundreds of universities and high schools, with elegant names and smiling professors at sun-dappled American campuses.</p> <p>Their websites, glossy and assured, offer online degrees in dozens of disciplines, like nursing and civil engineering. There are glowing endorsements on the CNN iReport website, enthusiastic video testimonials, and State Department authentication certificates bearing the signature of Secretary of State John Kerry.</p>

“We host one of the most renowned faculty in the world,” boasts a woman introduced in one promotional video as the head of a law school. “Come be a part of Newford University to soar the sky of excellence.”

Yet on closer examination, this picture shimmers like a mirage. The news reports are fabricated. The professors are paid actors. The university campuses exist only as stock photos on computer servers. The degrees have no true accreditation.

In fact, very little in this virtual academic realm, appearing to span at least 370 websites, is real — except for the tens of millions of dollars in estimated revenue it gleans each year from many thousands of people around the world, all paid to a secretive Pakistani software company.

That company, Axact, operates from the port city of Karachi, where it employs over 2,000 people and calls itself Pakistan’s largest software exporter, with Silicon Valley-style employee perks like a swimming pool and yacht.

Axact does sell some software applications. But according to former insiders, company records and a detailed analysis of its websites, Axact’s main business has been to take the centuries-old scam of selling fake academic degrees and turn it into an Internet-era scheme on a global scale.

As interest in online education is booming, the company is aggressively positioning its school and portal websites to appear prominently in online searches, luring in potential international customers.

At Axact’s headquarters, former employees say, telephone sales agents work in shifts around the clock. Sometimes they cater to customers who clearly understand that they are buying a shady instant degree for money. But often the agents manipulate those seeking a real education, pushing them to enroll for coursework that never materializes, or assuring them that their life experiences are enough to earn them a diploma.

To boost profits, the sales agents often follow up with elaborate ruses, including impersonating American government officials, to persuade customers to buy expensive certifications or authentication documents.

Revenues, estimated by former employees and fraud experts at several million dollars per month, are cycled through a network of offshore companies. All the while, Axact’s role as the owner of this fake education empire remains obscured by proxy Internet services, combative legal tactics and a chronic lack of regulation in Pakistan.

“Customers think it’s a university, but it’s not,” said Yasir Jamshaid, a quality control official who left Axact in October.

“It’s all about the money.”

HEADLINE	05/18 Muslim group hacks Auckland Univ.
SOURCE	http://www.stuff.co.nz/national/crime/68620658/muslim-group-hacks-auckland-university-website
GIST	<p>The University of Auckland is investigating how one of its websites was hacked by a group calling itself the Middle East Cyber Army.</p> <p>The cyber attack targeted the English Language Academy site, spokeswoman Alison Lees said. The site was brought down on Sunday and was out of service until Monday.</p> <p>A preview of the website on Google showed it had been "hacked by the Middle East Cyber Army". It read: "We are just here to deliver a message. We are Muslims and we are proud", along with Arabic script, which mentioned the prophet Muhammad.</p> <p>Lees said as soon as the university was alerted to the hack the site was taken offline and replaced with a maintenance page.</p> <p>She said no student data was stored on the server and no data was compromised. The website is hosted externally on a third-party server and was back running normally by Monday afternoon, she said.</p> <p>Lees said the university was looking into how the attack happened.</p>

HEADLINE	05/17 ISIS preps for cyber war
SOURCE	http://thehill.com/policy/cybersecurity/242280-isis-preps-for-cyber-war
GIST	<p>Islamic terrorists are stoking alarm with threats of an all-out cyber crusade against the United States, and experts say the warnings should be taken seriously.</p> <p>Hackers claiming affiliation with the Islamic State in Iraq and Syria (ISIS) released a video Monday vowing an "electronic war" against the United States and Europe and claiming access to "American leadership" online.</p> <p>"Praise to Allah, today we extend on the land and in the Internet," a faceless, hooded figure said in Arabic. "We send this message to America and Europe: we are the hackers of the Islamic State and the electronic war has not yet begun."</p> <p>The video received ridicule online for its poor phrasing and the group's apparent inability to make good on its cyber threat this week.</p> <p>But as hackers around the world become more sophisticated, terrorist groups are likely to follow their lead and use the same tools to further their ends, experts said.</p>

“It’s only really a matter of time till we start seeing terrorist organizations using cyberattack techniques in a more expanded way,” said John Cohen, a former counterterrorism coordinator at the Department of Homeland Security.

“The concern is that as an organization like ISIS acquires more resources financially they will be able to hire the talent they need or outsource to criminal organizations,” Cohen added. “I think they’re probably moving in that direction anyway.”

Military officials agree. NSA Director Adm. Michael Rogers this week called the pending shift “a great concern and something that we pay lots of attention to.”

“A number of individuals that have recently joined the movement of ISIS were folks that studied computer science in British schools and European universities,” said Tom Kellermann, chief cybersecurity officer at security firm Trend Micro, who said ISIS’s cyber capabilities are “advancing dramatically.”

Even the man responsible for a number of the brutal ISIS beheadings, dubbed “Jihadi John” by his captives, has a computer science degree, Kellermann said.

Part of the danger of the ISIS threat is the group’s ability to marshal attacks from its sympathizers, generating a diffuse and unconnected network that is hard to track.

Kellermann said the video threats this week were “a call to arms more than anything,” meant to incite individuals to act on their own.

“It has actually added a new dimension to the terrorist threat that our counterterrorism approach is not intended or designed to pick up on,” Cohen said.

So far, supporters have focused on distributed denial-of-service attacks, spear phishing campaigns, and hijacking legitimate websites to push malware, creating what are known as “watering holes.”

HEADLINE	05/15 Bullying moves to social media
SOURCE	http://www.nbcnews.com/health/kids-health/girls-more-likely-be-bullied-even-rates-decline-n359526
GIST	<p>Fewer students say they are being bullied at school. But those who are bullied are more likely to be girls than boys, more likely to be white than minority students — and more likely to be harassed on social media than in the hallways.</p> <p>The Education Department announced survey results Friday that found 22 percent of students age 12 to 18 said they were bullied in 2013.</p>

	<p>The figure, down 6 percentage points from 2011, is the lowest level since the National Center for Education Statistics began surveying students on bullying in 2005.</p> <p>Bullying has spread from school hallways and bathrooms to social media, raising awareness in recent years of what was once largely an underground issue.</p> <p>Students bullied are more likely to struggle in school, skip class, face substance abuse and commit suicide, the department said research has found. Being made fun of, called names or being insulted was the most common way the surveyed students said were bullied. Being the subject of rumors or threatened with harm was also common.</p> <p>The survey is from the School Crime Supplement to the National Crime Victimization Survey. It is a nationally representative sample.</p>

HEADLINE	05/17 Facebook aids sex predators bust
SOURCE	http://fusion.net/story/135327/facebook-helps-police-bust-sex-predators-because-law-enforcement-needs-all-the-help-it-can-get/
GIST	<p>On one hand, the Internet makes it easier for predators to find their prey online, and even exploit victims virtually by instructing other adults to molest children on webcams while they watch from the safety of their homes, thousands of miles away. But at the same time, online mischief leaves a digital footprint, which makes it easier for authorities to track pedophiles and predators across cyberspace, sometimes nabbing them before they cross the Rubicon from virtual perverts to real life offenders.</p> <p>“Since communicating over the Internet means users leave a digital footprint, police can now better investigate potential crimes, including the sexual exploitation of minors — and indeed adults,” says Melina Lito, program officer for sex trafficking for Equality Now. “The Internet is hugely important in gathering evidence and building cases against traffickers and other exploiters.”</p> <p>But U.S. law enforcement needs Facebook’s help to keep an eye on the prurient prowlings of online dirtbags.</p> <p>“Law enforcement does not monitor general Internet activity, unless we are tipped off to it,” says FBI Public Affairs Officer Christopher Allen. That means the FBI’s ability to catch guys like Big Dave Thompson “logically requires someone to tip law enforcement,” Allen adds.</p> <p>In some cases, that someone is Facebook. The social media company has a security team of hundreds of people around the world monitoring the 1.4 billion Facebook users for offensive or harmful content. The</p>

company says it removes any exploitive content that threatens or promotes sexual violence and alerts law enforcement when it deems need for police intervention.

Exploitive content, according to Facebook, “includes the sexual exploitation of minors, and sexual assault. To protect victims and survivors, we also remove photographs or videos depicting incidents of sexual violence and images shared in revenge or without permissions from the people in the images.”

But no one seems to know — or wants to say— just how often Facebook gets involved in tipping off law enforcement about suspicious online behavior. Facebook won’t say, ICE claims it doesn’t know, and FBI just said “No” when asked if they had any data on the number of Facebook tips they investigate.

What is clear is that online child pornography and sexual exploitation of minors is an enormous and growing market. The National Center for Missing and Exploited Children reports that there are an average of 2,000 arrests made in the U.S. each year for the possession of or trade in child porn. And that’s just in the U.S.

HEADLINE	05/16 Researcher tells FBI of airplane hack
SOURCE	http://www.businessinsider.com/hacker-chris-roberts-allegedly-said-he-hacked-airplanes-entertainment-system-2015-5
GIST	<p>A prominent hacker and security researcher allegedly told the FBI he accessed an airplane's in-flight entertainment system to make it fly sideways, according to a search warrant application filed by the FBI.</p> <p>One World Labs founder Chris Roberts was detained by the FBI in April after tweeting that he might hack into the domestic United Airlines flight he was flying on. According to the FBI affidavit — first put online by APTN News and highlighted in an article in WIRED — Roberts had spoken with the FBI earlier this year about repeatedly hacking into planes' in-flight entertainment systems, and in one instance, using his access to issue a climb command and make the plane turn sideways.</p> <p>After interrogating him, the FBI confiscated two of Roberts' laptop computers, as well as several hard drives and USB sticks, WIRED reports.</p> <p>The search warrant application also details how Roberts said he hacked into the plane's in-flight entertainment system — IFE — to change its flight.</p> <p>"He compromised the IFE systems approximately 15 to 20 times during the time period 2011 through 2014," according to the warrant application. "Each of the compromises occurred on airplanes equipped with IFE systems with video monitors installed in the passenger seats."</p>

	<p>Roberts said he was able to get physical access to the IFE systems by removing the cover of the Seat Electronic Box installed underneath passengers seats, according to the FBI filing. Then, the FBI said, he would use a modified Ethernet cable to connect his laptop to the IFE system, which allowed him to access other airplane systems.</p> <p>"He stated that he then overwrote code on the airplane's Thrust Management Computer while aboard a flight ... [and] successfully commanded the system he had access to the issue the 'CLB' or climb command," the warrant application states.</p> <p>With the command, according to the FBI document, Roberts "caused one of the airplane engines to climb resulting in a lateral or sideways movement of the plane."</p>

HEADLINE	05/16 Sony PlayStation Network hacked?
SOURCE	http://www.bidnesstc.com/42949-sony-playstation-network-down-lizard-squad-claims-credit/
GIST	<p>After Sony's PlayStation Network (PSN) intermittently went down yesterday, reports claim that the hacking group "Lizard Squad" might be behind the outage.</p> <p>Disgruntled online PSN gamers took to social media, complaining they were unable to go online with their PlayStation 4 or PlayStation 3 consoles, which prevented them from playing multiplayer games such as Destiny and Call of Duty: Advanced Warfare. Other issues also surfaced when trying to connect single-player games, including Bloodborne, to third-party servers.</p> <p>Sony confirmed that the PlayStation Store, PlayStation Video, PlayStation Vue, PlayStation Now, and all social features were inactive. "You may be experiencing issues related to signing in or creating an account on PlayStation Network," the company posted on its website, in response to a barrage of nervous questions from customers.</p> <p>The bad news is that Lizard Squad is back as it claimed it was responsible for the recent PSN outage at more or less the same time people started complaining about the network problems. The group also tweeted that it was launching an attack on PSN servers moments before DownDetector realized hundreds of gamers were complaining about it. The group even provoked the FBI by saying none of its members had been indicted, though another report indicated that a few were charged.</p>

HEADLINE	05/16 Cyber war escalates
SOURCE	http://www.bankingexchange.com/risk-management/cyberfraud-id-theft/item/5483-cyber-war-escalates
GIST	Phishing, malware, denial of service, bots, keyloggers, advanced persistent threats—banks have become all-too-aware of not only what these are, but why they need to be defended against.

From the earliest days of the internet—barely 20 years ago—despite all the undeniable benefits that digital technology represents, banks have suffered attacks from criminals able to exploit digital vulnerabilities.

For two decades, the industry has invested increasing amounts of time, talent, and, especially, money to battle an intractable cyber menace.

The war has only started, it seems.

Many bank execs and others are coming to the realization that that juggernaut of cyber criminality is accelerating.

All the defenses put into place so far likely won't stand a chance against the cybercriminal masterminds—and the lesser lights among them who can just buy new digital weapons on the dark net and elsewhere—who are coming up the ranks now. More resources, on top of what's already in place, are needed to push back against this insidious threat.

The situation is forcing fundamental changes in strategy as financial institutions seek to take advantage of the beneficial aspects of technology in the face of heavy regulation, customer preferences, and increasing competition.

It's not that the execs were naïve or uninformed about the dangers of phishing. There's a new development in the phishing arena, and even the follow-on phenomenon of spear phishing, in which criminals target specific companies.

The new thing is called “whaling,” in which the targets are specific, high-level individuals in a corporate network. Through social engineering and other means, the crooks are able to leverage personal information regarding an executive to gain access to confidential data that can be exploited for profit.

A Kaspersky Lab report finds that in 2014, cybercriminals used the names of well-known banks in 16% of attacks, compared with 22% in 2013. Meanwhile, attacks on well-known online shopping sites rose to 7% in 2014, from 6.5% the year before.

Surely cold comfort. The war never ends.

HEADLINE	05/16 Hackers attack German parliament
SOURCE	http://www.nytimes.com/2015/05/16/world/africa/germany-hackers-attack-computers-in-the-lower-house-of-parliament.html?_r=0

GIST	<p>Hackers have launched an attack on the computer system of the Bundestag, the lower house of the German Parliament, a parliamentary spokesman said Friday.</p> <p>The spokesman, Ernst Hebecker, said that the origin and dimensions of the attack were not yet known, and that administrators in the Bundestag had spotted the first indications of a cyberattack a few days earlier.</p> <p>Warnings of a disruption went out to at least some lawmakers on Friday morning, when many were absent because of the Ascension holiday weekend. The attack followed an assault in January on the websites of some government offices, including Chancellor Angela Merkel's office. Responsibility for those attacks was claimed by a Russian hacker group that said it opposed German support for the government of Ukraine.</p>

HEADLINE	05/15 Cyberattack hits Penn State
SOURCE	http://www.cnet.com/news/penn-state-cyberattack-exposes-passwords-from-18k-people/
GIST	<p>Pennsylvania State University's College of Engineering revealed Friday that it has been the target of two "highly sophisticated" cyberattacks over the last two years.</p> <p>University President Eric Barron issued an apology Friday that said usernames and passwords from more than 18,000 people may have been accessed. However, investigators did not find evidence that credit card and social security numbers were stolen, Barron said. Another statement from the school said a security company hired by the university to investigate the attacks concluded that at least one of the assaults originated from China.</p> <p>These assaults are the latest in a long line of cyberattacks on US universities. Hacks into databases at the University of California, Los Angeles, the University of Southern California and the University of Maryland have exposed the personal information of hundreds of thousands of people. Barron said that on average Penn State "repels" more than 22 million cyberattacks from around the world every day.</p> <p>"In this particular case we are dealing with the highest level of sophistication," Barron said. "Unfortunately, we now live in an environment where no computer network can ever be completely, 100 percent secure."</p>

HEADLINE	05/18 ISIS slaughtered hundreds in Ramadi
SOURCE	http://www.newsmax.com/Newsfront/isis-slaughter-ramadi-terror/2015/05/18/id/645155/

GIST	<p>Islamic State militants likely killed up to 500 people — both Iraqi civilians and soldiers — and forced 8,000 to flee from their homes as they captured the city of Ramadi, a provincial official said Monday, while the government-backed Shiite militias vowed to mount a counter-offensive and reclaim the Anbar provincial capital.</p> <p>The statements followed Sunday's shocking defeat of Iraq's security and military forces as the militants swiftly took control of Ramadi, sending government forces there fleeing in a major loss despite the support of U.S.-led airstrikes targeting the extremists.</p> <p>Bodies, some burned, littered the city's streets as local officials reported the militants carried out mass killings of Iraqi security forces and civilians. Online video showed Humvees, trucks and other equipment speeding out of Ramadi, with soldiers desperate to reach safety gripping onto their sides.</p> <p>"We do not have an accurate count yet," said an Anbar spokesman, Muhannad Haimour. "We estimate that 500 people have been killed, both civilians and military, and approximately 8,000 have fled the city." The figures could not be independently confirmed, but Islamic State militants have in the past killed hundreds of civilians and soldiers in the aftermath of their major victories.</p>

HEADLINE	05/18 Germany aided US bin Laden hunt
SOURCE	http://www.newsmax.com/Newsfront/bin-laden-germany-find-pakistan/2015/05/17/id/645148/
GIST	<p>The German spy agency BND helped the United States locate Osama bin Laden's hideout in Pakistan, German newspaper Bild am Sonntag reported Sunday.</p> <p>The information on bin Laden's Abbottabad compound was provided by a BND informant inside Pakistan's Inter-Services Intelligence agency, according to Britain's Telegraph.</p> <p>The German newspaper said that the BND's Bad Aibling listening post in Bavaria was used to monitor telephone and email communications in northern Pakistan to make sure the planned raid by U.S. Navy SEALs remained secret.</p> <p>The report says the United States eventually found bin Laden by tracking one of his couriers, which backs up White House claims last week that Pakistan was not involved in the raid. Journalist Seymour Hersh had reported from an anonymous source that the Pakistani government was actually a part of the mission to kill bin Laden. Both Pakistan and the United States have long denied that.</p> <p>The report of BND involvement is positive public relations for the agency, which has been under fire in Germany for cooperating with the U.S. National Security Agency to spy on political and business groups, including the French government, the European Commission and Airbus Group.</p>

HEADLINE	05/18 Shiite militia mass to retake Ramadi
SOURCE	http://www.nbcnews.com/storyline/isis-terror/isis-ramadi-shiite-militiamen-mass-help-retake-city-sunni-militants-n360486
GIST	<p>Thousands of Shiite militiamen were massing on Monday to help retake the city of Ramadi after ISIS captured the Anbar provincial capital in a stunning setback for Iraq's government.</p> <p>At least 500 people have been killed in Ramadi while around 8,000 have fled, a spokesman for the governor of Anbar told NBC News.</p> <p>"There have been executions in the streets of Ramadi," Muhanad Haimour said, describing how ISIS fighters used cars, bulldozers rigged with explosives and suicide bombers to overrun the city following a weeks-long fight for control.</p> <p>"The situation in the city is absolutely terrible," Haimour added. "The city is in very bad shape."</p> <p>The fall of Ramadi comes despite the support of U.S.-led airstrikes against ISIS and just weeks after Iraq's army and Shiite militias recaptured Tikrit from the Sunni militants. Haimour said he believed fighters retreating from Tikrit had "set their sights on Ramadi" — but expressed certainty the provincial capital wouldn't stay in ISIS' hands for long.</p> <p>When asked if the fall of Ramadi signaled a failure on the part of Iraq's central government, Haimour stressed that Prime Minister Haider al-Abadi had "been doing everything he can" and "dealing with a lot."</p> <p>"It is obviously a failure no matter how you look at it," Haimour conceded. "But we believe the security forces will be able to regroup."</p> <p>One senior Iraqi security official told NBC News that around 3,000 fighters — from armed Shiite groups including the Al-Khurasani Plattons, The Chosen Ones Movement and Badr Forces — were arriving in Ramadi on Monday with more due to deploy in the coming 48 hours.</p> <p>Haimour would not say how many of the militiamen — known as the Popular Mobilization Forces — were being called up, but said their arrival will change the game.</p> <p>While he acknowledged that "Ramadi is a very important city," Haimour said "no one" expects ISIS to survive in Iraq for long.</p> <p>"We believe we are seeing the final chapter," he said. "Not a new beginning or a victory."</p>

HEADLINE	05/17 Tsarnaev mom: US will burn in flames
SOURCE	http://www.vocativ.com/usa/nat-sec/boston-marathon-bomber-dzhokhar-tsnarnaev-mother/
GIST	<p>With her terrorist son sentenced to death, the mother of Boston Marathon bomber Dzhokhar Tsarnaev sent raging messages to his supporters saying the United States will burn “in the flames of an eternal and terrifying fire,” her close friend told Vocativ.</p> <p>“They think that they are killing us and they celebrate this, but we are the ones who will rejoice when Allah grants us the chance to behold them in the flames of an eternal and terrifying fire, an otherworldly flame,” Zubeidat Tsarnaeva wrote Sunday in a WhatsApp message to Zarina Kasenova, a friend and supporter.</p> <p>Zubeidat Tsarnaeva sent several distraught messages this weekend to loved ones after her 21-year-old son received the death penalty for his role in the Boston Marathon bombings in 2013, her friend said.</p> <p>Vocativ discovered Zubeidat Tsarnaeva’s messages, written in Russian, via VKontakte, the Russian social media site, where she and other anti-American supporters of Dzhokhar Tsarnaev have raised money for his defense and rallied around each other. When Vocativ contacted the friend, Kasenova, she said she and other loved ones had doubts about the case. “You should understand that this group is not a shrine to Dzhokhar, it’s a group with doubts about the case,” she wrote via VKontakte messaging. “While there are still doubts, there will be support. I haven’t seen 100% proof of his guilt, so I’m here.”</p> <p>Boston jurors disagreed, rejecting Dzhokhar Tsarnaev’s defense team’s attempt to place the blame on his older brother, Tamerlan, who was killed during a shootout with police days after the bombing. A CBS News poll found that 60% of Americans wanted Dzhokhar Tsarnaev to get the death penalty.</p> <p>The VKontakte group, Support Dzhokhar Tsarnaev, is run by another family friend named Timur Raduyev. Raduyev, who says he is in close touch with the Tsarnaev family, wrote on the group Saturday that Zubeidat told him Dzhokhar’s lawyers wanted to appeal against the death penalty. “I’m broken – Zubeidat and Anzor, be strong, my family,” he posted to his group, to which hundreds of close supporters in Russia and Chechnya responded with crying emojis and profound sadness. Anzor is Dzhokhar’s father.</p> <p>Zubeidat Tsarnaeva declined to comment via WhatsApp when Vocativ reached out to her. Her current WhatsApp profile icon is a picture of an injured Winnie the Pooh bear with an overlaid quote from a 2012 tweet by Dzhokhar: “Sometimes you gotta fight for the things you love most.”</p>

HEADLINE	05/18 Airstrikes resume in Yemen
SOURCE	http://www.cnn.com/2015/05/17/middleeast/yemen-ceasefire-over-airstrikes-resume/index.html

GIST	<p>Smoke and the stench of bombs filled the skies over Yemen again Sunday as a five-day humanitarian cease fire ended. Saudi-led coalition airstrikes resumed in four Aden districts, according to Ali al-Halemi, a security official in Aden, and another official who did not want to be named.</p> <p>There was also confirmation from two activists, Basem Al-Sultan and Abdulaziz al-Shuaibi. All four of those who confirmed the airstrikes were in different districts of Aden.</p> <p>The airstrikes targeted Yemeni Houthis battling coalition forces on the ground. The cease fire ended at 11 pm local time Sunday (4 pm ET). There has been no word of death or injuries yet from the renewed airstrikes. No airstrikes have been witnessed in Sana'a, Yeman's capital.</p> <p>Yemeni President Abdu Rabbu Mansour Hadi -- speaking in Saudi Arabia at the Riyadh Conference for Saving Yemen -- promised his country would survive the unrest.</p> <p>"We promise you, despite all of this, that the breakthrough and victory will be soon," he said, according to the state-run Saudi Press Agency. "...it hurts us to see our country under siege of a coup by militias and their supporters."</p> <p>Brig. Gen. Ahmed Asiri, Saudi-led coalition spokesman, told CNN Saturday that no longer-term cease fire had been reached, and all options would still be on the table when the cease fire ended.</p>

HEADLINE	05/18 ISIS seizes key Iraq city
SOURCE	http://www.cnn.com/2015/05/18/asia/isis-ramadi/index.html
GIST	<p>The key Iraqi city of Ramadi fell to ISIS on Sunday after government security forces pulled out of a military base on the west side of the city, officials said.</p> <p>The ISIS advances came after militants detonated a series of morning car bomb blasts, Mayor Dalaf al-Kubaisy and a high-ranking Iraqi security official said. The explosions forced Iraqi security forces and tribal fighters to retreat to the city's east, they said.</p> <p>"This is a huge setback to Iraqi forces and to the U.S. strategy to degrade and ultimately defeat ISIS," said Peter Mansoor, a retired U.S. Army colonel.</p> <p>But Iraqi and U.S. officials, including Secretary of State John Kerry, said the fight for Ramadi is far from over.</p> <p>"It is possible to see the kind of attack we have in Ramadi, but I am absolutely confident in the days ahead that will be reversed," Kerry said during a visit to Seoul, South Korea, on Monday. "Large numbers of</p>

	Daesh were killed in the last few days, and will be in the next days because that seems to be the only thing they understand."

HEADLINE	05/18 DOD: strategy to defeat ISIS is working
SOURCE	http://www.longwarjournal.org/archives/2015/05/strategy-to-defeat-islamic-state-is-working-us-department-of-defense-claims.php
GIST	<p>This Department of Defense news article ...on the status of the fight against the Islamic State couldn't have been more poorly timed.</p> <p>Published on May 15, the same day that the Islamic State overran the government center in Ramadi, the report provides a Pollyannaish view from Brigadier General Thomas D. Weidley of the US military's air campaign and the Iraqi military's fight against the Islamic State. Weidley is the chief of staff for Combined Joint Task Force Operation Inherent Resolve, the US-led coalition that was put together to "defeat and dismantle" the Islamic State.</p> <p>Weidley described Ramadi as "contested" and claimed that Iraqi forces repelled most attacks in the city when in reality the Islamic State took control of the government center and most neighborhoods in Ramadi by May 15. By May 17, the Islamic State was in full control of Ramadi and overran the Anbar Operations Command and 8th Brigade Headquarters at Camp Ar Ramadi. Iraqi forces are said to be in complete disarray in the Fallujah-Ramadi corridor.</p> <p>Weidley's description of the situation in Baiji was just as overly optimistic. He claimed that while the Islamic State breached the perimeter and has had "episodic control of some refinery facilities to continue attacking Iraqi security forces," Iraqi forces are regaining the initiative inside and outside of the refinery. In reality, the Islamic State controls upwards of 80 percent of the refinery and has besieged an Iraqi force holed up there. The Islamic State is in full control of the city of Baiji and the surrounding areas, the the Iraqi military is unable or unwilling to send reinforcements.</p> <p>Astonishingly, Weidley cites statistics of Coalition airstrikes in Ramadi and Baiji to bolster his case. "Since the beginning of [Operation Inherent Resolve], the coalition has provided precision air support for the [Iraqi forces] with approximately 420 airstrikes in the Fallujah-Ramadi area," Weidley noted.</p> <p>"Since the campaign began its mission to defeat ISIL [the outdated acronym for the Islamic State] eight months ago, coalition forces have carried out 330 airstrikes in the Baiji area," the report stated.</p> <p>Ironically, Weidley is detailing just how anemic and ineffective the US air campaign has been in both Anbar province and Baiji. Despite the estimated 420 strikes in the Ramadi-Fallujah area and 330 more in Baiji, the Islamic State was able to organize its assault forces, advance, and overrun Iraqi security forces in both areas.</p>

	<p>Full text of DoD article, titled Strategy to Defeat ISIL is Working, Military Official Says:</p> <p>WASHINGTON, May 15, 2015 – The coalition and Iraqi security forces strategy to defeat and dismantle the Islamic State of Iraq and the Levant extremist group is clear and on track, the chief of staff of Combined Joint Task Force Operation Inherent Resolve said today.</p> <p>Marine Corps Brig. HEADLINE	05/18 Minnesota experts seek new approach
SOURCE	http://www.startribune.com/minnesota-experts-working-to-counter-terrorism-see-help-from-abroad/304065331/
GIST	<p>WASHINGTON – The federal government has committed more than \$200,000 to Minnesota law enforcement and community groups in a counterterrorism effort officials hope halts young men and women in the United States from being recruited to fight with Islamic extremist groups.</p> <p>President Obama has asked Congress for an additional \$15 million to expand such efforts nationally in his budget this year.</p> <p>But the “countering violent extremism” program, which will likely pay for youth mentorships and cultural programs, already is coming under fire before it has doled out any cash in Minnesota.</p> <p>Civil liberties groups have argued from the start that the efforts targeted at the Somali community paint too broad a brush and stigmatize their community. They also say there should not be a forced federally funded relationship between law enforcement, religious leaders and schools.</p> <p>Nearly 50 Minnesota Muslim groups recently signed a petition expressing concerns over countering violent extremism, or CVE, efforts.</p> <p>“It is our recommendation that the government stop investing in programs that will only stigmatize, divide and marginalize our communities further,” the petition said.</p> <p>Instead, counterterrorism experts argue, the United States needs to look to Europe, which has a longer history of battling extremism.</p> <p>The arrests last month of six men for allegedly planning to go abroad to fight with the Islamic State in Syria have heightened conversations among experts that therapy should be given a higher focus and that more should be done to counter recruiting campaigns ahead of time.</p>

Germany, Sweden, Denmark and Saudi Arabia have programs that have counselors and community leaders working at the forefront to try and change behavior, before getting law enforcement involved.

British authorities have endorsed a program run by professional cage fighter Usman Raja, who seeks to counter Islamic extremism with abundant empathy.

Raja's approach is internationally recognized and backed by federal officials in the United Kingdom, as well as the world's foremost Islamic scholars.

Besides Raja's program in the U.K., the British government funds a program called "Channel" that allows people worried about friends or family to approach officials without the risk they will be part of a sting operation or they will get thrown in jail.

In Minnesota, a number of community leaders acknowledged they are learning as they go about how best to counter violent extremism, and many of the programs — including a controversial one in Minneapolis Public Schools — remain in formative stages.

HEADLINE	05/18 Report: 'white widow' in 400 deaths
SOURCE	http://www.breitbart.com/national-security/2015/05/18/report-white-widow-samantha-lewthwaite-responsible-for-400-deaths/
GIST	<p>An anti-terror officer told The Daily Mirror that Samantha Lewthwaite, who has become known as the White Widow, is personally responsible for over 400 murders since she quickly rose up the ranks of Somalian radical Islam group al-Shabaab.</p> <p>"She is an evil person but a very clever operator," he claimed.</p> <p>Officials believe she orchestrated the massacre of 148 people at Garissa University College in Kenya. Witnesses said the gunmen specifically slaughtered the Christians. Al-Shabaab conducted that massacre only a few days after militants seized a hotel in Mogadishu, which left 17 people dead.</p> <p>However, she rose to international fame after al-Shabaab attacked innocents at the Westgate Mall in Kenya in September 2013. The murderous rampage killed 67 people and injured another 175. Interpol issued an arrest warrant for Lewthwaite in the wake of the attack. They sent the red alert to 190 countries, notifying officials it is a priority to pass along any information on her whereabouts.</p> <p>"The lady has moved up the ranks. She is one of the most important figures in the terror group," said a top officer at Somalia's National Intelligence and Security Agency. "We think this lady is sitting at the right hand of the leader directing attacks. She does not carry out attacks herself as she is too important but is</p>

responsible for many, many deaths – hundreds. She uses children to kill for her after giving money to their families.”

Lewthwaite’s parents raised her a Christian, but after they broke up in 1994, her life went downhill and she converted to Islam. She married Germaine Lindsay in 2002. Only three years later, Lindsay detonated a bomb on a train between King’s Cross and Russell Square, leaving 26 dead. Lewthwaite denied any knowledge of the attack and claimed extremists lured her husband into the plot. She vanished in 2009 with her two children.

Lewthwaite is now a mother of four. In 2013, confidential Scotland Yard file stated that she was married to Abdi Wahid, a former officer in the Kenyan Navy. She was found in Kenya in possession of a fake passport and became a terrorist suspect when Kenyan officials found her fingerprints during an investigation into an al Qaeda plot against Western tourists. This led officials to believe she was working with the Somalia group al-Shabaab, an offshoot of al Qaeda. The Mombasa police gave her the nickname “White Widow”; it would not be her last brush with the law.

Jermaine Grant, her accused accomplice in the planned 2011 attack, is currently on trial in Mombasa. Scotland Yard counter-terrorism detective Robert Garrick testified yesterday and said the police found sexy lingerie at her Kenyan safe house along with her birth certificate. He said there were plenty of pink and red lingerie in her room.

The Daily Mail also published pictures of her residence in South Africa. She received a South African passport under the name Naledi Pandor, but the neighbors knew her as Natalie Faye Webb and said she lived there for three months. Officials reported she accrued around \$8,800 in debt, including \$3,000 to two leading South African banks and \$1,000 to two clothing stores, and worked as an IT specialist at a halal meat pie factory.

Now authorities believe she underwent plastic surgery, changed her hair color, and lost weight.

The Mirror also claims she “escaped death in March when she had just left a terrorist camp” when bombed it.

In May 2014, The Daily Mirror reported she married a third time. This time she married Hassan Maalim Ibrahim, also known as Sheikh Hassan, who is a warlord. The marriage offers her more “protection by her new husband’s heavily-armed relatives.” At that time, witnesses spotted her Baidoa.

“Her in-laws will treat her very well as she is now one of them and part of one of the large clans,” claimed one security official. “Samantha is in a heavily guarded village in a no-go area for outsiders. But we’re sure she’ll move around which is why she needs to get in with the family. At the moment she hardly leaves her grass thatch house. She wears black socks and gloves and hijab to cover her white skin so spies won’t see her. Samantha has given herself great protection with this marriage.”

	The Somalian authorities believe she lives in Haaway in southern Somalia, which is controlled by al-Shabaab.

HEADLINE	05/17 ISIS threatens Obama after raid
SOURCE	http://www.newsmax.com/Newsfront/isis-obama-threat-kill/2015/05/17/id/645132/
GIST	<p>The Islamic State group (ISIS) has threatened to kill President Barack Obama after a weekend by the U.S. military left the ISIS second-in-command dead, Independent Journal Review reports.</p> <p>Following the killing of Abu Sayyaf in Syria, a tweet, posted in Arabic by an ISIS follower threatened death for Obama and "worshippers of the cross."</p> <p>Translated into the English, the tweet reads: "If your goal is killing Abu Sayyaf then our goal is killing Obama and the worshippers of the cross. We have attacks coming against you." The militant also posted a photoshopped picture of a beheaded Obama.</p> <p>IJReview noted that while the group is highly unlikely to succeed in killing the president, the threats should be taken seriously because ISIS has the ability to hit other high-level U.S. officials. The article cites the killing of Ambassador Chris Stevens and three other Americans in Benghazi, Libya, on Sept. 11, 2012.</p>

HEADLINE	05/17 ISIS smuggling fighters w/refugees
SOURCE	http://www.mirror.co.uk/news/world-news/isis-terror-group-smuggling-fighters-5714524
GIST	<p>Terror group Islamic State are using human trafficking gangs to smuggle militant extremist to the west. The jihadi organisation is utilising the Mediterranean refugee crisis to sneak their fighters into Europe, and investigation has revealed.</p> <p>Intelligence sources say ISIS are working with the cruel people-smuggling network to hide terrorists, bent on destruction, on boats among stricken refugees.</p> <p>Experts claim ISIS is also capitalising on the emergency in the region to fund its terrorist activities by taxing people smugglers.</p> <p>Abdul Basit Haroun, an adviser to the intelligence service of the Libyan government, said he had spoken to boat owners who operate in IS-controlled areas who told him the group takes a 50 per cent cut of their income.</p> <p>The proceeds can run to tens of thousands of pounds per vessel.</p>

	<p>He told BBC 5 live Investigates: "The IS, what they are doing they are not controlling the boat. They give permission for the boat owner to use the spot under their control and they charge them for that 50/50 of whatever they make. They use the boats for their people who they want to send to Europe as the European police don't know who is from IS and who is a normal refugee or not. The boat owners have a list of who to take but some people come suddenly out of the list and they're told take them with you. They sit down separately, they come alone and in the boat they are not scared at all. They are for IS - 100 per cent."</p> <p>Asked why ISIS would be doing this, he said: "I think they do something for planning in future, not for today or tomorrow."</p>

HEADLINE	05/17 Iraq trained recruits go empty handed
SOURCE	http://www.stripes.com/news/awaiting-weapons-iraq-s-trained-recruits-go-home-empty-handed-1.346717
GIST	<p>IRBIL, Iraq — At a military base among the rolling hills of Kurdistan, thousands of volunteers have been trained to fight Islamic State militants just 10 miles from the group's stronghold of Mosul.</p> <p>As the base expands, it's preparing to train thousands more. Yet many of the recruits — mainly Sunni Muslims, Christians, Kurds and other minorities — are no closer to the battlefield than when they began drilling. Without enough weapons to fight, they are sent home after an average of three weeks of training.</p>

The fighters, whose role could prove crucial in the effort to rout the Islamic State group, are at the center of a debate over whether the United States and other Western countries should send weapons directly to Iraq's minority groups instead of channeling them through the Shiite-dominated central government.

The volunteers' leaders say that Baghdad, which has expressed fear that the Sunni volunteers might turn on the government after an Islamic State defeat, has been funneling most of the arms provided by international backers to its Shiite militia allies. Though some Republicans in Congress favor sending weapons straight to the Sunnis and Kurds so as to bypass Baghdad, the Obama administration firmly opposes such a move out of fear it could deepen the country's ethnic divide.

"We have about 10,000 fighters who are well-trained to fight, but so far we don't have enough weapons or equipment for them," said Atheel al-Nujaifi, a Sunni and the exiled governor of Nineveh province, which includes Mosul. "The central government hasn't given us weapons for the volunteers, and even for the police, they have only given 20 percent of what they need. It's a real problem for us."

The Iraqi Ministry of Defense declined to comment for this article.

HEADLINE	05/17 ISIS makes further advances in Ramadi
SOURCE	http://www.bbc.com/news/world-middle-east-32773780
GIST	<p>Islamic State militants have made further gains in the Iraqi city of Ramadi, with reports of them taking a key military command centre.</p>

	<p>Local officials have said the city is on the verge of falling, with army reinforcements unable to hold ground.</p> <p>The prime minister called on troops not to abandon their posts, while telling Shia militias to prepare to deploy.</p> <p>Ramadi is the capital of Iraq's largest province, Anbar, and is just 70 miles (112km) west of Baghdad.</p> <p>Muhannad Haimour, a spokesman for the provincial governor, told AFP news agency that security forces had abandoned an operations command base on Saturday on the northern bank of the Euphrates.</p> <p>But he added: "Ramadi has not fallen - there are still people fighting in some neighbourhoods."</p> <p>A police commander said government forces had redeployed from the city to its outskirts.</p>

HEADLINE	05/16 ISIS looting sites into 'oblivion'
SOURCE	http://www.nbcnews.com/storyline/isis-terror/isis-looting-destroying-ancient-syrian-sites-industrial-scale-n359461
GIST	<p>CAIRO — Precious Syrian historical sites in ISIS-controlled territory are being looted "into oblivion," experts told NBC News amid reports the Sunni militants were closing in on more ancient treasures.</p> <p>With fears mounting that Palmyra — home to monumental and significant ruins — would fall to ISIS, archaeologists and legal experts convened in Cairo for a conference on how to stem the destruction of the region's cultural heritage.</p> <p>Syria is experiencing looting "on an industrial scale" in ISIS-controlled territory, according to Michael Danti, Boston University archaeology professor.</p> <p>"They are really looting sites into oblivion," said Danti, who is co-director of the ASOR Syrian Heritage Initiative, a team of scholars documenting destruction of Syrian and Iraqi sites with the U.S. Department of State.</p> <p>Danti's findings are based on high-resolution satellite imagery and information from experts and residents on the ground.</p> <p>"The sites look like the surface of the moon... They're coming in with bulldozers and actually removing entire chunks of archaeological mounds," he said. "They take the antiquities out and use the soil as fertilizer or fill for new constructions."</p>

	He said the destruction benefits ISIS — which makes money from selling licenses, imposing taxes and taking a cut of looting profits. The tax — normally of around 20 percent — is based on Islamic jurisprudence, which deems treasures found in the ground and spoils of war to be taxable items, Danti explained.

HEADLINE	05/17 Syria: ISIS pushed from Palmyra
SOURCE	http://www.cbsnews.com/news/syria-isis-ousted-palmyra-unesco-world-heritage/
GIST	<p>After several days of fierce clashes, Damascus declared on Sunday Islamic radical fighters have withdrawn from Palmyra, a town in central Syria home to famed 2,000-year-old ruins.</p> <p>"Syrian troops have advanced and recaptured control of the whole city. The air force has been mounting dozens of air strikes against ISIS militants who are running away in the desert," a military source told CBS News on condition of anonymity.</p> <p>He said dozens of jihadi fighters were killed in the fighting.</p> <p>The official Syrian news agency SANA quoted a military source as saying on Saturday that regime forces had prevented ISIS fighters from seizing a hilltop southwest of the Islamic citadel.</p> <p>Most of Palmyra's renowned ruins, including colonnaded streets and elaborately decorated tombs, lie to the southwest of the city.</p>

HEADLINE	05/16 Inside raid that killed ISIS leader
SOURCE	http://www.cbsnews.com/news/inside-the-us-raid-against-senior-isis-leader-abu-sayyaf/
GIST	<p>In an early morning mission conducted under the cover of darkness Saturday, a team of Delta Force commandos took out roughly a dozen Islamic State of Iraq and Syria fighters, including a key ISIS leader, Abu Sayyaf -- the man described as the head of the terror group's lucrative oil operations.</p> <p>The commandos went into eastern Syria aboard Black Hawk helicopters and Osprey tilt rotor aircraft. Their target was a building where Sayyaf lived with his wife and oversaw black market oil operations, a major source of ISIS income.</p> <p>One Pentagon official called Sayyaf the "Chief Financial Officer of ISIS."</p> <p>A firefight broke out, and according to Pentagon officials, some of the ISIS fighters attempted to use women and children as human shields. About a dozen enemy fighters were killed in fighting that sometimes involved hand-to-hand combat.</p>

	<p>Pentagon officials said there were no reports of civilian casualties and no Americans were killed or wounded, although there were bullet holes in some of the aircraft.</p> <p>The commandos found Sayyaf and his wife, Umm Sayyaf, on the top floor of the building. According to Pentagon officials, he attempted to resist and was killed. His wife was captured and taken back to Iraq, along with a young Iraqi woman who officials believe had been enslaved by Abu Sayyaf. The young woman will be returned to her family. The wife will be interrogated.</p> <p>Officials believe she knows about the abuse suffered by Kayla Mueller, the American aid worker who died earlier this year while being held hostage by ISIS.</p> <p>Defense Secretary Ash Carter called the killing of Abu Sayyaf a significant blow to ISIS, although no one expects it to cripple the organization.</p> <p>This was the first successful commando raid into Syria. The troops brought back captured cellphones and laptops, which will now used in an effort to track down other ISIS leaders.</p>

HEADLINE	05/17 Taliban bomber attacks EU vehicle
-----------------	--

SOURCE	http://www.cnn.com/2015/05/17/asia/afghanistan-violence/index.html
GIST	<p>Four people, including a British citizen, were killed by a Taliban suicide bomber Sunday in the Afghan capital, authorities said.</p> <p>Kabul police spokesman Ebadullah Karimi said at least 18 people were wounded in the attack, which occurred just after 9:00 a.m. near Hamid Karzai International Airport.</p> <p>According to Karimi, the bomber targeted the European Union vehicle -- occupied by the Briton and three others -- with an explosive-laden car.</p> <p>"We can confirm that a British national was tragically killed in a terrorist attack in Kabul this morning," a spokesman for the United Kingdom's Foreign Commonwealth Office said. "We stand ready to provide consular assistance to the family."</p> <p>The three other EU Police Mission members in the car suffered injuries that were not thought to be life-threatening, EUPOL said in a statement.</p> <p>The Taliban claimed responsibility for the attack. "The target of the suicide car bomb attack was a convoy of foreign invaders," Taliban spokesman Zabiullah Mujahid said in a statement.</p> <p>EUPOL is a civilian operation that's aimed at helping the development of Afghanistan's police service.</p>

HEADLINE	05/15 Boston bomber sentenced to death
SOURCE	http://abcnews.go.com/US/jury-reaches-verdict-boston-marathon-bombing-penalty-phase/story?id=31067121
GIST	<p>Boston Marathon bomber Dzhokhar Tsarnaev has been sentenced to death today by a jury in a Boston federal courthouse.</p> <p>Tsarnaev was convicted by the same jury of seven women and five men last month of all 30 counts related to the deadly April 15, 2013 bombing. Three people were killed, including an 8-year-old boy, and another 260 were injured when Tsarnaev and his older brother, Tamerlan, detonated twin explosive devices near the finish line of the marathon. Three days later, the brothers murdered MIT police officer Sean Collier.</p> <p>Tamerlan Tsarnaev was killed in a shootout with police four days after the explosions. The jury today found death the penalty was "appropriate" for six of the 17 death penalty eligible counts against Dzhokhar Tsarnaev.</p> <p>"The jury has spoken. Dzhokhar Tsarnaev will pay with his life for his crimes," U.S. Attorney Carmen Ortiz said following the verdict.</p>

HEADLINE	05/16 Turkey shoots down Syria helicopter
-----------------	--

SOURCE	http://www.wsj.com/articles/turkish-forces-shoot-down-syrian-helicopter-1431800538
GIST	<p>ISTANBUL—Turkey’s armed forces shot down a Syrian helicopter Saturday, Turkish officials said, days after Ankara pressed its North Atlantic Treaty Organization allies to push for regime change in Damascus as part of a broader effort to fight terrorism in the Middle East.</p> <p>A Syrian helicopter breached a seven-mile stretch of the border in the Cilvegozu district of Turkey’s southeastern Hatay province for about five minutes just after 2 p.m. local time, Turkish Defense Minister Ismet Yilmaz said. After Turkey detected the border violation, two F-16 fighter jets on patrol headed to the region and attacked the chopper, which crashed inside Syria, Turkey’s military said.</p> <p>“I congratulate our armed forces for responding as necessary against Syrian forces,” Mr. Yildiz said in televised comments from the central Anatolian province of Sivas.</p> <p>While there was no confirmation of Ankara’s claim from Damascus, Syria’s pro-government Addounia TV channel, citing military sources, contradicted Mr. Yilmaz’s account, saying Turkish forces had downed a small, remotely controlled surveillance plane.</p>

HEADLINE	05/16 US: key ISIS leader death major blow
SOURCE	http://www.politico.eu/article/white-house-us-special-forces-kill-key-islamic-state-leader/
GIST	The death of a senior leader of the Islamic State of Iraq and the Levant, the capture of his wife and the seizure of a trove of intelligence about ISIL’s inner workings amount to a major blow against the extremist group, U.S. officials said Saturday.

Army Delta Force special operators killed the “chief financial officer” of ISIL, Abu Sayyaf, in a nighttime cross-border raid late Friday or early Saturday. The elite American troops took captive his wife, Umm Sayaaf, who is said to be highly knowledgeable about the terror group’s inner workings, and brought back a cache of documents, laptop computers and other materials said to include financial and communications information.

“This is very useful, very important intelligence that we were able to collect,” a defense official told POLITICO.

The raid also freed an Iraqi Yezidi woman whom the couple were believed to be holding as a slave.

It is a rare publicly known case of U.S. ground operations in Syria, where the militant group, also known as ISIS, has grabbed significant territory. Although a U.S.-led coalition has dealt the Islamic State significant setbacks, especially in Iraq, the group is far from defeated. Just this week, it captured the government headquarters in Ramadi, the capital of Iraq’s Anbar province.

Military planners have been working for more than a month on the raid to try to capture Abu Sayyaf, who helped oversee ISIL’s illicit sales of oil and gas, which represent a key source of its revenue.

The American special operators were surprised to discover relics at the site including an ancient Assyrian bible, coins and other artifacts, the defense official said — even though ISIL has been destroying what it calls ancient examples of “idolatry” in the territory it controls in Syria and Iraq.

National Security Council spokeswoman Bernadette Meehan said the operation “was conducted with the full consent of Iraqi authorities and, like our existing airstrikes against ISIL in Syria, consistent with domestic and international law.”

Secretary of Defense Ash Carter, in a separate statement, said “the operation represents another significant blow to ISIL, and it is a reminder that the United States will never waver in denying safe haven to terrorists who threaten our citizens, and those of our friends and allies.”

HEADLINE	05/16 Top bin Laden aide gets life in prison
SOURCE	http://www.foxnews.com/us/2015/05/16/top-bin-laden-aide-sentenced-to-life-in-prison-in-embassy-bombing-plot/
GIST	NEW YORK – A former top aide to Osama bin Laden was given life in prison for the 1998 bombings of two embassies in Africa, a sentence handed down Friday in a U.S. courtroom where he was confronted by a woman who was blinded in one of the attacks and others who lost loved ones.

	<p>"I worship the same God as you," said Ellen Karas, directly addressing Khaled al-Fawwaz. "But he is not an angry God. He is not a vengeful God."</p> <p>Edith Bartley, whose father and brother were killed in the same attack in Kenya that scarred Karas, told the judge al-Fawwaz deserved a life term.</p> <p>Al-Fawwaz, 52, was arrested in London weeks after the August 1998 attacks but was not extradited from Great Britain until 2012. He was convicted in February of terror charges accusing him of supporting the attacks in Kenya and Tanzania that killed 224 people, including a dozen Americans.</p>

HEADLINE	05/16 Lebanon arrests ISIS commander
SOURCE	http://www.ibtimes.com/lebanon-arrests-isis-commander-countrys-northeast-reports-1925561
GIST	<p>Lebanese troops arrested a commander from the Islamic State group in the country's northeastern region, according to media reports on Saturday. The suspect was captured in the village of Labweh, where he was arrested at an army checkpoint while heading north, according to the Daily Star, which cited the state-run National News Agency.</p>

	<p>The report did not specify when the arrest was made.</p> <p>The man was later identified as 21-year-old Abdel-Rahman al-Bezerbashi, an ISIS member known as "Baghdadi's grandson," the Daily Star reported, citing Lebanese media.</p> <p>A security source told the Daily Star that the man was "suspected of having links to Syrian rebel groups," but he could confirm his rank or affiliation. He added that the man was also not carrying any identification proof.</p> <p>ISIS has been a threat along Lebanon's border since last year, when the militant group briefly overran the town of Arsal, near Labweh, triggering a five-day clash with the Lebanese army that killed dozens.</p>

HEADLINE	05/16 US kills ISIS militant commander
SOURCE	http://www.ctvnews.ca/world/u-s-forces-kill-isis-militant-in-rare-raid-into-syria-1.2377280
GIST	<p>BEIRUT -- In a rare ground attack deep into Syria, U.S. Army commandos killed a man described as the Islamic State's head of oil operations, captured his wife and rescued a woman whom American officials said was enslaved.</p> <p>A team of Delta Force commandos slipped across the border from Iraq under cover of darkness Saturday aboard Black Hawk helicopters and V-22 Osprey aircraft, according to a U.S. defence official knowledgeable about details of the raid. The official was not authorized to discuss the operation publicly and spoke on condition of anonymity.</p> <p>The Americans intended to capture a militant identified by U.S. officials as Abu Sayyaf. When they arrived at his location, a multi-story building, they met stiff resistance, the U.S. official said, and a firefight ensued, resulting in bullet-hole damage to the U.S. aircraft.</p> <p>Abu Sayyaf was killed, along with an estimated dozen IS fighters, U.S. officials said. No American was killed or wounded.</p> <p>Before the sun had risen, the commandos flew back to Iraq where Abu Sayyaf's wife, Umm Sayyaf, was being questioned in U.S. custody, officials said. The goal was to gain intelligence about IS operations and any information about hostages, including American citizens, who were held by the group, according to Bernadette Meehan, spokeswoman for the U.S. National Security Council.</p> <p>Abu Sayyaf was described by one official as the IS "emir of oil and gas," although he also was targeted for his known association with the group's leader, Abu Bakr al-Baghdadi.</p>

HEADLINE	05/17 Scotland Yard monitored sci-fi?
SOURCE	http://www.dailymail.co.uk/news/article-3085856/How-police-kept-track-Trekkies-Met-drew-secret-dossier-Star-Trek-X-Files-fearing-sci-fi-shows-cause-riots-mass-suicides.html
GIST	<p>Star Trek and The X-Files were among science-fiction TV shows monitored by Scotland Yard over fears they posed a potential threat to national security, it was revealed yesterday.</p> <p>Nineties TV shows Dark Skies, Roswell, Millennium and the film Lawnmower Man were also watched by the Metropolitan Police Special Branch, according to newly-released files.</p> <p>Police were concerned British fans of the US shows would kill themselves or turn against society, while they also kept tabs on the shows to protect the country from rioting and cyber-attacks.</p> <p>The report compiled in 1997 said that viewers obsessed with the programmes could go into a frenzy triggered by the millennium, leading to anarchy and ‘an act of extreme violence’.</p> <p>It read: ‘Fuel is added to the fire by television dramas and feature films mostly produced in America. These draw together the various strands of religion, UFOs, conspiracies, and mystic events and put them in an entertaining story line. It is not being suggested that the production companies are intentionally attempting to ferment trouble. However, producers of programmes, including The X-Files, Millennium, Dark Skies and Star Trek, know what psychological buttons to press to excite interest in their products. Obviously, this is not sinister in itself. What is of concern is the devotion certain groups and individuals ascribe to the contents of these programmes.’</p> <p>The report maintained that as the nineties drew to a close, various groups were showing ‘an unhealthy interest’ in microchip technology and barcodes.</p> <p>Growing numbers of people imagined microchips could be surgically implanted in their brains to provide immediate screening information, or barcodes stamped on their foreheads ending in 666 - ‘the number of the beast,’ the report said.</p> <p>Scotland Yard was worried many shows were linked to Government conspiracy theories.</p>

	'The problem is that growing numbers are not treating this as entertainment and finding it impossible to divorce fantasy from reality,' the report warned.

HEADLINE	05/17 Putin invasion this summer?
SOURCE	http://www.thedailybeast.com/articles/2015/05/17/new-putin-invasion-coming-this-summer.html#
GIST	<p>The war in Ukraine may have faded largely from international headlines, but Vladimir Putin's drip-drip invasion continues. In the last two weeks, forensic evidence, some of which has been reported by monitor organizations and senior Western diplomats, the rest corroborated by eyewitness photography and video, only confirms what the U.S. fears most: A summer offensive is inevitable.</p> <p>On May 5, the Ukrainian government released new data which says that they have lost 28 towns to Russian-backed separatists since February 18. That was the day the strategic town of Debaltsevo, which guarded a key highway to separatist-controlled regions, slipped from Ukraine's control. The map of separatist territory is as alarming as it is illustrative, especially when it is combined with the daily reports of ceasefire violations and fighting coming out of both the Organization for Security and Co-operation in Europe (OSCE) and Kiev.</p> <p>On May 6, Ukrainian President Petro Poroshenko addressed the National Security and Defense Council and warned that Russia has 50,000 troops on the border and its proxies have more than 40,000 fighters inside the country. That's not only a combined 50% increase in possible invaders over July of last year, the month which preceded the "Russian invasion" on the Ukrainian mainland. It's more than enough soldiers to invade and gobble up a significant amount of Ukrainian territory.</p> <p>"There is a convincing evidence that Ukraine strictly complies with the Minsk [ceasefire] agreements and militants constantly violate them," Poroshenko noted. Separatists do not allow international observers to verify their withdrawal of heavy weaponry. "Militants regularly shoot Ukrainian positions, engage in reconnaissance and subversive activity and provoke armed confrontations in order to disrupt peaceful settlement of the conflict."</p> <p>One day later, May 7, the OSCE witnessed a significant amount of fighting both near Donetsk and around a town called Shirokino, 20 kilometers east of Mariupol—part of a trend of heavier fighting which started in late April.</p> <p>While the OSCE reports that it has seen an increase of heavy weaponry within the demarcation line for weeks, Ukraine maintains that it is only returning fire and it is the Russian-backed separatists who are on the offensive. On May 8, the day after the OSCE's unmanned aerial vehicle (UAV) was jammed, the OSCE witnessed three Ukrainian tanks in government-controlled territory—an admitted violation of the negotiated ceasefire. That same day the OSCE witnessed 30 separatist tanks moving toward the front lines within the demarcation line—10 times more than the Ukrainian government was deploying. The OSCE</p>

	also observed a testing ground for advanced weaponry—proof, according to the U.S. ambassador to Ukraine, Geoffrey Pyatt, of “Russia’s train and equip program in plain sight.”

HEADLINE	05/16 Hidden volcano may pose a threat
SOURCE	http://www.krem.com/story/news/nation/2015/05/16/hidden-cascade-volcano-poses-threat/27459593/
GIST	<p>SEATTLE — Monday marks the 35th anniversary of the eruption of Mount St. Helens that killed 57 people. Mount Rainier is considered the world's most dangerous volcano because of its size and how close it is to the population centers of Tacoma and Seattle.</p> <p>But there's another mountain you've probably never seen that's getting attention for the risks it poses to the Seattle area.</p> <p>Unlike most of the volcanoes in the Cascade Mountains that are viewable from Interstate 5 or even Seattle, few people notice Glacier Peak. It lurks within in the northern Cascades in Snohomish County and has a record of violent, even extreme eruptions.</p> <p>Jim Vallance a geologist at the Cascades Volcano Observatory, was a young field assistant on Mount St. Helens in the wake of the 1980 eruption. He remembers doing field work on St. Helens in 1979.</p> <p>"It was quiet. You may remember if you were an old timer in the Northwest, that Spirit Lake was a blue body of water with cabins all around," said Vallance. "That all changed dramatically in 1980."</p> <p>"As impressive as it was, Mount St. Helens was actually hundreds of feet shorter than Glacier Peak," Vallance points out. "The summit is right here."</p> <p>Now his role at the observatory is dedicated to understanding Glacier Peak. Every year's brief field season is on foot or with the help of pack mules to bring out more samples that lead to more understanding.</p> <p>"I'm working on a giant four-dimensional puzzle. I'm trying to work out what happened in the past, when did it happen and how often," said Vallance.</p> <p>When a volcano's glaciers melt during an eruption, it picks up massive amounts of fine dirt and debris. It becomes what's called a lahar.</p> <p>In the case of Glacier Peak, the geological record shows lahars reaching as far away as Mount Vernon, Burlington, Stanwood and Puget Sound by following the Skagit and Stillaguamish rivers.</p> <p>When could an eruption on Glacier Peak occur? There's no telling, said Vance, remembering that summer of 1979, when Mount St. Helens seemed so quiet.</p>

	"It could be this year or a thousand years," he said.

HEADLINE	05/16 Hawaii volcano set to erupt?
SOURCE	http://hosted.ap.org/dynamic/stories/U/US_VOLCANO_EARTHQUAKES?SITE=AP&SECTION=HOME&TEMPLATE=DEFAULT&CTIME=2015-05-16-20-28-46
GIST	<p>HONOLULU (AP) -- A series of earthquakes and shifting ground on the slopes of Kilauea have scientists wondering what will happen next at one of the world's most active volcanos.</p> <p>A lake of lava near the summit of Kilauea on Hawaii's Big Island had risen to a record-high level after a recent explosion. But in the past few days, the pool of molten rock began sinking, and the surface of the lava lake fell nearly 500 feet.</p>

	<p>Meanwhile, a rash of earthquakes rattled the volcano with as many as 20 to 25 quakes per hour, and scientists' tilt meters detected that the ground was deforming.</p> <p>"Clearly the lava, by dropping out of sight, it has to be going somewhere," said Steven Brantley, deputy scientist in charge of Hawaiian Volcano Observatory of the U.S. Geological Survey.</p> <p>One possibility is that a new lava eruption could break through the surface of the mountain, Brantley said.</p> <p>Right now, there are two active eruptions on Kilauea. One is the eruption spewing into the lava lake in the Halemaumau Crater, which is visible in Hawaii Volcanoes National Park. The other is Puu Oo vent, in Kilauea's east rift zone, which sent fingers of lava toward the town of Pahoa before stopping outside a shopping center last year.</p> <p>The flurry of earthquakes that peaked in intensity Friday have been rattling Kilauea's southwest rift zone, so it's possible that a new eruption could occur southwest of the Halemaumau Crater, or even in the crater itself, Brentley said. Or, the tilting, shifting ground could lead to nothing.</p>

HEADLINE	05/17 Nigeria: restaurant served human flesh
SOURCE	http://www.dailymail.co.uk/news/article-3084326/Nigerian-restaurant-shut-serving-HUMAN-flesh-bags-containing-human-heads-bleeding.html
GIST	<p>A Nigerian restaurant has reportedly been shut down for cooking human flesh and serving it to customers.</p> <p>The police were tipped off by locals who suspected something horrific was taking place inside the kitchen. They raided the hotel restaurant to discover human heads which were still dripping with blood in plastic bags.</p> <p>A local priest who ate at the restaurant - in the south-eastern province of Anambra - was alarmed at the price of meals there, let alone where the meat came from,BBC Swahili reported.</p> <p>He was presented with a bill of 700 Naira - around £2.20 - when the daily wage for tens of millions of Nigerians is approximately 60p.</p> <p>The priest said: 'The attendant noticed my reaction and told me it was the small piece of meat I had eaten that made the bill scale that high. I did not know I had been served with human meat, and that it was that expensive.'</p> <p>The police also found a terrifying arsenal of weapons which included grenades when they raided the restaurant. Ten people were arrested in connection to the crimes.</p>

HEADLINE	5/17 Strange sound from the sky?
SOURCE	http://www.dailymail.co.uk/travel/travel_news/article-3084260/What-strange-sound-sky-Noise-heard-globe-nearly-DECADE-explanation.html
GIST	<p>A mysterious noise from the sky is continuing to baffle people all over the world - as well as giving those who hear it sleepless nights.</p> <p>Sounding like a trumpet or a collective from a brass section of an orchestra, a selection of videos shot from the Canada to Ukraine, via the U.S., Germany and Belarus show strange goings on above us.</p> <p>And the eerie sounds have been continuously heard at all different times and locations for almost a decade.</p> <p>The first video posted on YouTube recording the unusual, unearthly sounds, was in 2008 when a user recorded the strange sounds in the sky from Homel, in Belarus.</p> <p>That same year another anonymous user shared the 'ear-deafening' sounds that they insisted 'were not a hoax,' from a quiet neighbourhood believed to be in the U.S.</p> <p>Kimberly Wookey from Terrace, British Columbia in Canada first captured the alien sound in June 2013, and since then she has managed to capture several recordings of the noise with her most recent being on May 7 this year.</p> <p>Another recording of the sound was captured in Kiev, Ukraine in August 2011. An eyewitness said: 'The sound was extremely loud, with some people 30-40km from the recording also hearing it in other cities.</p> <p>'It was in the news with the investigation with specialists and scientists, but there is still no exact explanation.'</p>

HEADLINE	05/16 Train hit by object before crash?
SOURCE	http://www.cnn.com/2015/05/16/us/philadelphia-amtrak-train-derailment/index.html
GIST	<p>One of three conductors aboard the Amtrak train that derailed in Philadelphia this week told investigators she heard the locomotive's engineer say the train had been struck by an object, National Transportation Safety Board member Robert Sumwalt said Friday.</p> <p>The assistant conductor said she overheard radio transmissions made Tuesday by Amtrak engineer Brandon Bostian and the engineer of a Southeastern Pennsylvania Transportation Authority (SEPTA) train.</p> <p>"She recalled that the SEPTA engineer had reported to the train dispatcher that he had either been hit by a rock or shot at, and the SEPTA engineer said that he had a broken windshield, and he placed his train into</p>

emergency stop," Sumwalt said. "She also believed that she heard (the Amtrak) engineer say something about his train being struck by something."

Bostian was interviewed Friday afternoon for the first time since the derailment of Amtrak Northeast Regional Train 188. Eight people were killed and more than 200 were injured.

The locomotive's windshield was shattered in the derailment. But Sumwalt said there is "particular damage" to the lower portion of the windshield that the FBI will examine. He described it as a "circular pattern that emanates out just a bit."

"We're very interested in this report. We want to learn more about it so we will use all sources of information that we can to independently validate that," Sumwalt said.

HEADLINE	05/17 Spokane nabs repeat violent offender
SOURCE	http://www.krem.com/story/news/crime/2015/05/17/spokane-police-department-arrests-repeat-violent-offender/27506023/
GIST	<p>SPOKANE, Wash. -- The Spokane Police Department said they tracked down and arrested a repeat violent offender on Tuesday.</p> <p>On April 17, police said 30-year-old Brandon Hutchinson was arrested after a vehicle pursuit that included collisions, leading to a foot pursuit and a fight with an SPD officer where he grabbed the officer's Taser. Police said Hutchinson believed it was the officer's gun.</p> <p>Officials said Hutchinson was booked into jail for several felonies including the 1st degree assault with a weapon on an officer and a felony warrant, but he was able to bond out a few days later.</p> <p>Then on May 12, authorities said warrants were issued for his crimes on April 17. The Spokane Police Department from the Patrol Anti-Crime Team learned that he was at a location in the Spokane Valley and possibly armed. Officers said they set up surveillance and attempted to arrest Hutchinson as he was getting in to the passenger side of a vehicle.</p> <p>As officers approached, police said Hutchinson reached the center console, pushed the driver out of the car and sped off. Authorities said he was pursued by officers at high speeds where he later crashed and tried to run. When he was caught officers said he fought violently with officers.</p> <p>Hutchinson has been booked into jail on his warrants and new felony charges.</p>

HEADLINE	05/17 Machete-wielding suspect arrested
SOURCE	http://www.seattlepi.com/local/komo/article/Machete-wielding-suspect-arrested-after-car-chase-6269663.php
GIST	<p>MILTON, Wash. - What started as a search for a machete-wielding suspect in Bellevue ended in a police chase through Milton on Sunday.</p> <p>The search started around 12:30 p.m. along 5901 152nd Avenue SE following a domestic violence incident. Police say a 24-year-old man threatened to kill family members, and fled into the woods with a machete.</p> <p>Aided by a helicopter, officers combed the area around Forest Glen Park with search dogs for hours.</p> <p>Several hours later, a report of multiple carjackings in Federal Way led Bellevue detectives to their suspect. The suspect stole a Mercedes, and dumped it at a convenience store before stealing a Dodge Charger with a 23-year-old passenger inside.</p> <p>The Dodge Charger was spotted near Sears and pursued through Federal Way, Kent, and Auburn. The chase ended in Milton when the suspect crashed at 23rd and Milton Way.</p> <p>Police say the kidnapped passenger was uninjured in the crash, and the uninjured suspect was taken into custody.</p>

HEADLINE	05/18 Miss. police officer injured in shooting
SOURCE	http://www.usatoday.com/story/news/nation/2015/05/18/miss-police-officer-injured-in-shooting/27517841/
GIST	<p>JACKSON, Miss. — After an emotional week in which two Hattiesburg, Miss., officers were killed in the line of duty, the news that a Jackson police officer was "down" Sunday night shook Jackson Police Department to the core.</p> <p>Police spokesperson Colendula Green confirmed that an officer was injured but no one was killed. Several shots were fired, one of which hit the officer in the leg.</p> <p>Officers were clearing the parking lot of the Express Fuel Food Mart at the corner of Bailey Avenue and Northside Drive between 9 and 9:30 p.m. when shots were fired, Green said. Store co-owner Desmond Brown said police shot back.</p> <p>"Gunshots started happening, bullets started flying. JPD started shooting back wildly," Brown said. "There are bullet holes in that canopy."</p>

He said police had been harassing customers for four hours, driving them out of the parking lot and out of the store, and that an officer had told him he had seen someone drinking and "smoking dope" on the premises. Brown, who has often claimed harassment by police but does not have a felony conviction on his record from the state of Mississippi, has been arrested at least twice since April 1. One of those arrests was for allegedly selling spice out of the gas station.

"They incited what happened here tonight," Brown said.

HEADLINE	05/18 Rival biker gangs brawl; 9 dead
SOURCE	http://www.cnn.com/2015/05/18/us/texas-biker-gang-brawl-shooting/index.html
GIST	<p>Even before the deadly melee started, police were already in place, anticipating a brawl. What they saw was far more brutal than what they had expected.</p> <p>Rival biker gangs unleashed a hailstorm of bullets outside a Twin Peaks restaurant in Waco, Texas, leaving nine people dead and at least 17 hospitalized.</p> <p>"In my nearly 35 years of law enforcement experience, this is the most violent and gruesome scene that I have dealt with," Waco police Sgt. W. Patrick Swanton said.</p> <p>It happened in broad daylight -- around noon Sunday at the restaurant known for scantily clad servers and "Bike Nights."</p> <p>The fracas apparently started inside the restaurant's bathroom with something as simple as a shove or a disrespectful glance, authorities told CNN affiliate KTVT. That brawl quickly escalated into a fistfight, which led to a knife fight, KTVT said.</p> <p>The brouhaha spilled into the parking lot, where the gunfire erupted, Swanton said.</p> <p>Bullets flew toward police, who returned fire. No officers were wounded, and all of the dead and injured are believed to be bikers, Swanton said.</p> <p>He declined to identify the biker gangs involved. By the time the scene cleared, CNN affiliate KWTX said, authorities had recovered more than 100 weapons.</p>

HEADLINE	05/17 Waco: at least 5 biker gangs involved
SOURCE	http://heavy.com/news/2015/05/what-biker-gangs-were-involved-in-waco-texas-shootout-banditos-scimitars-cossacks-motorcycle-club-gang-shooting-victims-rivals-photos-video-gang-names/

GIST	<p>Police say at least 5 biker gangs were involved in a bloody shootout with each other and police in the parking lot of a Waco, Texas restaurant on Sunday that left at least 9 dead and 18 wounded.</p> <p>The biker gangs haven't been publicly identified, but photos and video from the scene show the bikers "flying their colors." Three gangs have been observed there, the Cossacks Motorcycle Club, the Scimitars Motorcycle Club and the Bandidos Motorcycle Club.</p> <p>Law enforcement sources told the Waco Tribune that the Cossacks and the Bandidos were at the center of the incident.</p> <p>Photos also show members of the Leathernecks, Veterans and Los Pirados, though it wasn't immediately clear which, if any, of the other clubs they are affiliated with. The website United Clubs of Waco shows those three clubs as being affiliated with the Bandidos.</p> <p>The Scimitars could be seen among the Cossacks during the aftermath of the shooting.</p>

SOURCE	http://heavy.com/news/2015/05/scimitars-motorcycle-club-biker-gang-waco-texas-shooting-shootout-members-history-patch-facebook-photos-video-cossacks-bandidos-names-victims-crime-arrests/
GIST	<p>Members of the Scimitars Motorcycle Club were among five gangs involved in a violent brawl and shootout outside a Waco, Texas restaurant that left at least 9 dead and 18 wounded.</p> <p>Here's what you need to know about the Scimitars and the shootout:</p> <p>1. The Scimitars Are Aligned With the Cossacks The Scimitars are aligned with the Cossacks Motorcycle Club, which have been feuding with the the Bandidos Motorcycle Club. Photos on Facebook pages belonging to members of the Cossacks in west Texas show the two clubs together.</p> <p>2. The Club Is Based in Texas The Scimitars Motorcycle Club is based in Texas and appears to be a smaller club than the Bandidos and Cossacks. A May 2014 story in the Odessa American shows members of the Cossacks and Scimitars volunteering to build a playground.</p> <p>3. The Waco Shootout Was Called 'One of the Worst Gun Fights' in the City's History One officer called the shootout between the rival gangs "one of the worst gun fights that we've had in the city limits of Waco."</p>

Police told KXXV-TV that all of the victims were gang members who had gathered at the Twin Peaks restaurant. At least 18 others were, also all bikers, were injured. The extent of those injuries wasn't immediately released.

Sgt. Patrick Swanton said innocent bystanders and officers somehow managed to escape injury, including a restaurant full of families just feet away from the one where the shooting started.

"Let's just say it's Sunday and someone was looking out for us," Swanton said. "There were so many rounds fired from bad guy weapons here."

Police said there were at least 100 bikers at the scene and at least five gangs involved. Swanton said the argument started over a parking issue. More than 100 weapons were recovered at the scene.

4. Police Say the Restaurant Management Was at Least Partially at Fault for the Shooting

Police said the business could have done more to prevent the violence.

Waco Police Sgt. W. Patrick Swanton told the Waco Tribune, "Management knew that there were issues, and we were here, but they continued to let those groups of people into their business."

"Apparently the management wanted them here, so we didn't have any say so on whether they could be here or not," Swanton said.

Local District Attorney Abel Reyna told KWTX about two weeks ago that trouble between rival bikers had been brewing at Twin Peaks for some time. He said police were on heightened alert because of incidents during Biker Night on Thursdays.

He said two local motorcycle gangs were feuding and it spilled over as others from the Dallas-Fort Worth area came to Waco to support the local gangs.

5. Police Said the Gangs Wanted to 'Instill Violence Into Our Community'

The police department's spokesman, Sgt. Patrick Swanton, was clear about who the bikers are after a reporter said one of the bikers claimed that they are clubs, not gangs.

"They are a biker gang. We know exactly who they are," Swanton said at a televised news conference. "A bunch of criminal element biker members that came to Waco and tried to instill violence into our community and unfortunately did just that."

"This is not a bunch of doctors and dentists and lawyers riding Harleys," he said. "These are criminals on Harley-Davidsons."

HEADLINE	05/17 Cossacks MC involved in violent brawl
SOURCE	http://heavy.com/news/2015/05/cossacks-motorcycle-club-biker-gang-waco-texas-shootout-shooting-members-photos-patch-video-scimitars-history-arrests-crimes-rival-bandidos/
GIST	<p>Members of the Cossacks Motorcycle Club were among five gangs involved in a violent brawl and shootout outside a Waco, Texas restaurant that left at least 9 dead and 18 wounded.</p> <p>Another gang, the Bandidos Motorcycle Club, were at the center of the fight along with the Cossacks. Another gang that has been identified, the Scimitars, appeared to be aligned with the Cossacks.</p> <p>1. The Cossacks Were Founded in Texas in 1969 The Cossacks were founded in Texas in 1969, according to the book The One Percenter Encyclopedia: The World of Outlaw Motorcycle Clubs. The club’s colors are gold and black and its patch features a cossack, which is a nomadic horseman and warrior.</p> <p>Its motto is, “We take care of our own.”</p> <p>The Cossacks say they traded the horses rode by the warriors of 400 years ago for motorcycles, though they doubt any of their members descended from actual Russian cossacks.</p> <p>2. The Rivalry With the Bandidos Led to a Stabbing in 2013 The rivalry between the Cossacks and the Bandidos in Texas goes back to at least 2013. According to the BigCountryHomePage.com, the president of the Abilene, Texas chapter of the Bandidos, Curtis Jack Lewis, was arrested in November 2013 on charges that he stabbed two members of the Cossacks during a fight outside a restaurant.</p> <p>3. The Waco Shootout Was Called ‘One of the Worst Gun Fights’ in the City’s History One officer called the shootout between the rival gangs “one of the worst gun fights that we’ve had in the city limits of Waco.”</p> <p>Police told KXXV-TV that all of the victims were gang members who had gathered at the Twin Peaks restaurant. HEADLINE	05/17 SPD: crime down 25% south Seattle
SOURCE	http://www.king5.com/story/news/local/seattle/2015/05/18/crime-down-south-seattle/27515509/
GIST	<p>The Seattle Police Department says crime is down 25% in the south precinct compared to this same time last year. Seattle PD is using a new program called SeaStat to gather and sort crime data and so far it has helped them identify problem areas and negative trends.</p> <p>"It helps us focus on the problem areas, the prolific offenders, the repeat victims, and we also feed through our micro community policing plan and take community input into the process," Seattle Police Chief Operating Officer Mike Wagers said. "We want to know if we're addressing the problems, where they're occurring, when they're occurring, we're going back to the right people to see if they are repeat offenders, and then we want to measure did work?"</p>

	<p>If you take a closer look at the numbers in the south precinct you'll see that YTD (year-to-date) property crimes have dropped by 26% and violent crimes have gone down by 24%. More specifically, robberies are down 36% and car prowls are down 37%. That means there have been 54 fewer robberies and 330 fewer car break-ins.</p>

HEADLINE	05/18 Bandidos OMG in all-out war
SOURCE	http://www.washingtonpost.com/news/morning-mix/wp/2015/05/18/how-the-bandidos-became-americas-most-feared-biker-gang/
GIST	<p>The Bandidos motorcycle gang has a saying: “Cut one, we all bleed.”</p> <p>It’s not clear who started the cutting, but there was plenty of bloodshed on Sunday when the Bandidos brutally clashed with members of several other bike gangs at a restaurant in Waco, Texas. A wild shootout in broad daylight left nine bikers dead, 18 wounded and at least three under arrest.</p> <p>The confrontation began about noon at a Twin Peaks in a shopping center and quickly escalated from fisticuffs to all out war, said Sgt. W. Patrick Swanton, a police spokesman. At one point, as many as 30 gang members were shooting at one another in the restaurant’s parking lot. Police found more than 100 weapons and scores of shell casings.</p> <p>The shootout is the latest and perhaps goriest chapter in a long history of violence involving motorcycle gangs in America. The Bandidos, like its more popularly known arch-rival the Hells Angels, are frequent characters in that blood-soaked book. The group is generally considered the world’s second largest biker gang, behind the Angels, with as many as 2,500 members in 13 countries, according to the Department of Justice.</p> <p>The Bandidos’ story charts the rise of bike gangs from counterculture clubs to fearsome organized crime organizations, and helps to explain why tragedy struck on Sunday in a city already associated with spectacular violence.</p> <p>The Hell’s Angels might have been first, but they were far from the only ones. Scores more motorcycle gangs sprung up across America. Many if not all of them sought to tap into the American outlaw archetype, as reflected in their rebellious names: the Outlaws, the Pagans, the Warlocks, the Mongols and the Bandidos.</p> <p>The Bandidos began almost 20 years after the Hell’s Angels, but the two gangs soon became bitter rivals. According to the motorcycle club’s legend, founder Donald Chambers was bored with other bike clubs. “Chambers started the Bandidos in March 1966, when he was 36 years old and working on the ship docks in Houston,” Skip Hollandsworth wrote in a 2007 profile of the gang. “He told his friends that he was</p>

naming his club the Bandidos, in honor of the Mexican bandits who refused to live by anyone's rules but their own, and he began recruiting his first members not only out of Houston but also out of the biker bars in Corpus Christi, Galveston, and San Antonio.

"Don wasn't looking for people who fit into what he called 'polite society,'" one of the group's first members told Hollandsworth. "He wanted the badass bikers who cared about nothing except riding full time on their Harley-Davidsons. He wanted bikers who lived only for the open road. No rules, no bullshit, just the open road."

But as both the Hells Angels and the Bandidos expanded, they grew from free-wheeling counter-culture clubs into ruthless organized crime syndicates, according to academics who study the groups and prosecutors who pursue them in court. "The desire to dominate rivals temporarily decreased the power of the subculture's core values among many clubs while increasing their reliance on organized criminal activities," Quinn writes. "As the extremes of violence used in internecine warfare escalated, however, these activities could no longer be concealed by the milieu's code of silence. It was only at this point that law enforcement agencies finally began to take these clubs seriously."

HEADLINE	05/17 Catch-22 of community policing
SOURCE	http://www.newsweek.com/community-policing-foot-patrol-question-332168
GIST	<p>“BALTIMORE: The Greatest City in America.” So reads the white lettering on a bench in the West Baltimore neighborhood of Sandtown-Winchester, where 34 percent of residential properties are reported to be vacant or abandoned. Booze and snack refuse dot gutters. In a garden enclosed by a chain-link fence, a tangle of weeds nearly conceals an unexpected, much-needed burst of beauty: three bunches of crimson flowers. The Western District police station, a boxy institutional structure, stands amid this landscape, surrounded by metal barricades on a recent April day.</p> <p>It was in the Western District area that Freddie Gray, a 25-year-old African-American man, suffered a spinal injury related to an arrest April 12, and then died on April 19. His death was part of a succession of police-involved fatalities of black men across the U.S. in recent months, sparking mass protests. On April 27, rioting and looting erupted in Baltimore.</p> <p>Against this backdrop, the Baltimore Police Department (BPD) and other U.S. law enforcement agencies have been attempting to bolster their community-policing efforts, to improve relations with area residents. Foot patrol is an essential component of the BPD’s initiative. While walking the beat has always been part of the BPD’s policing, the department recently mandated that officers spend at least 30 minutes of every 10-hour shift on foot, chatting with members of the community.</p> <p>“We’re pushing every police officer to get out of their cars for 30 minutes no matter if it’s in a residential area, commercial area, to engage in the community,” Police Commissioner Anthony W. Batts told Baltimore Sun reporter Justin George. (Following a BPD strategy released in 2013, Batts wanted to increase foot patrols, “training officers to feel comfortable interacting with individuals with a wide array of backgrounds,” George also reported.)</p> <p>Even the Baltimore police union president, Gene Ryan, got on board—despite high call volumes. “I really think it’s a good idea,” Ryan told George. “That’s one way to improve the relationship with us and the people of Baltimore.”</p> <p>Renewed interest in foot patrol isn’t unique to Baltimore, amid the nationwide push for community policing. In St. Petersburg, Florida, Police Chief Anthony Holloway launched a program called Park, Walk and Talk several months after starting his job in August. His program requires all officers in the St.</p>

Petersburg department to park their cars, walk a neighborhood and talk to people there for an hour a week. Officers must log their hours, so supervisors can confirm their participation.

In Cleveland, where the police department was criticized for “a pattern or practice of unreasonable and unnecessary use of force” by the U.S. Department of Justice in December, both clergy leaders and the American Civil Liberties Union of Ohio called for foot patrols to improve police-community relations. ACLU Ohio said in a statement that the Cleveland Police Department should “require officers to patrol neighborhoods on foot as much as possible.”

The President’s Task Force on 21st Century Policing, meanwhile, is charged with determining the best ways police can reduce crime and build trust with communities. In early March, the task force published an hundred-plus page interim report that emphasizes community policing as a way to achieve these goals—in fact, “Community Policing & Crime Reduction” is one of the six listed “pillars” in the report.

Some of the recommendations in this section seem almost tailor-made for foot patrol proponents. Police must communicate with people at times other than emergency calls or crime investigations, the report recommends. Law enforcement agencies must allow officers time “to participate in problem solving and community engagement activities” during patrols, the report says.

Foot patrol sounds like an even better idea when you look at the data. Research has indicated it both improves police-community relations and fights crime. Though these positive outcomes make foot patrol quite an appealing policing tactic today, they happened before a year that saw the police-involved deaths of Eric Garner, Michael Brown, Akai Gurley, Tamir Rice and Walter Scott—and, most recently, Freddie Gray.

While man-on-the-street interviews wouldn’t provide quantitative data, I had been looking into foot patrol for a while, including earlier reporting on St. Petersburg’s initiative, and I had traveled to Baltimore hours before the city burned to try to find out whether residents thought the requirement would work, both in general and in light of Gray’s death. In interviews, the general sentiment was that foot patrol, like other community-policing techniques, was either a pipe dream or a paradox: Foot patrol could build much-needed trust in communities of color, but not until trust had first been restored. Residents conceded, however, that restoring trust probably wouldn’t happen if successful community-police engagement programs, such as foot patrol, weren’t already in place.

Sure, this doesn’t mean that foot patrol wouldn’t work, but it suggests that officials’ enthusiasm for foot patrol might be too glib—and that a lot of people supposedly poised to benefit from this kind of community policing absolutely do not want more cops on the streets right now.

“Foot patrol was what the very first police officers did when they walked out of the doors on September 29, 1829,” explains Jerry Ratcliffe, a professor of criminal justice and director of the Center for Security

and Crime Science at Temple University, and a Metropolitan Police alum. “That was just a part of what policing was all about.”

By the mid-20th century, technological and philosophical changes in policing prompted the decline of foot patrol in the U.S. The radio car and the 911 system “essentially changed the nature of policing from preventative policing to one of reactive policing,” Ratcliffe says. As citizens started calling police to report crimes and emergencies, dispatchers responded by deploying cars via radio. In turn, the metrics by which law enforcement agencies and agents were assessed changed, he explains.

In 2009, Ratcliffe, along with other researchers at Temple University, partnered with the Philadelphia Police Department to determine whether foot patrols could deter crime. They identified 120 crime hot spots and deployed foot patrols to 60 that summer. After three months, the results were striking: In targeted foot patrol areas, violent crime dropped 23 percent, the study claims. Even taking into account displacement—in essence, when crime crackdowns in one area push criminal activity to another location—the study claims foot patrols prevented 53 violent crimes during the experiment.

The rub? The Philadelphia Foot Patrol Experiment concluded that while targeted foot patrol can deter crime, there’s a potential risk to police-community relations. That’s because “pedestrian field interviews”—when police stop someone on the street and often conduct a search (basically stop and frisk)—went up 64 percent in target areas, the study said.

In departments that are dedicating resources to foot patrol, as in St. Petersburg and Baltimore, the efficacy of small-scale initiatives is also unclear. Ratcliffe says it’s “probably a good idea” but adds that criminologists need to study “sufficient dosage”—that is, how much foot patrol is necessary to have a positive impact—before making any claims. He agrees that there might be qualitative benefits to these smaller programs.

HEADLINE	05/16 Pot edibles new problem for police
SOURCE	http://www.seattletimes.com/nation-world/pot-edibles-in-dry-states-are-a-new-problem-for-police/
GIST	<p>After nearly 20 years on the job, Jim Jeffries, the police chief in LaFollette, Tenn., has seen his share of marijuana seizures — dry green buds stashed in trunks or beneath seats, often double-bagged to smother the distinctive scent.</p> <p>But these days, Jeffries is on the lookout for something unexpected: lollipops and marshmallows.</p> <p>Recently his officers pulled over a Chevy Blazer driven by a couple with three children in tow. Inside, the officers discovered 24 pounds of marijuana-laced cookies and small hard candies shaped like gingerbread men, plus a tub of pungent marijuana butter perfect for making more.</p>

The bags of Kraft marshmallows looked innocent enough. But a meat injector was also found in the car. After searching the Internet, Jeffries realized that the marshmallows probably had been infused with the marijuana butter and heat-sealed into their bags.

“This is the first time that we have ever seen marijuana butter or any of this candy containing marijuana in the county,” Jeffries said. “We hope it’s the last time.”

That seems increasingly unlikely. Across the country, law enforcement long accustomed to seizures of bagged, smokable marijuana are now wrestling with a surge in marijuana-infused snacks and confections transported illegally across state lines for resale.

Pot edibles, as they are called, can be much easier to smuggle than marijuana buds: They may resemble candy or home-baked goodies, and often have no telltale smell. And few police officers are trained to think of gummy bears, mints or neon-colored drinks as potential dope.

Some experts worry that smuggled pot edibles will appeal to many consumers, particularly adolescents, who are ill prepared for the deceptively slow high. Impatient novices can easily eat too much too fast, suffering anxiety attacks and symptoms resembling psychosis. Already, young children have eaten laced sweets left within reach.

There are no hard numbers for the amount of pot edibles being trafficked interstate, but police departments in a variety of jurisdictions without legal sales report seizing increasing amounts in the past year. The quantities suggest the products are intended to supply a growing demand, law-enforcement officials say.

The popularity of confections laced with marijuana has caught many health officials by surprise. Pot edibles took off in 2014, the first year of recreational sales in Colorado, when nearly 5 million individual items were sold to patients and adult users.

Demand in Colorado and Washington state has spawned a stunning assortment of snacks and sweets, from Mondo’s sugar-free vegan bars to Dixie Edibles’ white chocolate peppermint squares.

Today consumers 21 and older can legally buy pot edibles in those two states; soon adults in Oregon and Alaska will join them. Pot edibles are available to medical users in at least half a dozen of the 23 states with medical marijuana programs.

HEADLINE	05/15 Olympia: fewer homes more cars hit
SOURCE	http://q13fox.com/2015/05/15/home-burgaries-down-but-car-prowls-up-in-olympia/
GIST	OLYMPIA — Home burglaries are down in Olympia by almost 50% from the same time last year, but car prowls are up 13%, police crime statistics showed Friday.

	<p>If you are not a victim of a car prowl, you probably know someone in the state's capital who is.</p> <p>Police say thieves are breaking into fewer homes but breaking into more cars in Olympia.</p> <p>Thieves are hitting cars in the downtown area, especially those parked on or near 4th and 5th avenues and Franklin Street.</p> <p>Police say the latest string of car break-ins happened late at night with the victims inside nearby bars.</p> <p>Some believe the rash of car prowls could deter people from coming downtown.</p>

HEADLINE	05/16 Serial arsonist targeting Renton?
SOURCE	http://q13fox.com/2015/05/15/serial-arsonist-5-fires-set-at-downtown-renton-businesses-in-past-3-weeks-video/
GIST	<p>RENTON — Renton business owners are on alert after learning they were targeted by an arsonist. Fire officials say they have reason to believe the fire-starter isn't new to the area.</p> <p>Investigators say there's been a total of five fires set intentionally in the downtown area. The first fire was set three weeks ago in the 100 block of south Third Street, with the most recent fire just blocks away, near Renton High School.</p>

HEADLINE	05/17 San Diego police officer shot in neck
SOURCE	http://www.nbcsandiego.com/news/local/Officer-Involved-Shooting-Kearny-Mesa-304040191.html
GIST	<p>A female San Diego police officer was shot in the neck near Highway 163 at Health Center Drive on Sunday morning and is expected to survive, according to the San Diego Police Department.</p> <p>The officer, a 5 year field training officer, is talking in the hospital, SDPD Chief Shelley Zimmerman said.</p> <p>"She is talking, smiling, and very in good spirits," Zimmerman said at a press conference. "She appreciates everybody's concern about her well being, very much appreciates that."</p> <p>The incident started as a pursuit, when a silver Jeep heading southbound on State Route 163 did not yield to lights and sirens when driving over 65 miles per hour, Lt. Mike Hastings said.</p> <p>The car was later abandoned and the incident turned into a foot pursuit, where the man being chased showed a gun and began firing, Hastings said.</p>

	<p>The female SDPD, who is not being identified by officials yet, was shot in her upper body. Two other SDPD officers shot the suspects, Hastings said, and he was pronounced dead at the scene. Police have not released his name but say he may be related to a series of shootings at buildings.</p>

HEADLINE	05/15 Counterfeit prescription drugs in US
SOURCE	http://abcnews.go.com/Health/abc-news-investigation-counterfeit-prescription-drug-operations-us/story?id=31077758
GIST	<p>A year-long ABC News “20/20” investigation uncovered numerous operations involving the sale of dangerous counterfeit prescription drugs, many of which were sold under the guise of being authentic medication shipped in from Canada, or sold openly on the streets, Flea Markets, or retail stores in Los Angeles.</p> <p>For the past year, an ABC News’ “20/20” investigation team has been working behind the scenes with U.S. Homeland Security, U.S. Customs and Border Protection, FBI, Los Angeles Police Department, the L.A. Sheriff’s department, among other law enforcement agents to investigate the prevalence of counterfeit goods being sold across the United States. These items range from everyday home goods such as bicycle helmets and perfumes, to more dangerous fakes, such as airbags and prescription drugs.</p> <p>We rode along with authorities to multiple counterfeit prescriptions drug raids in Los Angeles. One apartment agents raided contained boxes of illegal and counterfeit medicine – Amoxicillin, vitamin shots for b12 deficiency; Terramycin, an antibiotic for eye infections, Ampicilin for ear infections. Investigations said these drugs can fetch thousands of dollars in sales on a good week.</p> <p>Other raids turned up counterfeit Viagra, heart medication, morphine and other injectable arthritis drugs.</p> <p>In another raid, investigator Brian Wong with the Los Angeles Sheriff’s Department, who is also a trained pharmacist, helped uncover counterfeit prescription drugs being sold at a flea market. There, fake drugs that are meant to be kept refrigerated are being sold in the heat of the day. Wong uncovered a range of counterfeits at that location, ranging from unapproved prescription vitamins, to pain medication.</p> <p>Authorities say customers are drawn to these unlicensed sellers because much of the medicine is cheaper than if they had it filled at their local pharmacy. But counterfeit drugs can be dangerous because the pills aren’t using the correct chemical compounds, or substituting in unsafe substances.</p> <p>The operation that we were allowed to join in that week, according to pharmaceutical company Merck -- there as consultants to spot the fake and illicit drugs –netted an incredible 415,000 doses of illicit pharmaceutical products.</p>

	A popular way many customers get cheaper prescription drugs is to try to order them online from Canada. There are numerous small storefronts across the country with names like Canada Drugs or Canada Direct, advertising inexpensive drugs, but there are questions over whether the medicines being sold are pure, or even from Canada.

HEADLINE	05/14 Another child death in hot car
SOURCE	http://www.cnn.com/2015/05/14/us/florida-hot-car-toddler-death/index.html
GIST	<p>A 16-month-old girl died after her father forgot to take her to day care and left her in a vehicle in the northern Florida sun, according to the Columbia County Sheriff's Office, citing what family members told authorities.</p> <p>Police are investigating the Tuesday death, casting the girl's parents into the spotlight: The girl's mother has been identified as Wendy Timonera Kwon, an assistant state attorney; her father is Young Kwon, a public defender.</p> <p>"This is still an active investigation, and we're still in the process of conducting interviews," said Gretl Plessinger, Florida Department of Law Enforcement.</p>

	<p>The Sheriff's Office asked the Florida Department of Law Enforcement to investigate the death because the girl's parents work for the 3rd Judicial Circuit.</p> <p>On Wednesday in Quincy, Massachusetts, another father frantically called 911 after realizing he had left his child inside his car at a train station.</p> <p>"I left my 1-year-old baby in my SUV by accident this morning at the North Quincy station," the man told 911. "I'm on my way back to the station now."</p> <p>The Fire Department responded, and the baby was rescued.</p> <p>Both cases highlight an alarming situation that becomes increasingly more dangerous in summer.</p> <p>"Sadly heat stroke claimed the lives of 30 children last year and 44 children the year before," said Kate Carr, president and CEO of Safe Kids Worldwide. "So far this year, there have been two reported deaths from heatstroke in cars."</p>

HEADLINE	05/16 Buyer beware: success targeting 'johns'
SOURCE	http://www.seattletimes.com/seattle-news/crime/buyer-beware-early-success-for-initiative-targeting-johns-instead-of-prostitutes/

GIST

Police agencies across King County collectively arrested more men last year for patronizing a prostitute than they arrested women on prostitution charges, offering the first statistical indications of a countywide effort to shift responsibility for the sex trade onto the men who fund it.

“For the last five years, we’ve seen a pretty significant disproportionality,” with far more women involved in prostitution arrested than men who pay them for sex, said King County Senior Deputy Prosecutor Val Richey.

Countywide, “2014 was the first year patronizing charges outpaced prostitution charges — and they did it in a big way,” Richey said of local police agencies.

The dramatic shift is being attributed to the county’s “Buyer Beware” initiative, aimed at reducing the local demand for prostitution by targeting those who pay for sex.

In the seven months since the Buyer Beware launch, King County Prosecutor Dan Satterberg said he’s seen an important “course correction,” with police now arresting more men on patronizing charges while arresting fewer women on prostitution charges.

But the effort is not just about busting sex buyers. A new, 10-week intervention program is also seeing early success in helping men examine their attitudes about sexuality and their motivations for paying prostituted women and girls for sex, Satterberg and Richey said.

Historically, women involved in prostitution have been arrested at a rate 10 times higher than the men who paid them for sex, according to Richey. Police, city attorneys and judges across the county are all working to shift that dynamic to hold men accountable for the harms caused to the mostly girls and women caught up in the sex trade, Satterberg said.

Seattle police have been on the forefront of the trend since 2012, when three women were arrested for prostitution compared to 89 men for patronizing a prostitute.

Last year, police in Seattle, Kent, Renton, Des Moines, Federal Way and Auburn collectively arrested three men to every woman in prostitution cases.

“Other cities didn’t have quite the same ratio” but the evolution in police practices has still seen that “prostitution charges have gone down and patronizing charges have gone up — just not to the same degree,” said Richey, who handles most of his office’s felony prostitution cases.

05/16 Teens arrested after shots fired

SOURCE	http://www.komonews.com/news/local/Police-arrest-2-teens-after-shots-fired-near-Beacon-Hill-park-304008161.html
GIST	<p>SEATTLE - Two teens were arrested Friday night after multiple gun shots were fired near a South Beacon Hill park, the Seattle Police Department said.</p> <p>Neighbors called 911 after hearing gun shots around 10:30 p.m Friday at Van Asselt Playfield. Police arrived quickly, and stopped multiple cars trying to leave the area.</p> <p>Police say they spotted a gun on the floor of a tan Chevy Impala, and took the 18-year-old driver and 16-year-old passenger into custody after multiple shell casings were found in the park.</p> <p>The driver was booked into King County Jail for a firearms charge, and the passenger was booked into King County Youth Services Center for an outstanding warrant.</p>

HEADLINE	05/16 Hate crimes on rise in UK
SOURCE	http://www.presstv.ir/Detail/2015/05/16/411381/Hate-crimes-rise-UK-Wales-Muslims
GIST	<p>An Islamic center in UK has condemned a spike in hate crimes across England and Wales since 2012.</p> <p>The Muslim Council of Britain and the Church of England have says the targets of hate crimes are predominantly Muslims. According to the council, racially or religiously aggravated harassment crimes – such as verbal or written racist abuse – increased from a total of 15,249 to 17,605 between 2012 and 2014.</p> <p>The figures, obtained from 41 of 43 police forces approached through Freedom of Information (FoI) requests, show more than 47,000 hate crimes recorded over the past three years.</p> <p>“These figures showing the rise of Islamophobic attacks sadly are not that surprising. If you consider how over the last couple of years we have seen a concentrated effort by the Islamophobia industry in America and Europe and especially in the UK now as well to demonize Islam, it is understandable that obviously that anti-Muslim rhetoric will obviously going to spin out into physical violence,” a member of Muslim Public Affairs Committee in London, Raza Nadim told Press TV.</p> <p>He warned that the UK is lurching towards the right saying:”What you are seeing is that many of the politicians, many of the political elite and those in the media world are pushing and pumping up a very white supremacist bigoted narrative, Islamophobic and racist in its nature... that leads to more hate crimes and more violence.”</p>

HEADLINE	05/15 Chicago to pay police torture victims
-----------------	--

SOURCE	http://www.themilitant.com/2015/7919/index.shtml
GIST	<p>CHICAGO — In front of a packed chamber May 6, the City Council here unanimously approved a reparations ordinance allocating \$5.5 million for many of those tortured and framed up by police commander Jon Burge and his notorious “Midnight Crew” from 1972 to 1991.</p> <p>As the names of the torture victims and their families present in the City Hall chambers were read, the crowd of 100 jammed into a glass-walled balcony cheered. Leaving the balcony after the ordinance passed, they chanted, “Reparations won!”</p> <p>Burge and his “crew” extracted false confessions to win convictions of at least 120 people, mostly Black men, using electric shocks, mock executions, suffocation and beatings.</p> <p>The determined refusal over years of those tortured and framed up to remain silent, their protests and legal challenges, along with mounting outrage, especially in Chicago’s Black neighborhoods, led to the exposure of the cops’ practices and prevented the city government from sweeping the cases under the rug.</p> <p>Mayor Rahm Emanuel agreed April 14 to support the ordinance, saying his goal was to “close this book — the Burge book — on the city’s history, close it and bring closure for the victims.”</p> <p>According to the <i>Chicago Sun Times</i>, city officials say 55 torture victims are potential recipients of the reparations.</p> <p>In 1993 the Chicago police department finally fired Burge. In 2006 a special Cook County prosecutor’s investigation concluded Burge and his gang had carried out torture, but that the statute of limitations had run out for prosecution of their crimes.</p> <p>Burge was later convicted of perjury for lying about one case of torture and spent about four years in federal custody, partly under home confinement.</p> <p>The ordinance, originally introduced in 2013 at the urging of Chicago Torture Justice Memorials, apologizes to the torture victims and sets up the reparations fund, as well as free enrollment in city colleges, and priority access to job training, housing, counseling and other social services. It calls for Chicago public schools to teach a history lesson on the Burge torture cases. It also calls for “local law enforcement officials to provide evidentiary hearings to the torture survivors who remain behind bars,” to have a chance to show their confessions were coerced.</p>

HEADLINE	05/11 Police officer deaths rise; morale drops
SOURCE	http://www.washingtontimes.com/news/2015/may/11/police-officer-deaths-in-the-line-of-duty-double-a/
GIST	<p>Law enforcement morale is at an all-time low as uniformed officers endure increased pushback from the communities and politicians they're risking their lives to protect, and a new report released Monday shows on-duty law enforcement deaths in 2014 occurring at nearly twice the previous year's rate.</p> <p>“One of the things that we've seen just lately, that we've never seen before, is police officers are telling their own families, and their own children, ‘Don't go into this line of duty, this line of work, because it's not worth it any more,’” said Bill Johnson, executive director of the National Association of Police Organizations.</p> <p>The number of law enforcement officers who were feloniously killed in the line of duty in 2014 increased 89 percent as compared to the year prior — with most dying after being shot by gun-carrying criminals, according to a preliminary report issued by the FBI on Monday.</p> <p>In raw numbers, 51 law enforcement officers were killed in the line of duty in 2014, versus 27 such deaths in 2013.</p> <p>The FBI report Monday was preliminary; the complete annual report will be released in the fall.</p> <p>And the number killed in deliberate ambush attacks has tripled in a year, according to data collected by the National Law Enforcement Officers Memorial Fund. In 2014 there were 15 officers killed in fatal ambushes compared to five in 2013, the group said.</p> <p>Police unions are “very much concerned” over the increased number of attacks on officers, which seem to be planned ambushes and unprovoked attacks, Mr. Johnson said.</p> <p>Police work is dangerous, and “partisan, political sound bites” are piling additional danger on top of officers, Mr. Adler said.</p> <p>Mr. Johnson agrees.</p> <p>“Traditionally, I think politicians, whether they're Democrats or Republicans, have always taken great pains to publicly support the men and women out there that are trying to do this job,” Mr. Johnson said.</p> <p>“And I think, unfortunately, over say the last eight or nine months, there has been not just a lack of leadership supporting police at the political level, but it's almost like the coin has flipped.”</p> <p>Following the deaths of Ramos and Liu, growing fractures between lawmakers and law enforcement officers became evident. Police showed their displeasure with New York Mayor Bill de Blasio, who had</p>

said he warned his biracial son about racist cops, by turning their backs on him during a press conference to discuss the murder of the two officers and again during the funeral for [Ramos](#).

An effort to quell that tension came from federal government officials during National Police Week.

[FBI](#) Director James B. Comey said in an online video released Monday that one of the hardest things he has to do is call the heads of law enforcement departments who have lost an officer in the line of duty.

“I make far too many calls,” he said. “I make calls to small departments, to big departments, to urban departments, to rural departments. I make far too many calls.”

In the video, Mr. Comey noted the strained relationship between law enforcement officers and the communities they serve, and appealed to officers to try to clearly see the people that they serve.

HEADLINE	05/11 Thurston Co. to focus on seatbelts
SOURCE	http://www.theolympian.com/2015/05/11/3721645/thurston-county-drivers-face-fines.html
GIST	<p>Extra seat belt patrols, with an emphasis on children who are not properly restrained, are planned for May 18-31.</p> <p>In Thurston County, the Lacey, Olympia, Tenino, Yelm and Chehalis Tribal police departments; the Thurston County Sheriff's Office and the Washington State Patrol will participate in the campaign, with the support of the Thurston County Target Zero Task Force, according to a news release.</p> <p>Violators could be fined \$124. While a seat belt offense may be reported on your driving record, it is not available to insurance companies.</p> <p>All extra patrols are part of Target Zero, which strives to end traffic deaths and serious injuries in Washington by 2030. For more information, visit targetzero.com. Additional information on the Washington Traffic Safety Commission can be found at wtsc.wa.gov.</p>

HEADLINE	05/11 Tacoma closes boat launch to public
SOURCE	http://www.komone.com/news/local/303351151.html
GIST	<p>TACOMA, Wash. -- A boat launch at the Tacoma Narrows Marina will no longer be available to the public following the recent drowning death of a an elderly Fircrest man.</p> <p>Pierce county authorities believe 88-year-old Richard Gustafson got lost last month and mistook the ramp for a road. It was the fifth such drowning at the boat launch in the past two decades.</p>

	<p>Four years ago, a 21-year-old named Michaela Baker lost her life driving down the ramp in the dark. Ten years ago Walter and Ethel Nash lost their lives on this ramp. Authorities said it was dark and the elderly couple must have taken a wrong turn and mistaken the ramp for the roadway.</p> <p>On Monday, officials from the marina said the boat launch will no longer be available to the public. In a written statement, Maria Estrada with Narrows Marina LLC said a temporary barrier and signs have been put up to keep people from using the launch. A permanent gate and signs will be installed sometime this week.</p>

HEADLINE	05/11 Diablo Lake drawdown hurts boaters
SOURCE	http://www.komonews.com/news/local/Diablo-Lake-drawdown-is-bad-news-for-boaters-303370701.html
GIST	<p>DIABLO LAKE, Wash. -- A popular lake for boating and swimming will be off limits for a while, and that's not sitting well with many locals.</p> <p>Diablo Lake has long been a boaters paradise, but that will be put on hold for a while beginning Tuesday. That's when Seattle City Light will begin lowering the lake so maintenance crews can work on the Ross Dam barge and ferry facilities.</p> <p>The lake will be off limits for more than a month, and Seattle City Light may quickly lower the five-mile reservoir without notice, making it dangerous for public use.</p> <p>"In the morning it may appear to be higher, but once you come to launch you won't be able to retrieve. It's discouraged for all boating on the lake at this time," said park ranger Katy Hooper.</p> <p>The lake, which helps generate more than 20 percent of Seattle's electricity, will be 10 feet below normal operating conditions. Diablo is a small reservoir and is not affected by snow pack.</p> <p>The National Parks Service will also take advantage of the water level by cleaning layers of sediment off the public boat ramp at the Colonial Creek Campground.</p> <p>And more bad news for boaters: Seattle City Light says the lake will once again be off limits for maintenance from September 15 through Halloween.</p>

HEADLINE	05/11 Rental inspections start in Seattle
SOURCE	http://www.king5.com/story/news/local/seattle/2015/05/11/rental-inspections-start-in-seattle/27149121/

GIST	<p>SEATTLE – Inspections have started under Seattle's new Rental Registration & Inspection Ordinance, which aims to make sure rental properties are in line with minimum housing and safety standards. Under the rules, rental properties will undergo inspection at least once every ten years.</p> <p>"For the most part, all rental housing in Seattle, all the way down to single-family homes that are rented out should register with the program," explained Geoff Tallent, the RRIO Program Manager in the City of Seattle's Department of Planning and Development.</p> <p>The program has been under development for some time now after city council members pointed to a 2009 American Housing Survey that showed an estimated 10 percent of rental housing has "moderate to severe" physical problems in the Seattle area.</p> <p>"It's important for renters to know that this program is coming too and that their property or their unit may be selected for inspection," Tallent said. "They should have nothing to be concerned about if it is selected for inspection. It'll be an inspector looking at the maintenance items on the property itself. The inspector is not looking at how they live or what they're doing in their property."</p>

HEADLINE	05/11 Chambers Bay 300+ tents city
SOURCE	http://www.thenewtribune.com/2015/05/11/3786706_were-building-a-city-usga-says.html?rh=1
GIST	<p>There are tents, and then there are the tents that have blossomed on the grounds of the Chambers Bay golf course over the past two months.</p> <p>The crisp-white shelters erected at the behest of the United States Golf Association boast the kind of accoutrements a car camper could only dream of.</p> <p>"We're talking about flooring. We're talking about electrical. We're talking about heating and air-conditioning," said Danny Sink, USGA on-site championship director.</p> <p>It has taken an army of carpenters, electricians, engineers and others to erect the more than 100 tents already standing, including the huge merchandise pavilion near the Central Meadow that will hold more than 500,000 items for sale by the time the U.S. Open golf championship tees off next month.</p> <p>The work has been methodical, Sink said. That includes the use of global positioning satellites to make sure everything is placed correctly.</p> <p>"Every corner of every point of every tent is GPS'd," Sink said. "We know exactly what the elevations are. We know what's underneath the tents and so on and so forth."</p>

“What we’re really doing here is building a city, and we’re building a city for 235,000 people for the week,” he said. “It’s a process. It’s such a big event that we have a dedicated Home Depot rep that’s on site every day.”

The process began March 16 and will continue steadily until June 11, when USGA officials will open the merchandise pavilion to the masses ahead of the official start of championship week June 15.

Crews will build scores of additional smaller tents for admissions and concessions between now and then. They also will continue the task of finishing work inside, including adding moldings, carpets and other amenities, said Eric Reinhardt, who is overseeing the construction project for the USGA.

“The real time-consuming part of construction is what goes on inside those tents,” Sink said. “You’ll be in some of these tents during the championship, and they’ll look like a home.”

And will it all get done by mid-June?

“We’ve had great weather,” Reinhardt said, adding the work is on schedule. “We’ve had great cooperation from Pierce County and Kemper Sports. Everything is going great.”

By the time the world’s best golfers arrive for practice rounds, more than 300 tents will stand on the grounds. They range from the 1895 Club, a climate-controlled hospitality tent for premium ticket holders in the North Meadow, to corporate hospitality tents west of the eighth fairway, to the merchandise pavilion and other main attractions in Spectator Square in the Central Meadow.

The USGA contracts with the national firm Arena Americas to provide the shelters.

HEADLINE	05/11 Shell: oil rig to arrive Seattle this week
SOURCE	http://www.seattlepi.com/business/energy/article/Company-Giant-oil-rig-to-be-towed-to-Seattle-6257000.php
GIST	<p>SEATTLE (AP) — A giant floating oil rig currently anchored off Port Angeles, Washington, will be towed to Seattle this week despite the Seattle mayor's assertion that the Port of Seattle can't host the rig until it gets a new land-use permit, a Royal Dutch Shell spokesman said Monday.</p> <p>In an email, Shell spokesman Curtis Smith said the 400-foot-long Polar Pioneer was scheduled to arrive at the Port of Seattle's Terminal 5 "later in the week" to prepare for planned exploration in the Arctic Ocean.</p> <p>Protesters in kayaks have promised to challenge the rig.</p> <p>Smith said his company believes its arrangements to use the terminal are valid and disagrees with Seattle's interpretation.</p>

	Seattle Mayor Ed Murray has urged the port to reconsider its two-year, \$13 million lease with Foss Maritime, a company whose client is Shell.

HEADLINE	05/12 Report: Russia soldiers died in Ukraine
SOURCE	http://www.stripes.com/news/europe/nemtsov-report-220-russian-soldiers-died-in-ukraine-battles-1.345668
GIST	<p>MOSCOW — A report containing material compiled by slain Russian opposition leader Boris Nemtsov says at least 220 Russian soldiers died in two battles in eastern Ukraine within the past year.</p> <p>The Russian Defense Ministry denies that any of its soldiers are fighting in Ukraine, saying that Russians who have joined the separatists are volunteers.</p> <p>The report, published Tuesday, claims the soldiers were released from their duties and listed as volunteers. The 64-page report was compiled from witness reports in media accounts and information gathered by Nemtsov, including from relatives and other representatives of the dead soldiers.</p> <p>Nemtsov was shot dead on Feb. 27 in central Moscow. Five suspects, including a Chechen police officer, were arrested in the killing, but investigators have not named a suspected mastermind and the motive remains unclear.</p>

HEADLINE	05/12 Judge reopens Clinton email lawsuit
SOURCE	http://www.foxnews.com/politics/2015/05/12/federal-judge-agrees-to-reopen-hillary-clinton-email-lawsuit/
GIST	<p>A federal judge has agreed to reopen a lawsuit that seeks to gain access to emails from former Secretary of State Hillary Clinton’s private server.</p> <p>Judge Reggie B. Walton’s decision Friday came after the State Department and Judicial Watch, which brought the lawsuit, agreed that the documents that Clinton kept on her own email server separate from the government should be turned over.</p> <p>“This is the first case that’s been reopened,” Tom Fitton, president of Judicial Watch told The Washington Times. “It’s a significant development. It points to the fraud by this administration and Mrs. Clinton.”</p> <p>Previously, the court dismissed Judicial Watch’s request, on the grounds that the documents did not exist.</p>

HEADLINE	05/11 Gov. expands animal cruelty laws
-----------------	---

SOURCE	http://www.king5.com/story/news/local/pets-and-animals/2015/05/11/inslee-signs-measure-expanding-animal-cruelty-laws/27144365/?csp=nbcnews
GIST	<p>OLYMPIA, Wash. - A new measure making it a civil offense to lock an animal in a car or enclosed space in dangerous conditions has been signed into law by Gov. Jay Inslee.</p> <p>Inslee signed Senate Bill 5501 Monday, joined by Waffles, a 1-year-old Schnauzer-Yorkshire Terrier mix who belongs to bill sponsor Sen. Joe Fain. The new law creates a \$125 fine for leaving an unattended animal confined where temperature, lack of water or dearth of fresh air could hurt or kill it.</p> <p>It also authorizes an animal control officer or law enforcement officer to enter a car or enclosed area to remove the animal, and protects them from any liability for any property damage that may occur.</p> <p>Criminal prosecution for animal cruelty could still be pursued separate from the civil fine.</p> <p>Inslee vetoed one section of the bill, which animal advocates said would have made it difficult or impossible to prosecute neglect and cruelty to farm animals in noncommercial settings, such as animals kept in backyards or by hobbyists.</p>

HEADLINE	05/11 More bad news Washington's drought
SOURCE	http://www.king5.com/story/tech/science/environment/2015/05/11/drought-news/27147919/?csp=nbcnews
GIST	<p>Washington State's snow pack level is now averaging just 17 percent of normal, based on measurements made on May 1, 2015. That's down from a state wide average of 24 percent on April 1, which is the traditional benchmark for the peak of the state's snow pack.</p> <p>"Worst snow drought we've ever seen," said Scott Pattee, the water supply specialist with the Natural Resource Conservation Service, part of the U.S. Department of Agriculture.</p> <p>The enemy is warmer temperatures, said Pattee.</p> <p>Overall, fall and winter precipitation was about normal, just most of it didn't hang around as snow that melts out over the warmer months of the year. It's Pattee who tracks the state's snow pack both in the field and through the use of technology, what are called snowtel sites, many in remote locations, around the state and feed in data daily.</p> <p>On Monday Pattee said several regions around the state report no detectable snow, such as the mountains in the Central Puget Sound basin below 5,000 feet, and the one station that saw snow over the Olympic Mountains on May 5 now detects nothing.</p>

	<p>In a place named Cox Valley, where there should be 80 inches of snow on the ground, there is nothing but a new crop of wildflowers coming up, said Pattee.</p> <p>For the west side of the state one critical worry point is river flows that are seeing record lows for this date. The Washington State Department of Fish and Wildlife, which operates a number of hatcheries, says it's forming contingency plans for low water, says department spokesman Darren Friedel.</p>

HEADLINE	05/11 Bird flu found in Indiana
SOURCE	https://ca.news.yahoo.com/h5n8-bird-flu-strain-found-backyard-poultry-flock-165938903--sector.html
GIST	<p>(Reuters) - A strain of avian flu that until now had been found only in the Western United States has cropped up in Indiana, bringing the total number of states affected by the virulent outbreak to 15, the U.S. Department of Agriculture said on Monday.</p> <p>The eastward spread of any strain of the highly contagious H5 virus is worrying to farmers and investigators, who have hoped that warmer spring weather would help lower the number of infections in birds and curtail the virus' spread.</p> <p>The H5N8 strain found in a backyard poultry flock in Indiana is concerning to them also. It is different from the H5N2 strain that has been confirmed in scores of Midwestern farms and resulted in the death or culling of nearly 30 million birds so far.</p> <p>The highly pathogenic H5N8 strain had been seen only in the Pacific flyway during this outbreak. Federal and state officials have confirmed it in commercial chicken and turkey farms in California and a backyard poultry flock in Oregon. It was also found in captive falcons in Idaho and Washington, according to the USDA.</p> <p>How the H5N8 virus moved eastward is not yet known.</p>

HEADLINE	05/11 Severe storms tear across Midwest
SOURCE	http://www.cnn.com/2015/05/11/us/severe-weather-damage-injuries/index.html
GIST	<p>The lawn of what used to be the Van, Texas, intermediate school is scattered with shards of glass and long, twisted strips of metal and plastic. The building's windows are blown out, and debris hangs choked on the windowsills.</p> <p>The roof has been severed from the walls, evidence of the tornado that tore through Van late Sunday. Two people -- an adult man and woman related to one another -- died as a result of the storm, Van Zandt County Fire Marshal Chuck Allen said Monday.</p>

	<p>It looks like seeing your entire childhood destroyed, residents told CNN.</p> <p>In all, at least five people are dead and dozens injured after severe storms tore across the middle of the United States over the weekend. More than 70 tornadoes were reported in the Midwest and Plains states.</p> <p>As day broke Monday in Van, the significant destruction from Sunday's storm became evident. Officials said search canines were helping comb through the town to search for the missing.</p>

HEADLINE	05/11 Arctic offshore drilling approved
SOURCE	http://www.komone.com/news/local/Shell-gets-preliminary-US-approval-for-Arctic-drilling-303308551.html
GIST	<p>ANCHORAGE, Alaska (AP) - Just days ahead of a planned protest of Royal Dutch Shell's Arctic drilling program in Seattle, the company on Monday cleared a major bureaucratic hurdle to drill off Alaska's northwestern coast.</p> <p>The Bureau of Ocean Energy Management approved the multi-year exploration plan in the Chukchi Sea for Shell after reviewing thousands of comments from the public, Alaska Native organizations and state and federal agencies.</p> <p>"We have taken a thoughtful approach to carefully considering potential exploration in the Chukchi Sea,</p>

recognizing the significant environmental, social and ecological resources in the region and establishing high standards for the protection of this critical ecosystem, our Arctic communities, and the subsistence needs and cultural traditions of Alaska Natives," the agency's director, Abigail Ross Hopper, said in a statement. "As we move forward, any offshore exploratory activities will continue to be subject to rigorous safety standards."

Before Shell can begin drilling this summer, the company must still obtain other permits from state and federal agencies, including one to drill from the Bureau of Safety and Environmental Enforcement and government opinions that find Shell can comply with terms and conditions of the Endangered Species Act.

Shell spokesman Curtis Smith said the approval "is an important milestone and signals the confidence regulators have in our plan. However, before operations can begin this summer, it's imperative that the remainder of our permits be practical, and delivered in a timely manner.

"In the meantime, we will continue to test and prepare our contractors, assets and contingency plans against the high bar stakeholders and regulators expect of an Arctic operator," Smith said in an email to The Associated Press.

The Port of Seattle would need to get another permit to base the Arctic drilling fleet in Seattle for about six months of the year.

Meanwhile, activists plan to protest the movement of 400-foot drill ship Polar Pioneer from Port Angeles, Washington, to the Seattle port. A so-called "festival of resistance" starts Saturday and will include protesters on land and in kayaks, trying to block the ship's movements.

HEADLINE	05/11 Tacoma police shoot, kill armed man
SOURCE	http://www.komonews.com/news/local/Tacoma-police-shoot-armed-man-to-death-after-loud-music-complaint-303278761.html
GIST	<p>TACOMA, Wash. - Officers responding to a loud music complaint shot and killed an armed man on Sunday night in south Tacoma.</p> <p>The incident unfolded just after 10 p.m. when 911 dispatchers received a call from someone in the neighborhood complaining about loud music coming from a home in the 3400 block of South Proctor Street.</p> <p>Responding officers saw a man inside the home grab a gun and move toward the door to the residence. One of the officers shot the man just outside the home. The man was pronounced dead at the scene.</p> <p>Police say a SWAT team then surrounded the residence and cleared everyone else out of the home, which</p>

is a duplex. The man's parents live in the other unit.

The man's mother was there and said she didn't hear any loud music. She says, "I think this could have been handled differently."

Steve Gary, a neighbor who witnessed the incident, said he heard 14 gunshots.

"I just heard - it sounded like 14 gun shots, you know, seven in a row - and then another seven. That's all I heard," he said.

The man's father, Steven Cunningham, says his son was a gun collector.

"He's handled guns all his life," he said. "He has a gun collection, eight or 12 rifles."

The officer involved in the shooting has been placed on paid administrative leave, while the shooting is investigated. He is 34 years old and has been with the Tacoma police department for six years.

SOURCE	http://www.washingtontimes.com/news/2015/may/11/tsa-doesnt-know-which-screening-equipment-works/
GIST	<p>The Transportation Security Administration (TSA) is compromising the safety of airline passengers and aircraft by improperly managing the maintenance of its airport screening equipment, according to a government watchdog.</p> <p>The administration has not issued adequate policies and procedures to airports for carrying out equipment maintenance-related responsibilities, shows a report released by the Department of Homeland Security's Office of Inspector General.</p> <p>As a result, TSA cannot adequately oversee the maintenance of equipment routinely used to screen passengers and their baggage as they travel to and from various airports throughout the country, the report states.</p> <p>"Because TSA does not adequately oversee equipment maintenance, it cannot be assured that routine preventative maintenance is performed or that equipment is repaired and ready for operational use," the report said. "Without diligent oversight ... TSA risks shortening equipment life and incurring costs to replace equipment."</p> <p>Those equipment failures may lead to longer wait times and delays in passenger and baggage screening, and may be less effective in detecting dangerous items, the watchdog said.</p>

	“Consequently the safety of airline passengers and aircraft could be jeopardized,” the report said.

HEADLINE	05/11 ‘Superbug’ typhoid spreading globally
SOURCE	http://www.reuters.com/article/2015/05/11/us-health-typhoid-idUSKBN0NW1E920150511
GIST	<p>An antibiotic-resistant "superbug" strain of typhoid fever has spread globally, driven by a single family of the bacteria, called H58, according to the findings of a large international study.</p> <p>The research, involving some 74 scientists in almost two dozen countries, is one of the most comprehensive sets of genetic data on a human infectious agent and paints a worrying scene of an "ever-increasing public health threat", they said.</p> <p>Typhoid is contracted by drinking or eating contaminated matter and symptoms include nausea, fever, abdominal pain and pink spots on the chest. Untreated, the disease can lead to complications in the gut and head, which may prove fatal in up to 20 percent of patients.</p> <p>Vaccines are available -- although, due to limited cost effectiveness, not widely used in poorer countries -- and regular strains of the infection can be treated with antibiotic drugs. However, this study found that the H58 "superbug" version, which is resistant to multiple types of antibiotics, is now becoming dominant.</p> <p>"H58 is displacing other typhoid strains, completely transforming the genetic architecture of the disease and creating a previously under appreciated and on-going epidemic," the researchers said in a statement about their findings.</p>

HEADLINE	05/11 Concern over e-cigs use by teens
SOURCE	http://www.king5.com/story/news/local/2015/05/11/e-cigarettes-teenagers-vaping-pierce-county/27115173/
GIST	<p>TACOMA, Wash. -- The growing popularity of e-cigarettes among teens has local health officials extremely concerned. A recent survey by the state found 1 in 5 high school sophomores in Pierce County are vaping. That's twice the number who smoke regular cigarettes.</p> <p>"Yeah, it's popular in high school. I probably see it in all grades," said Sophia Blakesoe, a Lincoln High School student.</p> <p>"There's always kids after school smoking. I guess it makes the school look kind of bad because it's right in front of school. I feel like maybe the police should do something about it," said Henry Douk, a Lincoln High School student.</p> <p>While e-cigarettes are promoted as a way to quit smoking or a healthier form of smoking, they do contain nicotine, which is very addictive. But local health officials are worried about more than nicotine. The "e-juice" that goes into these devices isn't regulated and a lot of it comes from China.</p>

	<p>More than 300 million e-cigarettes are expected to be shipped to the U.S. and Europe from China this year. A recent report by the American Heart Association found metals in the products, including copper, tin, silver, and nickel.</p> <p>"What our biggest concern is that it's a product that young people are feeling is safe and okay to use, not realizing that there is the nicotine, there are these chemicals or other things that we're not even sure what's in them," said Miae Aramori with the Tacoma-Pierce County Health Department.</p>

HEADLINE	05/11 SEA adds putting green for US Open
SOURCE	http://www.king5.com/story/sports/golf/2015/05/11/sea-tac-airport-putting-green-us-open/27128237/
GIST	<p>SEATAC, Wash. – Air travelers to and from Seattle have a chance to recreate some of the great U.S. Open golf moments of the past. It's part of a celebration for the tournament which will be played at Chambers Bay near Tacoma next month.</p> <p>The USGA has installed what it calls the Epic Putt Challenge in Sea-Tac Airport's central terminal. The artificial putting green will give travelers a chance to challenge themselves to putts accomplished by greats such as Tiger Woods, Payne Stewart and Hale Irwin.</p> <p>Fans will also be able to try a replica of the 18th green at Chambers Bay. Guests will be entered for a chance to win two tickets to the U.S. Open.</p> <p>The green is located beyond the security checkpoints. Only passengers with tickets can play.</p> <p>The Epic Putt Challenge will move to South Lake Union Park in Seattle and will be featured as part of the Open For All Fan Experience June 17-21.</p>

HEADLINE	05/11 GM defective switch death toll at 100
SOURCE	http://www.foxnews.com/leisure/2015/05/11/death-toll-from-defective-gm-ignition-switches-rises-to-100/?intcmp=latestnews
GIST	<p>The death toll from faulty ignition switches in small cars made by General Motors has reached 100.</p> <p>The families of the victims are being offered compensation by Attorney Kenneth Feinberg, who was hired by GM last year. In addition, GM has agreed to make offers to 184 people who were injured in crashes caused by the switches in older-model cars such as the Chevrolet Cobalt.</p> <p>GM recalled 2.6 million of the cars last year, but acknowledged it knew about problems with the switches for more than a decade.</p>

Through much of last year, the company had blamed the switches for 13 deaths but conceded the toll would rise. During a Congressional hearing in June, Rep. Diana DeGette, D-Colo., said the death toll could rise to 100 based on lawsuits and media reports.

The "grim milestone" revives concerns about automakers quickly sharing information with the National Highway Traffic Safety Administration, and for the agency to analyze data and promptly take action, DeGette said in a statement. "As we have seen with the problems with GM's ignition switches, these failures can compound and bring tragic consequences for far too many innocent people," she said.

HEADLINE	05/11 Police believed cellphone was a gun
SOURCE	http://www.king5.com/story/news/local/2015/05/11/lakewood-police-shooting/27137737/?csp=nbcnews
GIST	<p>LAKWOOD, Wash. - The interim police chief in Lakewood says officers shot and killed a 37-year-old man in a lumberyard last month because he pointed a cell phone at them as though it were a gun.</p> <p>Interim Lakewood Chief Mike Zaro said Monday he could not have asked the two officers involved in the shooting to have handled it differently because they had no time to identify the dark object the man was pointing.</p> <p>Daniel Covarrubias was atop a 25-foot-tall stack of lumber at Pinnacle Lumber on April 21 when he was shot. Witnesses called 911 because they heard police sirens and saw him running, and they assumed he was fleeing from police.</p> <p>Zaro said the two officers fired a total of nine shots, five of which hit Covarrubias. He said the prosecutor's office will determine whether the shooting was justified.</p> <p>Zaro said police were not looking for him. A lawyer for his family has said Covarrubias had gone to a hospital just hours before because he was having hallucinations.</p> <p>Covarrubias' family and supporters protested outside the police station during Monday's announcement. Covarrubias' mother said the officers should not have fired. The family says it is conducting its own investigation.</p>

HEADLINE	05/11 Feds warn health insurers
SOURCE	http://www.nbcnews.com/storyline/obamacare-deadline/yes-you-have-pay-birth-control-feds-tell-insurers-n357136

GIST	<p>Insurance companies have to pay for birth control, mammograms and well-woman visits without charging co-pays and without a fight, the federal government said in a stern reminder Monday.</p> <p>The 2010 Affordable Care Act sets out not only to get health insurance to all Americans, but to make sure that the policies people have cover basic care. It's also aimed at lowering costs. Providing women with birth control is cheaper than paying for unplanned pregnancies, and cancer screening can catch cancer while it's still easy and less expensive to treat - or can even prevent cancer altogether.</p> <p>That means covering some pricey genetic tests and it also means covering transgender people, the Health and Human Services, Treasury and Labor departments said in a joint statement.</p> <p>But some women's advocacy groups and a few members of Congress have complained that some insurance companies aren't doing what they are supposed to.</p>

HEADLINE	05/11 Global sea levels rising faster
SOURCE	http://www.cbsnews.com/news/global-sea-levels-rising-faster-than-previously-thought/
GIST	<p>The world's seas are rising faster than previously thought, offering stark evidence that global warming is posing dire challenges to coastal communities around the world.</p> <p>In an analysis published in Nature Climate Change on Monday, researchers used satellite data combined with tidal gauge information and GPS measurements to overturn previous suggestions that rates had slowed in the past decade.</p> <p>"This information is vital as communities around the world plan and respond to our changing climate," the University of Tasmania's Christopher Watson, the lead author on the study, said.</p> <p>"Previously, it was clear that the rate of rise over the past 20 years was roughly double the rate determined over the past century - what was curious was that the rate appeared slower in the last decade relative to the one before," he said. "That slowing has puzzled scientists because it coincides with an increase in water entering our oceans from Greenland and West Antarctica."</p> <p>The researchers found a small overestimation of the sea level rise from 1993 to 1999 that had distorted the trend. As a result, the researchers concluded that global mean seal level rise from 1993 until mid-2014 had risen 2.6 to 2.9 mm per year, slightly less than previous estimate of 3.2 mm.</p> <p>So by using the lower figure, it actually demonstrated that seas have risen faster since 1993 relative to the slower rate over the previous decades.</p>

HEADLINE	05/11 Ore. expands gun background checks
SOURCE	http://abcnews.go.com/US/wireStory/oregon-governor-signs-bill-expanding-gun-background-checks-30967845
GIST	<p>Oregon Gov. Kate Brown signed a bill Monday requiring background checks on firearm transfers between private parties, making Oregon the eighth state to require screening on nearly all gun sales.</p> <p>The law, which takes effect immediately, requires gun buyers and sellers who aren't related to visit a licensed gun dealer who can run a background check.</p> <p>"We have an obligation to protect Oregonians from gun violence," said Brown, a Democrat. "If we want to keep our kids, schools and communities safe we must make it harder for dangerous people to get guns."</p> <p>Republicans vehemently opposed the measure. They say it will only burden gun owners who are committed to following the law without changing the behavior of people willing to break it.</p> <p>Brown's signature caps a long campaign by Oregon Democrats seeking stronger gun laws, which intensified following a 2012 shooting at a suburban shopping mall packed with Christmas shoppers. The bill's critics point out that the rifle used in that shooting was stolen. A 22-year-old gunman killed three people and injured a third before turning the gun on himself.</p> <p>Backed by national gun-control groups, Democrats pushed for background check legislation in 2013 and 2014 but didn't have enough votes. The path to victory was paved when Democratic candidates picked up three legislative seats in the 2014 election, some of them with the help of gun-control groups such as former New York Mayor Michael Bloomberg's Everytown for Gun Safety.</p>

HEADLINE	05/11 Drought: West turns ever more arid
SOURCE	http://www.bloomberg.com/politics/articles/2015-05-11/drought-transcends-state-lines-as-u-s-west-turns-ever-more-arid
GIST	<p>The record drought plaguing California isn't limited by lines on a map. Arid conditions caused by dwindling rainfall and snowpack are stretching across the West.</p> <p>In Washington's Yakima Valley, popular for growing wine grapes and beer hops, officials are cutting off water to about 1,700 farmers for three weeks starting today. At Lake Mead, east of Las Vegas, a 130-foot white band lines canyon walls as water sinks to the lowest since the reservoir was filled in 1937.</p> <p>"California has gotten the attention, and rightly so," said Roger Pulwarty, director of the National Integrated Drought Information System at the National Oceanic & Atmospheric Administration. "Across most of the West, dry conditions are expected to persist."</p>

While droughts are common in the western U.S., climate change has led to longer and more frequent water shortages in recent years. Nine of the 10 warmest years since 1880 have been since 2000, according to NASA, diminishing mountain snowpacks -- including in California and Nevada's Sierra Nevada range -- that supply most of the water in the western U.S.

The change suggests a permanent, drier future just as the center of the U.S. population moves steadily west to a region that's already home to 55 million people. That's prompting policy makers to consider extracting desalinated water from the Pacific Ocean, and forcing farmers in the nation's most productive agricultural region to leave land unused and to dig deeper wells to reach groundwater.

A severe drought grips almost 40 percent of the West, according to the U.S. Drought Monitor, a federal website.

Outside California, conditions are at their worst in neighboring Nevada. That state is followed by Oregon and Washington, said Kelly Redmond, a regional climatologist at the Western Regional Climate Center in Reno, Nevada.

"In the California and Nevada region, this is among the worst we've seen it in the last 120 years or so," he said.

In Oregon, where 34 percent of the state is facing extreme drought, Governor Kate Brown declared emergencies in two counties last month, adding to five designated earlier this year.

Forty-seven percent of California, the most populous state, faces exceptional drought, the Drought Monitor's highest rating. Regulators have required water suppliers to cut use as much as 36 percent starting next month.

HEADLINE	05/11 Google shuts down map editor
SOURCE	http://www.upi.com/Business_News/2015/05/11/Google-forced-to-shut-down-map-editor-after-urinating-Android-problem/1321431383223/?spt=hs&or=bn
GIST	<p>MOUNTAIN VIEW, Calif., May 11 (UPI) --Google is shutting down its map editor, Map Maker, until it solves the problem of people defacing its maps.</p> <p>The company had to apologize after someone used Map Maker to create an image of the Android logo urinating on the Apple logo. The company recently announced it will halt map editing until the problem is solved.</p>

	<p>The company tried to prevent people from misusing the tool by making it so each edit had to be approved before it would appear on the map, but this has made it so there are too many edits waiting for approval.</p> <p>"Every edit you make is essentially going to a backlog that is growing very fast," wrote team member Pavithra Kanakarajan. "We believe that it is morefair to only say that if we do not have the capacity to review edits at roughly the rate they come in, we have to take a pause."</p>

HEADLINE	05/07 Healthcare data breaches climb 125%
SOURCE	http://www.darkreading.com/attacks-breaches/healthcare-data-breaches-from-cyberattacks-criminals-eclipse-employee-error-for-the-first-time/d/d-id/1320315? mc=RSS DR EDT
GIST	<p>Cybercriminals and nation-state actors are indeed targeting healthcare organizations for their valuable data: cyberattacks and physical criminal activity now have officially surpassed insider negligence as the main cause of a data breach in healthcare organizations.</p> <p>The Ponemon Institute's new Fifth Annual Benchmark Study on Privacy and Security of Healthcare Data, published today, found that close to 45% of all data breaches in healthcare are due to criminal activity such as cybercriminal and nation-state hacks, malicious insiders, and physical theft, a 125% increase in such activity over the past five years. That's a first, since employee or insider negligence -- user errors, lost laptops and thumb drives, etc. -- accounted for the majority of breaches last year and in years past, according to Ponemon.</p> <p>More than 90% of healthcare organizations surveyed by Ponemon in its report has suffered at least one data breach exposing patient data over the past two years, while 39% had been hit by two- to five breaches, and 40% had suffered more than five breaches during that timeframe. Security incidents (without an actual data breach) occurred at 78% of healthcare organizations.</p> <p>About 45% of those breaches came via criminal attacks; 43% by lost or stolen computing devices; 40% via employee mistakes; and 12% via a malicious insider.</p> <p>The cost of all of this healthcare breach-mania? Some \$6 billion per year, with an average cost of \$2.1 million per healthcare organization, according to the report, which was commissioned by ID Experts.</p> <p>"For the first time, criminal attacks constitute the number one root cause [of data breaches], versus user negligence/incompetence or system glitches," says Larry Ponemon, chairman and founder of Ponemon Institute. "Ninety-one percent had one or more breach in the last two years, and some of these are tiny, less than 100 records, but they are still not trivial."</p>

HEADLINE	05/12 ISIS e-book for terrorist wannabes
SOURCE	http://www.express.co.uk/news/world/576642/ISIS-jihadi-manual-fighters-build-bomb-carry-condoms
GIST	<p>EUROPEANS and Americans allied with the brutal Islamic State terror regime have been instructed to always carry a condom, according to a newly-released guide on 'How to Survive in the West'.</p> <p>The e-book, distributed on Twitter, contains wide-ranging advice for wannabe jihadis on how to build bombs, evade spies and commit credit card fraud.</p> <p>"How to Survive in the West: A Mujahid Guide" is only the latest in a series of terror manuals published by ISIS.</p> <p>British police have targeted tens of thousands of websites purporting to offer jihadist material, including advice for sleeper cells on how to launch attacks.</p> <p>The 'Mujahid' - or jihadi fighter - e-book's chapter titles include 'Earning Money', 'Transporting Weapons' and 'Bomb Making'.</p> <p>According to Middle East Media Research Institute - an online terrorist monitoring service that obtained the journal - other chapters include 'Hiding the Extremist Identity', 'Internet Privacy', 'Training', and 'What Happens When You Are Spied On And Get Raided'.</p> <p>Among the items listed as essential to carry in an IS 'survival kit' are a flexible saw, matches, needles, small fish hooks, snare wire, medical kit, surgical blades, waterproof plasters, water purifying tablets - and condoms.</p> <p>The latex contraceptives can be used as a water-storing device in harsh climates, but it is unclear why the barbaric regime would recommend the contraceptives form part of a fighter's essential items.</p> <p>Militants are known to have raped girls as young as nine in Syria and Iraq, with many becoming pregnant.</p> <p>The guide also advises members of IS living in the West to avoid attracting unwanted attention from police by not growing a beard.</p> <p>"Don't make it too obvious you have become a practising Muslim. For example: If you haven't grown a beard, don't grow it now, because you will bring unwanted attention onto yourself."</p> <p>But the guide goes on to caution against shaving, saying to suddenly remove a beard would draw attention from friends and family.</p>

It also offers tips for female jihadis to avoid being searched at airports, advising them to wear light-coloured rather than black hijabs - a veil that covers the head and neck - to avoid tougher security measures.

The authors recommend committing credit card fraud or Ebay scams to finance the terror organisation, and for members to claim extra benefits and avoid paying tax wherever possible.

In preparing for urban warfare in the ravaged towns of the northern Iraq and Syria, the manual also urges trainee fighters to run up and down stairs to simulate climbing over rubble.

Among the more sinister chapters is one which describes in detail the process for making six different types of explosive device: Molotov cocktails, nail bombs, microwave airbag bombs, gas canister bombs, remote controlled bombs, and car bombs.

The group claims the brothers responsible for the Boston marathon bombing used the same technique to build a microwave bomb which exploded killing three people and injuring 264.

The book also details how to avoid being spied on, how to conceal bombs and weapons in a car, and how to reach IS-held territory in Syria without a passport.

The Twitter account that initially shared the link to the manual has now been suspended.

HEADLINE	05/11 Cyberattacks target mobile banking
SOURCE	http://www.cutimes.com/2015/05/11/cyberattacks-target-mobile-banking
GIST	<p>Reports of 2.2 billion malicious attacks on computers and mobile devices in 2015's first quarter and an evolving Dyre Wolf malware threat are reminders of the continuing need for financial institutions to remain vigilant.</p> <p>In an epic quarter, Moscow-based security firm Kaspersky Lab released the "IT Threat Evolution Report for Q1 of 2015." It discovered 2.2 billion malicious attacks blocked during the quarter on computers and mobile devices. That doubles the amount detected in Q1 of 2014.</p> <p>In a "good news, bad news scenario," Kaspersky Lab experts detected that mobile threats are declining but are still dangerous. During the quarter, 103,072 new malicious mobile device programs were discovered, which represents a 6.6% decline from Q1 of 2014. However, mobile malware seems to be evolving toward monetization as malware writers design SMS Trojans, banker Trojans and ransomware Trojans capable of stealing or extorting money and users' financial data. This category of malware accounted for 23.2% of new mobile threats in Q1 of 2015. Kaspersky also detected 1,527 new mobile banking Trojans, 29% more than in Q1 of 2014.</p>

	<p>During the same time period, Kaspersky Lab also published a report on Carbanak, opening up a new era of advanced, persistent threat (APT) attacks in the cybercriminal world – a set of stealthy and continuous computer hacking processes. Carbanak, which is considered one of the most successful criminal cyber criminal campaigns ever, is responsible for an estimated 100 financial organization hits and a total of close to \$1 billion stolen directly from banks.</p>

HEADLINE	05/11 New malware targets Wordpress
SOURCE	http://www.csoonline.com/article/2921138/malware-cybercrime/unusual-wordpress-attack-steals-login-credentials.html
GIST	<p>Wordpress, the Internet's favorite content management system, is a common target for criminals who redirect innocent users to malware download sites.</p> <p>But a new type of malware steals user login credentials instead, while leaving the rest of the user experience unchanged.</p> <p>"It's an interesting attack -- we haven't seen this before," said Michael Sutton, VP of Security Research at San Jose-based cloud security vendor Zscaler, Inc., which recently issued a report about the malware.</p> <p>"Wordpress tends to be a very common target for attacks," he said. "It's broadly used, but tends to be pretty insecure and not well maintained. Typically, they inject some code to redirect the browser to download malware on the machine to participate in some botnet."</p> <p>The open source Wordpress software currently accounts for two-thirds of the content management system marketplace, according to W3Techs, and powers a quarter of all websites.</p> <p>In this new attack, Wordpress pages are still serving up unwanted Javascript, but instead of redirecting users to a different site, it steals their credentials as they try to log in.</p> <p>"That's a harder thing to detect," he said. Sites that attempt to download malware are trying to install something on a user's machine. "But if my credentials are compromised, I would have no knowledge of that," Sutton said.</p>

HEADLINE	05/11 Billions lost by healthcare industry
SOURCE	http://www.benzinga.com/news/15/05/5498677/cyber-attacks-cost-the-health-care-industry-billions-a-year
GIST	The rise of cyber-attacks has led to virtually every company beefing up its internal security measures to limit, not eliminate, the fallout from future attacks.

The list of sectors most prone to attacks include the obvious choices: financial institutions, governmental organizations and retailers that track tens of millions of customers. However, one sector whose threats may be misunderstood by the public is healthcare.

According to Bloomberg, cyber-attacks against health-care providers have more than doubled over the past five years. The average data breach costs a hospital \$2.1 million, a figure that is alarming considering nearly 90 percent of all health-care providers faced a cyber-attack in the past two years.

Bloomberg estimated that the rise in attacks against doctors, hospitals, insurance providers and other members of the health care community is costing the entire industry \$6 billion annually.

"The health-care industry is being hunted and hacked by the elite financial criminal syndicates that had been targeting large financial institutions until they realized health-care databases are more valuable," Tom Kellermann, chief cybersecurity officer at Trend Micro Inc. told Bloomberg.

What makes health care providers an attractive victim is the fact that they likely store Social Security numbers, insurance IDs, addresses and medical details. Bloomberg noted this kind of sensitive data sells for as much as 20 times the price of a stolen credit-card number in the dark web where buyers and sellers remain anonymous and virtually untraceable.

2015 is proving to be a very difficult year as hackers have thus far accessed nearly 80 million records from Anthem Inc and 11 million records from Premera Blue Cross.

As such, the total number of records stolen in the first half of 2015 are already in excess of last year's total.

HEADLINE	05/11 ISIS threatens cyberattack against US
SOURCE	https://www.the-newshub.com/general/isis-threatens-cyber-attack-on-us-targets-at-2pm-today
GIST	<p>ISIS social media accounts are claiming they will perform a large cyber-attack on the United States at 2pm Eastern today. While specific targets have not been identified, it is possible that the group has identified vulnerable systems since they have named a precise time for the attack.</p> <p>The threat, named "Message to America" was released on a Twitter account early this morning and was posted in Arabic....</p> <p>The threat translated states," "Soon: Hacker of the supporters association will present: A Message to America, from Planet earth to the digital world." The account has now been suspended.</p> <p>In April, J.M. Berger co-author of ISIS: The State of Terror, stated in an interview with The Guardian:</p>

	<p>“Isis has been recruiting hackers for some time now. Some are virtual collaborators from a distance, but others have been recruited to immigrate to Syria. Activity targeting the west is just part of their portfolio. They’re also responsible for maintaining internet access in Isis territories, for instance, and for instructing members on security.”</p> <p>The group took over the US Central Command Twitter account earlier this year in January and targets of the threat could be more social media accounts linked to government agencies. On the other hand, they could target infrastructure systems and more important targets.</p>

HEADLINE	05/11 ISIS threatens #Londonattack
SOURCE	http://www.infowars.com/isis-terrorists-threaten-londonattack/
GIST	<p>Jihadists identifying themselves with the terror group ISIS are brazenly tweeting about plans to attack yet another major western city under the Twitter hashtag #LondonAttack.</p> <p>Images and threats posted to the social network include photographs of guns and suicide belts, with one user named ‘Abu Aiman Al kinyi’ warning, “Bismillah we are coming #londonattack.”</p> <p>“Just learnt how to make suicide belt by my brother @time4dugma_ Will be using in #LondonAttack,” states another shocking tweet.</p> <p>The tweets are extremely concerning given that last week’s attack on a Muhammad art exhibition in Garland, Texas was preceded by series of tweets sent out under the hashtag #TexasAttack.</p>

A retweet of a chilling message sent out by a user called ‘@71LastTweep’ also warns Muslims to stay away from the Covent Garden area, a location in the West End of London popular with shoppers and tourists. Another tweet directly names Floral St, Covent Garden as the target.

Another tweet shows Paddington Underground Station on a map alongside a suicide belt and the words, “Let the reality hit home, the taste of chaos, carnage & bloodshed. #foreignpolicy #QaribanQariba.”

HEADLINE	05/12 Experts: no specific terrorist profile
SOURCE	http://www.homelandsecuritynewswire.com/dr20150512-terrorists-personality-traits-indistinguishable-from-traits-of-the-general-population-experts
GIST	<p>Social scientists and psychologists have not found a personality trait that visibly marks a potential for violent extremism, making it difficult to identify members of a group who may take up arms in support of a common cause.</p> <p>“As of now, there is no specific terrorist profile,” said Jocelyn Bélanger, an assistant professor of psychology at the University of Quebec at Montreal who studies violent radicalization. “They come in all shapes and sizes.” Research on violent extremism, including interviews with current and former radicals, provide broad lessons on why and how some individuals might become violent radicals.</p> <p>The <i>Dallas Morning News</i> points out that violent extremism occurs throughout an different communities, and is not limited to religious or political movements. For many individuals who feel humiliated or oppressed, or who seek rewards through heroism or martyrdom, radical movements offer “the highway to significance,” Bélanger said. Mental illness plays almost no part in political or religious terrorism, and while extremists might convince themselves that their actions are justified, research shows that they are not psychotic.</p> <p>“There is little evidence of major psychoses being implicated, except in a minority of instances,” said Dr. Kamaldeep Bhui, a psychiatrist at Queen Mary University of London who studies violent extremism and is also editor of the British Journal of Psychiatry. In a recent research paper, Bhui and two colleagues wrote that “terrorists are generally well-integrated, ‘normal’ individuals,” not angry, social outcasts like many school shooters.</p> <p>Psychiatrist Jerrold M. Post, who founded and directed the CIA’s Center for the Analysis of Personality and Political Behavior during twenty-one years with the agency, and now a professor at George</p>

	<p>Washington University, echoed that view in a report published last month. “There are no psychological characteristics or psychopathology that separate terrorists from the general population,” wrote Post. “Rather, it is group dynamics, with a particular emphasis on collective identity that helps explain terrorist psychology.” Post added that the Internet can let isolated individuals feel like an important member of “the virtual community of hatred.”</p>

HEADLINE	05/10 Children in Yemen become fighters
SOURCE	http://www.washingtonpost.com/world/middle_east/why-so-many-children-are-fighting-in-yemens-civil-war/2015/05/10/7602d9be-e7a8-11e4-8581-633c536add4b_story.html
GIST	<p>SANAA, Yemen — Abdullah Ali’s 15-year-old son disappeared from home one morning three months ago. A week later, the boy called his horrified family to say he had joined the Shiite insurgents known as Houthis — becoming one of a growing number of underage soldiers fighting in Yemen’s civil war.</p> <p>“He’s just a child. He’s only in the ninth grade,” Ali, 49, a civil servant who lives in the city of Taiz, said recently. “He should be at school learning, not fighting.”</p> <p>Hundreds and possibly thousands of boys are fighting in Yemen’s conflict, according to rights groups and aid workers. Many are between the ages of 13 and 16, the groups say. Experts cite worsening poverty in the Arabian Peninsula country as a major reason children are joining armed groups.</p> <p>The child soldiers are found in nearly every faction battling in Yemen. According to some estimates, boys younger than 18 form nearly a third of the Houthi rebel force’s approximately 25,000 fighters.</p> <p>Over the past year, the Houthis have swept southward from their northern strongholds, taking control of the capital, Sanaa, and besieging the southern port city of Aden. Since March, a coalition of mainly Arab states led by Saudi Arabia has been launching airstrikes to push back the rebels and restore President Abed Rabbo Mansour Hadi to power. As the war has intensified, dozens of child fighters are thought to have been killed.</p> <p>Julien Harneis, the Yemen representative for UNICEF, said that warring factions, including the country’s al-Qaeda affiliate and southern separatists, appear to be increasing recruitment of minors, partly by offering money, regular meals and other benefits.</p> <p>“Becoming a fighter is seen as a way to make money to survive for those children who come from vulnerable backgrounds,” Harneis said. “And this is happening in all groups, from the north to south, in every corner of the country.”</p>

HEADLINE	05/11 Assad losses to become ISIS gains?
SOURCE	http://edition.cnn.com/2015/05/11/politics/syria-bashar-assad-isis-nusra-moderates/index.html
GIST	<p><i>Washington (CNN)</i> Syrian President Bashar al-Assad's momentum in fighting off rebel groups has decreased, but should his regime crumble, Syria could face greater instability and control by extremist groups, U.S. security officials are warning.</p> <p>They attribute the gains of rebel fighters in part to their acquiring more battleground experience as well as the ability to use advanced tactics. There are also signs that moderate forces have become more coherent in their organization, making Assad more vulnerable.</p> <p>But the officials pointed out that the U.S. will still have trouble identifying moderate partners while extremist groups such as al Qaeda affiliate al Nusra and ISIS, also known as ISIL, try to take advantage of any cracks in the government's control.</p> <p>The Syrian regime's "momentum has been slowed," according to Joint Chiefs of Staff Chairman Gen. Martin Dempsey. "I do believe the situation is trending less favorably for the regime."</p> <p>The shift has occurred in the last several weeks, Dempsey recently told reporters. Rebels have scored gains in both the north and south of Syria.</p> <p>"What it might mean for the nation of Syria is further instability," he said, "for power to suddenly transfer precipitously. And it could mean an even increased humanitarian crisis."</p> <p>Additionally, if Assad's power fades, both ISIS and al Nusra are poised to step into the breach even more assertively, potentially controlling parts of Damascus and other Assad strongholds.</p>

HEADLINE	05/11 Pentagon reviews threats beyond ISIL
SOURCE	http://www.usatoday.com/story/nation/2015/05/11/noetic-looking-beyond-isil/27121623/
GIST	<p>After missing the early stages of the Islamic State's rise into one of the world's most threatening militant groups, the Pentagon has begun a review to help anticipate possible threats beyond the Islamic State, military records show.</p> <p>Called "Looking Beyond ISIL," the review was commissioned by Defense Secretary Ashton Carter's office to back the work of the Special Operations Command Central, which coordinates special operations in the Middle East, according to Air Force Maj. Eric Badger, a Pentagon spokesman.</p> <p>The Islamic State is also known as ISIL or ISIS.</p>

The study is being led by the Noetic Group, a Washington-based consulting firm that has taken on some of the most pressing challenges for the Pentagon in the last four years, records show. It has helped develop policy for law enforcement in troubled areas of the world, to counter the Islamist Boko Haram terrorist movement in Nigeria, to cope with the convergence of future conflicts in Asia and to plan for shifts in the Palestinian Authority in the West Bank and Gaza.

HEADLINE	05/11 Twitter link ties w/Texas gunman, ISIS
SOURCE	http://www.nytimes.com/2015/05/12/us/twitter-clues-show-ties-between-isis-and-garland-texas-gunman.html? r=0
GIST	<p>Hours before he drove into a Texas parking lot last week and opened fire with an assault rifle outside a Prophet Muhammad cartoon contest, Elton Simpson, 30, logged onto Twitter.</p> <p>“Follow @_AbuHu55ain,” Mr. Simpson posted, promoting a Twitter account believed to belong to Junaid Hussain, a young computer expert from Birmingham, England, who moved to Syria two years ago to join the Islamic State and has become one of the extremist group’s celebrity hackers.</p> <p>This seemingly routine shout-out is an intriguing clue to the question of whether the gunmen, Mr. Simpson and Nadir Soofi, 34, both of Phoenix, were acting in concert with the Islamic State, also known as ISIS or ISIL, in carrying out an attack outside a community center in Garland, Tex. The Islamic State said two days later that the two men, who were killed by officers after opening fire, were “soldiers of the Caliphate.” It was the first time that the terror group had tried to claim credit for an operation carried out in its name on American soil.</p> <p>As the gunmen were driving toward the Curtis Culwell Center, Mr. Hussain logged onto Twitter himself from half a world away, firing off a series of posts in the hour before the attack began at 7 p.m. on May 3. One message posted to his account about 5:45 p.m. seemed to predict imminent violence: “The knives have been sharpened, soon we will come to your streets with death and slaughter!”</p> <p>After the attack, Mr. Hussain was in the first wave of people who praised the gunmen, before his account was suspended.</p> <p>Law enforcement officials have not presented any conclusive evidence that the Islamic State planned or directed the attack. Yet Mr. Simpson appears to have been part of a network of Islamic State adherents in several countries, including the group’s hub in Syria, who have encouraged attacks and highlighted the Texas event as a worthy target.</p> <p>Counterterrorism officials say the case shows how the Islamic State and its supporters use social media to cheerlead for attacks without engaging in the secret training, plotting and control that has long characterized Al Qaeda. But a close look at Mr. Simpson’s Twitter connections shows that he had</p>

	developed a notable online relationship with some of the Islamic State’s best-known promoters on the Internet, and that they actively encouraged such acts of terror.

HEADLINE	05/11 Saudi-led coalition pounds Yemen
SOURCE	http://www.usatoday.com/story/news/world/2015/05/11/saudi-airstrikes-yemen/27142965/
GIST	<p>SANAA, Yemen (AP) — Warplanes from a Saudi-led coalition pounded weapons depots on the edge of Yemen's capital Monday, one day before a humanitarian cease-fire is due to start and a U.N. envoy arrives on his first visit to try to end the war.</p> <p>The latest airstrikes followed the release by the Shiite rebels of video and photos of the purported wreck of a Moroccan F-16 that they claim to have shot down over the northern province of Saada near the Saudi border.</p> <p>Yemeni security officials said Monday's coalition airstrikes targeted arms and ammunition depots on Noqom mountain, on Sanaa's northeastern edge. The bombardment shook the entire city, collapsing some homes and shattering windows. They also caused shells to explode from the arms depots, and the munitions hit residential areas and started fires. There was no immediate word on civilian casualties.</p> <p>The officials, who spoke on condition of anonymity because they were not authorized to talk to the media, said the explosions were the strongest in Sanaa since the air campaign began March 26 against the rebels, known as the Houthis, and their allies in the army and security forces loyal to former President Ali Abdullah Saleh.</p>

HEADLINE	05/11 Pakistan knew bin Laden location?
SOURCE	http://www.nbcnews.com/news/world/pakistanis-knew-where-bin-laden-was-say-us-sources-n357306
GIST	<p>Two intelligence sources tell NBC News that the year before the U.S. raid that killed Osama bin Laden, a "walk in" asset from Pakistani intelligence told the CIA where the most wanted man in the world was hiding - and these two sources plus a third say that the Pakistani government knew where bin Laden was hiding all along.</p> <p>The U.S. government has always characterized the heroic raid by Seal Team Six that killed bin Laden as a unilateral U.S. operation, and has maintained that the CIA found him by tracking couriers to his walled complex in Abbottabad, Pakistan.</p> <p>The new revelations do not necessarily cast doubt on the overall narrative that the White House began circulating within hours of the May 2011 operation. The official story about how bin Laden was found was constructed in a way that protected the identity and existence of the asset, who also knew who inside the</p>

	<p>Pakistani government was aware of the Pakistani intelligence agency's operation to hide bin Laden, according to a special operations officer with prior knowledge of the bin Laden mission. The official story focused on a long hunt for bin Laden's presumed courier, Ahmed al-Kuwaiti.</p> <p>While NBC News has long been pursuing leads about a "walk in" and about what Pakistani intelligence knew, both assertions were made public in a London Review of Books article by investigative reporter Seymour Hersh. Hersh's story, published over the weekend, raises numerous questions about the White House account of the SEAL operation. It has been strongly disputed both on and off the record by the Obama administration and current and former national security officials.</p> <p>The Hersh story says that the "walk in," a Pakistani intelligence official, contacted U.S. authorities in 2010, that elements of ISI, the Pakistani intelligence agency, knew of bin Laden's whereabouts, and that the U.S. told the Pakistanis about the bin Laden raid before it launched. The U.S. has maintained that it did not tell the Pakistani government about the raid before it launched.</p>

SOURCE	http://www.cnn.com/2015/05/11/politics/nsa-cyber-terror-isis-recruitment/index.html
GIST	<p>The head of U.S. Cyber Command said Monday that the ability of ISIS to recruit adherents online is "a trend that is clearly increasing, not decreasing" and that the terror group's ideology is "increasingly resonating" with Americans.</p> <p>Adm. Mike Rogers, director of the National Security Agency, also said that the terror group's recent efforts to use cyber capabilities as a weapons system rather than only for recruiting and spreading ideology is a "great concern" to the NSA.</p> <p>When it comes to responding to cyber breaches by terror groups as opposed to countries, such as North Korea and China, Rogers said that "every scenario is different."</p> <p>"I don't have an easy answer," he said. "The mechanisms of what you use to apply that pressure, I think, varies by the entity you're trying to shape and let them know, 'hey, you don't want to go down this road, and when you do, you need to know there is a price you're going to pay.'"</p> <p>The challenge for the NSA, Rogers told a cyber security forum, is the balance between privacy and security. It's a compromise Congress and the intelligence community must agree on by the end of the month, when the legislation that provides authority to the Foreign Intelligence Surveillance Court expires.</p>

Suspicious, Unusual

HEADLINE	05/11 Short-sightedness on rise in Europe
SOURCE	http://www.upi.com/Health_News/2015/05/11/Short-sightedness-on-the-rise-in-Europe/2581431357652/?spt=rln&or=1
GIST	<p>LONDON, May 11 (UPI) -- Roughly a quarter of the general population in Europe is short-sighted. But nearly half of all young adults (between the ages of 25 and 29) are diagnosed with nearsightedness. Those are the findings of a new study by researchers at King's College London.</p> <p>The results -- a meta-analysis of 15 studies by researchers at the European Eye Epidemiology Consortium -- suggest myopia is becoming more common.</p> <p>The review pinpointed education as one of the causes. In analyzing data on the seeing abilities of more than 60,000 Europeans, researchers found those who had completed higher education were twice as likely to be nearsighted as those whose studies ended after primary school.</p> <p>More time spent studying and staring at computer screens is at least partially to blame in the rise of myopia among young people. But schooling doesn't entirely explain the new findings, researchers say. Shortsightedness is influenced by family history and other environmental factors.</p> <p>"We knew myopia was becoming more common in certain parts of the world -- almost 8 in 10 young people are affected in urban East Asia -- but it is very interesting to find that the same pattern is being seen here in Europe," lead study author Katie Williams, an ophthalmology researcher at King's College London, said in a press release. "This has major implications for the future burden from this eye disease which can threaten sight in older age, particularly in very short-sighted people."</p>

HEADLINE	05/12 NATO expels Russia spies?
SOURCE	http://www.foxnews.com/world/2015/05/12/nato-reportedly-expels-dozens-alleged-russian-spies-from-brussels-headquarters/
GIST	<p>NATO reportedly has moved to expel dozens of suspected Russian spies from its headquarters in Brussels in the latest sign of a renewal of tensions between the western military alliance and Moscow.</p> <p>The Guardian reported that NATO decided last month to mandate that all non-member state delegations reduce their staff to no more than 30 people. The new rule only affected Russia, though estimates of the exact number of Russian delegates vary. The Kremlin says it has only 37 people accredited to work in Brussels. However, a diplomat from a NATO member state told The Guardian that in fact 61 people were part of the delegation. Other NATO sources told the paper the number was as high as 90.</p>

	<p>Regardless of the number, the paper reported that NATO diplomats estimate that approximately half of the Russian contingent was working on behalf of Moscow's intelligence service. In practice, the paper reported, only Russia's ambassador to NATO, his deputy, his secretary, and his driver, were allowed to traverse the alliance's offices without being escorted.</p> <p>NATO Secretary General Jens Stoltenberg denied in an interview that the new rule specifically targeted Russia, saying, "With the Russians we have decided to suspend all practical co-operation but to maintain the channels of political and military dialogue and contact. A delegation of 30 is more than enough to do that."</p>

HEADLINE	05/12 OECD warns on youth binge drinking
SOURCE	http://abcnews.go.com/Health/wireStory/oecd-warns-harmful-binge-drinking-youth-30975617
GIST	<p>Alcohol consumption in wealthy, developed countries has declined over the past two decades, but dangerous binge drinking increased among the young, according to a new study by the Organization for Economic Cooperation and Development.</p> <p>The 34-nation OECD, which advises governments on policies for economic growth, says that average annual alcohol consumption in its member countries fell 2.5 percent over the past 20 years, to 9.1 liters of pure alcohol per capita.</p> <p>That overall trend hides a dangerous increase in hazardous drinking by young people, the OECD says, as measured by both the amount and the rate that alcohol is consumed.</p> <p>Harmful consumption of alcohol now accounts for a higher proportion of deaths worldwide than HIV/AIDS, violence and tuberculosis combined, according to the report, "Tackling Harmful Alcohol Use."</p>

HEADLINE	05/10 Asylum 'secret password' for illegals
SOURCE	http://www.foxnews.com/us/2015/05/10/asylum-is-secret-password-for-immigrants-looking-to-enter-us-say-critics/
GIST	<p>Critics say there's a secret password that allows immigrants access into the U.S., and one that can be uttered in a short phone interview in a process they say exposes border security to widespread fraud.</p> <p>The word: Asylum.</p> <p>"Almost anyone at all can call themselves an asylum seeker and get in. It's a global joke," said Kenneth Palinkas, president of the National Citizenship and Immigration Services Council. "It's not border security if anyone can recite the magic words and get waved right on in."</p>

Under current policy, aliens caught crossing the border illegally can claim asylum, and with it receive authorization to work in the United States. Once a work permit is conferred, then comes a social security card and a variety of taxpayer funded benefits such as Supplemental Security Income, SNAP/Food Stamps, Temporary Assistance for Needy Families, and Medicaid. Some of which even legal, permanent residents do not receive.

It's a tactic most often used by 19 to 21 year-olds, according to a recent Immigration Customs Enforcement (ICE) report to Congress. Examples of terrorists who applied for asylum include Sheik Omar Abdul Rahman, the blind sheik behind the 1993 World Trade Center bombing, and Ramzi Yousef, another of the '93 plotters and the nephew of Khalid Sheik Mohammed.

The House Judiciary Committee last year uncovered an internal Department of Homeland Security report demonstrating at least 70 percent of asylum cases contained proven or possible fraud. Despite this, more than 90 percent of cases in which applicants claimed a "credible fear" in their nation of origin were approved. And yet, even when the asylum officer denies the case, the alien may still be awarded benefits by appealing to a judge using a "credible fear" defense and in the meantime roam freely across the country.

"Unfortunately our generous asylum policies have become subject to ever increasing levels of abuse largely due to the Obama Administration's pattern of rubber stamping "credible fear" claims and asylum cases," said Bob Goodlatte, R.-Va., chairman of the House Committee on the Judiciary.

"Instead of detaining asylum seekers while the government determines whether their cases are legitimate, the Obama administration simply releases them into the United States."

According to the Committee, credible fear claims have increased 586 percent -- an unprecedented surge.

HEADLINE	05/11 Nasty germs in your coffee maker
SOURCE	http://www.cbsnews.com/news/nasty-germs-may-be-lurking-in-your-coffee-maker/
GIST	<p>CHICAGO --So what's really brewing in that cup of coffee you make every day? It turns out germs love to lurk.</p> <p>Ten Chicago area families let CBS 2 swab their one-cup coffee makers. Then CBS 2 reporter Mary Kay Kleist took the samples to Loyola University, where experts tested them for germs.</p> <p>Microbiologist Roman Golash tested the cup containing coffee grounds, underneath where the coffee comes out and the water reservoir. He found bacteria including gram-positive strains like staphylococcus,</p>

streptococcus and bacillus cereus. He also discovered enteric bacteria, or [bacteria of the intestines, like e-coli](#).

"I think the high amounts of fecal material or the enteric organisms I would probably be concerned about," Golash said.

Five of the machines sampled had bacteria either on the machine, in the water or in both places. Test results found bacteria in just the water samples of three other machines and no bacteria at all in the samples taken from two of the machines.

Stephanie Mathews' machine had 100,000 colony-forming units of bacteria in the water reservoir -- the highest number of bacteria in all the samples. "That's gross," Mathews said.

Another resident, Tess Kearns, had bacteria in the water reservoir and in the coffee outlet area. "I definitely need to clean that more often," Kearns said. "I'm very skeeved out right now."

These germs could cause gastrointestinal issues and stomach upset in people, especially if they have compromised immune systems.

"Any organism, given the right situation to the right person, can cause a problem," Golash said.

HEADLINE	05/11 How many pages to print the Internet?
SOURCE	http://abcnews.go.com/Technology/pages-takes-print-entire-internet/story?id=30956365
GIST	<p>It's the ultimate estimation game: How many pieces of paper would it take to print the entire Internet?</p> <p>Two British scientists have arrived at the approximate number of pages they say it would take to create a hard copy of everything on the Internet.</p> <p>The answer: 136 billion standard 8 1/2 by 11-inch pieces of printer paper.</p> <p>Using Wikipedia as a baseline, the scientists at the University of Leicester in the United Kingdom estimated 4,723,991 English pages exist on the site. From there they determined the average number of pages each would require to print is 15, putting a hard copy of the English version of the encyclopedic website at 70,859,865 paper pages.</p> <p>With approximately 4.54 billion pages on the Internet, the team doubled their Wikipedia rule to approximate that it would take approximately 30 pieces of paper per Web page to be printed.</p> <p>The result is 136.2 billion pieces of paper. Want some more math?</p>

	<p>At 500 sheets of paper per ream and each tree yielding 17 reams, it would take 16 million trees to print a hard copy of the Internet.</p> <p>The results were published in the Journal of Interdisciplinary Science Topics.</p>

HEADLINE	05/11 Most Gulf rulers to skip US summit
SOURCE	http://abcnews.go.com/International/wireStory/saudi-bahrain-kings-miss-gulf-nation-summit-us-30949614
GIST	<p>It is not just the Saudi king who will be skipping the Camp David summit of U.S. and allied Arab leaders. Most Gulf heads of state won't be there.</p> <p>The absences will put a damper on talks that are designed to reassure key Arab allies, and almost certainly reflect dissatisfaction among leaders of the six-member Gulf Cooperation Council with Washington's handling of Iran and what they expect to get out of the meeting.</p> <p>Rulers of Saudi Arabia, the United Arab Emirates, Bahrain and Oman never publicly announced they would attend the summit — so officially at least, there was no reversal of plans.</p> <p>At the summit, leaders of Gulf nations will be looking for assurances that they have Obama's support at a time when the region feels under siege from Islamic extremists and by Iran's rising influence. The Gulf states worry the nuclear pact taking shape with the U.S., Iran and other nations may embolden Tehran to act more aggressively in the region.</p> <p>Israeli Prime Minister Benjamin Netanyahu has expressed similar concerns, saying the emerging deal will leave too much of Iran's nuclear infrastructure intact while giving it quick relief from economic sanctions.</p> <p>Netanyahu has been an outspoken critic of the deal, raising tensions with the White House. U.S. attempts to reassure Israel that the deal will have strong safeguards have done little to ease its concerns. Netanyahu has claimed that moderate Sunni Arab countries see "eye to eye" with Israel on the matter, though he has not elaborated.</p> <p>Abdulkhaleq Abdullah, a professor of political science at Emirates University, said Gulf leaders were staying away from the Camp David gathering to signal their displeasure over the nuclear talks.</p>

HEADLINE	05/11 Seattle man finds unexploded 'blast ball'
SOURCE	http://www.komonews.com/news/local/Capitol-Hill-Man-find-Seattle-Police-Detonation-Device---303359201.html

GIST	<p>SEATTLE -- A Capitol Hill resident says he found an unexploded "Blast Ball" outside his apartment after this month's May Day riot, and he and others are now questioning the department's use of the crowd control tactic.</p> <p>Hugh Ramsey said the sound from a Blast Ball made him run from his apartment on May Day to see what happened. He saw a scene of protesters marching, police following them and lots of smoke and flashes of light along Denny Way.</p> <p>And then he noticed what he called a "small sphere" sitting on the side of the road near Summit and Denny.</p> <p>"I saw what appeared to be a hand grenade in the gutter of the street," said Ramsey.</p> <p>Ramsey said the pin was still in it and he initially worried it might explode. When he thought it was safe, he scooped it up and tucked it into his camera bag.</p> <p>He noticed some officers had them dangling from their waistband and realized it belonged to Seattle Police.</p> <p>"An officer lost track of his personal explosive device," said Ramsey.</p>

HEADLINE	05/11 Is ISIS hiding in Mexico?
SOURCE	http://www.adn.com/article/20150511/islamic-state-hiding-mexico
GIST	<p>ANAPRA, Mexico -- Pedro Luis Hidalgo, who runs an animal-feed store about a mile south of the border, scoffs at warnings from U.S. right-wingers that Islamic terrorists are near his home.</p> <p>Washington's conservative Judicial Watch for months has charged that the areas around Ciudad Juarez have become hotbeds of Middle Eastern militants bent on invading America. Last month, the group said it had proof that there was a training camp in Anapra, a community on the western end of Juarez.</p> <p>"Here we have drug traffickers and delinquents. Thank God, we don't have terrorists," said Hidalgo, 39, to nods of approval of two neighbors visiting his feed store.</p> <p>FBI and Homeland Security officials said they found no evidence that the Judicial Watch report was accurate.</p> <p>Of course, it's difficult to prove that no one is hiding in an unknown cave in the barren landscape around Anapra, which three decades ago was little more than a sprawling squatters' camp, but has grown to an impoverished, crime-ridden community of about 40,000 people.</p>

Sandwiched between the U.S. border fence and the Chihuahua Desert, Anapra is easily viewed from the U.S. side. Border Patrol agents watch from peaks and plateaus above Anapra.

Despite the denials by U.S. officials and residents of Anapra, several vocal congressional Republicans have insisted that Middle Eastern terrorists are on the Mexican border and intent on attacking America.

And that type of allegation increasingly has become a part of the immigration debate in Congress, talk radio, and the huge world of bloggers.

"We know that ISIS is present in Ciudad Juarez, or they were within the last few weeks," Rep. Trent Franks, R., Ariz., said in September on a rightist radio show, using another common name for the Islamic State. "And so there's no question that they have designs on trying to come into Arizona."

Rep. Duncan Hunter, R-Calif., went further on another radio show: "Name your terrorist organization, they're coming in through the southern border."

Pennsylvania Republican Rep. Louis J. Barletta made a similar allegation in a September congressional hearing.

"Terrorist networks have been using our porous southern border and a broken immigration system to enter the United States," he said.

Some Anapra residents said that they heard about the congressmen's statements, covered by Mexican media outlets, but that the information didn't square with their knowledge of geography.

"Yes, ISIS exists, but not here. They are in Iraq and Afghanistan," said Govelin Arreola, 37, an Anapra construction worker.

Arreola, who worked in Texas for several years before he was deported in 2008, said drug violence was out of control in his town, though the killings had lessened recently. He pointed to the corner of his outside wall, where he said a man was murdered during a period of intense gang warfare.

Arreola's mother, Rosa Isela Valles, 57, who was selling used clothing at a weekly street market outside the house, had a more down-to-earth view of the threats on the border.

"Here there is the terrorism of hunger," Valles said, referring to the poverty in Anapra. "The people are in need of basic necessities."

HEADLINE | **05/11 Garland police: FBI didn't warn us**

SOURCE	http://www.dallasnews.com/news/crime/headlines/20150511-garland-police-say-they-had-no-tip-about-attack-at-culwell-center.ece
GIST	<p>GARLAND — Garland’s police chief made clear Monday that his department had no advance warning that two gunmen from Phoenix would target a controversial art exhibit.</p> <p>Two men armed with assault rifles and wearing body armor pulled up to the Curtis Culwell Center and opened fire May 3, wounding a Garland ISD security guard.</p> <p>Five Garland police officers, who were providing security at the Muhammad art exhibit, returned fire, killing Elton Simpson and Nadir Soofi.</p> <p>“We had no information from the FBI or anyone else that Elton Simpson posed a threat to our event,” Police Chief Mitch Bates said at a news conference, the department’s first in a week.</p> <p>FBI Director James Comey said Thursday that federal investigators knew a few hours beforehand that Simpson might be interested in the event. It featured provocative cartoons depicting the Muslim prophet Muhammad.</p> <p>“We didn’t have reason to believe that he was going to attack the event or, in fact, we didn’t have reason to believe he had left Phoenix,” Comey said. “But because we developed reason to believe that he might be interested in the event, we sent it to them as part of what we’ve been doing in connection with the event generally.”</p> <p>A picture, license plate and other information about Simpson was distributed. Garland police confirmed Monday that the assistant chief in charge of securing the event was on that distribution list, but had not seen the information.</p> <p>The FBI called it a bulletin. Bates referred to it as an email, one of many the department receives regularly.</p>

HEADLINE	05/12 DEA: money is presumed to be guilty
SOURCE	http://freebeacon.com/issues/dea-seizes-amtrak-passengers-life-savings-without-charging-him-with-crime/
GIST	<p>Joseph Rivers, a 22-year-old Michigan resident, was on his way to Los Angeles in April to fulfill his dream of becoming a music video producer, according to Rivers and his lawyer, when federal agents from the Drug Enforcement Agency (DEA) boarded his Amtrak train during a stop in Albuquerque.</p> <p>DEA agents approached Rivers, the only black passenger in the train car, and asked to search his bag. Inside the bag, agents found \$16,000 in cash—money Rivers said he had saved up and received from family members to pursue his music video aspirations.</p>

The agents detained Rivers and asked him about the cash. According to Rivers and his lawyer, Michael Pancer, a San Diego-based attorney, Rivers had the agents call his mother to confirm his story, but the DEA nevertheless seized his money, believing it was somehow connected with drugs.

The DEA agents then released Rivers, leaving him penniless in Albuquerque. He was never charged with a crime. The incident, first reported by the *Albuquerque Journal*, is the latest case to highlight the practice of civil asset forfeiture.

Under civil asset forfeiture laws, police and federal agents can seize property on the mere suspicion that it is connected to criminal activity. The property owner does not even have to be charged with a crime, since asset forfeiture is technically an action against the property itself.

“We don’t have to prove that the person is guilty,” Sean Waite, the head of the DEA’s Albuquerque office, told the *Albuquerque Journal*. “It’s that the money is presumed to be guilty.”

HEADLINE	05/11 Ex-Soviet spy worked in NY power grid
SOURCE	http://www.rtoinsider.com/soviet-spy-jack-barsky-nyiso-15052/
GIST	<p>A former Soviet spy who lived in the United States for more than 35 years under an assumed identity has been working since 2011 as director of software development for NYISO but never had access to any sensitive data or operations, officials said.</p> <p>The power grid operator responded to a CBS “60 Minutes” report that aired Sunday, in which “Jack Barsky” revealed his Cold War past, when he posed as an American in the 1970s and 80s in the hopes of gaining access to high ranking government officials.</p> <p>Born Albrecht Dieterich in East Germany, he was recruited by the KGB as a student. He assumed the identity of Jack Barsky after Soviet agents provided him the birth certificate of an American boy who died at age 10.</p> <p>Barsky told CBS he was directed to infiltrate the office of Zbigniew Brzezinski, President Jimmy Carter’s national security adviser from 1977-1981 but never got close to the official. He said his biggest coup was providing Soviets enterprise software designed by an insurance company for which he worked.</p> <p>Barsky, who lives northeast of NYISO headquarters in Rensselaer, was placed on administrative leave recently when he told the ISO he was going to be the subject of a “60 Minutes” report.</p> <p>According to his LinkedIn profile, Barsky came to NYISO after serving as chief information officer for NRG Energy from 2006 to 2010 and ConEdison Solutions from 2002 to 2006. The companies confirmed his employment to Capital New York.</p>

“According to the story on ‘60 Minutes,’ Mr. Barsky appears to have had regular contact with the FBI over a period of many years that was not publicly disclosed. The FBI generally informs a company such as the NYISO of any potential cyber security threat of which it is aware. We have a long standing and productive relationship with the FBI and at no time did the FBI indicate that this employee posed a threat,” NYISO spokesman David C. Flanagan said.

“Out of an abundance of caution, we have conducted internal forensic reviews of physical and computer records and have not discovered any security threats or any indication that the employee engaged in improper behavior. The employee did not have direct access to grid operations or energy market systems that would enable manipulation of software. Further, the individual did not have physical access to our control rooms.”

Flanagan said NYISO has hired an outside firm to “to conduct a separate analysis to confirm our findings.”

According to the “60 Minutes” report, Barsky was discovered in 1997 by the FBI, when he was working as a computer programmer in New Jersey. His last name had appeared in materials provided to the government by a KGB defector in 1992.

Barsky was never arrested or charged, as the FBI determined he would be of no value in jail; he was more useful living freely as he was debriefed about KGB operations.

HEADLINE	05/11 Police: brutal attack in park
SOURCE	http://www.kirotv.com/news/news/police-brutal-attack-park-leaves-man-without-sight/nmDrM/
GIST	<p>BALLARD, Wash. — A man was reportedly blinded after an attacked in Golden Gardens Park.</p> <p>He and his girlfriend were reportedly at the park, at 8498 Seaview Pl. N.W., with other classmates on May 2 when another group of "rowdy" classmates arrived.</p> <p>"Out of nowhere" a classmate of the victim tackled him from behind and proceeded to choke him, the Ballard News Tribune reported.</p> <p>A friend of the victim separated him from the suspect. When the victim was leaving and asked the suspect why he had tackled him, the suspect reportedly responded by slapping and then punching the victim.</p>

	<p>Then the two groups started fighting. Another suspect held the victim down, and the suspect gouged the victim's eyes with his thumbs. The suspect also pushed sand in the victim's eyes during the attack, which was described as excruciating pain. The victim's girlfriend rushed him to Swedish Hospital.</p> <p>He was sent to Harborview Medical Center for his optical nerve damage.</p> <p>Police said the suspect is an ex-Army soldier who owns weapons and has anger issues. A report said there were alleged two separate accounts of "choking people out" during their time as classmates.</p> <p>It's unclear whether the victim's injuries are permanent or temporary.</p>

HEADLINE	05/11 Gig Harbor police eye \$1M in thefts
SOURCE	http://www.thenewstribune.com/2015/05/11/3786863/police-more-that-1-million-in.html
GIST	<p>Gig Harbor police said Monday that more than \$1 million worth of goods may have been stolen from commercial or rental trucks in the area.</p> <p>Officers found some of the stolen property in three Key Peninsula storage units, after employees of a local lumberyard reported a break-in April 24.</p> <p>GPS tracking of the vehicle showed someone took it to Fox Island, dropped off the wood, then dumped the truck back near the business, police said.</p> <p>Investigators identified some suspects, and found stolen property amounting to \$200,000 in several storage units in unincorporated Pierce County, involving at least eight stolen trucks and nine victims, police said.</p>

	<p>Among the goods taken were personal family items, military equipment, commercial goods and tools. The stolen goods could amount to a value of more than \$1 million, because investigators think it's possible some of the items were sold, police said.</p> <p>One person was arrested, and investigators are working to determine if there are other suspects responsible for the thefts.</p>

HEADLINE	05/12 Organized crime grows w/migrants
SOURCE	http://www.newsmax.com/World/GlobalTalk/Immigration-mafia-crime-migrants/2015/05/12/id/643983/
GIST	<p>The profits are huge, the risks limited and the demand virtually inexhaustible: trafficking illegal migrants to Europe is increasingly becoming the domain of organized crime groups attracted by the multibillion-dollar pay-off, experts say.</p> <p>Transporting desperate migrants from conflict zones in Africa or the Middle East is a lucrative business that generates an estimated \$7 billion, about six billion euros, a year, and mafia groups want a slice of the pie.</p> <p>"Cross-border trafficking flows ... are more often connected to organized crime. Complex trafficking flows can be more easily sustained by large and well-organized criminal groups," said the United Nations Office on Drugs and Crime in a recent report.</p> <p>With better connected and broader "big fish" networks taking over, even the journey itself has changed, said Arezo Malakooti, who works for Paris-based Altai, a group that advises the International Organization for Migration (IOM).</p> <p>"In 2013, the immigrants told us that they took a journey in stages, and at each stage they would change smugglers and pay a new price. Sometimes they would stop at locations to work and make money to be able to afford the next step," said Malakooti.</p> <p>"In 2014 we increasingly saw migrants paying for a journey from home to destination. It's happening more and more now."</p> <p>There is also an interconnection between different networks, suggested by the fact that some migrants passing through Libya end up working as prostitutes in Europe, said Joel Milman, IOM spokesman.</p> <p>One of the things attracting the big fish mafia bosses is a richer clientele of middle-class Syrians escaping their war-torn country — a more prosperous group than their African counterparts.</p>

HEADLINE	05/12 Indonesia arrests 7 in seafood slavery
SOURCE	http://abcnews.go.com/International/wireStory/indonesian-police-arrest-seafood-slavery-case-30972425
GIST	<p>Two Indonesians and five Thais were arrested on charges of human trafficking connected with slavery in the seafood industry, Indonesian police said Tuesday. They were the first suspects taken into custody since the case was revealed by The Associated Press in a report two months ago.</p> <p>The arrests were made Monday and late Friday in the remote island village of Benjina, said Lt. Col. Arie Dharmanto, National Police anti-trafficking unit chief.</p> <p>Five Thai boat captains and two Indonesian employees at Pusaka Benjina Resources, one of the largest fishing firms in eastern Indonesia, were taken into custody. The arrests come after the AP reported on slave-caught seafood shipped from Benjina to Thailand, where it can be exported and enter the supply chains of some of America's biggest food retailers.</p> <p>"They have committed an extraordinary crime, and we will not let it happen again in Indonesia," Dharmanto said. "We will not stop here. We will pursue those who are involved in this case, whoever they are."</p> <p>Police will recommend they be charged by prosecutors. If the men go to trial, they could face jail sentences of up to 15 years and fines as high as \$46,000, he said.</p>

GIST	<p>The Swedish Supreme Court has denied WikiLeaks founder Julian Assange's latest appeal to dismiss an arrest warrant for allegations of sexual assault.</p> <p>Assange has been holed up in London's Ecuadorian Embassy for more than two years to avoid extradition to Sweden, where prosecutors want to question him about 2010 allegations that he raped one woman and sexually molested another.</p> <p>Although prosecutors have agreed to look into conducting interviews in London to move the investigation forward, the court sees "no reason" to lift the arrest warrant, Sweden's Supreme Court said in a statement released on Monday.</p> <p>In a previous appeal, Assange argued that the preliminary investigation has been open for an unacceptably long time, and that the arrest warrant improperly keeps him from going to Ecuador, which offered him asylum, or even from going outdoors.</p> <p>The prosecutors previously balked at coming to Britain to question Assange, however, some of the alleged crimes will be subject to a statute of limitations in August this year, which has spurred Swedish authorities to change their approach.</p>

HEADLINE	05/12 Another blogger hacked to death
SOURCE	http://www.cnn.com/2015/05/12/asia/bangladesh-blogger-killed/index.html
GIST	<p>The attack on bloggers critical of Islam has taken on a disturbing regularity in Bangladesh with yet another writer hacked to death Tuesday.</p> <p>Ananta Bijoy Das, 32, was killed Tuesday morning as he left his home on his way to work at a bank, police in the northeastern Bangladeshi city of Sylhet said.</p> <p>Four masked men attacked him, hacking him to death with cleavers and machetes, said Sylhet Metropolitan Police Commissioner Kamrul Ahsan.</p> <p>The men then ran away. Because of the time of the morning when the attack happened, there were few witnesses. But police said they are following up on interviewing the few people who saw the incident.</p> <p>"It's one after another after another," said Imran Sarker, who heads the Blogger and Online Activists Network in Bangladesh. "It's the same scenario again and again. It's very troubling."</p>

	<p>Das' death was at least the third this year of someone who was killed for online posts critical of Islam. In each case, the attacks were carried out publicly on city streets.</p> <p>The three victims are hardly the only ones who have paid a steep price for their views. In the last two years, several bloggers have died, either murdered or under mysterious circumstances.</p>

HEADLINE	05/11 FBI: killing of police officers on rise
SOURCE	http://thehill.com/policy/national-security/241594-fbi-officer-killings-on-the-rise
GIST	<p>The number of law enforcement officers killed through acts of violence has been on a precipitous upswing, according to preliminary data from the FBI.</p> <p>Statistics released by the bureau on Monday show that 51 officers were killed by a felony crime in 2014, up from the just 27 killed in 2013 — which represented a 35-year low.</p> <p>From 1980-2014, an average of 64 officers were killed each year across the country, the FBI said.</p> <p>The new data come amid growing tensions between police and communities across the country, in the wake of multiple deaths of unarmed black men and boys at the hands of police.</p>

	<p>As instances of unrest have spread from Ferguson, Mo., to Staten Island, N.Y., to Baltimore, scrutiny of law enforcement and of the perils that come with the job have also been on the rise.</p> <p>According to the FBI's new data, officers were shot at in 46 of the 51 deaths. Four officers were run over by vehicles and one was killed by someone's bare hands.</p> <p>Those deaths happened in a mix of situations: 11 officers were killed after answering disturbance calls, 10 were attempting to make traffic stops and eight were killed in an ambush. In other instances, officers were killed while investigating cases, dealing with people with mental illnesses or making other arrests.</p> <p>All of the cases from the slayings have been closed, the FBI said.</p>

HEADLINE	05/11 Most arrested in crackdown not LEAD
SOURCE	http://mynorthwest.com/11/2759800/Many-arrested-in-Aprils-Seattle-crime-crackdown-not-eligible-for-diversion-program
GIST	<p>Rather than sending suspected drug dealers that were arrested during Seattle's April crime crackdown to prison, the plan was to enroll "some" in a diversion program.</p> <p>That "some" was 11 out of at least 95 people arrested, so far.</p>

Return to Top	<p>Many of the people arrested in the 9.5 blocks of downtown, between First and Fourth avenues and Union and Stewart streets, were not eligible for the Law Enforcement Assisted Diversion program.</p> <p>"Almost all the people arrested in the nine-and-a-half blocks are being dealt with in the old way," Lisa Daugaard, deputy director of Public Defender Association, said on Mike McGinn's "You. Me. Us. Now." podcast.</p> <p>The "old way" she refers to is the process of arresting, booking, prosecuting, and convicting.</p> <p>The arrests were made by Seattle police in an effort to crack down on drug dealing and associated crime.</p> <p>The LEAD pre-booking diversion pilot program would have redirected those low-level offenders to community-based services, instead of jail and prosecution.</p> <p>The intention was to divert as many as possible to LEAD, Daugaard said. It turns out eligibility kept "a lot" of people out.</p>

HEADLINE	05/11 Sexually motivated burglar arrested
SOURCE	http://blog.seattlepi.com/seattle911/2015/05/11/police-man-arrested-tied-to-12-sexually-motivated-burglaries-in-u-district/
GIST	<p>Seattle police believe a man they arrested Friday is tied to 12 sexually motivated burglaries near the University of Washington campus since December.</p> <p>Upon receiving a positive DNA match for the man from a rape kit administered on the first known victim, police arrested the 35-year-old at his Northgate-area home.</p> <p>Police booked him into King County Jail for investigation of one count of rape, one count of indecent liberties and four counts of burglary.</p> <p>The intruder typically hit residences housing several women north of the UW campus. He struck between 2 and 6 a.m. while the alleged victims slept in homes between the 1500 block of Northeast 45th Street and the 1900 block of Northeast 52nd Street, according to police reports.</p> <p>The arrested man has not yet been charged. He is scheduled to face a bail hearing Monday afternoon.</p> <p>The man appears to have no criminal history in Washington, according to court records. He reportedly has a wife and four kids and has been employed by the same person in Seattle for 14 years.</p>

HEADLINE	05/11 Growing list refugees run into trouble
SOURCE	http://www.wnd.com/2015/05/in-u-s-just-9-days-refugee-tries-to-rape-woman/
GIST	<p>The U.S. screening process for foreign refugees has once again failed to stop a criminal from entering the country, as indicated by the case of Tchalim Koboya Lidawo of Togo.</p> <p>Lidawo was in the U.S. only nine days when he was arrested in Virginia and charged with two counts of attempted rape and one count of abduction with force related to an incident on Dec. 4, 2014.</p> <p>Lidawo pleaded no contest to the charges May 8 and was sentenced to 10 years in prison.</p> <p>Lidawo is the latest in a long line of refugees the government has brought in from overseas who have run afoul of the law.</p> <p>Hundreds of former refugees have come to the U.S. and ended up being charged with providing material support to foreign terrorist organizations or other criminal acts.</p> <p>The country with the worst record is Somalia. So many Somalis have have been arrested or sought by authorities that U.S. attorney for Minnesota, Andrew Luger, concluded last month that the state “has a terror recruitment problem” among its growing Somali-American community. The community is about 50,000 strong in the greater Minneapolis-St. Paul area, made up of Somali refugees and their sons and daughters.</p> <p>The U.S. State Department has resettled 3 million foreign refugees into communities across the U.S. since 1975. It insists the refugees are the “most rigorously scrutinized” of all immigrants. But the program has changed from its early days. While the first refugees in the 1970s and early 1980s tended to come from Southeast Asia and other peaceful nations, more in recent years, since the early 1990s, have come from countries in the Middle East and Africa where Islamic-inspired civil war rages.</p> <p>The list of those refugees running into trouble once they get to the U.S. keeps growing.</p> <p>The next big wave of high-risk refugees is coming from Syria, which is bogged down in a five-year civil war among warring Islamic factions. So far, only about 800 have entered the U.S., and 92 percent of them have been Muslim.</p> <p>Michael Steinbach, the deputy assistant director of the FBI’s counter-terrorism unit, admitted in a February hearing before the House Homeland Security Committee that the FBI is incapable of vetting refugees from Syria. He said there are no reliable records available to the U.S. in a “failed state” like Syria.</p>

	Yet the U.S. State Department, under the authority of the Refugee Act of 1980, continues to admit 70,000 refugees per year into the U.S., roughly half of them from terror-supporting countries like Somalia, Iraq, Afghanistan, Yemen and Syria.

HEADLINE	05/11 Canada busts major heroin trafficking
SOURCE	http://globalnews.ca/news/1992026/28-people-arrested-in-major-heroin-trafficking-operation/
GIST	<p>VANCOUVER – Twenty eight people have been arrested in a major heroin trafficking and importation operation.</p> <p>The investigation began in June, 2013, when members of the RCMP Federal Serious and Organized Crime (FSOC) identified a group of people in the Vancouver area involved in importing heroin. Shipments started in Afghanistan and would travel by air via Africa and then to Canada and Europe.</p> <p>Once shipments reached Canada, the heroin would then be distributed in various cities.</p> <p>Investigators reached out to agencies, including the South African Police Service and the Belgium Federal Police to identify people involved and dismantle the operation.</p> <p>Police say the operation was complex and that transnational organized crime, including heroin trafficking, is a global problem in which geographical boundaries do not exist.</p> <p>Along with the 28 arrests, 37 kilograms of heroin were also seized.</p> <p>The FSOC, the Vancouver Police Department (VPD) and the Canada Border Services Agency (CBSA) were involved in this multi-agency, multi-national investigation.</p>

issues, and moved to the Philippines in May 2011. After moving to Davao City in the Philippines, Eccleston married a local woman, and needed money to stay in his new country of residence.

According to a press release from the FBI, it was the desire to collect funds to stay in the Philippines that led Eccleston to walk into a foreign embassy, report that he was a government employee with top-secret security clearance and offer "to provide classified information, which he claimed had been taken from the U.S. government."

Eccleston first offered a list of over 5,000 email accounts of all officials, engineers, and employees of the NRC in exchange for \$18,800, which he claimed was about the cost of a new Honda Civic. He also said that he could obtain accurate engineering blueprints of U.S. nuclear reactors, but didn't relay an asking price for that information.

HEADLINE	05/11 Ex-CIA officer jailed 3.5yrs for leak
SOURCE	http://www.bbc.com/news/32456102
GIST	<p>Former CIA officer Jeffrey Sterling spoke to a journalist in Washington about the CIA. Now a judge has sentenced him to prison for three and a half years for revealing classified information.</p> <p>Mr Sterling, 47, stood in front of a judge in Alexandria Federal Court in the US state of Virginia.</p> <p>"You have a lot of talent - and an ability to live a law-abiding life," Judge Leonie Brinkem told him. But, she said, the offences he had committed were severe.</p> <p>"There has to be a clear message sent to other people at the agency," she said, explaining that intelligence officers should understand that they, too, will be punished if they disclose classified information. "There's going to be a price that will be paid."</p> <p>After the court adjourned, Mr Sterling turned around. His wife, Holly, sobbed against his shoulder. He reached out his arm stiffly to comfort her, and they walked out of the courtroom together.</p> <p>It's the end of a legal battle for him. It also concludes a trial that's been watched closely by journalists, intelligence officers and others in the US and abroad.</p> <p>In January Mr Sterling was convicted of espionage on charges that he revealed classified information - he spoke to a journalist, James Risen, who writes for the New York Times, about the efforts of US officials to disrupt Iran's nuclear programme.</p>

	<p>Mr Risen wrote about the American plot in a book called State of War, which was published in 2006. He said Americans tried to create misleading guidelines for Iranian scientists that would trip them up as they worked on their nuclear programme.</p> <p>The then-attorney general, Eric Holder, said Mr Sterling's decision to reveal details about the CIA programme to a journalist put people's lives at risk and endangered national security.</p> <p>For these reasons Gabriel Schoenfeld, a senior fellow at Hudson Institute and the author of a book called Necessary Secrets, believes that his sentence is light.</p>

HEADLINE	05/11 Kent impounds car in deadly shooting
SOURCE	http://www.king5.com/story/news/local/kent/2015/05/11/kent-police-impound-suspected-cars-in-fatal-drive-by/27143583/?csp=nbcnews
GIST	<p>KENT, Wash. -- Kent police say they impounded two vehicles suspected in a deadly drive-by shooting that killed an infant on April 16.</p> <p>The 1-year-old, Malijha Grant, died after being shot in the head as she rode in a car with her parents.</p> <p>Police released a description of two vehicles seen fleeing the crime scene - the suspect's vehicle described as a black four-door sedan, and a second car described as a silver 2007 Pontiac Grand Am, license plate 678-ZRL, stolen from the Kent area.</p> <p>Police received numerous tips from the public. Based on that information, investigators identified several leads in the case and impounded two vehicles suspected in the shooting.</p> <p>Police said both vehicles were taken to an undisclosed location for investigation. After inspection, investigators determined that one of the recovered vehicles, a Pontiac Grand Am, was not the second vehicle that was involved.</p> <p>No information was released about the other vehicle impounded.</p> <p>Investigators say they still believe a Pontiac Grand Am with a burned out passenger side brake is still outstanding. Police are still asking for the public's help for assistance in locating the vehicle.</p> <p>Investigators say the killing was related to a series of gang-related shootings between Seattle and Tacoma.</p>

HEADLINE	05/11 Cop killer suspect w/mental problems
SOURCE	http://www.cbsnews.com/news/mississippi-man-accused-in-officer-killings-was-drug-addict-his-mother-says/
GIST	<p>HATTIESBURG, Miss. -- A Mississippi man accused of fatally shooting two police officers has mental problems and is addicted to drugs, appearing high in photos after he was arrested, his mother said Monday.</p> <p>Mary Smith told The Associated Press that her son smoked synthetic marijuana known as "spice" daily and had been hearing voices ever since he was attacked and hit in the head with a pipe several years ago.</p> <p>Smith's son, 29-year-old Marvin Banks, was charged with two counts of murder in the deaths of officers Benjamin Deen and Liquori Tate. The officers were slain Saturday night in what authorities have so far only described as a traffic stop gone awry.</p> <p>A preliminary investigation indicated Deen had pulled over a vehicle for speeding and then called for backup, which is when Tate arrived. Gunshots erupted in the road near the Hattiesburg Housing Authority office. Banks' girlfriend, Joanie Calloway, was also charged with two counts of murder.</p> <p>His younger brother, 26-year-old Curtis Banks, is charged as an accessory to murder and Marvin's friend Cornelius Clark is charged with obstruction. It's not clear what warranted those charges.</p> <p>Warren Strain, a spokesman for the Mississippi Department of Public Safety, said it was too early to say who shot the officers or how many shots were fired, and it wasn't clear what prompted the gunfire.</p>

HEADLINE	05/11 Nun: Boston bomber 'genuinely sorry'
SOURCE	http://abcnews.go.com/US/boston-marathon-bomber-dzhokhar-tsarnaev-genuinely-anti-death/story?id=30955484

GIST	<p>Boston Marathon bomber Dzhokhar Tsarnaev was “genuinely sorry for what he did,” famed anti-death penalty advocate and nun Sister Helen Prejean told a Boston court today.</p> <p>Prejean said she spoke to Tsarnaev in recent days and, after the two had “established trust,” Tsarnaev told her that “no one deserves to suffer like they [the bombing victims] did.”</p> <p>“His face registered it. He kind of lowered his eyes,” Prejean said. “[His voice] had pain in it. I had every reason to think that he was taking it in and he was genuinely sorry for what he did.”</p> <p>Prejean’s description of a remorseful Tsarnaev is at odds with the cold-blooded killer as prosecutors have painted him in court. Tsarnaev has not appeared to show any emotion during either phase of his trial, except when he appeared to tear up at his relatives’ testimony last week, and has never publicly apologized for his role in the attack.</p>

FAIR USE Notice All rights to these copyrighted items are reserved. Articles and graphics have been placed within for educational and discussion purposes only, in compliance with 'Fair Use' criteria established in Section 107 of the Copyright Act of 1976. The principle of 'Fair Use' was established as law by Section 107 of The Copyright Act of 1976. 'Fair Use' legally eliminates the need to obtain permission or pay royalties for the use of previously copyrighted materials if the purposes of display include 'criticism, comment, news reporting, teaching, scholarship, and research.' Section 107 establishes four criteria for determining whether the use of a work in any particular case qualifies as a 'fair use'. A work used does not necessarily have to satisfy all four criteria to qualify as an instance of 'fair use'. Rather, 'fair use' is determined by the overall extent to which the cited work does or does not substantially satisfy the criteria in their totality. If you wish to use copyrighted material for purposes of your own that go beyond 'fair use,' you must obtain permission from the copyright owner. HEADLINE	04/10 Nursing home bills average \$91K/year
SOURCE	http://www.yakimaherald.com/news/latestnational/3070585-8/nursing-home-bills-in-us-now-average-91k
GIST	<p>The steep cost of caring for the elderly continues to climb. The median bill for a private room in a nursing home is now \$91,250 a year, according to an industry survey out Thursday.</p> <p>The annual “Cost of Care” report from Genworth Financial tracks the staggering rise in expenses for long-term care, a growing financial burden for families, governments and insurers like Genworth. The cost of staying in a nursing home has increased 4 percent every year over the last five years, the report says. Last year, the median bill was \$87,600.</p> <p>“Most people don’t realize how expensive this care can be until a parent or family member needs it,” said Joe Caldwell, director of long-term services at the National Council on Aging. “And then it’s a real shock.”</p> <p>The annual report from Genworth, which sells policies to cover long-term care, looks at costs for a variety of services, including adult daycare, and home health aides. And nursing home bills are rising at the fastest pace, twice the rate of U.S. inflation over the last five years. One year in a nursing home now costs nearly as much as three years of tuition at a private college.</p> <p>For its report, Genworth surveyed 15,000 nursing homes, assisted living facilities and other providers across the country in January and February. It found wide differences from state to state. In Oklahoma, for instance, the median cost for a year in a nursing home came out to \$60,225. In Connecticut, it was \$158,775. Alaska had the highest costs by far, with one year at \$281,415.</p> <p>Washington’s median cost for care last year was \$96,933 for a semi-private room and \$105,631 for a private room. In Yakima, the median costs were \$76,285 and \$83,585, respectively.</p> <p>So, who pays the nursing-home bill? “A lot of people believe Medicare will step in and cover them, but that’s just not true,” said Bruce Chernoff, president and CEO of The Scan Foundation, a charitable organization. Medicare will cover some short visits for recovery after a surgery, for instance, but not long-term stays.</p>

	Often enough, experts say senior citizens wind up spending their savings until they hit their last \$2,000, and at that point they can turn to Medicaid, the government's health insurance for the poor, to help cover the bill. As a result, Medicaid pays for more than half of the country's long-term care bill. That cost accounts for more than a quarter of Medicaid spending, according to the Kaiser Family Foundation.

HEADLINE	04/09 Spokane program cleans up graffiti
SOURCE	http://www.krem.com/story/news/local/spokane-county/2015/04/09/spokane-graffiti-website/25512031/
GIST	<p>SPOKANE, Wash. – The beginning of warmer weather poses a new challenge for anyone who is fed up with graffiti.</p> <p>This is normally the time of year in Spokane when tagging cases skyrocket. The City of Spokane has introduced a new website aimed at cleaning it all up.</p> <p>Faced with a staggering increase in tagging cases, 2 On Your Side checked up on a website that allowed people to easily report graffiti.</p> <p>Since July 2014, that website has allowed people to report the exact address of a tagging incident, including sending pictures.</p> <p>Heading into the warm weather season, new numbers suggest the website could finally be making a dent in tagger's plans. Nearly 200 tips have come into the website since July 2014, according to the city.</p> <p>City officials also said nearly 90 percent of overall graffiti cases are uncovered through tips provided to the website. Because those tips are instantaneous, the graffiti is covered up faster. City officials hope that will discourage taggers from breaking the law again.</p> <p>Overall graffiti cases have dropped by 40 percent since 2014, city officials said.</p> <p>The website was set up when graffiti enforcement was transferred from the police department to code enforcement. As a result, Spokane Police are no longer bogged-down with graffiti complaints, giving them more time to investigate more serious issues.</p>

HEADLINE	04/09 Oil spill fouls Vancouver B.C. beaches
SOURCE	http://blog.seattlepi.com/seattlepolitics/2015/04/09/vancouver-b-c-oil-spill-city-not-informed-for-13-hours/#32040101=0
GIST	Residents of Vancouver, B.C., were told on a warm spring Thursday to stay away from popular beaches after a spill of toxic bunker oil or raw crude oil left a kilometer-long slick in the city's scenic English Bay.

The city's government was not notified of the spill for more than 13 hours after it was spotted from a sailboat, reported to a marine spill hot line and then to Canada's Coast Guard.

Port Metro Vancouver was informed, but the autonomous port apparently did not inform the city.

"The lack of notice is profoundly disturbing for many of my constituents: They use the beaches at Kitsilano every morning to run, to go kayaking, to run with dogs and let them in the water," said David Eby, who represents the Vancouver-Point Grey riding (district) in the British Columbia Legislature.

A bulk carrier hauling grain is the suspected cause of the spill. The suspect ship has been boomed off, and the spill is being cleaned up.

The spill, and the 13-hour delay, have come at a highly sensitive time for the oil industry and its great and good friend, the government of Canada's Prime Minister Stephen Harper.

The Canadian government appears inclined to approve a pipeline project, with capacity greater than Keystone XL, that would create an oil export terminal at Burnaby, just east of Vancouver.

HEADLINE	04/10 Video record gap in S.C. shooting
SOURCE	http://www.newsmax.com/US/police-shooting-south-carolina/2015/04/10/id/637657/
GIST	<p>Questions persist about the shooting death of a black South Carolina motorist after the release of dashboard video of a traffic stop that led to a white officer being charged with murder.</p> <p>The dash cam footage released by state police on Thursday showed North Charleston Officer Michael Thomas Slager pulling over motorist Walter Scott for a broken brake light last weekend.</p> <p>Saturday's traffic stop opens routinely as Scott is stopped in a used Mercedes-Benz he had bought days earlier, footage from the patrol car showed. The white officer is seen walking toward the driver's window, requesting Scott's license and registration. Slager then returns to his cruiser.</p> <p>The video also shows Scott beginning to get out of the car, his right hand raised above his head. He then quickly gets back into the car and closes the door. After Slager goes back to his patrol car, minutes later, Scott jumps from his car and runs. Slager chases him.</p> <p>What's missing is what happens from the time the two men run out of the frame of dashboard video to the time picked up in a bystander's cellphone video a few hundred yards away. The cellphone footage starts with Scott getting to his feet and running away, then Slager firing eight shots at the man's back.</p>

	<p>The dashboard camera is in stark contrast to the cellphone footage of the later moments of the encounter. On the dash cam video, Slager never touches his gun during the stop. He also makes no unreasonable demands or threats.</p> <p>"It is possible for something to happen in that gap to significantly raise the officer's perception of risk," Seth Stoughton, a former police officer and criminal law professor at the University of South Carolina.</p> <p>Both Slager, 33, and Scott, 55, were U.S. Coast Guard veterans. Slager had one complaint in his personnel file of excessive force that was ultimately dismissed. Scott had been jailed repeatedly for failing to pay child support. But neither man had a record of violence. Slager consistently earned positive reviews in his five years with the North Charleston Police.</p> <p>Slager's attorney, Andy Savage, said Thursday that he's conducting his own investigation, and that it's "far too early for us to be saying what we think."</p>

HEADLINE	04/09 Short people risk higher heart disease
SOURCE	http://www.usatoday.com/story/news/2015/04/09/short-tall-heart-disease/25510553/
GIST	<p>(NEWSER) – It's tough enough being on the shorter side, and a new study in the New England Journal of Medicine doesn't make things any easier. Researchers in the UK find that being small of stature increases the risk of coronary heart disease, the Telegraph reports.</p> <p>More specifically, for every 2.5 inches shorter we are, our risk increases by 13.5%. In other words, a five-foot tall person has a 32% higher risk of heart disease than a five-foot-six person does. The findings, which involved data on 200,000 people, are tied to genetics; it seems the genes involved in height could also be involved in heart disease. "The more height-increasing genetic variants that you carry, the lower your risk of coronary heart disease—and conversely, if you were genetically shorter, the higher your risk," a researcher notes.</p> <p>That is, at least if you're a man, NPR reports: Researchers didn't discover a clear relationship between height and heart disease risk in women, though that might just be because the study involved more male than female subjects. Experts have been aware of an apparent relationship between height and heart disease since the 1950s without being able to explain it, NPR notes.</p>

HEADLINE	04/10 Calif. gov. sounds alarm on drought
SOURCE	http://www.usatoday.com/story/news/2015/04/09/drought-california-brown/25544867/
GIST	California Gov. Jerry Brown warned Thursday that the drought parching his state will lead to a summer of forest fires and potential water shortages.

In an interview with USA TODAY, Brown called the drought "unprecedented in recorded history" and is evidence of a changing climate.

His comments came a week after Brown called for the state's first mandatory water restrictions. He ordered the cutbacks because of a paltry snowpack in the Sierra, which is one of the state's primary sources of water.

"We're in for tough times," Brown said.

He admitted it might take a while for the enormity of the drought to sink in for many of his state's 38 million residents. "There's been fairly inadequate conservation so far," he said.

He expects Californians to do what's required to deal with the drought. He hopes the drought will bring Californians together, enabling them to understand how to use less water.

"We're trying to use the water in the wisest way possible," Brown said.

More than 44% of California is in "exceptional" drought — the worst level of drought. That's the highest percentage of exceptional drought the state has seen this year. It is the highest percentage of any U.S. state. All of California, except a tiny corner of San Bernardino County, suffers some degree of drought, according to the drought report.

After some rain and snow in Northern California this week, the state is likely to remain warmer and drier than average the next two weeks, according to the Climate Prediction Center.

HEADLINE	04/09 Expert: untreatable tick-borne virus
SOURCE	http://www.foxnews.com/health/2015/04/09/untreatable-tick-borne-virus-found-in-conn/?intcmp=latestnews
GIST	<p>An untreatable, and sometimes fatal tick-borne disease is turning up in parts of southern Connecticut, according to one expert.</p> <p>Dr. Theodore Andreadis, head of The Connecticut Agricultural Experiment Station, told WCBS 880 that the Powassan virus has symptoms similar to those of Lyme disease, including headache, nausea and fever.</p> <p>Once contracted, there is no treatment for the virus, and the disease can often be fatal, Andreadis said. While there have been no reported human cases in the areas, Andreadis said that people who venture into wooded areas may encounter deer carrying ticks.</p>

	“These ticks will transmit this virus when they feed within a matter of hours, whereas with Lyme disease, for example, ticks generally have to feed up to two days before they’re capable of transmitting it,” Andreadis told WCBS 880.

HEADLINE	04/10 Largest aircraft on Earth
SOURCE	http://www.foxnews.com/tech/2015/04/10/meet-largest-aircraft-on-earth/?intcmp=latestnews
GIST	<p>A U.S. Army mega aircraft – a hybrid of plane, helicopter, hovercraft and airship- is going civilian.</p> <p>Designed by British design company Hybrid Air Vehicles for the U.S. military, this massive piece of next-gen tech can travel through the air at nearly 100 miles per hour.</p> <p>At 302 feet, the Airlander 10 is bigger than a Boeing 747 and its new big brother in development will be bigger than a football field. Airlander 10 can carry 10 tons of equipment and the company says these uber-blimbs will be able to circumnavigate the globe twice in one trip without landing.</p> <p>Designed to meet military standards, Airlander works in extreme weather conditions and doesn’t need a prepared landing zone. In fact, it can land on challenging surfaces like water, sand, snow and ice – making it an excellent option for delivering cargo to remote locations in tough conditions.</p> <p>With humans on board, it can stay aloft for about five days, but when it is unmanned it can stay aloft for weeks on end.</p>

HEADLINE	04/09 Panama Hotel is National Treasure
SOURCE	http://www.king5.com/story/news/local/seattle/2015/04/09/seattles-panama-hotel-named-a-national-treasure/25559285/?csp=nbcnews
GIST	<p>SEATTLE -- The country's newest national treasure is right here in Seattle. The National Trust for Historic Preservation on Thursday named the Panama Hotel in Seattle a national treasure.</p> <p>The hotel is described as an amazing cultural resource, and a time capsule from World War II.</p> <p>Japanese Americans, summoned for internment 73 years ago, could only take two suitcases with them. Many left their belongings in the basement of the Panama Hotel, which was built in 1909 or 1910.</p> <p>"It takes your breath away to reflect on what it must've been like at that time for Japanese Americans to leave behind everything they had," said Stephanie Meeks, President of the National Trust for Historic Preservation.</p>

	<p>"It's incredible, I mean I don't think history can get any better than this," said Jan Johnson, who has owned the Panama Hotel for the last 30 years.</p> <p>The Panama Hotel is now the 60th national treasure in the U.S.</p>

HEADLINE	04/10 Robot enters Fukushima nuke reactor
SOURCE	http://www.nbcnews.com/news/world/japans-fukushima-nuclear-plant-reactor-examined-snake-shaped-robot-n339091
GIST	<p>TOKYO — A snake-shaped robot equipped with a camera gave officials the first look inside one of the reactors at Japan's crippled Fukushima Daiichi Nuclear Power Plant on Friday.</p> <p>The plant suffered meltdowns in three of its reactors in March 2011 after a massive earthquake and tsunami hit Japan, killing more than 15,000 people.</p> <p>The crippled reactors are inaccessible to humans because of deadly levels of radiation, so using the two-foot-long robot was the first chance officials were able to examine the damage caused by highly radioactive nuclear-fuel debris.</p> <p>"We believe this will lead us to figuring out how to decommission the reactor," Ryo Shimizu, spokesman for plant operator Tokyo Electric Power Company (TEPCO), told NBC News.</p> <p>The robot, developed by Hitachi and GE Nuclear Energy, was inserted into a maze of pipes leading to Reactor Unit No.1. at 9:25 a.m. (4:25 p.m. ET Thursday), Shimizu said. He later confirmed to NBC News the robot reached its destination around two hours later — though stopped its work 2/3 of the way through. It was not immediately clear what disrupted the robot's efforts.</p> <p>Friday's probe was the first of several planned by officials until the robot's investigation of the reactor finishes next spring. TEPCO is designing a separate robot to examine reactor units 2 and 3.</p>

HEADLINE	04/10 US in high-level talks with Cuba
SOURCE	http://www.nbcnews.com/news/us-news/john-kerry-meets-cuban-foreign-minister-bruno-rodriguez-panama-city-n339041
GIST	<p>PANAMA CITY — The U.S. and Cuban foreign ministers sat down for talks Thursday night in the highest-level meeting between the two sides since the early days of the Cuban revolution more than half a century ago.</p>

	<p>Secretary of State John Kerry met Cuban Foreign Minister Bruno Rodriguez in a Panama City hotel, the latest step toward better ties since President Barack Obama announced a historic shift in Cuba policy on Dec. 17.</p> <p>The two men talked for at least two hours, sitting across from each other in a restaurant-bar in the hotel fronted by large glass windows. The U.S. government said the meeting went well.</p> <p>The encounter took place on the eve of the Summit of the Americas in Panama, where Obama and Cuban President Raul Castro are expected to cross paths along with other leaders in the region. Obama appears to be close to removing Cuba from the list of countries that the U.S. government says sponsor terrorism.</p>

HEADLINE	04/10 Pakistan votes to stay out of Yemen action
SOURCE	http://abcnews.go.com/International/wireStory/pakistani-lawmakers-vote-stay-yemen-conflict-30217417
GIST	<p>Pakistan's parliament on Friday decided not to join the Saudi-led coalition targeting Shiite rebels in Yemen, with lawmakers adopting a resolution that calls on the warring parties in the impoverished Arabian Peninsula country to resolve the conflict through peaceful dialogue.</p> <p>After days of debating, Pakistani lawmakers unanimously voted in favor of a resolution, which states that "the parliament desires that Pakistan should maintain neutrality in the Yemen conflict so as to be able to play a proactive diplomatic role to end the crisis."</p> <p>The predominantly Sunni Pakistan, which has a Shiite minority of its own and shares a long border with Shiite powerhouse Iran, has been concerned about getting involved in Yemen's increasingly sectarian conflict and a Saudi-Iran proxy war in the region.</p> <p>The conflict in Yemen pits the Saudi-led Sunni Gulf Arab coalition against Shiite rival Iran, which supports the rebels known as the Houthis and has provided humanitarian aid, though both Iran and the rebels deny it has armed them.</p> <p>Since the Saudi-led coalition launched the aerial campaign more than two weeks ago, pro-Saudi groups have rallied across Pakistan, urging Islamabad to join the coalition. The rallies, organized by a militant-linked Sunni group and Hafiz Saeed, who heads the Jamaat-ud-Dawa religious group, have condemned the Shiite rebels' advance in Yemen.</p>

HEADLINE	04/10 S.C. policing tactics under scrutiny
SOURCE	http://abcnews.go.com/US/wireStory/black-motorists-fatal-shooting-outcry-police-tactics-30217966
GIST	<p>As North Charleston surged in population last decade, South Carolina's third-largest city fought rising crime through a simple policing solution: be aggressive. But the city's police department lost the respect of many black residents in neighborhoods they blitzed, and now many are upset after the fatal shooting of an unarmed black motorist by a white officer.</p> <p>Police in North Charleston used computers to track the neighborhoods where crime was on the rise, then sent waves of officers to patrol and conduct traffic stops, looking for offenders and letting drivers know they were present and cracking down. By the numbers, the tactics worked: every major category of crime, from murder to burglary to robbery to rape all fell significantly from 2007 to 2012, the last year for which statistics are available for the State Law Enforcement Division.</p> <p>But anger is surfacing as civil rights leaders are demanding a full U.S. Justice Department investigation of the North Charleston force and its crime-fighting approach. The fatal shooting of Walter Scott as he fled after a traffic stop Saturday stirred outrage around the nation, but people in North Charleston familiar with the police department's focus said they weren't surprised.</p> <p>"If the image of the city is more important than the lives of their citizens, there is going to be a problem," said Dot Scott, president of the National Association for the Advancement of Colored People's Charleston branch. She's unrelated to the slain motorist.</p> <p>The U.S. Justice Department is conducting a parallel investigation with a local prosecutor into whether there were civil rights violations in the killing of Walter Scott. The NAACP would like that expanded to a full probe of whether racism and lack of respect for civil rights is pervasive through the entire department — like the federal agency's probe after of another black death at the hands of a law enforcement officer in Ferguson, Missouri.</p>

HEADLINE	04/09 Investigation in deputies beating man
SOURCE	http://www.nbclosangeles.com/news/local/Man-on-Stolen-Horse-Stunned-by-Sheriffs-Deputies-in-IE-299250951.html
GIST	<p>San Bernardino County Sheriff John McMahon ordered an immediate internal investigation Thursday into an arrest by deputies after a horse pursuit caught on camera by NewsChopper4.</p> <p>Deputies appeared to use Tasers to stun a man and then beat him after the pursuit in San Bernardino County Thursday afternoon.</p> <p>Aerial footage showed the man falling off the horse, and then being stunned with a Taser by a sheriff's deputy. The man appeared to fall to the ground with his arms outstretched. Two deputies immediately descended on him and began punching him in the head and kneeling him in the groin.</p> <p>The group surrounding the man grew to 11 sheriff's deputies.</p> <p>In the two minutes after the man was stunned with a Taser, it appeared deputies kicked him 17 times, punched him 37 times and struck him with batons four times. Thirteen blows appeared to be to the head. The allegedly stolen horse stood idly nearby.</p> <p>The man did not appear to move from his position lying on the ground for more than 45 minutes. He did not appear to receive medical attention while deputies stood around him during that time.</p>

HEADLINE	04/09 Ayatollah: White House 'lying'
SOURCE	http://www.weeklystandard.com/blogs/ayatollah-khamenei-accuses-wh-lying-being-deceptive-and-having-devilish-intentions_914336.html
GIST	<p>President Obama has long known that the real decision maker in Iran is Ayatollah Khamenei, the so-called supreme leader. While other Iranian officials have negotiated with Western powers over the mullahs' nuclear program, Khamenei's opinion is the only one that really counts. It is for this reason that Obama began writing directly to Khamenei early in his presidency.</p> <p>Earlier today, Khamenei broke his silence on the supposed "framework" the Obama administration has been trumpeting as the basis for a nuclear accord. Khamenei's speech pulled the rug out from underneath the administration.</p> <p>Khamenei accused the Obama administration of "lying" about the proposed terms, being "deceptive," and having "devilish" intentions, according to multiple published accounts of his speech, as well as posts on his official Twitter feed.</p>

HEADLINE	04/10 Tornadoes cut through Midwest
SOURCE	http://www.cnn.com/2015/04/10/us/severe-weather/index.html
GIST	<p>Multiple tornadoes ripped through the rural Midwest on Thursday. A large and dangerous twister tore across fields in Iowa. And a twister touched down 70 miles outside of St. Louis.</p> <p>Eight tornadoes were reported Wednesday in Oklahoma, Kansas and Missouri, the Storm Prediction Center said.</p> <p>But it appears residents have been fortunate enough to come away from the terrifying weather spectacle alive. Hail stones the size of tennis balls plummeted down on Ashton, Illinois.</p> <p>It could have been worse as severe tornado damage dotted a path not far from the dense populations of Chicago and Rockford -- the state's third largest city. The tornado cut a 22-mile path through Ogle County, according to disaster management coordinator Tom Richter.</p>

HEADLINE	04/09 Excessive force? 3 cases in spotlight
SOURCE	http://www.cnn.com/2015/04/09/us/police-use-of-force-cases/index.html
GIST	<p>A man dies in police custody after a dog allegedly mauls him. A mentally ill man is shot dead after his family calls police asking for help. An officer shoots into a vehicle after a car chase, killing a man originally suspected of drunk driving.</p> <p>As debate once again surges about whether police are using excessive force -- and whether race plays a role in how much force they use -- three recent cases from around the country are in the spotlight.</p> <p>Details are still emerging about the incidents. In all three cases, which resulted in the deaths of African-American men, representatives of the officers involved have said they were physically threatened and acted appropriately.</p> <p>Here's a look at what we know:</p> <p>Mauled by police dog? Prosecutors in Cumberland County, New Jersey, said they're investigating the death of a 32-year-old man who was in police custody.</p> <p>Police said officers unleashed a K9 on 32-year-old Phillip White when a violent struggle ensued after they were dispatched March 31 to a report of a "disorderly person." It wasn't long before officers called for medical assistance, according to prosecutors, reporting that White was in respiratory distress. He was pronounced dead at the hospital soon afterward.</p>

"It's a tragedy that's blatantly preventable," said Conrad Benedetto, an attorney representing White's family.

[A Facebook page](#) demanding justice in the case points to cell phone videos of the incident and accuses police of deliberately allowing the dog to maul White to death.

Mom in dash cam video: 'Please don't hurt my child'

Lavall Hall, a 25-year-old who family members say was a paranoid schizophrenic, died after police shot him in February. Family members had called police for help tracking down Hall after he left his mother's house. Now they've filed a civil rights lawsuit against the city of Miami Gardens, its former police chief and the two officers involved in the shooting.

The family's lawyer said video of the shooting makes it clear police went too far.

Shooting into vehicle after police chase

On the same day authorities said [a police officer was being charged with murder after a shooting in North Charleston, South Carolina](#), another officer was arrested 150 miles away in the town of North Augusta. Public Safety Officer Justin Gregory Craven is charged with discharging a firearm into a vehicle while occupied.

The case stems from the February 2014 shooting death of 68-year-old Ernest Satterwhite, who was shot dead while sitting in a car in his driveway after a police chase. Police had tried to pull Satterwhite over on suspicion of driving under the influence, [the Edgefield Daily reported at the time](#), citing police incident reports. Craven shot into the vehicle after reporting that Satterwhite had grabbed his gun during a confrontation. Satterwhite was pronounced dead at a nearby hospital.

In a lawsuit, Satterwhite's family "vehemently denies" that he ever tried to grab the officer's weapon, [according to The Washington Post](#). A grand jury indicted Craven on a misdemeanor charge of "misconduct in office" earlier this year -- a lesser charge than the manslaughter charge prosecutors had been seeking, the Post reported.

On Monday, the South Carolina Law Enforcement Division announced Craven will now face the felony firearm charge, which carries a maximum penalty of up to 10 years in prison and a \$1,000 fine.

HEADLINE	04/09 Female unemployment worsens
SOURCE	http://www.breitbart.com/big-government/2015/04/09/female-unemployment-worse-under-president-obama/

GIST	<p>The official female unemployment rate is 4.9 percent, according to data released earlier this month by the Bureau of Labor Statistics. At a similar point in his presidency, the rate under President George W. Bush was 4.5 percent.</p> <p>Breitbart News earlier reported that the number of women leaving the workforce is at an all time high. And according to CNS News, the labor force participation for the past month was 56.6 percent, a 27-year low.</p> <p>However, the female unemployment rate is slightly better than the male unemployment rate, which sits around 5.1 percent.</p> <p>James Sherk, an expert in labor economics at the Heritage Foundation, said the difference between the male and female unemployment rate is the type of occupation.</p> <p>“Men are much more likely to work in construction and manufacturing jobs than women,” said Sherk. He said during the economic downturn, about half the job losses came from the construction and manufacturing sectors.</p> <p>He added that usually government employment is not affected by an economic recession as much as other sectors, which gives females a slight advantage since usually more females work as teachers and government employees.</p>

HEADLINE	04/09 Pot farming worsening Calif. drought
SOURCE	http://www.newsmax.com/US/California-drought-marijuana-cultivation/2015/04/09/id/637459/
GIST	<p>Opposition to the legalization of marijuana has focused on the potentially detrimental impact the drug may have on adolescent development, as well as its contribution to rising crime rates, but a new study examines how pot cultivation has worsened California's current drought.</p> <p>The study authored by scientists from the California Department of Fish and Wildlife concludes that the demand for water to cultivate cannabis in northern California has worsened the local effects of the state's historic drought.</p> <p>"The environmental impacts associated with marijuana cultivation appear substantial, yet have been difficult to quantify, in part because cultivation is clandestine and often occurs on private property," says the study, which was published in the scientific journal PLOS One.</p> <p>The scientists further concluded that "water demands for the existing level of marijuana cultivation in many northern California watersheds are unsustainable and are likely contributing to the decline of sensitive aquatic species in the region" and that "marijuana cultivation may be completely de-watering streams, and for the larger fish-bearing streams downslope, the flow diversions are substantial."</p> <p>The authors acknowledge their analysis is limited in part because marijuana remains illegal for recreational use and is therefore unregulated and growers often cultivate pot under the radar.</p>

HEADLINE	04/08 Report: 39K illegal minors to US
SOURCE	http://www.newsday.com/news/nation/report-more-unaccompanied-minors-on-the-way-into-u-s-1.10218313
GIST	<p>About 39,000 immigrant children are expected to enter the country illegally as unaccompanied minors this federal fiscal year, reaching the second-highest level of that migration since 2008, says an analysis issued Wednesday by a research group in Washington, D.C.</p>

	<p>The estimate by the Migration Policy Institute, a nonprofit that studies the movement of people across international borders, is based on apprehension figures issued by U.S. Customs and Border Protection for the first five months of the fiscal year that began Oct. 1, 2014, and ends Sept. 30.</p> <p>Many of the children coming from El Salvador, Honduras and Guatemala likely will be resettled where there are established Central American communities, such as Long Island's Nassau and Suffolk counties, said Marc Rosenblum, the report's author.</p> <p>"They are coming from similar communities and are headed to similar communities," said Rosenblum, deputy director of the institute's U.S. Immigration Policy Program. "The local impact is that whatever challenges school districts and local health care systems are under already are likely to increase."</p> <p>The second wave of immigrants, as some are calling it, is expected even as localities and school systems struggle to absorb about 53,500 children who arrived in the last fiscal year, which ended Sept. 30, 2014.</p> <p>Those minors continue to move through a multistep immigration court process to decide whether they can stay or are to be deported.</p> <p>More than 3,000 of those minors moved in with relatives or sponsors on Long Island, making the region one of the top places in the nation to receive the children.</p>

SOURCE	http://freebeacon.com/national-security/iran-new-nuke-deal-is-not-acceptable/
GIST	<p>Iran has described an agreement to curb its nuclear program as “not acceptable” days after the United States hailed the new framework deal.</p> <p>Following the announcement of a framework accord that the United States described as a major step in rolling back Iran’s nuclear work, leaders in Tehran began to accuse the Obama administration of lying about the deal’s parameters.</p> <p>The disagreement revolves around a White House fact sheet that outlined concessions Tehran agreed to after negotiations in Lausanne, Switzerland, last week.</p> <p>On Wednesday, Iran rejected most of the concessions it reportedly agreed to undertake.</p> <p>Top Iranian leaders are describing the framework as a “lie” and announced that international nuclear inspectors will not be permitted to enter any of its contested military sites.</p>

	<p>Iran also maintains that all of the Islamic Republic's controversial nuclear work will continue under any deal—a claim that runs counter to White House claims.</p> <p>“The U.S. fact sheet is a U.S. version and not acceptable to Iran,” Iranian Foreign Ministry spokeswoman Marziyeh Afkham said in a Persian-language interview with the country's state-controlled media, translated by the CIA's Open Source Center.</p>

HEADLINE	04/09 White House takes swipe at Netanyahu
SOURCE	http://www.foxnews.com/politics/2015/04/09/white-house-takes-shot-at-netanyahu-on-twitter/
GIST	<p>The White House took an apparent swipe at Benjamin Netanyahu on Twitter Wednesday, posting a diagram similar to one used by the Israeli prime minister -- only this time, using it to defend the Iran nuclear deal.</p> <p>The White House tweet included a cartoonish sketch of a bomb. On the left side were the supposed consequences of not striking a deal, including resumed production of highly enriched uranium and no limits on that stockpile. On the right side were the supposed benefits of a deal, including "no production or stockpile of highly enriched uranium."</p> <p>The sketch appeared to be almost identical to the one held up by Netanyahu during a 2012 United Nations speech. In that address, he warned of the consequences of a nuclear-armed Iran and urged the world to prevent that outcome -- holding up the bomb diagram and, dramatically, drawing a red line near the top.</p> <p>The White House diagram includes the same red line and reads, “Under the framework for an Iran nuclear deal, Iran's uranium enrichment pathway to a weapon will be shut down.”</p> <p>In the tweet, the fuse of the bomb is being cut with scissors.</p> <p>Though the message makes no mention of Israel, it's an unmistakable reference to the prime minister's address and just the latest episode in rising tensions between the Obama and Netanyahu administrations over the nuclear talks.</p>

HEADLINE	04/09 Lawsuit: 911 calls went unanswered
SOURCE	http://www.nbcdfw.com/news/local/Paralyzed-Woman-Claims-Dallas-911-Failure-Left-Her-That-Way-299126791.html
GIST	<p>A woman who was paralyzed in a shooting allegedly committed by her ex-boyfriend claims in a new lawsuit that Dallas police failed to respond to repeated calls for help and kicked her as she lay wounded because they did not believe she was unable to move.</p>

Roxanna Mayo is seeking more than \$1 million in damages following the Jan. 19 shooting, which has left her paralyzed from the neck down, except for one arm. She said her then-boyfriend of about six months, Quadriq Anthony Sharper, was drunk and threatening her and her children on the day of the attack. So she, her mother and her daughter called 911 for help repeatedly at about 4:30 p.m. The lawsuit claims that police didn't respond until more than an hour later, after a neighbor reported the shooting.

"If they'd have come out the first five times we called I wouldn't be paralyzed," Mayo said in an interview. "And my whole family wouldn't be destroyed and none of this would have happened."

Once they did respond, Mayo's lawsuit says, Dallas officers kicked her as she lay wounded because they did not believe she was paralyzed.

"They said, 'If you're paralyzed, do you feel this?' And they were kicking me in the front and the back," Mayo said.

HEADLINE	04/09 NHTSA: wash underside of car
SOURCE	http://www.nbcnews.com/business/autos/uncle-sam-wants-you-wash-your-car-n338406
GIST	<p>If you live where salt is used to clear the roads of snow and ice, U.S. safety regulators have a message for you: Wash the underside of your car.</p> <p>The message came Wednesday from the National Highway Traffic Safety Administration, which closed a five-year investigation into rusting pipes that carry brake fluid in about 5 million older Chevrolet, Cadillac and GMC pickups and SUVs, without seeking a recall.</p> <p>Instead, the agency blamed the problem on rust caused by road salt and a lack of washing. It determined that it was not the result of a manufacturing or design defect.</p> <p>The agency urged people in 20 cold-weather states and Washington, D.C., to get their car and truck undercarriages washed several times during and after the winter, and to get their brake lines inspected for rust and replace them if necessary. The warning underscores the importance of washing highly corrosive salt from beneath a car because over time, it can cause suspension parts, the frame, or other components to corrode and fail.</p>

HEADLINE	04/09 US warns Iran on Yemen rebels
SOURCE	http://news.yahoo.com/us-not-stand-iran-backs-yemen-rebels-kerry-074532494.html

GIST	<p>Aden (AFP) - Washington warned Thursday it would not "stand by" while Iran supports rebels in Yemen, where a Saudi-led coalition pounded anti-government forces at the start of a third week of bombings.</p> <p>In the most direct US criticism yet of Tehran's backing of the Shiite Huthi rebels, Secretary of State John Kerry said Washington would not accept foreign interference in Yemen.</p> <p>"There have been -- there are, obviously -- flights coming from Iran. Every single week there are flights from Iran and we've traced it and know this," Kerry told PBS television in an interview.</p> <p>"Iran needs to recognise that the United States is not going to stand by while the region is destabilised or while people engage in overt warfare across lines, international boundaries in other countries."</p> <p>The United States has backed the Saudi-led campaign, which launched air strikes last month as the rebels advanced on Yemen's main southern city of Aden after seizing the capital Sanaa.</p>

HEADLINE	04/09 US, Russia rekindle Cold War tension
SOURCE	http://news.yahoo.com/us-russian-war-games-rekindle-cold-war-tensions-130126127.html
GIST	<p>AMARI AIR BASE, Estonia (AP) — Russia is so close that the F-16 fighter pilots can see it on the horizon as they swoop down over a training range in Estonia in the biggest ever show of U.S. air power in the Baltic countries.</p> <p>The four-week drill is part of a string of non-stop exercises by U.S. land, sea and air forces in Europe — from Estonia in the north to Bulgaria in the south — scaled up since last year to reassure nervous NATO allies after Russia's military intervention in Ukraine. U.S. and Russian forces are now essentially back in a Cold War-style standoff, flexing their muscles along NATO's eastern flank.</p> <p>The saber-rattling raises the specter that either side could misinterpret a move by the other, triggering a conflict between two powers with major nuclear arsenals despite a sharp reduction from the Cold War era.</p> <p>"A dangerous game of military brinkmanship is now being played in Europe," said Ian Kearns, director of the European Leadership Network, a London-based think-tank. "If one commander or one pilot makes a mistake or a bad decision in this situation, we may have casualties and a high-stakes cycle of escalation that is difficult to stop."</p> <p>With memories of five decades of Soviet occupation still fresh, many in the Baltic countries find the presence of U.S. forces a comfort rather than a risk.</p> <p>In recent months, Estonia, Latvia and Lithuania have seen hundreds of U.S. armored vehicles, tanks and helicopters arrive on their soil. With a combined population of just over 6 million, tiny armies and no combat aircraft or vehicles, the last time tanks rumbled through their streets was just over 20 years ago, when remnants of the Soviet army pulled out of the region.</p> <p>The commander of Estonia's tiny air force, Col. Jaak Tarien, described the roar of American F-16s taking off from Amari — a former Soviet air base — as "the sound of freedom."</p> <p>In Moscow the U.S. Air Force drills just 60 miles (100 kilometers) from the Russian border are seen in a different light.</p> <p>"It takes F-16 fighters just a few minutes to reach St. Petersburg," Foreign Ministry spokesman Alexander Lukashevich said, referring to the major Russian port city on the Baltic Sea. He expressed concern that the ongoing exercise could herald plans to "permanently deploy strike aircraft capable of carrying nuclear weapons at the Russian border."</p> <p>Moscow also says the U.S. decision to deploy armored vehicles in Eastern Europe violates an earlier agreement between Russia and NATO.</p>

HEADLINE	04/09 Police cameras bring own set problems
SOURCE	http://www.wsj.com/articles/police-cameras-bring-problems-of-their-own-1428612804
GIST	<p>As more police agencies equip officers with body cameras in response to public pressure, authorities are discovering they create problems of their own: how to analyze, process and store the mountains of video each camera generates.</p> <p>Prosecutors in northern Colorado recently spent hours poring over a dozen videos captured by police wearing cameras. The case? An arrest for drunk and disorderly conduct.</p> <p>Clifford Riedel, Larimer County’s district attorney, said his office has been overwhelmed with footage from the 60 body cameras the Fort Collins Police Department uses, and will need to hire an additional technician to sort through it all. “There are just huge amounts of data being generated from cameras,” said Mr. Riedel. “It used to be that video on a case was the exception. Now it’s the rule.”</p> <p>The movement gained new intensity after the police shooting last week of a fleeing man in South Carolina. While many experts inside and outside of law enforcement agree that body cameras—clipped to officers’ uniforms or glasses—help increase police transparency and may even improve police behavior, police</p>

departments and prosecutors are struggling with how to sift through, preserve and share the visual evidence.

On top of that, agencies need policies and personnel to respond to requests from journalists and the public to release video under freedom-of-information requests.

“The vast majority of places are still trying to figure this out,” said Michael White, a professor of criminology at Arizona State University who wrote a Justice Department report on body cameras.

Dr. White estimates that between 4,000 and 6,000 U.S. police departments, out of about 18,000 nationally, use body cameras. Officers generally turn them on when stopping a driver or responding to an incident.

Some departments use body cameras in addition to dashboard ones that have become common at many agencies, but result in less-useful footage because much police action takes place away from their vehicles. Body cameras—which cost hundreds of dollars each—typically result in much more video for departments to handle.

The push to require body cameras intensified nationally after last August’s shooting of Michael Brown, a black 18-year-old, by a white police officer in Ferguson, Mo. This week, after a bystander’s cellphone video surfaced showing a white South Carolina policeman fatally shooting an unarmed black man in his back, several prominent state lawmakers voice support for a bill to require all officers to wear cameras.

But the cost has given some officials pause, said Lindsay Miller, senior research associate at the Police Executive Research Forum and co-author of a Justice Department report on the topic. “The cameras themselves aren’t overly expensive, but the years and years of data storage you’re going to deal with—that can definitely be cost-prohibitive,” said Ms. Miller.

Many departments keep inconsequential video for 30 to 60 days. But if the footage is evidence in a criminal case, it must be kept longer; most states require that video in a homicide case be kept indefinitely, she said. Ms. Miller said an emerging consensus is that the benefits outweigh the costs. In limited studies, the cameras have shown promise in reducing use of force by police and citizen complaints—and that can save money spent investigating complaints and settling lawsuits, she said.

In Oakland, Calif., the police department deploys 560 body cameras, enough for nearly every officer on duty, said Sean Whent, the chief of police. Their use results in about five to six terabytes of data every month—equivalent to about 1,250 to 1,500 high-definition movie downloads—said Mr. Whent. That data is stored on a department server for two years at a minimum—or longer if it is needed in a criminal or disciplinary case, he said.

In the future, Mr. Whent said he anticipates either using a cloud-storage service or reducing the retention period because of the sheer size of the data.

In Berkeley, Calif., officials are weighing whether to outfit officers with cameras. Police estimate it could cost up to \$135,000 to buy 150 cameras at \$900 a pop. But it could cost an additional \$45,000 a year for a limited data-storage plan priced at \$25 a month per camera—and officials have raised the possibility of also hiring new employees to sift through all the video.

The cameras “will create an enormous amount of data. Who gets access to it? How does it get stored?” said Laurie Capitelli, a Berkeley City Council member. “What appeared to be a no-brainer in terms of bringing accountability to the force has raised a lot ancillary questions.”

HEADLINE	04/09 States of emergency just formalities
SOURCE	http://www.usatoday.com/story/news/politics/2015/04/09/pro-forma-states-of-national-emergency/25479553/
GIST	<p>WASHINGTON — President Obama has declared or renewed 32 different states of national emergency during his presidency, allowing him to use extraordinary power to impose sanctions, freeze assets or blockade other nations.</p> <p>Those emergency declarations come with ominous-sounding warnings that foreign governments, terrorist groups or criminal organizations pose an "unusual and extraordinary threat to the national security" of the United States.</p> <p>But there's no need to be alarmed, White House officials said this week. Those dire warnings are really just formalities.</p> <p>The wording of presidential emergency declarations has become an international issue as President Obama visits Jamaica and Panama this week to meet with Caribbean and South American leaders. The "extraordinary threat" language has become so routine that it usually goes unnoticed — until it backfired on the Obama administration with Venezuelan sanctions.</p> <p>Venezuelan President Nicolás Maduro denounced the state of emergency Obama declared against his country last month, saying it was an imperialist attempt to interfere in Venezuelan affairs. Maduro seized emergency powers of his own, clamped down on opposition parties and won a resolution from the Union of South American Nations condemning Obama's order as an "interventionist threat to the sovereignty" of Venezuela.</p> <p>But that wasn't the intent, Deputy National Security Adviser Ben Rhodes said this week.</p> <p>"This is a language that we use in executive orders around the world," Rhodes said. "So the United States does not believe that Venezuela poses some threat to our national security. We, frankly, just have a framework for how we formalize these executive orders."</p>

The language is necessary because a president needs to declare a state of emergency in order to impose sanctions or block the assets of foreign governments or officials under the International Emergency Economic Powers Act. And to declare an emergency, the president must find that there's an "extraordinary threat" to national security.

"This is how we describe the process of naming sanctions, and there are 20 to 30 other sanctions programs we have," Jen Psaki, then the State Department spokeswoman, explained to reporters last month. "I understand people look at the context of what's happening on the ground, but it's consistent with how we announce and how we describe putting sanctions and putting these executive orders in place."

Presidential scholars say the use of one-size-fits-all emergency declarations is an abuse of the emergency powers Congress gives the president.

HEADLINE	04/09 ACLU: FBI hiding surveillance
SOURCE	http://www.thenewstribune.com/2015/04/09/3732704_fbi-agreement-requires-police.html?rh=1
GIST	<p>Police agreements with the Federal Bureau of Investigation ask officers to hide the capabilities of high-tech surveillance equipment from the courts and the public, according to records obtained by the ACLU.</p> <p>Unknown is whether the Tacoma Police Department's agreement with the feds to operate its cellphone-tracking device has such a provision. But even if it does, police officials say their officers now tell judges when using their device, called a cell site simulator or Stingray.</p> <p>This week's release of an unredacted copy of the nondisclosure agreement the FBI makes police agencies sign before acquiring such technology came after a court ordered the Erie County Sheriff's Office to turn over documents to the New York Civil Liberties Union.</p> <p>One section of the agreement requires police to keep the use of the device secret, even if judges or defense attorneys ask for more information.</p> <p>Police in Tacoma and elsewhere have used the device for years. It tricks cellphones into connecting with what appears to be a cell tower. Using the device, police can more accurately pinpoint the location of a suspect by the cellphone he or she carries. The device can also draw in data from all cellphones in an area, though Tacoma Police have said they don't use it that way.</p> <p>The Tacoma Police Department's nondisclosure agreement with the FBI was provided to The News Tribune last year, but it was heavily redacted. In a response to an identical records request to the FBI, the agency would not confirm nor deny the existence of a nondisclosure agreement with Tacoma.</p>

	<p>After The News Tribune reported last year that Tacoma police possessed a Stingray, Pierce County Superior Court judges demanded police to specific in court orders when they intended to use the technology. They also made police promise to not keep data collected on non-suspects.</p> <p>Tacoma Assistant Police Chief Kathy McAlpine said via email Thursday that the judges' wishes are being honored: "Cell site simulator is in all of our requests for court orders."</p> <p>The department has asked for eight court orders since the beginning of the year, all for TPD suspects, she wrote.</p>

HEADLINE	04/09 Gov. denies Pasco special prosecutor
SOURCE	http://www.komonews.com/news/local/Gov-denies-2nd-request-for-special-prosecutor-in-Pasco-cop-shooting-299242291.html
GIST	<p>SPOKANE, Wash. (AP) - Gov. Jay Inslee has denied a second request to appoint a special prosecutor in the case of a Mexican man shot and killed by three Pasco police officers. This request came from the attorney for the victim's estranged wife and daughters.</p> <p>Nicholas Brown, an attorney for the governor, this week sent a letter to Yakima attorney George P. Trejo Jr. denying the request.</p> <p>The letter said nothing had changed since the governor told the Hispanic advocacy group Consejo Latino last month that he wouldn't appoint a prosecutor in the Feb. 10 shooting of Antonio Zambrano-Montes, 35.</p> <p>The shooting of the unarmed Mexican national sparked a series of protests in Pasco, an agricultural city of 68,000 that is majority Hispanic. More demonstrations are planned this weekend.</p> <p>"We look forward to reviewing all the facts of the incident before any further decisions are made," Brown wrote.</p> <p>Trejo was highly critical of the decision, which he contrasted to Saturday's shooting of Walter Scott in South Carolina, where the officer accused of killing Scott was immediately fired and charged with murder.</p> <p>"It is even more disgusting when one compares the cold blooded killing of Mr. Zambrano with that of the defenseless man in South Carolina," Trejo wrote in an email. "There, prosecutors did not hesitate to charge the officer. Here in the State of Washington everyone wants to look the other way."</p>

HEADLINE	04/09 UW: 'warm blob' over Pacific Ocean
-----------------	---

SOURCE	http://www.komonews.com/weather/blogs/scott/UW-Warm-blob-in-Pacific-Ocean-linked-to-weird-weather-across-the-US-299240311.html
GIST	<p>As Seattle sits on a streak of four of the past six month setting records for warmest on record, a new University of Washington study pins the "blame" (or "credit" depending on your opinion of endless 50+ degree days in winter) on a large and persistent pool of warm water that has been entrenched in the Pacific Ocean off our coast.</p> <p>The waters have been averaging about 3-7 degrees above normal and researchers at the UW say it's been a major factor in the West Coast's recent warm stretches, and in turn, the winter to remember (or forget) across the East Coast.</p> <p>"In the fall of 2013 and early 2014 we started to notice a big, almost circular mass of water that just didn't cool off as much as it usually did, so by spring of 2014 it was warmer than we had ever seen it for that time of year," said Nick Bond, a climate scientist at the UW-based Joint Institute for the Study of the Atmosphere and Ocean, a joint research center of the UW and NOAA.</p> <p>Bond, who coined the term "the blob" for the warm patch, says the warm water "blob" began at about 1,000 miles in diameter and 300 feet deep and was a major cause for our mild winter in 2013-14. And now the "blob" has squished up against the West coast and is still about 3-4 degrees above normal. Forecast models suggest the blob will last through the year, according to the research papers.</p>

HEADLINE	04/09 Storm to hit passes with late snow
SOURCE	http://www.komonews.com/news/local/Winter-lm-baaaack-Storm-to-smack-passes-with-late-season-snow-299218081.html
GIST	<p>SEATTLE -- Just when we thought it was safe to think spring had a solid foothold on the weather, considering it feels like it's been in charge since, oh, December, along comes a storm that's reminiscent of winters past.</p> <p>A potent storm is set to bring heavy snow to the mountains and some drenching rains and hail to the lowlands. But while the mountains could desperately use the late-season snow, those of you with mountain pass travel plans who have long figured the days of worrying about snowy roads were over need to get your winter driving plans in order.</p> <p>Rain will begin to arrive on the coast around early afternoon Friday, spreading inland to the Puget Sound area by Friday evening and into the mountains shortly thereafter. Snow levels will only be around 2,000-2,500 feet, meaning a lot of snow is coming to the mountains.</p> <p>Forecasts call for about 6-11 inches in the mountains and around Stevens Pass, with about 3-5 inches in Snoqualmie Pass Friday night into Saturday morning. However, a Convergence Zone may enhance</p>

snowfall around either or both passes if one sets up and parks overhead. Some locations could get a foot of snow if the zone sets up and stalls.

In the lowlands, it'll be a very rainy Friday evening and early night, with rain tapering to showers in the hours after midnight but lingering through Saturday. As cold, unstable air streams after the storm, some of those showers will be heavy and could contain lightning and hail. A few of those showers, especially in the Convergence Zone, could see accumulating small hail much like we saw on March 31 in the North Seattle area.

HEADLINE	04/09 FBI to remedy police shooting data
SOURCE	http://www.newsmax.com/US/FBI-James-Comey-police-shootings-data/2015/04/09/id/637559/
GIST	<p>The police shooting that took place in North Charleston, South Carolina has highlighted once again the issue of police use-of-force policies as well as the limited amount of data available on such situations.</p> <p>However, The Los Angeles Times is reporting that the Federal Bureau of Investigation has a plan to correct that problem.</p> <p>FBI Director James Comey recently lamented this fact in a speech at Georgetown University in February following the deaths of black teenager Michael Brown and Staten Island man Eric Garner, when he asked for such information.</p> <p>"I wanted to see trends. I wanted to see information," Comey said. "They couldn't give it to me, and it wasn't their fault. Demographic data regarding officer-involved shootings is not consistently reported to us ... because reporting is voluntary, our data is incomplete and therefore, in the aggregate, unreliable."</p> <p>Comey said that he wants to see this change.</p> <p>"I intend for the FBI to be a leader in urging departments around this country to give us the facts we need for an informed discussion, the facts all of us need to help us make sound policy and sound decisions," he said.</p> <p>To accomplish that goal, the FBI is going to expand the National Incident Based Reporting System, which includes more detailed information and is already in use at about one-third of local law enforcement departments across the country.</p> <p>Steven Fischer, spokesman for the FBI's Criminal Justice Information Services, told the Times that "it's much richer data."</p> <p>He explained that the FBI is getting police departments on board by telling them that "it helps them with</p>

	transparency and accountability."
	Fischer also said that there will be a vote by the FBI board sometime this year to decide if the agency will collect data on all shootings involving a police officer, even if they aren't fatal.

HEADLINE	04/09 Police gun-grabbing sweeping nation
SOURCE	http://www.foxnews.com/politics/2015/04/09/right-to-bear-arms-gun-grabbing-sweeping-nation/
GIST	<p>Cherished family heirlooms were among the 21 firearms Michael Roberts surrendered to the Torrance Police Department in 2010, after his doctor filed a restraining order against him.</p> <p>The court order was the result of a dispute Roberts had with a member of the doctor's staff and, after Roberts pleaded no contest, the matter was resolved. Yet, even though he filed the proper Law Enforcement Gun Release paperwork on four separate occasions, obtained clearance from the California Department of Justice and had two court orders commanding the return of his guns, police refused to hand them over.</p> <p>With the backing of the National Rifle Association and California Rifle and Pistol Association, Roberts filed a federal lawsuit in May 2014, over the \$15,500 worth of firearms. In the end he got the money, but not the guns. The police had had them destroyed.</p> <p>Second Amendment lawyers say his case is not rare.</p> <p>"NRA and CRPA constantly get calls from law abiding people having problems getting their guns back," said Chuck Michel of Long Beach based Michel & Associates, who represented Roberts in the case. "The state Department of Justice wrongly tells police not to give guns back unless the person can document ownership of the gun and it is registered in the state DOJ's database. But the law doesn't require this."</p> <p>Gun owners can't comply anyway, Michel said, because police themselves routinely fail to enter the firearms into the DOJ's database, and most people don't have receipts for the guns they own.</p> <p>"This kind of below-the-radar bureaucratic gun confiscation is a growing Second Amendment and property rights violation problem, particularly in strict gun control states like California, New Jersey and Massachusetts," said Alan Gottlieb, founder of the Second Amendment Foundation. "People can't afford to spend tens of thousands of dollars on legal fees to get back a \$500 firearm."</p> <p>These tactics are a way for police departments or the government to make it more costly to own guns, said John Lott, an economist, leading expert on guns, and author at the Crime Prevention Research Center. Lott believes the illegal policies most hurt poor gun owners, who not only are less likely to afford to get their property back, but also typically live in neighborhoods where they are more vulnerable to crime.</p>

	Seizing legally owned guns can also be a way for law enforcement agencies to boost their revenue if, as in some cases, they sell the firearms rather than destroying them, Lott said.

HEADLINE	04/09 Pain of \$12.25hr minimum wage
SOURCE	http://www.cbsnews.com/news/feeling-the-pain-of-a-12-25-minimum-wage/
GIST	<p>With cities such as Seattle phasing in higher minimum wages, one city has already had a taste of a \$12.25 hour baseline rate, and the experience hasn't been all that painless.</p> <p>After voter approval, Oakland, California, a neighbor to San Francisco, boosted its minimum wage by more than one-third to \$12.25 an hour on March 1.</p> <p>The experiences haven't been entirely positive as more than one-quarter of respondents said they're somewhat or very likely to shut down as a response to the new wage law. Almost half of businesses have increased prices to cope, while another one-third said they've reduced employee hours or their hours of operation to meet the higher costs.</p> <p>The study could serve as a barometer for other cities that are considering boosting the minimum wage, the EPI said.</p> <p>To be sure, 70 percent of businesses that responded were small employers with fewer than 15 employees, and those smaller businesses may be less capable of absorbing higher labor costs than larger corporations.</p> <p>Some Oakland restaurants have boosted prices by as much as 20 percent as a result, The San Francisco Chronicle reported last month. Others have added a mandatory service charge to help cover the higher costs. That's causing some restaurant owners to worry that they'll lose customers to competing restaurants in other towns.</p>

HEADLINE	04/09 Contagious cancer killing clams
SOURCE	http://www.cbsnews.com/news/contagious-cancer-killing-east-coast-clams/
GIST	<p>A lethal marine cancer killing clams along North America's East Coast is contagious, new research indicates.</p> <p>Scientists say they've traced leukemia outbreaks among soft-shell clams from New York to Canada back to one case of cancer, which was transmitted to other clams.</p>

"The evidence indicates that the tumor cells themselves are contagious -- that the cells can spread from one animal to another in the ocean," said researcher Stephen Goff of the Howard Hughes Medical Institute and Columbia University in New York City.

"We know this must be true because the genotypes of the tumor cells do not match those of the host animals that acquire the disease, but instead all derive from a single lineage of tumor cells," Goff explained.

The findings, published April 9 in *Cell*, suggest that cells can survive in seawater long enough to reach and infect a new host. The researchers said it remains unclear if this soft-shell cancer can affect other mollusks, such as snails and mussels.

The leukemia outbreaks have devastated some populations of soft-shell clams for decades, according to background notes with the study.

Just two other contagious cancers are known to exist in the wild: the canine-transmissible venereal tumor, which is spread by sexual contact; and the Tasmanian devil facial tumor disease, which is spread through biting, the study authors pointed out.

HEADLINE	04/09 S.C. shooting witness speaks out
SOURCE	http://www.cnn.com/2015/04/09/us/south-carolina-witness-video/index.html
GIST	<p>Feidin Santana, the man who recorded a South Carolina police officer fatally shooting a fleeing unarmed man, says fear for his own life almost kept him from revealing the tape.</p> <p>In interviews with MSNBC and NBC, Santana recalled the moments when he recorded video of North Charleston police Officer Michael Slager shooting Walter Scott as Scott was running away Saturday -- evidence that led to the officer's firing and arrest.</p> <p>The video, Santana said, almost never came to light.</p> <p>"I ... thought about erasing the video," Santana told MSNBC's "All in With Chris Hayes" in an interview that aired Wednesday evening. "I felt that my life, with this information, might be in danger."</p> <p>"I know the cop didn't do ... the right thing. And like I say, I feel kind of scared about that," he added.</p> <p>The cell phone video, which Santana revealed this week, reignited national outcries surrounding police treatment of African-Americans and led to a murder charge against Slager, who is white. Scott was black.</p>

Santana, 23, also told NBC on Thursday that he didn't see Scott grab the officer's Taser -- an account that doesn't match what the officer told dispatchers about what led to the shooting following a traffic stop.

He said he ultimately revealed the video because what he saw -- a police officer shooting a man who was running away -- didn't match initial reports of the incident.

"As you can see in the video, the police officer just shot him in the back. ... And I knew right away that I had something in my hands," Santana told NBC's Lester Holt on Wednesday.

HEADLINE	04/10 Revealed: China's cyberwar 'cannon'
SOURCE	http://www.thedailybeast.com/articles/2015/04/10/revealed-china-s-cyberwar-cannon.html
GIST	<p>Computer security researchers have discovered a new "offensive device" being used by China's powerful Internet censors that gives them the power to launch attacks on websites and inject malicious viruses on computers around the world.</p> <p>The device is associated with China's so-called Great Firewall, which blocks Internet searches in China for information the government deems controversial, such as from Chinese dissidents and government critics. But this new tool, which researchers dubbed the Great Cannon, actually can commandeer an unwitting person's computer and marshal it into a network of machines used to flood websites with traffic and force them to shut down.</p> <p>The cannon was used in such a denial-of-service attack on GreatFire.org, which helps Internet users circumvent Chinese censors, researchers at Citizen Lab, with the Munk School of Global Affairs at University of Toronto, said in a report released Friday. The Daily Beast obtained an advance copy of the document.</p> <p>The Citizen Lab team concluded that it would be "trivial" to convert the Great Cannon from its censorship mission into a powerful system for injecting viruses, spyware, and other malicious code onto any foreign computer that communicates with a website in China, and that's not protected with encryption.</p> <p>The researchers say the Great Cannon is analogous to the so-called Quantum system, developed by the National Security Agency, which can implant malware on machines around the world for espionage and attacks. Quantum was revealed in documents leaked by former NSA contractor Edward Snowden and helped to show that the NSA runs an extensive, sophisticated, and aggressive operation designed to commandeer or spy on foreign computers. The NSA's British counterpart reportedly used Quantum to spy on the largest telecommunications provider in Belgium, which is a member of NATO.</p>

	<p>“This precedent will make it difficult for Western governments to credibly complain about others utilizing similar techniques,” the researchers said of China’s Great Cannon.</p> <p>So far, however, the Cannon’s operators—the report doesn’t identify them, but says there is “compelling and reproducible evidence” that they are in the Chinese government—have only used it against sites that help to evade state censorship. The attack on GreatFire.org, which began in March, was widely reported.</p> <p>Researchers speculate that the cannon’s builders may have wanted to advertise their new weapon to the world.</p>

HEADLINE	04/09 Amazon sues fake review websites
SOURCE	http://www.komonews.com/news/local/Amazon-sues-three-websites-that-sell-product-reviews-299290501.html
GIST	<p>SEATTLE -- Amazon is suing to block what they claim are fake reviews on their website.</p> <p>The lawsuit, filed Wednesday in King County court, claims three websites are illegally selling reviews on Amazon.</p> <p>The companies offer to post positive reviews on items sold on Amazon. One company sells three reviews for \$74, while another offers 200 positive reviews for \$3,400.</p> <p>Amazon says that's a violation of federal and state Consumer Protections acts. The suit also argues that the websites are violating Amazon's trademark and are providing false advertising.</p> <p>The owner of one of the websites listed in the lawsuit says his reviews are legit and his company is doing nothing wrong. Mark Collins, who owns buyamazonreviews.com, said the people who provide reviews "only post honest reviews."</p>

HEADLINE	04/09 Pedophiles safe haven on 'dark net'
SOURCE	http://www.cbsnews.com/news/pedophiles-finding-a-safe-haven-on-the-dark-net/
GIST	<p>Sweetie looks and sounds like a young girl from the Philippines. "My name is Sweetie," she says. "I'm 10 years old."</p> <p>There are thought to be hundreds of children like her in Southeast Asia, working in front of live Internet webcams, paid to perform sex acts for pedophiles.</p>

But Sweetie isn't real. She's a digital puppet, designed by Hans Guijt and his colleagues at Terre des Hommes Netherlands, a child protection organization, to catch pedophiles.

"In the 10 weeks time that we were active on the Internet we were hit by more than 20,000 people, 20,000 men mainly, who were trying to get in contact with us to engage us in sexual activities," Guijt told CBS News.

But Guijt added that many hardcore pedophiles can't be so easily caught, because they're using a separate, hidden Internet known as the dark net.

Originally developed by the U.S. military, the dark net is only accessible via a browser that masks users' identities by encryption.

The dark net's millions of users -- and thousands of websites -- operate on a network of more than 6,000 computer servers spread around the world that reroute signals to hide users' locations. It's still partly funded by the U.S. government, in order to help dissidents in China, Russia and Iran evade censorship.

But the layers of security protecting users' anonymity have also made the dark net a haven for pedophiles. While most users employ the dark net browser to hide their IP address while accessing sites on the regular Internet, a recent British study found that 80 percent of traffic to sites located only on the dark net were related to child pornography.

"It was just an awful realization, discovering there were tens of thousands of people who are not only trading child pornography, but planning to exploit children," said Greg Virgin, a former NSA employee turned cyber security consultant, who's now helping U.S. child protection groups.

HEADLINE	04/09 ISIS aligned group claims TV hack
SOURCE	http://www.foxnews.com/world/2015/04/09/french-tv-network-hacked-by-group-claiming-ties-to-isis/
GIST	<p>PARIS – Hackers claiming allegiance to the Islamic State group seized control of a global French television network, simultaneously blacking out 11 channels and taking over the network's website and social media accounts. The attack appeared to be an unprecedented step in the extremist group's information warfare tactics.</p> <p>The hackers briefly cut transmission of 11 channels belonging to TV5 Monde and took over its websites and social media accounts starting Wednesday night. The channel's director, Yves Bigot, said the attack was continuing Thursday. He told RTL radio that the network has restored its signal but can only broadcast recorded programs.</p> <p>The Islamic extremist group has claimed complex hackings before, but experts and a French official said the ability to black out a global television network represented a new level of sophistication for the group. The Paris prosecutor's office said Thursday it has opened a terrorism investigation into the attack.</p> <p>Bigot said he was shaken when he saw the black screen across the network's broadcasts "and when we discovered the sense of the message appearing on our social media and our websites, it both allowed us to understand what was happening and obviously worried us."</p> <p>The message on the TV5 Monde website read in part "I am IS" with a banner by a group that called itself Cybercaliphate. It was replaced later Thursday by a simple message saying that it was undergoing maintenance.</p>

HEADLINE	04/09 Pew: Facebook top social media teens
SOURCE	http://www.nbcnews.com/tech/internet/some-teens-instagram-some-kik-they-all-go-online-pew-n338136
GIST	<p>A Pew Research study of teenagers' online habits shows that while just about all teens go online daily, what they do and what apps they use vary widely.</p> <p>The survey, conducted online (rather than by phone, which Pew admits has greatly affected the results) shows that teens' habits and haunts depend on a number of factors, from family income to race and gender. Facebook was by far the most popular single platform, with 71 percent of all teens reporting using it. But interestingly, as household income increases, Facebook use drops off sharply, while use of Instagram, Snapchat and Twitter jump.</p> <p>Girls were much more likely than boys to use visual social media sites frequently. Half of girls are on Snapchat versus a third of boys, one in three uses Pinterest compared with one in 10 boys, and almost a</p>

	<p>quarter are on Tumblr while just 5 percent of boys are. Boys, on the other hand, are far more likely to have access to a gaming console (91 percent versus 70 percent) and play games online.</p> <p>Teens of black or Hispanic backgrounds more often had mobile phones from which to access such services (though fewer had desktops or laptops), and were twice as likely to use messaging apps like WhatsApp and Kik.</p>
Return to Top	<i>The report goes into much greater detail on the differences between various demographics. You can download and read the research at Pew's website.</i>

HEADLINE	04/10 Twitter suspends 10K ISIS accounts
SOURCE	http://www.todayonline.com/world/americas/twitter-says-it-suspended-10000-islamic-state-linked-accounts-1-day
GIST	<p>NEW YORK — Activists and experts who monitor the Twitter traffic of the Islamic State and its supporters noticed something odd last week when many accounts suddenly disappeared.</p> <p>The activists exchanged messages about the missing accounts, suspecting they had been suspended.</p> <p>Yesterday (April 9), a Twitter representative confirmed what some were saying and put a number on it. The social media network's violations department suspended approximately 10,000 accounts April 2 "for tweeting violent threats", the representative said.</p> <p>It was impossible to independently verify the assertion because Twitter's data is not public. But it would be the biggest single mass purge by Twitter of accounts linked to the Islamic State, also known as ISIS, which some experts believe has as many as 90,000 affiliated accounts.</p> <p>The suspensions came against a backdrop of rising criticism that Twitter has allowed the Islamic State to exploit the social network to spread propaganda, glorify violence and seek recruits.</p> <p>Twitter previously acknowledged suspending as many as 2,000 Islamic State-linked accounts per week in recent months.</p> <p>The Twitter representative, who spoke on the condition of anonymity for security reasons, attributed the surge of suspensions in part to a widely publicised effort by Islamic State opponents, including some hacking groups and online vigilantes, to expose suspect accounts and report them as violators.</p> <p>"We received a large amount of reports," the representative said.</p>

HEADLINE	04/09 FBI finds a clue
-----------------	-------------------------------

SOURCE	http://www.strategypage.com/htm/htiw/articles/20150409.aspx
GIST	<p>April 9, 2015: At the end of March the U.S. FBI (Federal Bureau of Investigation) released a report on FBI use of Internet and computer based operations. While acknowledging progress in developing Internet based intelligence and analysis capabilities within the FBI it was pointed out these capabilities are not yet fully appreciated by senior leadership. This leads to less use of FBI Internet and software experts than possible.</p> <p>Computer savvy field agents have a hard time getting all the attention they could use when it comes to FBI Cyber War and analysis resources. FBI Internet experts also have a hard time getting all the tools they need because their work is not seen as important as it actually is. As bad as this sounds it is actually good news because the FBI has made a lot of progress in this area in the last decade.</p> <p>Since 2000 the FBI has been striving to catch up with the demand for special agents and support staff possessing the computer skills needed to deal with computer based crime and espionage. A 2011 survey found that about a third of the agents assigned to computer crime teams felt they lacked the skills to handle all the demands of the job.</p> <p>In response the FBI has made increasingly vigorous and public efforts to increase the number of special agents (the FBI operatives who do most of the investigating) and support personnel with Cyber skills. Progress has been slow and the latest effort involves aggressive advertising seeking applicants to be special agents with substantial Internet security and hacker skills. As with other special agents the applicants must have a college degree and be able to pass an intense background investigation. The FBI ads list numerous technical skills applicants should have (to a significant degree, the more the better). Those skills include programming, network security, hacking (nothing illegal, of course, much less getting arrested for it), malware analysis, digital forensics and so on. Many college level software engineering programs now cover all this but the FBI is looking for applicants with practical experience as well. Those accepted, and who pass the regular special agent training and the new "Special Agent (Cyber)" course would become a special agent who can be used on computer crime (fraud, theft, espionage) cases.</p> <p>All this is part of a recruiting effort that began in 2009 as the FBI sought to recruit 850 special agents and 2,100 other specialists with Cyber skills. With 30,200 employees (40 percent of them "special agents") the FBI had finally admitted that it needed a lot more people with Cyber skills and it needed them fast. In 2009, with a recession going on it seemed a good time to be recruiting computer specialists. But this effort did not increase, much, the number of special agents with high grade computer chops. However, the addition of more computer savvy special agents did make it easier for senior FBI officials to get more timely updates from the young agents who could be trusted to accurately describe what the FBI was facing. What the FBI leadership heard, and now understood better, was not good news. The FBI had long played down the Cyber War threats and resisted the introduction of PCs in FBI operations. Now came the realization that the threat was much larger than leadership had ever appreciated and that the FBI was poorly equipped to deal with the threat.</p>

The FBI is responsible for going after criminals (including terrorists and spies) that operate via the Internet. The problem is that, for decades, the FBI had been way behind when it came to computer technology. Since the late 1990s the FBI has tried to catch up. A major problem has been hiring technically competent people. There were several reasons for this difficulty First, the FBI is a pretty straight-laced organization, not the sort of environment that appeals to cutting edge computer techies. This puts off a lot of good people the FBI would like to have. Another problem is money. The FBI employees are paid according to civil service pay scales. This system makes it difficult to hire hot-shot computer experts at market wages. The FBI solution initially was to hire whoever they could get, and then train them. This included a lot of on-the-job training. The problem with this approach was that when these FBI employees got really expert, they noted that they could make a lot more money using their new skills in a non-government job and left.

The FBI responded to this by creating working relationships with companies that had the highly paid Internet experts. Not quite the same as hiring expensive consultants, but it gave the FBI access to top notch computer skills when they needed it most. Internet security companies, in particular, liked the working relationship with the FBI, because these outfits tracked a lot of computer crime. In turn, the FBI had access to a lot more detail on computer crime, and people who had better skills and tools for hunting down the cybercrooks.

This is not the way the FBI normally likes to operate. At first, the FBI tried to create and maintain a database of online crime. But they didn't have the people, or other resources, to handle it. However, they discovered that commercial Internet security firms were already doing this, and found that these commercial databases were good enough. Working this much with commercial firms is new for the FBI. However, with all the rapidly changing computer technology, and Internet crime techniques, this is the only way the feds could cope. The cooperation with commercial firms also makes it easier to get other government agencies to work together. To take on Internet crime, the FBI had to include the Postal Service, the Federal Trade Commission, as well as a number of other federal, state, local and foreign law enforcement organizations in partnerships. It's a whole new way of operating for the FBI.

HEADLINE	04/09 Global tensions increase cyber threat
SOURCE	http://www.ft.com/cms/s/0/2e81dede-c0d7-11e4-876d-00144feab7de.html#axzz3Wtn0VwJl
GIST	<p>Geopolitical risks used to be something that only companies with a global presence had to worry about. But in cyberspace, any connected modern business is vulnerable.</p> <p>It is no longer enough for companies to sever ties with unsettled regions, cut loose risky subsidiaries or hedge their global exposures to manage their way through shifting international tensions.</p> <p>The past two years — marked by the escalation of state-on-state disputes and conflicts — have shown that the effects of cyber warfare or aggression can be experienced by almost any business.</p>

Companies can be victims of state-sponsored attacks for strategic reasons unconnected with their immediate business, from filmmakers such as Sony Pictures — allegedly hit by North Korean hackers last year — to Spanish renewable energy companies, targeted by Russia-linked hackers.

The nature and motivation for attacks is varied: from classic state surveillance to economic espionage, criminal gain, embarrassment or destruction.

“Whenever we have discovered a new domain in the history of mankind, we have had conflict over it,” says Dave DeWalt, chief executive of FireEye, one of the world’s biggest cyber security companies.

He believes such conflict in cyber space is already upon us: “We are seeing more and more complex attacks — highly sophisticated operations. On average, we are seeing attackers inside their target’s networks for about 200 days before they are discovered.”

Many western security officials fear that, as conflicts heat up around the world, cyber will become the front line for more overt, aggressive attacks.

With many of the world’s disputes deadlocked — the stand-offs between Iran and Saudi Arabia, North Korea and South Korea, Japan and China, or Russia and Europe — cyber is likely to supplant the physical world as the main theatre of conflict.

HEADLINE	04/09 Report: cybercrime is getting easier
SOURCE	http://www.theregister.co.uk/2015/04/09/websense_threat_report/
GIST	<p>The volume of malware threats is actually on the decline despite the increase in breaches, according to a study from Websense Security Labs.</p> <p>Websense Security Labs logged 3.96 billion security threats in 2014, which was 5.1 per cent less than 2013. Despite this, the number of high-profile breaches increased.</p> <p>Hackers have switched from spray and pray tactics to more "quiet, targeted and unique attacks" that Websense reckons are far more effective.</p> <p>Websense's 2015 Threat Report – published on Wednesday April 8 – also reports that malware authors are consistently reusing the same delivery techniques and infrastructure. An overwhelming 99.3 per cent of malware uses a command and control infrastructure used by at least one other malware author. An only marginally smaller 98.2 per cent of malware authors used command and control hubs found in five other types of malware.</p>

Around one in three (30 per cent) of end-users click through a malicious URL in an email even though they have been warned of the danger. "End users are increasingly desensitised from the warnings, don't feel responsible and still lack enterprise-driven education," according to Websense.

Hackers are gaining capabilities through the adoption of cutting-edge tools instead of technical expertise. Hackers are blending old tactics, such as macros, in unwanted emails with new evasion techniques. Old threats are being "recycled" into new threats launched through email and web channels, creating a noxious attack landscape in the process.

Redirect chains, code recycling and a host of other techniques are allowing these actors to remain anonymous, making attribution time consuming, difficult and ultimately unreliable.

Even entry-level threat actors (AKA script kiddies) can successfully create and launch attacks due to greater access to exploit kits for rent, Malware-as-a-Service and other opportunities to buy or subcontract portions of a complex multi-stage attack, Websense concludes.

In 2014, 81 percent of all email scanned by Websense was identified as malicious. Websense Security Labs identified more than 3 million macro-embedded email attachments in the last 30 days of 2014 alone.

HEADLINE	04/09 Cybercrime task force beat botnet
SOURCE	http://www.cbsnews.com/news/fbi-international-cybercrime-task-force-beebone-botnet/
GIST	<p>A new group of international cybercrime fighters claimed one of its first kills Thursday, pulling the plug on malicious servers that hijacked at least 12,000 machines, most of them in the United States.</p> <p>The elimination of the Beebone botnet is an early success chalked up by the Joint Cybercrime Action Taskforce, a coordination body created last year by the FBI, Britain's National Crime Agency, Europol and host of other international law enforcement agencies.</p> <p>FBI Assistant Director for Cyber Joseph Demarest, Jr. said, "Botnets like Beebone have victimized users worldwide, which is why a global law enforcement team approach working with the private sector is so important. The FBI is proud to join with our partners at Europol's European Cybercrime Centre, the Joint Cybercrime Action Taskforce (J-CAT), and the Dutch National High Tech Crime Unite to defeat malicious botnets that have the potential to impact thousands."</p> <p>Beebone acted as a "downloader," which installed other forms of malicious software on victims' computers without their consent or knowledge. An FBI cyber agent told CBS News this type of cybercrime opens the door to malware that can steal your information and your credentials to log into your bank account. It can also cause your computer to participate in other crimes.</p>

HEADLINE	04/10 Advisors working w/terror group PKK?
SOURCE	http://www.thedailybeast.com/articles/2015/04/10/u-s-advisors-may-be-working-with-terrorist-labeled-pkk-to-fight-isis.html
GIST	<p>MATARA, Iraq — On the volatile front lines facing the so-called Islamic State outside the northern Iraqi city of Kirkuk, American military personnel have been coordinating with the Kurdistan Workers Party (PKK), according to a local commander from the left-wing guerrilla group that is still on the U.S. State Department list of foreign terrorist organizations.</p> <p>Ageed Kalary commands a unit of about 30 PKK fighters positioned some 500 meters from the front. He claims that he has met with U.S. military personnel accompanying commanders from Iraq's Kurdish Regional Government's, whose soldiers are known as the Peshmerga, and which has strong, open American support. The last direct encounter, he said, was in December. But the coordination does not have to be face to face.</p> <p>"The Americans tell us what they need and share information but there is no formal agreement," he says about the U.S. military's interaction with a group that earned its "terrorist" label for the tactics it employed in its 29-year armed struggle against Turkish rule.</p> <p>The PKK's dug-out fortifications on the flats of the Little Zab River are shared with a Kurdish unit of the Iraqi army and all are in the line of fire for snipers of the self-proclaimed Islamic State, also known as ISIS. The winding front is reinforced by a mix of Kurdish Peshmerga units, PKK, Kurds equipped by the Iraqi army and Shia militias, while the U.S. provides logistical support and air strikes to keep most of Northern Iraq's richest oil region from the clutches of the jihadists.</p> <p>While the U.S. military affirms it shares information and provides advisory support for various Kurdish security forces through a Joint Operations Center in Erbil, the Iraqi Kurdish capital, the U.S. maintains that the foreign terrorist organization designation of the PKK remains unchanged—which on paper ought to mean no contact.</p> <p>However, U.S. Central Command spokesperson Mark Blackington doesn't outright deny that there has been coordination with PKK fighters in Iraq. Instead he calls Kalary's description of "cooperation" as a "mischaracterization." He then declines to characterize it further.</p>

GIST	<p>Pakistan's most populous province, Punjab, has decided to train prison staff in criminal psychology in a bid to curb terrorism.</p> <p>Farooq Nazir, inspector general of Punjab prisons, told News Lens Pakistan in a recent interview that the provincial government decided to treat criminals with therapy after militants massacred 134 schoolchildren as they sat in class at the Army Public School in Peshawar in December.</p> <p>"About 300 to 350 hardened criminals are currently detained in 36 jails of the province for terrorist activities, sectarian killings and other crimes of a heinous nature who will be given specialized psychological therapy," Nazir said.</p>

	<p>In addition, jail staff are being trained to assess inmates' anger and stress levels, background history, criminal tendencies and jail environment.</p> <p>"The training of jail staff in the first phase covers different topics and is meant to enhance their skills for judging psychology of criminals. The trained staff could then make assessments of the prisoners, citing certain symptoms in the prisoners' behavior, which they have been trained to identify," Nazir said.</p> <p>In the second phase, the jail officers are to prepare a list of inmates they recommend for therapy and submit the list to psychologists.</p> <p>"This training aims to reduce crime rate in the society and terrorism from the country," Nazir said.</p>

HEADLINE	04/10 Americans stuck in Yemen sue US
SOURCE	http://www.foxnews.com/politics/2015/04/10/state-dept-sued-for-failing-to-evacuate-us-citizens-stranded-in-yemen/?intcmp=latestnews
GIST	<p>WASHINGTON – Claiming the Obama administration turned its back on them, 41 Americans stranded in war-torn Yemen filed a federal lawsuit Thursday against the State Department and Defense Department for not evacuating them -- as fighting intensifies and U.S. allies launch airstrikes.</p> <p>The lawsuit, filed in U.S. District Court in Washington, D.C., seeks to compel the government to use “all resources” possible to rescue the stranded Americans. The plaintiffs range in age from just a few weeks old to senior citizens.</p>

	<p>“Despite the clear danger to Americans in Yemen – and the death of at least one American – the Obama administration has not yet taken any substantive steps to help citizens or permanent residents reach safety,” the lawsuit claims.</p> <p>The suit was filed on the plaintiffs' behalf by The American-Arab Anti-Discrimination Committee and the Council on American-Islamic Relations.</p> <p>Though the exact number of Americans stuck in Yemen is unknown, hundreds of people have expressed concern about loved ones in Yemen through a website set up to track and help them, Jenifer Wicks, a lawyer for CAIR, told reporters Thursday.</p>

GIST	<p>BEIRUT — Two weeks into a Saudi-led military campaign in Yemen, airstrikes appear to have accelerated the country’s fragmentation into warring tribes and militias while doing little to accomplish the goal of returning the ousted Yemeni president to power, analysts and residents say.</p> <p>The Yemeni insurgents, known as Houthis, have pushed ahead with their offensive and seem to have protected many of their weapons stockpiles from the coalition’s bombardments, analysts say. The fighting</p>

	<p>has killed hundreds of people, forced more than 100,000 people to flee their homes and laid waste to the strategic southern city of Aden.</p> <p>The battles are increasingly creating problems that go beyond the rebels opposing President Abed Rabbo Mansour Hadi and the forces supporting him. The conflict has reduced available water and food supplies in a country already suffering from dangerous levels of malnutrition and created a security vacuum that has permitted territorial advances by al-Qaeda in the Arabian Peninsula (AQAP).</p> <p>For the Saudi government and its allies, the military operation in Yemen may be turning into a quagmire, analysts say.</p>

HEADLINE	04/09 Feds: Wisc. man tried to join ISIS
SOURCE	http://abcnews.go.com/US/wireStory/wisconsin-man-accused-join-islamic-state-group-30175295
GIST	<p>A Wisconsin man traveled to the Middle East in a failed attempt to join the Islamic State group, federal authorities said Thursday.</p> <p>Joshua Van Haften, 34, of Madison, was arrested Wednesday night at O'Hare International Airport in Chicago after returning on a flight from Turkey. He is charged in a criminal complaint with attempting to provide material support to a foreign terrorist organization.</p> <p>Van Haften was scheduled to appear Thursday morning in federal court in Madison.</p> <p>The criminal complaint, which had been under seal since Oct. 28, alleges that Van Haften talked to people about his plan before leaving the United States in August for Istanbul.</p> <p>The complaint cites Facebook posts from Van Haften that said he was unable to cross the border from Turkey into Syria. In one post, Van Haften complained that the people who were supposed to help him just wanted his money, that he had almost no cash left and that he was dropped off on a road in the country and never picked up.</p> <p>Wisconsin court records showed several previous convictions for Van Haften, including felony battery in 1998, second degree felony sexual assault in 1999 and disorderly conduct, a misdemeanor, in 2007, online court records show. All of the offenses occurred in Rock County.</p>

HEADLINE	04/08 Tsarnaev mom: Americans terrorists
SOURCE	http://www.vocativ.com/world/russia/tsarnaevs-mother-speaks-out-my-son-is-the-best-of-the-best/

GIST	<p>Following the guilty verdicts in the Boston bombing trial on Wednesday, Dzhokhar Tsarnaev’s mother, Zubeidat, sent a note to a family friend declaring Americans are “the terrorists,” and saying her son is “the best of the best,” the friend told Vocativ.</p> <p>Vocativ discovered the post, written in Russian, in a support group on VKontakte, the Russian social media site. The sister of the family friend, Timur Raduyev, also sent the message to Vocativ. Raduyev said in VK messages to Vocativ that he posted the mom’s words to the support group.</p> <p>In part, the message reads: “I will never forget it. May god bless those who helped my son. The terrorists are the Americans and everyone knows it. My son is the best of the best.”</p> <p>In 2013, Rudayev started a group on VKontakte to support Tsarnaev and his family. Rudayev said he raised at least \$5,000. He shared photos of Tsarnaev’s mom and other family members. He also consistently posted to the group screengrabs of conversations he had with the mom through Whatsapp and other conversation apps. The group, called “Support for Dzhokhar,” has 1,882 followers on VK.</p>

HEADLINE	04/09 UN: alarming rise ISIS foreign fighters
SOURCE	http://www.hstoday.us/briefings/daily-news-analysis/single-article/un-alarming-rise-in-foreign-fighters-joining-islamic-militants-in-iraq-syria/47859d41f8e75583a2f8cf1d7c91fa87.html
GIST	<p>The number of foreign fighters leaving their home nations to join extremist groups in Iraq, Syria and other nations has hit record levels, with estimates of over 25,000 foreign fighters coming from nearly 100 countries, according to a recent United Nations (UN) report.</p> <p>The Al Qaeda Sanctions Committee prepared the report for the UN Security Council.</p> <p>The latest UN figures reveal a 71 percent increase in foreign recruits since the middle of last year—an increase that the UN panel of experts referred to as “higher than it has ever been historically.” In fact, the number of foreign fighters has “risen sharply from a few thousand a decade ago to more than 25,000 today.”</p> <p>US intelligence officials estimate more than 150 US citizens have traveled or attempted to travel to Syria to join the Islamic State. These alarming new estimates are raising concerns that the likelihood of terrorist attacks occurring around the globe is increasing. The report states that due to ease of travel the possibility of being affected by a terrorist attack “is growing, particularly with attacks targeting hotels, public spaces and venues.”</p>

	<p>Most foreign fighters are flocking to Syria and Iraq, which have become a hotbed for terrorist training activities. The UN estimates that 20,000 foreign fighters have traveled to these two countries to join the Islamic State, Al Nusra Front, and other splinter groups affiliated with Al Qaeda.</p> <p>The UN experts referred to Iraq and Syria as an “international finishing school for extremists” where “those who eat together and bond together can bomb together.” However, the rise of foreign fighters is not limited to Iraq and Syria. The UN estimates that 6,500 foreign fighters are in Afghanistan. Yemen, Libya, Pakistan, Somalia, northern Africa and the Philippines have also seen increases in their presence.</p> <p>The report also cited a "high number" of foreign fighters from Tunisia, Morocco, France and Russia, as well as an increase in fighters from the Maldives, Finland and Trinidad and Tobago.</p>

HEADLINE	04/09 VP: ISIS progress halted in Iraq
SOURCE	http://www.wsj.com/articles/joe-biden-says-islamic-state-has-been-checked-in-iraq-1428613407
GIST	<p>WASHINGTON—Vice President Joe Biden said Thursday the Islamic State extremist group’s progress in Iraq has been halted and that the fight against the armed movement has managed to unify the country.</p> <p>In a speech at the National Defense University in advance of Iraqi Prime Minister Haider al-Abadi’s visit to Washington next week, Mr. Biden said that the country’s feuding sectarian blocs had managed to put aside their differences and work together against a common threat.</p> <p>Islamic State, also called ISIS or ISIL, has been forced on the run and Iraqi forces, with American help, have made major strides against the extremist group, he said.</p> <p>“ISIL’s aura of invincibility has been pierced,” Mr. Biden said, pushing back against critics of the administration’s Iraq policy.</p> <p>“ISIL’s momentum in Iraq has halted and in many places has been flat out reversed. Thousands of ISIL fighters have been removed from the battlefield. Their ability to mass and maneuver has been greatly degraded. Leaders have been eliminated. Supply lines have been severed, weapons, checkpoints, fighting positions, IED factories, safe houses have been destroyed,” Mr. Biden said.</p>

HEADLINE	04/09 Penn. terror suspect held after threats
SOURCE	http://www.nytimes.com/2015/04/10/us/pennsylvania-terror-suspect-held-after-threats-cited.html? r=0
GIST	<p>An associate of a Philadelphia woman charged in a plot to join the Islamic State militant group in Syria pledged to avenge her arrest with attacks on the United States and violence at the jail where she is held, a federal prosecutor said.</p>

The associate posted a message on Twitter calling for suicide attacks after federal agents searched the home of the woman, Keonna Thomas, on March 27. The associate also posted an image of an exploding truck with the message, "No prison door would be able to stand against the force."

Jennifer Williams, an assistant United States attorney, cited the threats at a detention hearing in Philadelphia on Thursday, arguing that Ms. Thomas, a 30-year-old mother of two, should remain jailed pending trial. Ms. Williams told a federal judge that the messages underscored Ms. Thomas's "strong and robust" ties to the jihadist community and the danger she posed if released.

The judge, Marilyn Heffley, agreed and ordered Ms. Thomas, an unemployed former home health aide, to remain in federal custody. An F.B.I. spokesman said after the hearing that the agency could not discuss specific cases but that it takes every threat seriously.

HEADLINE	04/10 Bounties for top Al Shabab leaders
SOURCE	http://news.yahoo.com/somalia-issues-bounties-top-shebab-leaders-072952223.html
GIST	<p>Mogadishu (AFP) - Somalia's government has issued bounties for 11 top leaders of the Al-Qaeda-linked Shebab militants, with \$250,000 offered for the extremist's chief, Ahmad Umar.</p> <p>Other rewards include \$150,000 for the capture of Mahad Karate who runs the Amniyat, a special internal security wing that deals in intelligence and assassinations.</p> <p>The Shebab are fighting to overthrow Somalia's internationally-backed government, but have also carried out a string of revenge attacks in neighbouring nations, including Kenya, where the extremists massacred 148 people last week in Garissa university.</p> <p>Umar, also known as Abu Ubaidah, has led the movement since Ahmed Abdi Godane was killed by a US air strike in September.</p> <p>The militant group has suffered a string of setbacks, losing territory in battles with regional forces and top leaders to drone missile strikes.</p> <p>Rewards of \$100,000 are offered for the capture of nine others, including Shebab spokesman Sheikh Ali Mohamud Rage.</p> <p>Other nations have also issued rewards for information on Shebab commanders, with Washington offering cash rewards of up to \$5 million including for three Shebab commanders.</p>

	Kenya has offered \$215,000 for alleged Shebab commander Mohamed Mohamud, a former Kenyan teacher believed to now be in Somalia and said to be the mastermind behind the Garissa attack.

HEADLINE	04/10 Longest town names in the world
SOURCE	http://www.foxnews.com/travel/2015/04/10/longest-town-names-in-world/?intcmp=HPBucket
GIST	<p>Good luck trying to pronounce or remember some of these lengthy town names, which rank as some of the longest around the globe. Some you may have heard of and some you haven't, but either way they are certainly a mouthful.</p> <p>1. Llanfairpwllgwyngyll, Wales We bet you can't pronounce this one! Llanfairpwllgwyngyll on the island of Anglesey in Wales is purported to be the longest name in Great Britain. The name of the train station is even longer -- Llanfairpwllgwyngyllgogerychwyrndrobwlllantysiliogogoch.</p> <p>2. Los Angeles, California According to Michelle D. Garcia-Ortiz at El Pueblo de Los Angeles Historical Monument, L.A. is named after a river, which was its primary water source when settlers discovered it in 1781. Spanish settlers, who were devout Catholics, named the river El Rio de Nuestra Senora Reina de Los Angeles de La Poricuncula (River of Our Lady Queen of the Angels of Poricuncula) after a religious holiday that they had celebrated the day before. The governor then decided to name the area El Pueblo de la Reina de Los Angeles (sobre el Rio de la Porciuncula) or Town of the Queen of the Angels (on the River Porciuncula)</p> <p>3. Truth or Consequences, New Mexico In addition to being long, the town name of Truth or Consequences, New Mexico, is plenty quirky, too. Formerly called Hot Springs, New Mexico, the town was re-named in 1950 as part of a publicity stunt for the 10th anniversary of Ralph Edwards' successful radio game show on NBC.</p> <p>4. Fuerstenfeldbruck, Germany Fuerstenfeldbruck is a charming German town of about 35,000 residents in southern Bavaria near the Five Lakes Region. It houses many historic buildings, including a former Baroque monastery built in 1263 by Ludwig II in atonement for executing his wife. The city itself dates to the 12th century and is named for the monastery, "Furstenfeld," and the bridge over the river in town or "brucke".</p> <p>5. Freixo de Espada à Cinta, Portugal</p>

Located in the Duoro Wine Region of Portugal, Freixo de Espada à Cinta is known for its beautiful blooming almond trees in spring. Meaning “Ash-tree girded with sword,” there are a variety of theories as to how it ended up with this name.

6. Bangkok, Thailand

This one wins for longest name ever. Similar to Los Angeles, the full Thai name for Bangkok, which is Thailand’s capital city, is actually quite a bit longer, as in more than a hundred letters longer. Next time you visit the area, be sure to call it correctly: Krungthepmahanakhon Amonrattanakosin Mahinthagayutthaya Mahadilokphop Noppharatchathanaburirom Udomratchaniwetmahasathan Amonphimanawatansathit Sakkathattiyawitsanukamprasit.

HEADLINE	04/09 Report: co-pilot spiked pilot’s drink?
SOURCE	http://www.foxnews.com/world/2015/04/09/germanwings-co-pilot-may-have-spiked-pilot-drink-with-diuretic-report-says/?intcmp=latestnews
GIST	<p>Germanwings co-pilot Andreas Lubitz, who crashed Flight 9525 into the Alps, may have spiked the pilot’s drink with a diuretic in order to get him out of the cockpit, a new report claimed Thursday.</p> <p>The UK Daily Telegraph, citing German newspaper Express.de, reports that 27-year-old Lubitz may have mixed a drug into Captain Patrick Sondheimer’s drink, causing him to need to use the restroom and consequently leaving Lubitz alone in the cockpit.</p> <p>Other reports suggest that Lubitz searched online for information about diuretics in the days leading up to the crash. However, the Telegraph notes that the reports appear to be based on speculation, with no evidence that Lubitz bought the drugs in question or took them onboard the doomed flight.</p> <p>Investigators believe that Sondheimer was locked out of the cockpit by Lubitz after the captain left to go to the bathroom. Sondheimer is heard on the cockpit voice recorder banging on the door and demanding to be let in moments before the plane crashed into a mountainside, killing all 150 on board the March 24 flight from Barcelona to Dusseldorf.</p>

HEADLINE	04/09 FBI reward for 1995 train derailment
SOURCE	http://www.nbcnews.com/news/us-news/20-years-later-fbi-offer-new-reward-sunset-limited-train-n338996
GIST	The FBI on Friday will offer a new reward for information leading to the conviction of those responsible for a train derailment caused by an act sabotage in Arizona — nearly 20 years after it occurred.

The FBI did not say why the new reward is being offered now to find whoever sabotaged rail tracks in a remote area 70 miles southwest of Phoenix and caused the Amtrak passenger train the Sunset Limited to derail and fall off a bridge at around 1:35 a.m. on Oct. 9, 1995.

The FBI will offer a reward of \$310,000, [the Arizona Republic reported](#).

An Amtrak employee was killed and more than 100 of the train's 258 passengers were hurt. The FBI has classified the derailment as an act of domestic terrorism.

Investigators found four typed letters at the scene of the derailment that referred to the deadly federal government actions at Ruby Ridge, Idaho, and Waco, Texas. The letters were signed by the "Sons of the Gestapo" — a group the FBI and observers of extremist movements had never heard of before.

Whoever sabotaged the tracks near Hyder and caused the derailment pulled out 29 railroad spikes and removed a 19-foot section of the track, The Associated Press reported at the time. A wire was used to disable a warning system designed to alert a train operator of a track break.

HEADLINE	04/09 Did ISIS hack the BBC?
SOURCE	http://www.mirror.co.uk/tv/tv-news/bbc-hacked-isis-operational-error-5489298
GIST	<p>The BBC was feared to have fallen victim to an ISIS cyber-attack this evening as 'hackers' appeared to post Islamic State propaganda during a live broadcast.</p> <p>Viewers were left stunned as the words 'Je suIS IS' appeared on TV screens following a feature on the BBC News Channel. Above the red and white writing was the word 'CYBERCALIPHATE'.</p> <p>Newsreader Clive Myrie was clearly flustered as he addressed the loss of content during the programme.</p> <p>He said: "I do apologise, we seem to have lost our report from James Robbins, erm... stay with us."</p> <p>The incident happened just after 8.07pm leaving producers scrambling to the next feature. The incident follows today's hacking of the television network TV5Monde.</p> <p>Unlike the French attack, the BBC have stated that it was an 'operational error' that lead to the loss of sound and confusion.</p> <p>A BBC spokesperson told Mirror Online: "This was an operational error in which a graphic being used in BBC reports about the French cyber-attack was broadcast briefly by mistake during another item."</p>

HEADLINE	04/09 Immigration activists to illegals: vote
SOURCE	http://www.breitbart.com/big-government/2015/04/09/immigration-activists-to-train-community-navigators-in-exec-amnesty-path-to-power/
GIST	<p>A series of powerpoint presentations from the Committee for Immigration Reform Implementation sheds some light on how groups supportive of President Obama’s executive amnesty are strategizing to get people to sign up and defend the president’s actions.</p> <p>“Once the applications are out, the best defense of the programs will be huge number of applications for [Deferred Action for Childhood Arrivals] and [Deferred Action for Parents of Americans and Lawful Permanent Residents],” reads one of the powerpoint slide.</p> <p>The powerpoints are part of a curriculum for what the coalition of immigration activists calls community navigators to help prepare people up for executive amnesty.</p> <p>“Community navigators (or promotores) are volunteers who receive specialized training to provide quality immigration services for their communities in an empowering and effective way. The Committee for Immigration Reform Implementation (CIRI) has developed a curriculum for organizations to use to train navigators who will be engaged in outreach, organizing, screening, document preparation, and/or application assistance related to administrative relief implementation,” reads the program’s description.</p> <p>It’s slated for April 13.</p> <p>“The training has been fully vetted by the CIRI subcommittee on regional coordination, as well as the CIRI steering committee. We will introduce the model and discuss how it can be adapted for various contexts and demographics,” it adds.</p> <p>The powerpoints offer basic information about immigration law, President Obama’s executive actions on immigration, scams, and best practices about offering guidance on executive amnesty, as well as slides aimed at defending those actions.</p> <p>“Components Of Defense,” reads the headline of one slide that goes on to list “Hosting house meetings; Hosting/attending large info sessions; Participating in our org! Signing people up!; VOTING.”</p> <p>Another slide focuses on solidifying power. “VOTE!!” reads the headline, with its first bullet point reading “Path to Power” followed by another bullet point that reads “If you can’t vote: Register others; Canvas; Participate in campaigns.”</p>

HEADLINE	04/09 Mystery methane mass over Southwest
SOURCE	http://www.cbsnews.com/news/scientists-searching-for-methane-source-in-southwest/
GIST	<p>Scientists are working to pinpoint the source of a giant mass of methane hanging over the southwestern U.S., which a study found to be the country's largest concentration of the greenhouse gas.</p> <p>The report that revealed the methane hot spot over the Four Corners region - where Colorado, New Mexico, Utah and Arizona meet - was released last year.</p> <p>Now, scientists from the University of Colorado, the University of Michigan, the National Oceanic and Atmospheric Administration and NASA are conducting a monthlong study to figure out exactly where it came from.</p> <p>The answer could help reduce methane emissions that contribute to global warming.</p> <p>Methane occurs naturally and also is emitted by landfills and the agricultural and oil and natural gas industries.</p> <p>One possible source of the hot spot is methane released from the region's coal deposits.</p> <p>The releases can happen naturally, especially where coal seams reach the earth's surface. They also occur deliberately when energy companies extract methane - the primary component of natural gas - from coal beds.</p>

	The region is home to the San Juan Basin, North America's most productive area coal bed methane extraction area.

HEADLINE	04/09 Claim: SEA breached 5 times in 10yrs
SOURCE	http://www.kirotv.com/ap/ap/washington/ap-investigation-details-5-perimeter-breaches-at-s/nkqmX/
GIST	<p>SPOKANE, Wash. — Perimeter security was breached five times in the past decade at Seattle-Tacoma International Airport, including twice last year, according to an Associated Press investigation.</p> <p>Nationally, AP found there have been at least 268 perimeter security breaches at 31 major U.S. airports between January 2004 and January 2015. Incidents ranged from fence jumpers taking shortcuts and intoxicated drivers crashing through barriers to mentally ill intruders looking to hop flights. None was terrorism-related.</p> <p>Airports say breaches are relatively rare. Security measures typically include fences, cameras and patrols, but there are gaps. Not all of the miles of fences are routinely patrolled or covered by video surveillance.</p> <p>The incidents at Seattle-Tacoma, according to incident reports obtained under records act requests, were:</p> <ul style="list-style-type: none"> — On Oct. 25, a 22-year-old woman drove a car through a guarded gate, striking an exiting airport vehicle. She then drove to a terminal. Arresting authorities said she and her passenger were visibly intoxicated. "I am so dumb," the driver told officers. "My mom is going to kill me." — On Sept. 8, an airport worker found a 26-year-old man walking on a taxiway. He had jumped a security fence about 300 feet away from a terminal gate. He told officers he wanted to catch a flight to the Philippines. — On June 22, 2009, a mother threw a pack of cigarettes to her son, who was working inside the secure area. — On Dec. 3, 2006, a man told authorities he was "having a bad night" and "just felt like crashing through some gates." He did so in a 2003 BMW. — On Oct. 20, 2005, a person was found walking inside a secure area.

HEADLINE	04/09 Which airport with most breaches?
SOURCE	http://www.cbsnews.com/news/san-francisco-international-airport-us-perimeter-breaches-ap-investigation/
GIST	<p>While security problems at Mineta San Jose International Airport made worldwide headlines, an investigation by The Associated Press set to be released Sunday discovered San Francisco has had the most breaches in the past decade, CBS station KPIX-TV reports.</p> <p>The AP crunched the numbers from the last decade and found perimeter breaches at the nation's airports are hardly uncommon. San Francisco International Airport has the most breaches at 37.</p> <p>The story was scheduled to be released Sunday night by the AP and its partners, including KPIX-TV and CBSSF.com, but the airport's communications office issued a press release and scheduled a Thursday news conference about improvements in perimeter security.</p> <p>Breaches at San Francisco ranged from the mundane -- one case was "driver inadvertently took a rental car through a gate to secure area" -- to the vague "unspecified perimeter security breach," which appeared eight times in the airport's data.</p> <p>KPIX-TV tried to get airport spokesman Doug Yakel to do an interview about the findings, but he declined to do an interview.</p> <p>At Mineta airport, there were 18 breaches in the past decade, the most famous being 15-year-old Yahye Abdi surviving a flight to Maui stowed away in a plane's wheel well last year.</p> <p>While Yahye made headlines, the bigger problem is cars crashing through fences. Nine crashes occurred in the past decade, all at the same intersection.</p>

HEADLINE	04/09 Calif. utility to pay \$1.6B penalty
SOURCE	http://www.cnn.com/2015/04/09/us/california-pge-penalty/index.html
GIST	<p>The California Public Utilities Commission on Thursday said it is ordering Pacific Gas & Electric Co. to pay a record \$1.6 billion penalty for unsafe operation of its gas transmission system, including the pipeline rupture that killed eight people in San Bruno in September 2010.</p> <p>Most of the penalty amounts to forced spending on improving pipeline safety. Of the \$1.6 billion, \$850 million will go to "gas transmission pipeline safety infrastructure improvements," the commission said.</p> <p>Another \$50 million will go toward "other remedies to enhance pipeline safety," according to the commission.</p> <p>"PG&E failed to uphold the public's trust," commission President Michael Picker said. "The CPUC failed to keep vigilant. Lives were lost. Numerous people were injured. Homes were destroyed. We must do everything we can to ensure that nothing like this happens again."</p> <p>The company's chief executive officer said in a written statement that PG&E is working to become the safest energy company in the United States.</p>

HEADLINE	04/09 Florida prison system under scrutiny
SOURCE	http://www.foxnews.com/politics/2015/04/09/florida-prison-system-under-scrutiny-as-lawmakers-fight-to-keep-feds-out-and/?intcmp=latestnews
GIST	<p>Florida's state-run prison system is being hammered with allegations that guards abused and even killed inmates -- including one incident where, according to a witness, the skin was scalded off a prisoner's body in a shower -- leaving officials scrambling for answers and human rights groups urging the feds to intervene.</p> <p>In a stinging rebuke of Florida's prison system, several current and former inspectors recently went on record claiming workers were routinely ordered to ignore evidence of brutal beatings and other alleged crimes taking place behind bars.</p> <p>State lawmakers like Republican Sen. Bob Bradley are now backing a bill that would restructure the state's problem-plagued system by creating an independent oversight board to watch over the Department of Corrections and strip its power to self-police.</p>

	<p>“Ultimately, the leadership of our state is responsible for doing what is right and for restoring public faith in our corrections system,” Bradley told FoxNews.com.</p> <p>The DOC is Florida’s largest agency with 22,000 employees and more than 100,000 inmates, and can preside over its own internal investigations. The oversight panel, if approved, would have the authority to probe allegations of fraud, inmate abuse and corruption. It would also have subpoena powers.</p> <p>Bradley said that if the plan is adopted, it would demonstrate the state taking a "hard stand against abuses within our correctional system" and an environment he said has "allowed or disregarded" those abuses.</p> <p>The problems have been piling on for the FDOC for some time now.</p>

HEADLINE	04/09 Wash. D.C. rocked by shootings
SOURCE	http://www.cnn.com/2015/04/09/us/washington-shootings/index.html

GIST	<p>Washington was rocked late Thursday by shootings -- one at the gates of the U.S. Census Bureau's headquarters and another in a popular area packed with restaurant patrons. The shootings were connected, authorities said.</p> <p>They began with what authorities believe was a domestic kidnapping incident, according to D.C. Police Chief Cathy Lanier. The suspect's vehicle was spotted outside the Census Bureau, which is in Suitland, Maryland.</p> <p>A guard apparently approached the vehicle and saw two people arguing. That guard was then shot at least once in the upper body, said Prince George's County Fire Department spokesman Mark Brady. The guard was in extremely critical condition, according to Brady.</p> <p>The police chief said the suspect then fled the scene. Officers picked up the chase, and the suspect fired gunshots at multiple locations, Lanier said. The chase ended in a crash on Washington's busy H Street. A shootout ensues, Lanier said.</p> <p>An officer and the suspect were wounded, according to the police chief. Both were conscious and talking when they left the scene.</p>

HEADLINE	04/09 Priest murder capital of the world
SOURCE	http://www.breitbart.com/national-security/2015/04/09/catholic-priest-slain-in-mexico-priest-murder-capital-of-the-world/
GIST	<p>The lifeless body of 60-year-old Father Francisco Javier Gutiérrez Díaz was found Tuesday night with a gunshot wound to the head, dumped by the side of a road in a rural district of the central Mexican state of Guanajuato.</p> <p>Despite its high percentage of Catholics, Mexico holds the dubious distinction of being the country with the highest number of murders of Catholic priests in the world. This latest killing brings the number of murdered priests to ten during the administration of current Mexican President Enrique Peña Nieto, who took office in 2012.</p> <p>The priest was traveling alone from the village of Salvatierra to Acambaro when he was accosted by his assailants, apparently to rob him. The priest reportedly was carrying money to purchase a plot of land for his religious community near the village of Acambaro.</p> <p>On Wednesday the slaying was confirmed by the archbishop of Morelia, Cardinal Alberto Suárez Inda, who had ordained Father Gutierrez a priest on January 8, 1986.</p>

HEADLINE	04/09 El Salvador homicides hit record
SOURCE	http://news.yahoo.com/homicides-el-salvador-reach-record-gang-violence-grows-040224134.html
GIST	<p>SAN SALVADOR, El Salvador (AP) — El Salvador had more homicides in March than any other single month in a decade, a dark milestone that some attribute to the collapse of a gang truce and one that could mark a trend of greater violence to come.</p> <p>Data from the National Civil Police show 481 homicides recorded last month, or more than 15 a day. April's start is no better, with 73 killings reported in the first five days. At this rate, El Salvador is on pace to surpass Honduras as the deadliest peace-time country in the world.</p> <p>Gang-on-gang violence, as well as attacks on police and Salvadorans in general is spiking in what authorities say is an attempt by gangs to pressure the government to negotiate issues raised as part of a 2-year truce that fell apart in 2014. Others see it as a reaction to the new government's iron-fist approach to the country's two major gangs, Mara Salvatrucha and 18th Street.</p> <p>Since taking office in June, President Salvador Sanchez Ceren has openly opposed any negotiations with gangs, which according to various estimates have as many as 70,000 members in a country of 6 million inhabitants. Some 10,000 of them are in prison.</p>

HEADLINE	04/09 Sex offenders predisposed?
SOURCE	http://www.cnn.com/2015/04/09/europe/sex-offenders-genetic-predisposition/index.html
GIST	<p>A new study has concluded that genetics as well as environment can influence the likelihood that a person will become a sexual offender.</p> <p>Titled "Sexual offending runs in families: A 37-year nationwide study," the paper was published Thursday in the International Journal of Epidemiology. It was written by five experts from the Karolinska Institute in Stockholm, Sweden, the University of Ottawa in Canada, and Oxford University in the UK. It was based on nationwide Swedish data about 21,566 men convicted of sexual crimes between 1973 and 2009.</p> <p>One of the authors, Seena Fazel of the Oxford University Department of Psychiatry, said realizing that genetics can increase the risk that someone will commit a sex crime could help governments target those most in need of help.</p> <p>In an interview with CNN.com, Fazel acknowledged that isolating genetic factors can be difficult. But he said comparisons -- including of half-brothers who grew up in the same environment but had different mothers -- showed that the biological sons of offenders had a higher risk of becoming offenders themselves.</p> <p>The biological sons of a sex offender were five times more likely than the norm to commit sex offenses, the study found. But their maternal half-brothers were only twice as likely to do so, the paper said.</p> <p>"There is a genetic component," Fazel said. "It's not insignificant. It hasn't really be shown before in this field."</p> <p>The study concludes that genetics accounts for 40% of the risk. But Fazel said that was perhaps too precise a figure, and it would be better to think of it as anywhere between 20% and 50%.</p>

HEADLINE	04/09 Hijacker, cop-killer hiding out in Cuba
SOURCE	http://www.cnn.com/2015/04/09/americas/us-cuba-fugitive-charlie-hill/index.html
GIST	Charlie Hill sits in a dark bar on a blindingly sunny Havana day.

"Hey man," he says with a smoker's rasp and a nod that indicates he knows you have been looking for him. But then a lot of people have been looking for Charlie Hill for a long time.

For 43 years Cuba has provided refuge for Hill from facing charges that he killed a New Mexico police officer and hijacked an airliner to Havana.

Hill, now 65, decided to give CNN an interview after we'd spent two years trying to reach him. He wants to discuss how for the first time he is considering leaving his safe haven and returning to the United States.

"I miss my country," he said, his voice cracking. "I miss my family. I would like to go back and see where my grandparents were born, where I was born, where I went to junior high. Eat some blackberry pie. Even go to McDonald's. That's only natural."

Hill was a black power militant and said he is still a revolutionary. But he craves the kind of French fries that only capitalism can make.

Subject: Records request

Hi Teresa,

I'm trying to find out if any local law enforcement agencies have Stingray equipment or are using them or similar devices from other agencies that allow police to intercept cell phone data that is normally sent to cell phone towers.

Pursuant to the Idaho Public Records Law, I hereby request the following records:

Background

Cell site simulators, also known as IMSI catchers, IMEI catchers, GSM interceptors, covert cellular tracking equipment, and digital analyzers, impersonate a wireless service provider's (i.e., mobile phone company's or cellular phone company's) cell tower, prompting mobile phones and other wireless devices to communicate with the simulators instead of with the real cell towers. These devices are

often called "Stingrays," the name of one such device produced by Harris Corporation, along with their AmberJack, BlackFin, KingFish, Gossamer, LoggerHead, and TriggerFish devices.

Cell site simulators are commonly used in several ways: to collect unique numeric identifiers associated with each mobile phone in a given geographic area, to determine the precise location of a mobile phone when numbers associated with it are known but only a rough idea of its location is known, or to intercept phone calls and SMS messages.

Each of these uses raises privacy concerns, the most obvious of which is presented by the interception of voice and SMS messages. Collecting unique identifiers of all phones in a particular area inevitably collects location data on many innocent people who are suspected of no crime. Determination of the precise location of a specific phone can reveal that the phone, and thus the person who operates it, is in a constitutionally-protected place, such as a home, that has traditionally been immune from search without judicial approval via search warrant. The locations of people's mobile phones reveal a variety of personal information, such as: with whom they associate, where they assemble, where they spend their days, where they spend their nights, when they are home alone, where they protest, where they worship, and health care providers they visit.

It has been widely reported in recent months that law enforcement agencies use these devices while hiding their use from the public and from the courts.

Despite widespread public interest in the use and misuse of cell site simulators, the public lack information about your agency's use of these devices or about your agency's policy for such use. Information is needed so the public can determine whether use of cell site simulators by your agency complies with the Fourth Amendment to the U.S. Constitution and with Idaho law.

Request

Pursuant to the Idaho Public Records Law, I request:

1. Records regarding your agency's acquisition of cell site simulators, including but not limited to invoices, purchase orders, contracts, loan agreements, evaluation agreements, solicitation letters, correspondence with companies and public agencies that provide the devices, and similar documents.

2. Records regarding any offer, proposal, arrangement, agreement, or memorandum of understanding with the Idaho State Police (ISP), the Ada County Sheriff's Office (ACSO), Naval Criminal Investigative Service ("NCICS"), Federal Bureau of Investigation ("FBI"), U.S. Marshals Service, FBI's Data Intercept Technology Unit ("DITU"), or any corporation, to borrow, permanently acquire from, or use any cell site simulator owned or possessed by the ISP, ACSO, NCICS, FBI, U.S. Marshals, DITU, or corporation.
3. All nondisclosure agreements with Harris Corporation, Digital Receiver Technology (DRT, formerly Utica Systems, now a subsidiary of Boeing Corporation), Septier Communication Limited, Proximus LLC, any other corporation, and any state or federal agencies, regarding your agency's actual or potential possession or use of cell site simulators
4. Records regarding policies and guidelines governing use of cell site simulators, including but not limited to 1) when, where, how, and against whom they devices may be used, 2) logging, retention, purging, use, and auditing data stored in or communicated from the devices, 3) under what circumstances administrative warrant, judicial warrant, or other legal process must, should, or should not be obtained prior to, during, or following direct or indirect use of the devices, 4) under what circumstances the existence or use of the devices must, should, or should not be revealed to judges, prosecutors, defense attorneys, criminal defendants, or the general public., and 5) parallel construction techniques for use in avoidance of disclosure of the initial method of discovery of information gained initially by use of cell site simulators
5. Training materials for use of cell site simulators
6. Records regarding any communications or agreements with wireless service providers (i.e., mobile phone carriers such as AT&T, CenturyLink, CREDO Mobile, MetroPCS, Sprint, Ting, T-Mobile, Verizon, Virgin Mobile, etc.) concerning use of cell site simulators
7. Records regarding any communications, licenses, waivers, or agreements, with federal or state communications regulatory agencies (e.g., Federal Communications Commission, Canadian Radio-television and Telecommunications Commission, Idaho Public Utilities Commission, Washington Utilities and Transportation Commission, Oregon Public Utility Commission, etc.) concerning use of cell site simulators.
8. Records reflecting the number of investigations in which cell site simulators were used, the number of those investigations that resulted in prosecutions, and the number of those investigations that resulted in convictions.

9. Records reflecting a list of all criminal cases, with docket numbers if available, in which law enforcement officers or other staff used or arranged for the use of one or more cell site simulators as part of the underlying investigations.
10. All applications submitted to state or federal courts for warrants, orders, or other other authorization for use of cell site simulators in criminal investigations, as well as any warrants, orders, authorizations, denials of warrants, denials of orders, denials of authorization, and returns of warrants associated with those applications.
11. Records regarding the use of cell site simulators in closed investigations.
12. Date and docket number of any responsive records that are sealed.
13. All associated metadata.

I also request that, if appropriate, fees be waived as I believe this request is in the public interest.

In the event that fees cannot be waived, I would be grateful if you would inform me of the total charges in advance of fulfilling my request. I would prefer the request filled electronically, by e-mail attachment if available or CD-ROM if not.

Thank you.

John

Hi Gordon,

It was nice talking with you this morning. Our 2-day program is \$2500, and the 3-day is \$3895.00 I can offer a 10% discount either way you guys decide to go. I have attached the course curriculum as well as the course schedule, our classes are booking up incredibly fast. We have an executive chef here onsite, we do provide our students with breakfast and lunch and offer dinner as well. We also have accommodations right here on property with rates that start out at \$110/night and that is based on availability at the time of booking.

Please feel free to contact me anytime with any questions or concerns.

Thank you,

Darci Bolen

Hello Tim;

Here is the posting calendars that Southern used to post for Idaho. I have filtered these to show just Bogle. Does this work?

Let me know if this would work or if you need something else. Thanks.

Subject: Hello from AK!

No shit, this just happened in Alaska: I was sitting on the roots of this cool cedar beside the Klawoc River. Three bald eagles were fishing across the water. I was transfixed by watching one of them eat a fish it lifted onto the shore. Suddenly, a massive flapping noise just above my head dragged me back to consciousness. Undetected, a bald eagle had been chilling less than 6 feet above me. I called Montana. Ten minutes in, I glanced up and to my horror discovered I was perched directly under a deadly widow maker. It was spear shaped and hanging vertically by thin fibers. On closer inspection, it appeared to be suspended by rope; I could see twine but couldn't understand how it was strung and wasn't about to get impaled by some kind of primitive hunger games trap. I darted away anxiously chattering about my find when the forest froze me directly in the path of a massive bald eagle screaming through the trees in hot pursuit of another bald eagle. The pair careened through the low hanging obstacle course like kamakazee fighter pilots, nearly t-boning me again. I felt the need to hit the deck. I've never seen birds fly so fast, so close to the ground. I actually felt pretty threatened. Are they mating? Is this sacred bald eagle burial ground? Am I prey? Is the forest punking me? I decided the universe was being very clear that I was not supposed to be wandering through that forest just then, so I high tailed it out of there, stopping only once, and very briefly, at a particularly laden blueberry bush.

This is what I do when I'm not out in the field. Yesterday I went on a long, slow, misty walk with my roommates dopey boxer. We wandered through the community I'm crashing in. Lots of weathered blue and red and yellow homes on stilts, broken down cars, homes that have grown dilapidated ad hoc wings...like the jungle trees that fall down here but refuse to die and so sprout nursery trees in their rubble. It's a poor

community. Elvis (the boxer) and I walked the line of the bay and stopped at the bridge to watch 13 bald eagles play like kites at the mouth of the Klawoc.

I'm renting a room in an old cannery owned by the tribe along with all the other instructors and therapists. Our living space sits on top of the tribe's smoke shop and bingo hall. We've been given very stern directive (more than once) to keep quiet on bingo nights. Which is difficult to do with 12 rowdy humans, a kitten, a malamute puppy, an energetic adult brittany spaniel and a dim-witted, over-sized boxer. The smell of smoke wafts up into my room on the regular, as do the sounds of Hida women slowly calling out numbers and letters.

The cannery is growing on me (I don't think in a mold way). I can't help but love it's quirks. My roommates are an eclectic bunch, and for the most part, I love their quirks too. 7 of the 12 of us have SUWS roots. 5 of the 7 had their picture on the wall of the office. The twelve of us share one shower and for the first month of our time together we didn't have a working kitchen facility. Luckily several people had backpacking stoves, which is what we cooked on, all twelve of us, until the repair man finally fixed the kitchen stove. (Alaska time is very different than time "down south"). It's very difficult to fit food for that many people in one fridge, especially when a large percentage of those people tend to live on produce. Luckily, Angie and Kelly (possibly the most tenured wilderness instructors in the industry and also a delightful couple) have gutted and reclaimed a mini rv from the 70's. We've run an electrical cord from one of the rooms, across the pier into there place so that their fridge can be utilized in the effort to feed all the portland hipsters. Real Safe. I'm sure it will be fine. Don't worry, we're professionals.

There was a lot of build-up to finally heading out on the ocean with my group of boys. I spent my time anxiously awaiting the start of my trip while living in this odd bubble in Klawoc. I went through a month of sporadic clinical training on lots of depressing topics. Most I'm all too familiar with, but I did learn some new and useful stuff about trauma informed care and FASD. Fetal Alcohol Spectrum Disorder is a real problem in Alaska. I was also able to rack up some warehouse hours working on packing trips and sealing canoes. I was happy to secure this grunt work for two reasons: 1) Alaska is very expensive and after buying a 7 dollar loaf of non artisan bread, I was motivated to earn every penny possible in this season of work. 2) Our trip is very unlike SUWS. We are not near help and the environment is serious. Should we need help, there are places and conditions that would prohibit even the coast guard from responding. It's a full-on expedition and I didn't trust the warehouse kids to remember every detail in packing my trip. I'm a control freak but with good reason.

Three weeks ago, the start finally came. I loaded up canoes with four boys and two men and shoved off the rocky beach serenaded by the low, deep melody of the clinical director--an old salt and pepper sea dog--singing a song of beginnings borrowed from the Hida. Since then my life has consisted of paddling, humpback whales, black bears, rice and lentils, paddling, jungle, rain, rain, paddling, rain, tarp tents strung with p-cord in a rain forest sanctuary, diligent moss collecting, enchanted old growth forests, struggling to spark primitive fire on said wet moss, rafts of seals and otters threatening to turn over my kayak, barnacles, salt, cliff portages, attempting to strike camp in impenetrable second growth, stingray, elder circles, jellyfish, banana slugs on my face, rain, more paddling and navigating a tessellation of misty islands with four young men in the making.

We travel by canoe, but there are four boys and three instructors and so we also have a sea kayak to account for the odd number. In the beginning, the kayak was the speedier boat. It allowed me to zip between canoes and coach boys on paddling technique and help them move through angry shutdown moments. But after two weeks, paddling skills improved, canoes go mostly in a straight line now and it has become

difficult to keep up with the crafts powered by two in the kayak powered by one. One day I was paddling hard to catch up after pulling over for a pee break, and a whale breached thirty yards from my tiny boat, hung out for a couple breathless moments and then dove, flashing me its tail before it disappeared.

I see bears daily on our paddles but haven't had problems with them in camp. We're traveling through pretty wild places. In two weeks out, I only saw two other fishing boats way off on the horizon. For the most part, bears only have contact with humans wielding guns, so they're sufficiently afraid of us. I came to peace with them after waking several times to fresh bear poop within ten feet of my tarp shelter. I'm still obsessively diligent about the way we handle food, but figure if they haven't harmed me in my sleep yet, they're probably not going to.

The forest here is a strange jungle. In the old growth, there is space enough to carve out an existence around the weird mounds formed by decaying life under the moss strata, in between incredible red and yellow cedars ten feet around. In areas that the tribes have logged, striking camp becomes impossible. The second growth in these areas is absolutely impenetrable. I had a scary day that ended in ship-wrecking on a cliffed-out island because of this second growth.

The GPS said we were in the right spot. The topo maps said there were places to camp. But after circumnavigating the entirety of the large bay--paddling under sixty foot cliffs pounded by surf and hacking into the shoreline everywhere that wasn't cliff in search of places to put seven bodies--the endless devil's club brier suggested we might have to endure a cold, sleepless night on the canoes and resume paddling again when we had light. This wasn't attractive for several reasons. Not the least of which was the grueling paddle we needed to complete the next day to get to a place the skiff could reach us for resupply. It was getting late and becoming more urgent by the minute to find a place for the group to get out of the weather. There were two small islands in the distance and one of my co-instructors vaguely remembered a group using them before.

I filled our jugs from a creek and the weary boys got back into boats and resumed paddling. The island was protected by a moat of steep, sharp, barnacle covered rock. We paddled around it looking for a way to access the top. Our only bet was a crack in the cliffs that created a boulder field up to a pile of suspended drift wood. Unloading was dramatic, and had to happen one boat at a time. The entry was one boat wide and the swells quickly informed us that the waiting boats needed to paddle at least sixty feet away from the spot until it was open. The fire-line of gear became more efficient as canoes were extracted and hands became available. The boys started off that day acting like children but in that crucial moment acted like men. Somehow we got all the canoes up the boulder field and hoisted them on top of the suspended driftwood without anyone getting hurt. Tarps were strung, dryish wood scrounged and dinner put on the fire 6 hours later than normal that day. The boys collapsed in center and happily stared at the fire while my co-instructor read from a book they love and I and stirred pasta. (We eat rice and lentils everyday but have a ration of pasta and tomato sauce for days we get into camp late). We lifted stick spoons to our mouths with exhausted arms and ate hot food feeling like triumphant pirate kings.

The rain here is incredible. For the first week it rained steady. Keeping dry is an art and science and a religion. We didn't have to endure epic water runs in search of fresh water during this time. We just put pots and tin cups and a scavenged bucket at the low point of our tarps. They filled in in minutes. We did an extra careful job of emptying the sea water from our canoes and then used canoes to collect rain water. Gale winds kept us at one camp for an extra day. In that two day span, our canoes filled a third of the way full with rain. I have grown gills. I have exhausted myself

keeping track of the boys dry layers in that first week of teaching them to build reliable shelters and live outside while learning this new place myself. A couple of them suffer light effects of fetal alcohol syndrome and memory is difficult. Keeping track of clothes and remembering knots is not something I can expect them to do. With repetition and memory strategies we've found a way to make it work. As with all severely emotionally disturbed kids (SED is a classification within the "at-risk" population), it's mandatory to inform patience with realistic expectations. I was worried that my instructor brain would be rusty having had almost ten months away from working with hard kids in a therapeutic way. But stepping back into this role was like getting back on a bike.

My entry into the field *was* rough, but not for the reason I anticipated. On the night before my trip began an old mentor of mine (and my co-instructor tomorrow morning) arrived at the cannery. He had in tow an old man and fellow biker he'd met on the ferry. The man was very sick and apparently had nowhere to go. Had it been any other roommate, bringing typhoid mary into our commune would have been an intolerable act. But it was Cliff, so we begrudgingly made space. 24 hours after I came into contact with the old man, and 6 hours after I pushed off the mainland with my new tribe, I began vomiting uncontrollably. I didn't sleep at all the first night, just rocked back and forth, regularly vaulting away from my shelter, sometimes crawling on hand and knee, to be sick. I couldn't keep food down for the first three days which made paddling and hauling gear and staying warm difficult, but the sickness passed. Nothing coaches humility like squatting half-naked in the cold, dark rain heaving into moss, worrying about bears. It proved to be a useful refresher course in vulnerability before setting to the task of building rapport with kids who have walls up for good reason.

The boys have moved through the first phase of the program and have earned the right to fish. So far, our paddles have been too long to consider fishing enroute, but I have been able to add fish to my rice and lentils twice. Halibut one night (a gift from the clinical director), and rock fish the other (compliments of my partner). Inevitably boats end up waiting for each other (disparity in paddle fitness, behavioral problems, etc.) and my partner uses this time to fish. On one such wait, he snagged something big...he worried that it might be a halibut, a difficult thing to land in a canoe. But then, surfacing from the salty murk, came an alien looking creature. He'd snagged a sting ray about 3.5 feet across! So cool.

The kids in my care are similar to SUWS kids in some ways. They are defiant and oppositional. They have poor social skills. They are self-defeating and insecure and blow up when stressed. They're funny and brave and resilient. They've been kicked out of a lot of places, endured a lifetime of unspeakable trauma, learned survival behaviors that got them through hard times that are now making it difficult to navigate life..but there are some marked differences. One small but telling difference is the way they reacted to the diet. SUWS kids hated rice and lentils. They scorned it and refused to eat it. Best case scenario, they conceded that it wasn't terrible and that it had to be done. These kids loved it from night one. I cooked for them the first week so that one thing could be easy in those initial long, hard days. Each one of them thanked me profusely. They savored eating something warm. They were excited about the few spices available to them in the first phase. Unlike SUWS kids, these boys are not used to eating food regularly. They are certainly not used to a safe adult preparing it for them consistently everyday no matter what they do or say. SUWS kids came from privilege. These kids come from poverty.

There is an incredible amount of money available in Alaska for cool programs like this one. The education system is very well funded. Social services are well funded. The people are poor but the state is rich which is a weird dynamic. I do believe this experience can be life changing. Not for every kid. For some it will change their lives right now, but then they'll return to messed up family situations that will drain them of their new

found confidence and strip away the coping skills that are empowering a new identity. I've come to peace with that. I cannot help everyone. Some people are trapped in a matrix of cycles beyond the scope of help. But even for them, I don't feel like this is pointless, because at least once in their hard lives, regardless of whether anything is "fixed", they did something grand and they felt safe. And who knows, having a great story and a positive reference point might generate momentum in a stagnant life. And in the others, I can see a growing internal fire, a building sense of worth, a thirst for life, the confidence to take accountability for today and tomorrow and the will to let go of everything awful that happened yesterday.

I did two weeks with the my crew of boys and I am just at the end of a week of rest. "The Can" is a different place now that instructors are staggered across groups out on the ocean. Tomorrow I'll load up on the sciff and motor back out to my group.

Sorry that this message is long and rambling and follows a family circus-esque timeline. I don't normally like to send emails to many at once, it feels impersonal. But I have had reason to think of each one of you in this time away and wanted to say hello and send a story while reception allows. Hope all is well in Boise, Hilo, Twin Falls, Modesto, Utah, the ACT, ICR and Yellow Pine Bar.

Until next time,
Katie

P.S. Unfortunately, I don't have a camera on me when all the adventure is happening, but I've attached a couple phone camera pictures that capture life around The Can.

Anonymous tip of shooter gives reasonable suspicion to detain

A 911 caller reported that a "young black male" at a particular intersection was shooting at passing cars, including the caller's car. The anonymous caller described the shooter as between 5'7" and 5'9" tall and "maybe 19, 20" years old. The caller initially said that the shooter was wearing "all black" but later clarified that he was wearing a black shirt and gray khaki pants. The caller also stated that the shooter had a black handgun and, after shooting, entered the "Penny Pincher's Liquor" store.

Responding officers saw Edwards, a 26 year-old black male, 5' 11" and wearing a black, long-sleeve shirt and gray pants. There was only one other person in the area, a male Hispanic, wearing a black and green jacket and blue jeans. Four officers pointed guns at Edwards and an officer ordered Edwards to kneel. Another officer frisked Edwards and felt a gun. Edwards was arrested and charged with being a felon in possession of a gun.

Edwards claimed that he was arrested before the gun was found, alleging that the forcefulness of the encounter transformed the investigatory detention into a de facto arrest. He asserted that there was no probable cause to arrest him. He asked the court to suppress the evidence of the gun.

In *Florida v. J.L.*, 529 U.S. 266 (2000), the United States Supreme Court held that an anonymous tip that a juvenile fitting a particular description at a bus stop had a concealed gun was insufficient, without further detail, to support the reasonable suspicion to stop and frisk the juvenile. Though the recent Supreme Court decision in *Prado Navarette v. California*, 134 S.Ct. 1683 (2014), did not explicitly overturn *Florida v. J.L.*, it significantly modified the legal analysis of reasonable suspicion based on an anonymous tip. The *Prado Navarette* opinion cited four factors that make an anonymous tip sufficiently reliable to support an investigatory detention:

- The anonymous caller personally saw the incident
- The call immediately followed the incident
- The call came through 911 system, which presumably has the technology to track back called identification, thereby deterring false reports
- The information described an ongoing and dangerous crime

Considering those factors, the court of appeals easily found that the detention was proper. The court rejected Edwards' argument that the officers' tactics changed the detention into an arrest. "The officers' aggressive conduct was reasonable and did not convert Edwards' detention into an arrest.... The officers had sufficiently detailed information from the 911 call to reasonably believe that Edwards could be the shooter and therefore could be armed and dangerous, possibly having just committed a violent crime. The officers' legitimate safety concerns justified their on-the-spot decision to use intrusive measures to stabilize the situation before investigating further." *United States v. Edwards*, 2014 WL 3747130 (9th Cir. 2014).

Court weighs in on cell site location data debate

Subdiaz-Osorio fatally stabbed his brother and headed for the Mexican border. Officers contacted his cell phone service provider and used cell site location information to stop him on an Arkansas highway. Subdiaz-Osorio asked the court to invalidate his arrest because he was located through information obtained without a search warrant.

A sharply-divided Wisconsin Supreme Court held that the cell site location information was properly obtained under the exigent circumstances doctrine. The nation's courts are split on whether requesting cell site location constitutes a Fourth Amendment search, thus triggering the warrant requirement or an applicable exception. See Wallentine, *Cell-Site Location Evidence: A New Frontier in Cyber-Investigation*, 2 AELE MO. L. J. 401 (2011). In the *Subdiaz-Osorio* case, four justices illustrated the split by issuing three separate opinions.

In *City of Ontario v. Quon*, 560 U.S. 746 (2010), the Supreme Court cautioned courts to take deliberate care in crafting rules for new technology and the Fourth Amendment. The Court observed: "The judiciary risks error by elaborating too fully on the Fourth Amendment implications of emerging technology before its role in society has become clear." That caution was evident in the majority opinion in *Subdiaz-Osorio*.

The Wisconsin high court rejected the “trespass theory” of search applied in a recent Supreme Court GPS tracking case. *United States v. Jones*, 132 S.Ct. 945 (2012). Foreclosing this argument fit common sense. The officers did not physically intrude on either the car or the phone to obtain location information.

In a case decided by the same court on the same day, officers investigating a fatal shooting obtained a court order for a trap-and-trace, pen register and cell site location information for Tate’s cell phone. The court upheld admission of cell site location evidence used to find Tate. Though the court stated that the officers had not perfectly complied with statutes (which had been amended near the time of the investigation) they had complied with the “spirit of the statute.”

The Wisconsin Supreme Court raised an issue certain to be repeatedly litigated in the near future. The United States Supreme Court recently held that searches of arrestees’ cell phones ordinarily require a warrant. *Riley v. California*, 134 S.Ct. 2473 (2014). Lawyers are debating whether *Riley* impacts privacy claims for cell site location (and other geolocation) information. Watch for this claim in future cases.

The *Tate* case also involved use of a Stingray device to navigate to the phone signal source. A Stingray mimics cell tower signals, allowing officers to locate a phone based on signal strength (these devices are also known as StingRay, StingRay II, AmberJack, KingFish, TriggerFish or LoggerHead). Tate claimed that use of a Stingray trespassed on his phone signal and therefore officers should have obtained a warrant to use the device. The court “assumed, without deciding, that tracking a cell phone using cell site information and a Stingray constitutes a search.”

The officers’ compliance with the “spirit of the law” rendered the information admissible. The dissent opined that use of the Stingray constituted a Fourth Amendment trespass, that should have lead to suppression under the *Jones* GPS tracking decision. Notwithstanding the outcome in Tate’s case, officers using similar devices should discuss the search implications with their local legal counsel. *State v. Subdiaz-Osorio*, 849 N.W.2d 748 (Wis. 2014); *State v. Tate*, 849 N.W.2d 798 (Wis. 2014).

It may well be that the next clash of technology and the Fourth Amendment will involve cell site location information. The Eleventh Circuit just issued a decision disagreeing with the Fifth and Third Circuits. This circuit split makes the issue ripe for review by the Supreme Court. Recent decisions include: *United States v. Davis*, 754 F.3d 1205 (11th Cir. 2014) (warrant required for CSLI, but information properly admitted under good faith exception); *In re Application of United States for Historical Cell Site Data*, 724 F.3d 600 (5th Cir. 2013) (no warrant required, order under Stored Communications Act is sufficient); *In re Application of United States of America for Order Directing Provider of Electronic Communication Service to Disclose Records to Government*, 620 F.3d 304 (3rd Cir. 2010) (same); *Commonwealth v. Augustine*, 4 N.E.3d 846 (Mass. 2014) (warrant required for CSLI); *State v. Earls*, 70 A.3d 630 (N.J. 2013) (warrant required for CSLI).

Consent did not cover passengers who could not hear request to search car

A deputy stopped Iraheta for lane travel and expired registration. When the deputy discovered that Iraheta also had a suspended driver license, he asked Iraheta to step behind the car to answer questions. Iraheta said that they were traveling from California to Florida for a birthday party, and identified his passengers as his cousins. Questioned separately, a passenger disclaimed any familial relation. The deputy requested, and Iraheta gave, consent to search the car. The passengers could not hear this conversation.

The deputy discovered shrink wrapped packages of cocaine and methamphetamine in a large black duffel bag. Iraheta said that he did not know who put the duffel bag in the car. All three were arrested. The two passengers claimed that consent given by Iraheta could not apply to them because they did not hear the request and did not have an opportunity to object.

A prior ruling by the same court extended a driver's consent to search to include all luggage where the passengers did not object to the search. Here, the court noted that the stopped car had California plates, was stopped in Louisiana and was occupied by three people claiming to be en route to Florida. "Taken together these circumstances would put reasonable officers on notice that Iraheta could not give consent to a search of all of the bags in the trunk."

The court held that Iraheta did not have the authority to consent to a search of any bags not belonging to him. Because he claimed not to know who put the duffel bag in the car, the deputies should have been on notice that his consent did not include the bag containing the drugs. Reading the prior rulings and this decision, the lesson is that the deputy should have either asked each occupant for consent to search bags under their control or at least asked the driver for consent to search within the passengers' presence. *United States v. Iraheta*, 2014 WL 4086372 (5th Cir. 2014).

Warrantless retrieval of drugs from suspect's rectum leads to suppression

In the most recent issue of Xiphos, we heard about the Court of Appeals denying qualified immunity in the tale of cocaine plucked from a suspect's tail. *George v. Edholm*, 2014 WL 2198581 (9th Cir. 2014). In another case of copious cocaine storage in the rear, the same court has now held that warrantless removal requires suppression.

Fowlkes was arrested for distributing cocaine. During a jail strip search conducted by five officers, an officer saw a plastic baggie protruding from Fowlke's rectum. Fowlkes moved his hand to his anus, seeming to attempt to drive the baggie deeper into his anal canal. An officer delivered a single TASER device touch stun to thwart the effort. The officer then tugged on the bag and saw that it went from "dime size, then nickel size" and finally, "golf ball size" as it emerged.

The court termed this effort as a "brutal search," conducted without "anesthesia, lubricant, or medical dilation" and "no effort to minimize the potential for internal physical trauma or emotional humiliation." Searches of body cavities require a search warrant and should be conducted by medical personnel unless there are exigent circumstances. (See the Lexipol Custodial Searches Policy). There was no evidence of a medical emergency or potential destruction of the hidden cocaine that excused the warrant requirement.

The court also rejected an argument that the special needs doctrine supported the search. In *Florence v. Board of Chosen Freeholders*, 132 S.Ct. 1510 (2012), the Supreme Court upheld a blanket strip search and *visual body cavity* search requirement for persons booked into custody facilities. In this case, suppression was a result of the removal process, not the initial strip search or from the application of the TASER on Fowlkes, who had been aggressive toward officers during his arrest.

Securing Fowlkes and using a catch toilet would have removed the taint from the evidence. The officers could also have obtained a warrant and enlisted medical personnel to pull out the baggie. The officers certainly had probable cause to search—they could see the baggie of white powdery substance. The dissent would

have upheld the warrantless removal of the cocaine, noting that it was found in “plain view” during a lawful strip search. Fowlkes’ several other convictions were upheld. *United States v. Fowlkes*, 2014 WL 4178298 (9th Cir. 2014).

Subject: FW: [CCIPS electronic evidence tips] Cell-site simulators

Attachments: Cell-site simulator canvassing warrant go-by.docx; Cell-site simulator locating warrant go-by.docx; Triggerfish cell phone PRTT go-by - canvassing identifiers June 2012.docx; Triggerfish cell phone PRTT go-by - locating phone June 2012.docx

PSC Colleagues – Good afternoon. Attached is the October 2012 newsletter from the DOJ Computer Crimes Section with important information and a new “go-by” search warrant to locate a cell phone whose identifiers are already known to law enforcement, or to determine the identifiers of an unknown phone by collecting (“canvassing”) identifying signals from cell phones in the cell-phone user’s vicinity.

CCIPS Electronic Evidence Newsletter

Cell-site simulators (October 2012)

Go-by of the Month

A cell-site simulator is a mobile device that law-enforcement agents can use to locate a cell phone whose identifiers are already known to law enforcement, or to determine the identifiers of an unknown phone by collecting (“canvassing”) identifying signals from cell phones in the cell-phone user’s vicinity. Cell-site simulators are sometimes also referred to as “triggerfish,” as “stingray,” or by other brand names. The four attached go-bys authorize investigators to use a cell-site simulator. The go-bys are for both pen-trap orders and search warrant affidavits. No statute clearly prohibits the warrantless use of cell-site simulators in either capacity. Nevertheless, some courts have required probable cause to authorize a cell-site simulator, and the government may reduce litigation risks by obtaining a search warrant (or, in some circumstances, an arrest warrant) before using cell-site simulators.

Practice Tip

The litigation risk of using a cell-site simulator without a warrant is at its highest when the simulator will locate a phone in an area where the suspect has a reasonable expectation of privacy, such as his home, when officers lack the authority to enter that home. In contrast, when a cell-site simulator is used in conjunction with visual surveillance of the subject in public—such as when agents are attempting to determine the instrument number of a suspect’s phone—litigation risk is reduced (but a pen/trap order is still required).

Prosecutors should recognize that, as a result of efforts made to protect this sensitive technique, it is possible that only limited details about how the cell-site simulator works will be available for use in opposing a motion to suppress, or in trial. The functional operation of a cell-site simulator is typically described in the application for pen register authority; however, presenting assertions about technology in an *ex parte* filing is not the same thing as proving them during a hearing on a motion to suppress. Consequently, it may be difficult to rebut incorrect technological assertions raised by opposing counsel, and therefore difficult to rest any opposition to a motion to suppress on the technological aspects of how the cell-site simulator worked. Indeed, many law-enforcement agencies have explained that they would face serious operational problems if the public became aware of the operational details involved in the deployment of cell-site simulators, or even of their specifications, limitations, and capabilities. As a practical matter, this also increases the litigation risk from the warrantless use of a cell-site simulator.

If you are uncertain whether to seek a pen/trap or search warrant to authorize the use of a cell-site simulator, feel free to contact the CCIPS duty attorney at (202) 514-1026.

Key cases from the last 6 months

- *Court rejects defendant's request for additional discovery concerning the technical details of a cell-site simulator based on government's claim of law enforcement privilege.* After investigators located a defendant using a cell-site simulator, defendant filed a motion to suppress, and sought additional discovery concerning the technical workings of the cell-site simulator as necessary for him to assert his Fourth Amendment argument. Because the defendant had been located pursuant to a valid search warrant, the court concluded that no Fourth Amendment interest was at issue, and rejected the defendant's motion for additional discovery. The court noted, as part of its ruling, that the "for purposes of Defendant's motion to suppress, the government agrees that the Court may assume that the aircard tracking operation was a Fourth Amendment search and seizure." *United States v. Rigmaiden*, 844 F.Supp.2d 982, 995 (D. Ariz. 2012).
- *Magistrate judge refuses to sign a pen-trap order authorizing the use of a cell-site simulator device.* In a S.D. Texas case, a magistrate judge, relying in large part on *Rigmaiden*, rejected a government application for a pen-trap to authorize a cell-site simulator, concluding that "[b]ased on the statutory language and the limited case law analyzing this issue, a pen register does not apply to this type of electronic surveillance." *In re the Application of the U.S. for an Order Authorizing the Installation and Use of a Pen Register and Trap and Trace Device*, No. C-12-534M, 2012 WL 2120492, *5 (S.D.Texas).

This newsletter is a publication of the Computer Crime and Intellectual Property Section, in the Department of Justice's Criminal Division. If you would like additional guidance on electronic evidence issues, you can:

- *Consult the go-bys and guidance available on CCIPS Online at <http://dojnet.doj.gov/criminal/ccips/online/evidence.htm> (this link will work only if you can connect to the DOJ intranet);*
- *Consult the the CCIPS manual on Searching and Seizing Computers and Obtaining Electronic Evidence, which is publicly available at <http://www.justice.gov/criminal/cybercrime/docs/ssmanual2009.pdf>.*
- *Call the CCIPS duty attorney at (202) 514-1026.*

To subscribe or unsubscribe to future newsletters, please email CCIPS.Tips@usdoj.gov. Unless there is a problem or question about your subscription request, you will not receive a confirmation email. This email list is restricted to federal prosecutors and federal law enforcement agents, and you must use a federal government email address to subscribe.

Subject: CMV Crash
Attachments: ID1400011034.pdf

Sgt. Staley,

I was working an overtime shift today at the Huetter Port of Entry wasn I was callat 0822 and told of a 2 vehicle injury crash involving a CMV and a loss of 100 gallons of fuel.

A passenger vehicle was was traveling southbound and lthe car spun out in the slush/snow. The car went left of center and struck a northbounb CMV side-swiping it. Damage to the CMV was to the left front wheel hub fill cap, left door step, exhaust, left fuel tank (ruptured) and left fender on axle 2 that was pushed into the wheel. The rupture to the fuel tank caused a spill of an estimated 100 gallons of diesel. When I was traveling north to the crash, I was told that the fire department had alread made a bridge call through Bonner County and they had clean up crews coming.

The driver of the passenger car was transported to the hospital in Sandpoint where the female driver was examinted and released before we (ISP) cleared the crash scene. The passenger car driver will be cited for the crash by the investigating officer.

Subject: Fw: Dear God: It's me, the Dog

[Dear God: It's me, the Dog](#)

Dear God: Is it on purpose that Our
Names are spelled the same, only in reverse?

Dear God: Why do humans smell the flowers,
But seldom, if ever, smell one another?

Dear God: When we get to Heaven, can we sit
On your couch? Or will it be the same old story?

Dear God: Why are there cars named after
The jaguar, the cougar, the mustang,
The colt, the stingray, and the rabbit, but not ONE
Named for a Dog? How often do you
See a cougar riding around? We love a nice car
Ride! Would it be so hard to rename
The 'Chrysler Eagle' the 'Chrysler Beagle'?

Dear God: If a Dog barks his head off
In the forest and no human hears him,
Is he still a bad Dog?

Dear God: We Dogs can understand human Verbal instructions, hand signals, whistles, Horns, clickers, beepers, scent IDs, Electromagnetic energy fields, and Frisbee Flight paths. What do humans understand?

Dear God: More meatballs,
Less spaghetti, please.

Dear God: Are there mailmen in Heaven?
If there are, will I have to apologize?

Dear God: Here is a list of
Just some of the things I must remember
To be a good Dog:

1. I will not eat the cat's food before he eats
It or after he throws it up.
2. I will not roll on dead seagulls, fish,
Crabs, etc., just because I like the way they smell.

4. The sofa is not a 'face towel'.
5. The garbage collector is not stealing our stuff.
6. I will not play tug-of-war with Dad's Underwear when he's on the toilet.
7. Sticking my nose into someone's Crotch is an unacceptable way of saying 'hello'.
8. I don't need to suddenly stand Straight up when I'm under the coffee table.
9. I must shake the rainwater out of my fur before Entering the house - not after.
10. I will not come in from outside,
And immediately drag my butt across the carpet.
11. I will not sit in the middle of the living Room, and lick my crotch.
12. The cat is not a 'squeaky toy',
So when I play with him and he makes that noise,
it's usually not a good thing.

P.S. Dear God:
When I get to Heaven,
May I have my testicles back?

Hi everyone,

I need help. My phones, computers and emails have been hacked by someone. I hired a private investigator to aid in gathering evidence to be turned over to the FBI and I need to help him in the area of computer forensics, but I don't know enough to do so by myself. I have a box of computers and cell phones that have been hacked and have malware on most of them. The person who is cyberstalking me continues to engage in this illegal activity and I would like to gather more evidence to prosecute him. Can someone tell me if there is software that enables me to track the person(s) that is getting into my phones, computers and gmail accounts. Gmail has no IT department or security department. With a gmail account you have to post your hacking issues on a public forum. I believe that the hacker has viewed my posts regarding my gmail accounts and even responded to them. My phone carrier (T-Mobile) and my Internet service provider (Optimum online) both tell me that they can not track my account activity. This is very worrisome for me since I can not go anywhere without this person "following" me. I believe he may be using a stingray or similar device to carry out these crimes.

Please let me know if you can help. I greatly appreciate any assistance that anyone may provide me. Thank you in advance for your help!!!

Sincerely,

Khris Kerr

Subject: WIDT Paperwork

Scott,
Mike Kohn told me you are working on getting the approval to use WIDT (Cell phone tracking) on a case and you need ponies for the paperwork. If there is an FBI case, you have to use a Federal Court order unless the subject is a fugitive (i.e. an indicted person evading arrest or prosecution) or in cases where there is an "immediate danger of death or serious bodily injury" such as a kidnapping case. If either of the exceptions exist, state court orders are allowed. If state court orders are used, or if there is no FBI case, we have to have written certification from the head prosecutor of the jurisdiction and a written request from the local agency we are working with. Both of those forms are attached. The SAC then has to approve the use of WIDT using state paperwork. To obtain the SAC authority, just forward the prosecutor certification and requesting agency request forms to Doug Davis and I along with the court order and Doug will review those and make a recommendation to the SAC who will then approve it. Doug will have to review to court order if it is a state order to ensure the right verbiage is there. The order has to specifically grant the FBI authority to use a Pen Register/Trap and Trace device and to conduct a search of the subject's cell phone location. Doug can provide more guidance on the verbiage. I am also attaching the DOJ pony for use of WIDT. I will send you on the red side a copy of the federal court orders obtained recently in Boise for the use of WIDT on some DT subjects.

If you have any questions, please contact me.

Steve

Subject:

From looking at the attached presentation they are confusing "pinging" which is historical with E911 real time GPS. There is a big difference. Pinging is always available and simply a court order. E911 GPS is exigent circumstances.

And the device that "simulates" a cell tower is actually called a Triggerfish, Stingray or Hail Storm, depending on which model and type of technology. And many more agencies other than just the Feds have them. I'd bet ISP has one or two. And maybe even Boise PD.

Hi Glenn,

Marti Monk gave me your email address and suggested I contact you regarding an inquiry I received regarding the legality of pinging cell phones. Evidently, a training was recently held just over the Northern Idaho border in Washington. The presentation and notes are attached. The inquiry I received was asking for similar legal guidance on Idaho law regarding "pinging." I was wondering if you had either done research or maybe addressed this issue in one of the trainings you provided in Idaho?

I would be interested in any advice you may have, but obviously I am not asking you to do any additional research on the topic. I am just hoping to steer the Idaho prosecutor who sent the inquiry in the right direction.

From: Ellen Erskine [mailto:] **Sent:** Tuesday, July 22, 2014 11:22 AM **Subject:** FW: A Dog's Prayer

A Dog's Prayer

Dear God, It's me, the Dog.

Dear God: Is it on purpose that Our
Names are spelled the same, only in reverse?

Dear God: Why do humans smell the flowers,
but seldom, if ever, smell one another?

Dear God: When we get to Heaven, can we sit on your couch? Or will it be the same old story?

Dear God: Why are there cars named after the jaguar, the cougar, the mustang, the colt, the stingray, and the rabbit, but not ONE named for a Dog? How often do you see a cougar riding around? We love a nice car ride! Would it be so hard to rename the 'Chrysler Eagle' the 'Chrysler Beagle'?

Dear God: If a Dog barks his head off
in the forest and no human hears him,
is he still a bad Dog?

Dear God: We Dogs can understand human verbal instructions, hand signals, whistles, horns, clickers, beepers, scent IDs, electromagnetic energy fields, and Frisbee flight paths. What do humans understand?

Dear God: More meatballs,
less spaghetti, please.

Dear God: Are there mailmen in Heaven?
If there are, will I have to apologize?

Dear God: Here is a list of
just some of the things I must remember
to be a good Dog:

1. I will not eat the cat's food before he eats it or after he throws it up.

2. I will not roll on dead seagulls, fish, crabs, etc., just because I like the way they smell.

3. The Litter Box is not a cookie jar.

4. The sofa is not a 'face towel'.

5. The garbage collector is not stealing our stuff.

6. I will not play tug-of-war with Dad's underwear when he's on the toilet.

7. Sticking my nose into someone's crotch is an unacceptable way of saying 'hello'.

8. I don't need to suddenly stand straight up when I'm under the coffee table.

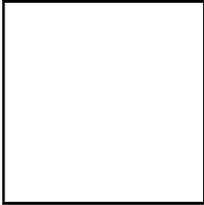

9. I must shake the rainwater out of my fur before entering the house - not after.
10. I will not come in from outside, and immediately drag my butt across the carpet.
11. I will not sit in the middle of the living room, and lick my crotch.
12. The cat is not a 'squeaky toy', so when I play with him and he makes that noise, it's usually not a good thing.

p.s.; Dear God,
When I get to Heaven,
May I have my testicles back?

I am working on getting a Word doc copy of the affidavit and warrant I used for the iPhone on the FORD case for possession of sexually exploitative material.

However I have attached several warrant go-by's and instructions for review when requesting cell phone tracking information including real-time tracking (pretty much the same threshold as requesting a T3. This material may be a little complex if the officer is not familiar with the technology.

[NOTE: INSERT SAME AS APPLIC]

[PROPOSED] ORDER

(UNDER SEAL)

This matter having come before the Court pursuant to an Application under Title 18, United States Code, Sections 2703(a) and (d), 3122, and 3123, by Assistant United States Attorney **[YOUR NAME]**, an attorney for the Government as defined by Fed. R. Crim. P. 1(b)(1), requesting an Order authorizing the **[installation and use] [continued use]** of a pen register and

trap and trace device, on the following telephone number[s]:

- (a) **[REPEAT EXACT SAME INFORMATION FROM APPLICATION REGARDING SUBJECT TELEPHONE NUMBER[S], BUT WITHOUT FOOTNOTES]** and

UPON REVIEW OF THE APPLICATION, THE COURT HEREBY FINDS THAT:

Pursuant to 18 U.S.C. ' 3123, Applicant has certified that the information likely to be obtained by such use is relevant to an ongoing criminal investigation being conducted by the **[AGENCY/IES]** in connection with possible violations of **[DESCRIBE EXACTLY AS IN APPLICATION]**.

THEREFORE, IT IS HEREBY ORDERED, pursuant to 18 U.S.C. § 3123, that Special Agents of the **[AGENCY/IES]** may **[install, or cause to be installed, and use] [continue to use]** a pen register anywhere in the United States to record or decode dialing, routing, addressing , or signaling information (including "post-cut-through dialed digits"¹) **[² [NOTE: INCLUDE FOOTNOTE 2 ONLY IF REQUESTED IN APPLICATION]** transmitted from the **Subject Telephone Number**, to record the date and time of such dialings or transmissions, and to record the length of time the telephone

¹ "Post-cut-through dialed digits", also called "dialed digit extraction features" are any digits that are dialed from the **Subject Telephone Number[s]** after the initial call set-up is completed, subject to the limitations of 18 U.S.C. §3121(c). To the extent additional digits that are received are content, the government shall not use such information for any investigative purposes or attempt to decode such information.

² Including dialing, routing, addressing, or signaling information transmitted over the communication service provider's network by a two-way radio feature (including, but not limited to, Nextel's "Direct Connect/Direct Dispatch", Verizon Wireless' "Push to Talk", or Sprint's "ReadyLink").

receiver in question is "off the hook" for incoming or outgoing calls, for a period of sixty days from the date this order is filed by the Court;³

IT IS FURTHER ORDERED, pursuant to 18 U.S.C. § 3123, that Special Agents of the [AGENCY/IES] may install, or cause to be installed, and use a trap and trace device on the **Subject Telephone Number[s]** anywhere in the United States to capture and record the incoming electronic or other impulses which identify the originating numbers or other dialing, routing, addressing, or signaling information reasonably likely to identify the source of a wire or electronic communication, and to record the date, time, and duration of calls created by such incoming impulses, for a period of sixty days from the date this order is filed by the court;

Pursuant to 18 U.S.C. §§ 2703(c)(1)(B) and 2703(d), Applicant has set forth specific and articulable facts showing that there are reasonable grounds to believe that records or other information identifying subscribers or customers (not including the contents of communications) for telephone numbers identified through the pen register and trap and trace devices on the **Subject Telephone Number[s]**, changes in service regarding the **Subject Telephone Number[s]**, cell site information regarding the **Subject Telephone Number[s]**, and records or other information

³ As used herein, the date this order is filed by the Court is the date indicated by the clerk's file stamp on the first page of this Order.

pertaining to subscribers or customers (but not including the contents of communications) for the **Subject Telephone Number[s]** will be relevant and material to an ongoing criminal investigation.

THEREFORE, IT IS FURTHER ORDERED, pursuant to 18 U.S.C. §§ 2703(c)(1)(B), 2703(c)(2) and 2703(d), that SBC Communications, Inc. or any subsidiary thereof, Ameritech, Southern New England Telephone Company, Verizon California, Inc., XO Communications, Comcast Cable Communications Inc./AT&T Corporation, Verizon New York, Inc., MPower Communications, Verizon New Jersey Inc., Bell South Telephone Company, Allegiance Telecom, Cox Communications and Qwest Communications (hereinafter the "local carriers"); AT&T, U.S. Sprint, and MCI (hereinafter the "long distance carriers"); Cellco Partnership, dba Verizon Wireless, AT&T Wireless Services, U.S. Cellular, MetroPCS, Cingular Wireless, Nextel Partners, Cricket Communications, Sprint Spectrum L.P., T-Mobile USA, Inc., Virgin Mobile USA, Nextel Communications and Western Wireless Corp. (hereinafter "the wireless carriers"); any internet service provider or other electronic communications provider providing voice-over IP telephony, and any other local, long distance, or wireless carrier servicing the **Subject Telephone Number[s]**, and any other person or entity providing wire communication service in the United States whose assistance may facilitate execution of the Order, shall disclose or provide the following upon oral or written request by Special Agents of

the [**AGENCY/IES**]:

1. Records or other information identifying subscribers or customers (but not including the contents of communications or toll records), namely, subscriber name, address, date of birth, social security number, driver=s license (state and number), contact names and numbers, employment information, method of payment, length of service, and type of service utilized, for all published, non-published, listed, or unlisted numbers, dialed or otherwise transmitted to and from the **Subject Telephone Number[s]**;

2. All changes (including additions, deletions, and transfers) in service regarding the **Subject Telephone Number[s]** to include telephone numbers and subscriber information (published, non-published, listed, or unlisted) associated with these service changes; [and]

3. For the **Subject Telephone Number[s]**, records or other information pertaining to subscriber(s) or customer(s), including historical cellsite information and call detail records [including direct connect records⁴] for the following dates:
_____ to the present [**THE LAST TEN DAYS IS RECOMMENDED**]
(but not including the contents of communications).

⁴ ASK TECH AGENT: DEFINE DIRECT CONNECT. OR BETTER YET, IS THERE A GENERIC TERM, SUCH AS WALKIE TALKIE FEATURE OR TWO WAY RADIO FEATURE??

d. For the **Subject Telephone Number[s]**, all cell site information⁵ provided to the government on a continuous basis contemporaneous with call origination (for outbound calling) and call termination (for incoming calls), or at such other time upon the oral or written request of the Government, including if reasonably available, during the progress of a call.

⁵"Cell site information" refers categorically to any and all data associated with registration of the Subject Telephone with cell sites/network, as well as other data used by the network to establish a connection with the telephone handset and to maintain connectivity to the network. This includes the physical location and/or address of the cellular tower, cell site sector, control channel number, neighbor cell lists, and any identification numbers, processing data, and parameters not pertaining to the contents of a call.

IT IS FURTHER ORDERED that this authorization for the **[installation and use] [continued use]** of a pen register and trap and trace device applies not only to the **Subject Telephone Number[s]** listed above, but also to any changed telephone number(s) subsequently assigned to an instrument bearing the same **[insert as appropriate ESN/IMSI/SIM]** as the **Subject Telephone Number[s]** or any changed **[insert as appropriate ESN/IMSI/SIM]** subsequently assigned to the same telephone number as the **Subject Telephone Number[s]**, or any additional changed telephone number(s) and/or **[insert as appropriate ESN/IMSI/SIM]**, whether the changes occur simultaneously or consecutively, listed to the same subscriber and wireless telephone account as the **Subject Telephone Number[s]**, **[insert only if requested in application - Confirm with Tech Agent]** and on any cellular phone that is within close proximity to the government device that may autonomously register with the device,⁶ within the 60-day period authorized by this Order;

IT IS FURTHER ORDERED, pursuant to 18 U.S.C. §§ 3123(a)(1) and ' 3123 (b)(2), that upon service of this order upon it, the local, long distance, and wireless carriers listed herein, any other communications service provider providing service to the **Subject Telephone Number[s]**, and any other person or entity

⁶Once the **Subject Telephone** is identified and located any data incidentally collected from non-target telephones shall not be recorded or retained.

providing wire communication service in the United States whose assistance may facilitate execution of this order, shall furnish Special Agents of the [**AGENCY/IES**] forthwith all information, facilities, and technical assistance necessary to accomplish unobtrusively the installation and use of the pen register and trap and trace devices and with minimum interference with the services that are accorded the persons with respect to whom the installation and use is to take place;

IT IS FURTHER ORDERED that the local, long distance, and wireless carriers, and any other person or entity providing wire or electronic communication service in the United States whose assistance is used to facilitate execution of the Order, furnish the results of the pen register and trap and trace devices to Special Agents of the [**AGENCY/IES**] as soon as practicable, on a continuing basis, twenty four (24) hours a day for the duration of the Order.

IT IS FURTHER ORDERED that the local, long distance, and wireless carriers be compensated by the investigative agency for reasonable expenses directly incurred in providing technical assistance; and,

Good cause having been shown, IT IS FURTHER ORDERED, pursuant to 18 U.S.C. ' ' 2705(b) and 3123(d), that this Order and the Application be sealed until otherwise ordered by the Court, and that the local, long distance, and wireless carriers listed herein, any internet service provider or other electronic

communications provider providing voice-over IP telephony, and
any other local, long distance, or wireless carrier servicing the
Subject Telephone Number[s] who is obligated by the order to
provide assistance to the Applicant, shall not disclose in any
manner, directly or indirectly, by any action or inaction, to the
listed subscriber(s) for the **Subject Telephone Number[s]**, the
occupant of said premises, the subscribers of the incoming calls
to or outgoing calls from the **Subject Telephone Number[s]**, or to
any other person, the existence of this Order, in full or
redacted form, of the pen register or trap and trace devices, or
of this investigation, unless otherwise ordered by this court.

IT IS FURTHER ORDERED that the identity of any targets of
the investigation may be redacted from any copy of the Order
served on any service provider or other person, and that this
order and application be SEALED until otherwise ordered by the
court.

*****WARNING!! ONE LAST THING: BEFORE FILING, SEARCH FOR ALL BRACKETS (A)@ IN APPLICATION AND ORDER TO MAKE SURE THAT ALL BRACKETS HAVE BEEN DELETED, ALL BRACKETED PHRASES HAVE BEEN FILLED IN OR DELETED AND THAT YOU HAVE REMOVED ALL BOLD EXCEPT FOR ASUBJECT TELEPHONE NUMBER[S]@*****

Keeping up with the *Jones's*

**Some Thoughts About Writing an
Affidavit and Order for a Ping or
Stingray that Complies with Various
Opinions in *Jones v United States***

By: Richard M. Wintory

Office of the Arizona Attorney General

Introduction

So, this case catches us up a bit short, despite the outcome not being a surprise. The reasoning, however, certainly surprised me! The majority redefines a search:

We hold that the Government's installation of a GPS device on a target's vehicle, and its use of that device to monitor the vehicle's movements, constitutes a "search."

This holding alone isn't a problem. The Court was unanimous that had the warrant issued in the case been executed legally (i.e. within the 10 days it was valid and in the jurisdiction of the issuing magistrate) the "search" would have been "reasonable" and hence legal. For our cases, getting a warrant prior to installation of trackers on vehicles isn't unusual; however, the thing that we've been doing, is replacing trackers with GPS orders pinging our target's phones to monitor their location over extended periods of time. We've also been using stingrays (typically as part of a wiretap investigation) to gather information telling us the phone number being used by our targets; occasionally while they are in public places but other times in protected places such as a home, office or their vehicle. Our approach in getting authorization for these techniques has ranged from adaptations of "go bys" written for pen registers to search warrants to wiretaps. In some cases the approach followed is inspired by Nike (we just do it).

These two techniques, pings and stingrays, while not specifically addressed in the *Jones* holding, must be reviewed in light of the majority and concurring opinions. ***I believe both are likely going to be viewed as "searches" whether used against target in public places or in homes and will require an authorization that is the equivalent of a search warrant, (i.e. based on an affidavit stating probable cause the location or identification of particularly described items or persons are evidence that will tend to establish the commission of a crime or tend to connect a person(s) to its commission.) Further I believe the Court's order will need to make appropriate findings and define the manner and time of the execution.***

A search occurs with any trespass on or in personal property to gather information.

The *Jones* majority holds even a technical physical intrusion, or "trespass" into or even on a protected place for the purpose of gathering information, constitutes a search. Thus, even though the tracker was only stuck on the outside of the undercarriage of a car, this was a "trespass" and when done to gather information, the majority holds, a search. But, we exclaim, our pings do no such thing! In fact, like the beepers placed in barrels of chemicals later bought by the bad guys in *Knott and Karo*, the technology that

lets us ping was in the device when our target purchased it so, *caveat emptor*, baby! Similarly, stingrays read signals floating through the air requiring no “trespass”. Unfortunately, the **Jones** majority and concurring opinions didn’t stop there.

The majority double taps us by holding that even if we avoid a physical intrusion, the information we gather may still be a “search” if it violates **Katz’s** “reasonable expectation of privacy” so, to not “search” we not only have to avoid physical trespasses to obtain information but survive a newly minted “**Katz** invasion of privacy analysis. This means even without a “trespass”, if we intrude on a reasonable expectation of privacy to obtain information, we still have conducted a “search”:

We do not make trespass the exclusive test. Situations involving merely the transmission of electronic signals without trespass would remain subject to Katz analysis. (at pg 11)

The Court continues by addressing Justice Alito’s concurrence which agrees we lose but for a different reason. Justice Alito and his 3 concurrers believed the “trespass” isn’t a big deal but that it’s a “search” based on **monitoring** the beeper for 30 days:

“Thus, even assuming that the concurrence is correct to say that “[t]raditional surveillance” of Jones for a 4-week period “would have required a large team of agents, multiple vehicles, and perhaps aerial assistance,” our cases suggest that such visual observation is constitutionally permissible. ***It may be that achieving the same result through electronic means, without an accompanying trespass, is an unconstitutional invasion of privacy,*** but the present case does not require us to answer that question. We may have to grapple with these “vexing problems” in some future case where a classic trespassory search is not involved and resort must be had to **Katz** analysis; but there is no reason for rushing forward to resolve them here.”

While a unanimous Court believes we may be “searching” with pings and stingrays; a majority of the Court believes gathering electronic information even without a trespass is still a “search”

So, here’s where we stand. A majority of the Court (the 4 justices joining in the majority opinion plus Sotomayor concurring) say we “search” with any “trespassory” placement of a device to gain information and every member of the Court agreed that at least we “may” commit an “unconstitutional invasion of privacy” by achieving the same result as extensive traditional surveillance through electronic means (such as a ping or stingray).

Whether it's a "may" or "is" will wait for a future case. But reading the opinions more carefully strongly suggests the answer and the path we should take immediately.

The Alito led concurrence got 4 votes arguing that a **Katz** "invasion of privacy" analysis (which every member of the Court agreed is the correct standard) would lead to a conclusion of an unconstitutional invasion of privacy for use of techniques like pings and stingrays. Again, the majority said Justice Alito "may" be correct, but is there a 5th vote already giving the Alito view the majority?

Sadly, yes. Justice Sotomayor ends any hope of treating pings (or stingrays) the same as a pen register. In her concurrence she fully embraces Justice Alito's view that 30 day pings are "searches":

"In cases of electronic or other novel modes of surveillance that do not depend upon a physical invasion on property, [read pings and stingray] the majority opinion's trespassory test may provide little guidance. But situations involving merely the transmission of electronic signals without trespass would remain subject to Katz analysis."

As Justice Alito incisively observes:

"...the same technological advances that have made possible non trespassory surveillance techniques will also affect the Katz test by shaping the evolution of societal privacy expectations. Post, at 10–11."
Under that rubric, I agree with JUSTICE ALITO that, at the very least, "longer term GPS monitoring in investigations of most offenses impinges on expectations of privacy." Post, at 13.

In fact, the only reason Justice Sotomayor doesn't join the Alito concurrence (which would have made it the majority opinion rather Justice Scalia's) is because *it didn't go far enough* in doing us dirty. First, she likes the majority's automatic loss for us with an investigatory trespass:

By contrast, the trespassory test applied in the majority's opinion reflects an irreducible constitutional minimum: When the Government physically invades personal property to gather information, a search occurs.

Next, Justice Sotomayor (alone, thank goodness) makes the case the Court should reverse the unprotected status of the data we collect with pen registers and subpoenas that require (by statute) nothing other than a certification of relevance:

More fundamentally, it may be necessary to reconsider the premise that an individual has no reasonable expectation of privacy in information voluntarily disclosed to third parties. E.g., Smith, 442 U. S., at 742; United States v. Miller, 425 U. S. 435, 443 (1976) (holding the Fourth Amendment doesn't protect against use of pen registers or subpoena's for records, respectively).

Simply put, while every member of the Court may agree, it is inconceivable that there aren't at least 5 votes putting pings and stingrays as "searches" presumptively requiring a warrant.

Does the automobile exception allow placement and monitoring of trackers?

The Government, by failing to argue from the get go the automobile exception permitted the use of the tracker on Jones's vehicle even without a warrant, forfeited the opportunity for the Supreme Court to address it (majority opinion at 12). Thus, I certainly feel that for cases where our pc is strong and time is short making a warrant not feasible, relying on the automobile exception **to place** a tracker isn't foreclosed by **Jones**. This allows time to then obtain an order to monitor the tracker for an extended period of time.

Information gathering using Stingrays is a "search"

These devices read cell phone signals in an area (the size of which can vary). When combined with visual surveillance we can deduce what cell number a target is using after taking readings from several locations the target is observed. Typically, the readings are taken while the target is in both public and private places. Until **Jones**, I had advised agents that readings taken while the target is in public places were safer "legally" as opposed to the target's home. I thought (and still think) we're when stingraying or pinging targets who are using their phone while in a home based on **KYLLO V. UNITED STATES** 533 U.S. 27 (2001). Agents used a thermal imager to build p.c. for a warrant to seize a grow operation. The Court (again with Justice Scalia doing us in) held:

"Where, as here, the Government uses a device that is not in general public use, to explore details of the home that would previously have been unknowable without physical intrusion, the surveillance is a "search" and is presumptively unreasonable without a warrant."

Kyllo's holding, seems to control when we ping and learn our target phone is in (or *not* in) a home. Or use a stingray and gather data from which we deduce the cell number being used from inside a home. It is true these devices often tell us nothing about

what's going on in a home as when they put our phone down in a public place, such as a road or restaurant.

However, as discussed above, *Jones* reinvigorates the "Katz invasion of privacy" analysis and there appear to be at least 5 votes that "Owners of GPS-equipped cars and smartphones do not contemplate that these devices will be used to enable covert surveillance of their movements." (Sotomayor concurring at 5), much less the number of the cell phone in their hand.

Can we use existing provisions of state law to obtain constitutionally sound ping and stingray orders?

Justice Alito's concurrence also invited Congress to address these issues with legislation as they did with the wiretap and pen register statutes.

In the meantime, we can ping and stingray using our state wiretap, pen register and search warrant statutes as the authority for orders. To protect our cases, our affidavits and the court's orders have to be focused on the legal issues relevant to pings and stingrays.

This means we need to add information to our ping affidavits beyond the minimal showing sufficient for a pen register application. Ironically, the showing needs to be different than even a wiretap affidavit and focused not on the use of the phone to facilitate criminality but how *locating* the device or *identifying* its assigned number are "evidence" and thus subject to seizure. Below are suggestions for the different situations we're seeking pens and stingrays:

Our authority (and the requirements) for a search warrant are in our statutes:

13-3911. Definition

A search warrant is an order in writing issued in the name of the state of Arizona, signed by a magistrate, directed to a peace officer, commanding him to search for personal property, persons or items described in section 13-3912.

ARS13- 3913 incorporates the Fourth Amendment by requiring:

- a. 13-3913. Conditions precedent to issuance
- b. No search warrant shall be issued except on probable cause, supported by affidavit, naming or describing the person and particularly describing the property to be seized and the place to be searched.

The stuff we can seize is listed in ARS 13-3912:

13-3912. Grounds for issuance

A search warrant may be issued upon any of the following grounds:

1. When the property to be seized was stolen or embezzled.

2. When the property or things to be seized were used as a means of committing a public offense.

3. When the property or things to be seized are in the possession of a person having the intent to use them as a means of committing a public offense or in possession of another to whom he may have delivered it for the purpose of concealing it or preventing it being discovered.

4. When property or things to be seized consist of any item or constitute any evidence which tends to show that a particular public offense has been committed, or tends to show that a particular person has committed the public offense.

5. When the property is to be searched and inspected by an appropriate official in the interest of the public health, safety or welfare as part of an inspection program authorized by law.

6. When the person sought is the subject of an outstanding arrest warrant

I've highlighted the two provisions that may apply to us pinging or stingraying to learn the location (or number) of a device.

The bottom line is we must establish pc that a given phone is being used:

1. to commit our offenses **and**
2. that locating that instrument (for a ping) **or**

Learning the number (for a stingray) will:

1. Tend to show an offense is being committed, or
2. Tend to show a particular person is committing the offense.

In our cases, typically, we're intercepting calls indicating a partially identified bad guy is doing bad things and planning to do more, often with other bad guys we've not identified at all. In these cases we easily show the necessary stuff by describing the calls and stating that:

1. Bad guy Inu is a using this phone to commit offenses.
2. We don't have bad guy Inu fully identified.

3. Locating bad guy Inu will enable us to identify him fully, thus tending to connect him to the offenses described in (1)

In other cases we're hearing the bad things may be occurring at locations that our guy may be traveling to. In these cases:

1. Listed offenses are occurring at static locations such as stash houses for drugs or money.
2. Our bad guy is visiting them while carrying our target phone
3. Tracking our bad guy's location will lead us to the places these offenses are being committed thus tending to establish the listed offenses are occurring
4. Finding these locations will also identify co-conspirators and tend to connect them to the commission of the listed offenses.

Additionally, when seeking ping or stingray orders during an investigation with an ongoing wire intercept authorization:

- We should incorporate the previously filed affidavits and 10 day reports when going back to our judge. If we're forced to go to another judge (due to availability issues) we should cut and paste your qualifications and experience from those affidavits.
- We've got to add the language from the search warrant statutes that make the **location** of the target phone subject to seizure in both the affidavit and the order as described above.

How long can the order authorize pinging or stingraying?

Our affidavits and the judge's order must also address the time frame in order to avoid the "general warrant" label that would be fatal. Our affidavits should describe the offenses are ongoing (or incorporate relevant portions of other submitted affidavits) and provide a basis to believe the "evidence" we've described will be available to be seized for the period of time we request.

A. INTRODUCTION

[YOUR NAME], an Assistant United States Attorney for the _____ District of _____, hereby applies to the Court for an order pursuant to 18 U.S.C. §§ 3122 and 3123, authorizing the installation and use of a pen register and trap and trace device on **[Subject Telephone Number[s]**, which is a cellular (mobile) device issued by **[Name of carrier]**. The identifying numbers for this particular mobile telephone are listed below. Definitions for each number are provided in Attachment A which is incorporated herein by reference:

Electronic Serial Number (ESN):

International Mobile Subscriber Identity (IMSI):

International Mobile Equipment Identity (IMEI):

Mobile Equipment Identifier (MEID)

2. Pursuant to 18 U.S.C. §§ 2703(c) and 2703(d), directing the electronic service providers to disclose or provide upon oral or written request by Special Agents of the **[AGENCY]**:

a. Records or other information identifying subscribers or customers (but not including the contents of communications or toll records), namely, subscriber name, address, date of birth, social security number, driver's license (state and number), contact names and numbers, employment information, method of payment, length of service, and type of service utilized, for all published, non-published, listed, or

unlisted numbers, dialed or otherwise transmitted to and from the **Subject Telephone Number[s]**;

b. All changes (including additions, deletions, and transfers) in service regarding the **Subject Telephone Number[s]** to include telephone numbers and subscriber information (published, non-published, listed, or unlisted) associated with these service changes; [and]

c. For the **Subject Telephone Number[s]**, records or other information pertaining to subscriber(s) or customer(s), including historical cell site information and call detail records, including records for any two way radio communications features as may be incorporated into the telephone handset, for the following dates: _____ to the present (but not including the contents of communications).

d. For the **Subject Telephone Number[s]**, all cell site information provided to the government on a continuous basis contemporaneous with call origination (for outbound calling) and call termination (for incoming calls), and at such other time upon the oral or written request of the government, including if reasonably available, during the progress of a call. Specific disclosure of cell site information will assist law enforcement in identifying the approximate physical location of the **Subject Telephone Number[s]** and will not disclose content of the calls.

II. CERTIFICATION FOR A PEN REGISTER AND A TRAP AND TRACE DEVICE PURSUANT TO 18 U.S.C. §§ 3122 AND 3123

In support of this application, I state the following:

1. I am an "attorney for the Government" as defined in Rule 1(b)(1) of the Federal Rules of Criminal Procedure, and therefore, pursuant to 18 U.S.C. § 3122, may apply for an order authorizing the installation and use of pen registers and trap and trace devices.

2. I certify that the information likely to be obtained from the pen register and trap and trace devices on the **Subject Telephone Number[s]** is relevant to an ongoing criminal **[fugitive]** investigation being conducted by the **[AGENCY]** in connection with possible violations of federal criminal statutes, including **[CITE VIOLATION(S) AND STATUTE(S), I.E. NARCOTICS DISTRIBUTION IN VIOLATION OF 21 U.S.C. § 841(A)(1)]** by **[LIST MAIN TARGET(S) OR STATE "UNKNOWN INDIVIDUALS"]**.

3. Therefore, based upon the above Certification, and pursuant to 18 U.S.C. §§ 3122 and 3123, I request that the Court issue an Order authorizing:

a. The **[AGENCY]** to install, or cause the provider to install, and use **[continued use]** a pen register device(s) anywhere in the United States to record or decode dialing, routing, addressing, or signaling information (including "post-cut-through dialed digits") transmitted from the **Subject Telephone Number[s]**, to record the date and time of such dialings or transmissions, and to record the length of time the telephone receiver in question is "off the hook" for incoming or outgoing calls, for a period of sixty days from the date the order is filed by the court¹.

¹For the purpose of this application and subsequent Order, "transmitted" shall include dialing, routing, addressing, or signaling information transmitted over the communication service provider's network by a two-way radio feature (including, but

b. The **[AGENCY]** to install, or cause the provider to install, and use **[continued use]** trap and trace device[s] on the **Subject Telephone Number[s]** anywhere in the United States to capture and record the incoming electronic or other impulses which identify the originating numbers or other dialing, routing, addressing, or signaling information reasonably likely to identify the source of a wire or electronic communication and to record the date, time, and duration of calls created by such incoming impulses, for a period of sixty days from the date the order is filed by the court.

c. That, pursuant to 18 U.S.C. § 3123(b)(1)(c), the requested **[installation and use] [continued use]** of a pen register and trap and trace device permit the use of such a pen register and trap and trace device not only on the **Subject Telephone Number[s]**, but also on any changed telephone number(s) subsequently assigned to an instrument bearing the same **[insert as appropriate ESN/IMSI/SIM]** as the **Subject Telephone Number[s]**, or any changed **[insert as appropriate ESN/IMSI/SIM]** subsequently assigned to the same telephone number as the **Subject Telephone Number[s]**, or any additional changed telephone number(s) and/or **[insert as appropriate ESN/IMSI/SIM]**, whether the changes occur consecutively or simultaneously, listed to the same subscriber and wireless telephone account number as the **Subject Telephone Number[s]**; **[insert as appropriate—Confirm with Tech Agent**

not limited to, Nextel's "Direct Connect/Direct Dispatch," Verizon Wireless' "Push to Talk," or Sprint's "ReadyLink"). The two-way radio feature, like a walkie-talkie, provides communication between similarly equipped cellular phones by pressing a button on the telephone. Like a pen register or trap and trace on a telephone, a pen register or trap and trace for information transmitted by the two-way radio feature will not disclose content of the call.

whether "target filtering" is possible] and on any cellular telephone that is within close proximity to the government device that may autonomously register with the device,² within the 60-day period

d. Pursuant to 18 U.S.C. § 3123(a)(1) and § 3123(b)(2), I further request that the Court direct that upon service of the Order upon it, the local, long distance, and wireless carriers listed in the proposed Order, any other communications service provider providing service to the **Subject Telephone Number[s]**, and any other person or entity providing wire communication service in the United States whose assistance may facilitate execution of the order, furnish forthwith all information, facilities, and technical assistance necessary to

² This is necessary in order to identify the Subject Telephone to the exclusion of others also operating within a particular cell site. We respectfully do not concede that a device used to receive radio signals, emitted from a wireless cellular telephone, that merely identify that telephone to the network (i.e., registration data) constitutes a "pen register" or "trap and trace" device. Cf. In the Matter of the Application of the U.S. for an Order Authorizing the Use of a Cellular Telephone Digital Analyzer, 885 F. Supp. 197, 201 (C.D. Cal. 1995) (interpreting prior definition of pen register device and holding that no court order is required to use a digital analyzer to capture cellular telephone ESN, telephone numbers, and dialed numbers, because the device does not "attach" to a telephone line). We nonetheless submit this request for authorization out of an abundance of caution, on the chance that the device may collect dialed numbers generated by a phone initiating an outgoing call attempt while it is temporarily registered with the device. To the extent such information is incidentally acquired, it is agency policy not to record or retain it or any data associated with non-target telephones. Moreover, the government uses a number of criteria to limit both the collection of data and to minimize any potential temporary disruption of service, most notably by operating the device for limited duration and only when the cell site information acquired from the provider indicates that the Subject Telephone is operating nearby.

accomplish unobtrusively the installation and use of the pen register and trap and trace devices and with minimum interference with the services that are accorded the persons with respect to whom the installation and use is to take place, with compensation to be paid by the investigative agency for reasonable expenses directly incurred in providing such facilities and assistance.²

e. I further request that the Order direct the local, long distance, and wireless carriers, and any other person or entity providing wire or electronic communication service in the United States whose assistance is used to facilitate execution of the order, to furnish the results of the pen register and trap and trace devices to Special Agents of the [AGENCY] as soon as practicable, on a continuing basis, twenty-four (24) hours a day for the duration of the Order.

Jurisdiction and Statutory Considerations: Section 3123, as amended (P.L. 107-56 (2001)), empowers courts to authorize

²The reference to "another communication service provider" is necessary so that the Court Order is still effective in the event that the **Subject Telephone Number[s] [is] [are]** transferred to another carrier pursuant to "Local Number Portability" ("LNP"). LNP allows a telephone user to change his/her telephone company but still keep the same telephone number. However, to transfer (i.e. "port") a telephone number pursuant to LNP, the subscriber information must remain the same. Thus, this reference applies if the **Subject Telephone Number[s] [is] [are]** transferred (i.e. "ported") to another telephone carrier, but the telephone number and subscriber information remain the same.

the installation and use of pen registers and trap and trace devices in other districts. Section 3123(a)(1) provides that the Court may enter an Order authorizing a pen register or trap and trace device "anywhere within the United States. . . ." Moreover, Section 3127(2)(A) now defines a "court of competent jurisdiction" as "any District Court of the United States (including a Magistrate Judge of such a Court) . . . having jurisdiction over the offense being investigated." 18 U.S.C. § 3127(2)(A)

Section 3122 "was not intended to require independent judicial review of relevance; rather, the reviewing Court need only verify the completeness of the certification." In re United States, 10 F.3d 931, 935 (2d Cir. 1993) (citing S. Rep. No. 541, 99th Cong., 2d Sess. 47 (1986), reprinted in 1986 U.S.C.C.A.N. 3555, 3601); see also United States v. Fregoso, 60 F.3d 1314, 1320 (8th Cir. 1995) (holding that the judicial role under Section 3123(a) is ministerial in nature because a proper application under Section 3122 mandates entry of the Order);

Brown v. Waddell, 50 F.3d 285, 290 (4th Cir. 1995) (Section 3122 does not require the government to establish probable cause to obtain a pen register or trap and trace device); United States v. Newman, 733 F.2d 1395, 1398 (10th Cir. 1984) ("[N]o showing of probable cause -- or even 'sufficient cause,' as defendant suggests -- is necessary to justify authorization of a pen register.")

Section 3123(b)(1)(C) has been amended to require the Court to specify in the Order "the attributes of the communications to which the Order applies, including the number or other identifier" 18 U.S.C. § 3123(b)(1)(C). The account

number, when combined with the same subscriber name for the **Subject Telephone Number[s]** sufficiently specifies "the attributes of the communications to which the order applies, including the number or other identifier . . ." as required by § 3123(b)(1)(C). Cf. United States v. Duran, 189 F.3d 1071, 1083-1086 (9th Cir. 1999) (holding interception of wire communications on a cellular telephone with a changed telephone number followed by a changed ESN was covered by the order authorizing the interception of wire communications even though the court order authorizing the wiretap only anticipated a changed telephone number but did not anticipate a changed ESN).

III. SPECIFIC AND ARTICULABLE FACTS ESTABLISHING REASONABLE GROUNDS TO BELIEVE THAT SUBSCRIBER RECORDS AND CELL SITE INFORMATION ARE RELEVANT AND MATERIAL TO AN ONGOING CRIMINAL INVESTIGATION PURSUANT TO 18 U.S.C. § 2703

1. Title 18, United States Code, Section 2703(d) provides that a court may issue an order authorizing disclosure of a record or other information pertaining to a telephone subscriber or customer (not including the contents of communications) when a government agency provides the court with:

[S]pecific and articulable facts showing that there are reasonable grounds to believe that the contents of a wire or electronic communication, or the records or other information sought, are relevant and material to an ongoing criminal investigation.

The statute, by its own language, precludes holding the Government to a higher standard of proof, such as probable cause. See Communications Assistance for Law Enforcement Act, Pub. L. No. 103-414 § 207(2), reprinted in 1992 U.S. Code Cong. & Admin. News 4292. The House Report reflected that "[t]his section imposes an intermediate standard to protect on-line

transactional records. It is a standard higher than a subpoena, but not a probable cause warrant." See H.R. Rep. No. 103-827, at 31-32 (1994), reprinted in 1994 U.S.C.A.A.N. 3489, 3511-12.¹

2. For the purposes of obtaining a Court Order for disclosure as described in 18 U.S.C. § 2703(c)(1), and in order to satisfy the requirements of 18 U.S.C. § 2703(d), government counsel, based on discussions with Special Agent **[AGENT'S NAME]**, hereby sets forth the following specific and articulable facts showing that there are reasonable grounds to believe that the records or other information identifying subscribers (but not including the contents of communications) for telephone numbers identified through the pen register and trap and trace device on **the Subject Telephone Number[s]**, cell site information regarding the **Subject Telephone Number[s]**, subscriber information associated with any service changes regarding the **Subject Telephone Number[s]**, [and the records or other information pertaining to subscribers (but not including the contents of communications) for the **Subject Telephone Number[s]**] will be relevant and material to an ongoing criminal **[fugitive]** investigation:

¹ Persons calling to and from the **Subject Telephone Number[s]** do not have a Fourth Amendment privacy interest regarding their subscriber information. United States v. Fregoso, 60 F.3d 1314, 1321 (8th Cir. 1995) (rejecting defendant's challenge to court order permitting phone company to supply subscriber information "for the telephone numbers obtained from the pen register and the caller identification service," holding, "We agree with the magistrate judge's assessment that because this information is listed in phone books and city directories, and at a bare minimum revealed to the phone company to obtain telephone service, there can be no expectation that this information will remain private."). See Smith v. Maryland, 442 U.S. 735, 742-44 (1979) ("a person has no legitimate expectation of privacy in information he voluntarily turns over to third parties.")

a. [INSERT SUMMARY OF FACTS RELATING TO INVESTIGATION AND RELEVANCE OF SUBJECT TELEPHONE NUMBER[S] TO INVESTIGATION. PLEASE BE AWARE THAT THIS SECTION IS SEPARATE FROM THE CERTIFICATION UNDER SECTION 3122 BECAUSE IT IS MADE PURSUANT TO SECTION 2703(d), WHICH REQUIRES A PRESENTATION OF PROOF, NOT MERELY A CERTIFICATION. IN ORDER TO OBTAIN A SECTION 2703 ORDER, WE MUST PRESENT "SPECIFIC AND ARTICULABLE FACTS ESTABLISHING REASONABLE GROUNDS TO BELIEVE THAT SUBSCRIBER INFORMATION AND CELL SITE INFORMATION ARE RELEVANT AND MATERIAL TO AN ONGOING CRIMINAL INVESTIGATION." (THIS IS A LOWER STANDARD THAN PROBABLE CAUSE.) AS A RESULT, YOU NEED TO MAKE SURE YOU SET FORTH SPECIFIC FACTS RE: YOUR INVESTIGATION, WHY AGENT THINKS TARGET(S) IS/ARE USING THE SUBJECT TELEPHONE(S), AND WHY GETTING SUBSCRIBER AND CELL SITE INFORMATION IS RELEVANT TO YOUR INVESTIGATION. YOU CAN ALSO INCLUDE ANY RELEVANT EXPERT OPINIONS OF YOUR AGENTS. TRY TO LIMIT THIS SECTION TO 4-5 PARAGRAPHS, ALTHOUGH MORE MAY BE NECESSARY DEPENDING ON THE CASE. IF QUOTING WIRETAPPED CALLS OVER THE SUBJECT TELEPHONE, USE NO MORE THAN TWO CALLS PER TELEPHONE AND INCLUDE AGENT'S INTERPRETATION OF ANY CODED LANGUAGE. IF WIRETAPPED CALL IS LENGTHY, SUMMARIZE.]

IMPORTANT: THE MAGISTRATE JUDGES NOW REQUIRE THAT IF THIS IS AN EXTENSION OF A PEN/TRAP ON SUBJECT TELEPHONE[S], YOU MUST INCLUDE A PARAGRAPH CONTAINING THE DATE, MISC. NO. AND SIGNING JUDGE OF ANY PRIOR PEN REGISTER ORDERS ON EACH SUBJECT TELEPHONE[S] IN YOUR CASE AND A SUMMARY OF THE RESULTS OF THE PRIOR PENS DURING THE MOST RECENT 60-DAY PERIOD. IF SUMMARY OF PAST PEN[S] DOES NOT INDICATE CRIMINAL ACTIVITY, JUDGE MAY NOT GRANT REQUESTED EXTENSION.

b. [INSERT EXPLANATION AS TO WHY RECORDS OR OTHER INFORMATION IDENTIFYING SUBSCRIBERS FOR TELEPHONE NUMBERS OBTAINED THROUGH THE PEN REGISTER AND TRAP AND TRACE DEVICES ON THE SUBJECT TELEPHONE NUMBER[S] ARE RELEVANT AND MATERIAL TO YOUR INVESTIGATION.

[IF FUGITIVE INVESTIGATION, INSERT THE FOLLOWING: In [AGENT'S] experience, information identifying subscribers for numbers obtained from numbers captured by the pen register and the trap and trace devices, and subscriber information associated with any service changes, has yielded information that is relevant and material to a fugitive investigation. Such information includes leads relating to the names of family members, associates, friends and other individuals who may assist in the

apprehension of the fugitive or may aid in the harboring of the fugitive. [AGENT] has advised me that one way to identify associates may be to obtain information identifying subscribers for calls made to and from the Subject Telephone Number and then conduct an investigation concerning those individuals. Based upon the identifying information, [AGENT] would then direct other investigators to monitor those addresses and determine if the fugitive is present or if the associates or family members may lead investigators to him.]

c. [INSERT FOLLOWING EXPLANATION AS TO WHY CELL SITE INFORMATION IS NEEDED FOR THE SUBJECT TELEPHONE NUMBER[S]: The investigating agents have further advised me that the general geographic location of the **Subject Telephone Number[s]** derived from cell site information used by the **Subject Telephone Number[s]** can be used to corroborate the observations of surveillance agents. More specifically, surveillance agents can compare observations of the user of the **Subject Telephone Number[s]** with cell site information in order to verify the identification and proximate location of the user of the **Subject Telephone Number[s]**.

[INSERT IF REQUESTING TOLL/CALL DETAIL RECORDS: d. INSERT EXPLANATION AS TO WHY YOU NEED RECORDS OR OTHER INFORMATION PERTAINING TO SUBSCRIBERS OF THE SUBJECT TELEPHONE NUMBER[S]. FOR FUGITIVE CASES: Historical records (i.e. toll information and/or call detail records) for the Subject Telephone Number[s] are important in fugitive investigations to establish a past pattern of activity for the fugitive (i.e. where he/she has been, who he/she has been calling) because it helps to determine where the fugitive is at now. The government is requesting historical records for a [NUMBER OF DAYS, I.E. 30 OR 60]-day period because [EXPLAIN NEED FOR PARTICULAR PERIOD OF TIME].

3. Accordingly, based upon the above proffer, and pursuant to 18 U.S.C. §§ 2703(c) (1) (B) and 2703(d), because there are reasonable grounds to believe that such information is relevant and material to the ongoing investigation, I further request that the Court issue an Order requiring the providers listed in the proposed Order, lodged concurrently herewith, and any other person or entity providing wire or electronic communications service in the United States whose assistance may facilitate execution of the Order, to disclose, or provide upon oral or written request by Special Agents of the [AGENCY] the information set forth above in paragraph A2.

D. REQUEST THAT ORDER PRECLUDE NOTICE AND THAT APPLICATION AND ORDER BE FILED UNDER SEAL

1. Based upon the information provided in this application, I believe disclosure of the requested Court Order may result in flight from potential prosecution or the destruction of or tampering with evidence, or may otherwise seriously jeopardize the investigation. Moreover, the exact nature of the Government "pen register" device and its configuration is classified as a law enforcement sensitive investigative technique, the disclosure of which would likely jeopardize other on-going investigations, and/or future use of the technique. Therefore, pursuant to 18 U.S.C. §§ 2705(b) and 3123(d), I request that this Application and Order be sealed and that the Court direct the local, long distance, and wireless carriers listed in the proposed Order, any internet service provider or other electronic communications provider providing voice-over IP telephony, and any other local, long distance, or wireless carrier servicing the **Subject Telephone Number[s]** who is obligated by the order to provide assistance to the

Applicant, not to disclose in any manner, directly or indirectly, by any action or inaction, to the listed subscriber(s) for the **Subject Telephone Number[s]**, the occupant of said premises, the subscribers of the incoming calls to or outgoing calls from the **Subject Telephone Number[s]**, or to any other person, the existence of this order, in full or redacted form, of the pen register or trap and trace devices, or of this investigation, unless otherwise ordered by this court.

2. I further request that the identity of any targets of the investigation may be redacted from any copy of the Order served on any service provider or other person, and that this order and application be SEALED until otherwise ordered by the court.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge and belief, and that this declaration was executed on [DATE] at [CITY], [STATE].

[YOUR NAME]
Assistant United States Attorney

ATTACHMENT A
Pertinent Definitions

Pen register: A "device or process which records or decodes dialing, routing, addressing, or signaling information transmitted by an instrument or facility from which a wire or electronic communication is transmitted, provided, however, that such information shall not include the contents of any communication . . ." 18 U.S.C. § 3127(3).

Trap and trace device: "a device or process which captures the incoming electronic or other impulses which identify the originating number" or other identifiers "reasonably likely to identify the source of a wire or electronic communication, provided, however, that such information not include the contents of any communication. 18 U.S.C. § 3127(4)

Post-cut-through dialed digits: Also called "dialed digit extraction features," are any digits that are dialed from the **Subject Telephone Number[s]** after the initial call setup is completed. For example, some post-cut-through dialed digits are telephone numbers, such as when a person places a calling card, credit card or collect call by first dialing a long-distance carrier access number and then, after the initial call is "cut through," dialing the telephone number of the destination party. That final number sequence is necessary to route the call to the intended party and, therefore, identifies the place or party to which the call is being made. Under these circumstances, the "post-cut-through" digits are the type of information (i.e., "dialing, routing, addressing, or signaling" information)

specifically authorized by the statute for capture. Post-cut-through dialed digits also can represent call content, such as when a person calls automated banking services and enters account numbers, or call voicemail systems and enters passwords, or calls pagers and dials call-back telephone numbers (which are considered numeric messages.) To the extent that additional digits that are content are received, the government will not use such information for any investigative purposes.

Electronic Serial Number (ESN): An eight (8) digit hexadecimal number which uniquely identifies a particular cellular telephone handset.

Mobile Equipment Identifier (MEID): A newer version of an ESN; used to uniquely identify a particular cellular telephone handset.

Subscriber Identity Module (SIM): The SIM is a card, sometimes called a "smart" card, which can be installed or inserted into certain cellular telephone handsets which contain subscriber-related data. This facilitates a telephone call from any valid cellular telephone since the subscriber data is used to complete the call rather than the telephone's internal serial number.

International Mobile Subscriber Identity (IMSI): A non-dialable 15 digit number stored on a SIM card which uniquely identifies a subscriber to the mobile telephone network. The IMSI number is unique to that SIM card and is never re-assigned. Thus, if the target exchanges his cellular telephone phone for

an updated model and/or changes his cellular telephone number, but retains his SIM card, the IMSI will remain the same.

International Mobile Equipment Identity (IMEI): A number which uniquely identifies the cellular telephone handset itself.

Cell Site: A cell site is located in a geographic area within which wireless service is supported through radio signaling to and from antenna tower(s) operated by a service provider. Cell sites are located throughout the United States. Cellular telephones that are powered on will automatically and periodically register or re-register with a cellular tower as the phone travels within the provider's service area. The registration process is the technical means by which the network identifies the subscriber, validates the account and determines where to route call traffic. This exchange occurs on a dedicated control channel that is clearly separate from that used for call content (i.e. audio)--which occurs on a separate dedicated channel. As used herein, "Cell site information" refers categorically to any and all data associated with registration of the Subject Telephone with cell sites/network, as well as other data used by the network to establish a connection with the telephone handset and to maintain connectivity to the network. This includes the physical location and/or address of the cellular tower, cell site sector, control channel number, neighbor cell lists, and any identification numbers, processing data, and parameters not pertaining to the contents of a call.

Call detail records: are similar to toll records (i.e. historical telephone records of telephone activity, usually listing outgoing calls and date, time, and duration of each

call), which are made and retained in the ordinary course of business. However, "call detail records" is the term used when referring to toll records of cellular telephones rather than hard line telephones. Unlike toll records, however, call detail records also include a record of incoming calls and the cell site/sector(s) used by the cellular telephone to obtain service for a call or when in an idle state.

Voice-over Internet Protocol telephony: Also called Voice-over IP or VoIP, is essentially a type of hardware and software that allows people to use the internet as a transmission medium for telephone calls. In general, this means sending voice information in the form of digital packets of information rather than sending it through the traditional public switch telephone network. Like a pen register or trap and trace on traditional telephone service, a pen register or trap and trace for VoIP service will not disclose the contents of the call.

UNITED STATES DISTRICT COURT
DISTRICT OF IDAHO

IN THE MATTER OF THE APPLICATION)
OF THE UNITED STATES OF AMERICA) MS _____
FOR AN ORDER AUTHORIZING THE USE OF A)
PEN REGISTER AND TRAP AND TRACE DEVICE)

**APPLICATION FOR PEN REGISTER/TRAP AND TRACE DEVICE AND
DISCLOSURE OF SUBSCRIBER AND OTHER INFORMATION**

The United States of America, by and through Wendy J. Olson, United States Attorney for the District of Idaho, and [AUSA], Assistant United States Attorney for said District, applies to the Court for an Order authorizing (1) the installation and use of a pen register and a trap and trace device (“Pen/Trap”) on cellular telephone number [Phone Number] (“Target Telephone”) pursuant to 18 U.S.C. § 3122 and § 3123; and (2) the disclosure of subscriber and other information for the numbers captured by the Pen/Trap pursuant to 18 U.S.C. § 2703(c) and (d). In support of this application, Applicant states the following:

1. Applicant is an “attorney for the Government,” as defined in Federal Rule of Criminal Procedure 1(b)(1), and is employed by a “governmental entity”, as defined in 18 U.S.C. § 2711. Therefore, under 18 U.S.C. § 2703(c) and (d), and § 3122, Applicant may apply for an order authorizing the installation and use of a Pen/Trap and disclosure of subscriber and other information for numbers captured by the Pen/Trap.

PEN/TRAP

2. “Upon an application made under 18 U.S.C. § 3122(a)(1), the Court shall enter an ex parte Order authorizing the installation and use of a pen register or trap and trace device anywhere within the United States, if the Court finds that the attorney for the Government has

certified to the Court that the information likely to be obtained by such installation and use is relevant to an ongoing investigation.” 18 U.S.C. ' 3123(a)(1).

3. A “pen register” is a device or process that records or decodes dialing, routing, addressing, or signaling information transmitted by a telephone that transmits a wire or electronic communication. 18 U.S.C. § 3127(3).

4. A “trap and trace device” is a device or process that captures the incoming electronic or other impulses which identify the originating number or other dialing, routing, addressing, and signaling information reasonably likely to identify the sources of a wire or electronic communication. 18 U.S.C. § 3127(4).

5. Applicant requests authorization to install and use a Pen/Trap on Target Telephone for a period of 60 days. Applicant certifies the **[Agency]** is conducting a criminal investigation of **[Target(s)' Name]** and others as yet unknown, in connection with possible violations of **[Crime Violation (ie, drug trafficking)]**. It is believed one or more of the subjects of the investigation are using the Target Telephone, a **[Type of Phone]** issued by **[Service Provider]**, subscribed to by **[Subscriber Name & Address]**, and used by **[User]** in furtherance of the subject offenses. The factual statement set forth later in this application supports this certification.

6. The **[AGENCY]** does not seek to intercept the contents of any wire or electronic communications. Neither will the **[AGENCY]** make use of “post-cut-through-digits”; digits dialed from Target Telephone after the initial call setup is completed. The **[AGENCY]** is required to “use technology reasonably available to it that restricts the recording or decoding of electronic or other impulses to the dialing, routing, addressing, and signaling information utilized in the processing and transmitting of wire or electronic communications so as not to include the contents of any wire or electronic communication.” 18 U.S.C. § 3121(c). The **[AGENCY]** is

unaware of any technology that restricts the recording or decoding of “post-cut-through-digits.” To the extent the Pen/Trap records or decodes information considered “content,” the [AGENCY] will make no investigative use of that information.

SUBSCRIBER AND OTHER INFORMATION

7. A Court may order “a provider of electronic communication service or remote computing service to disclose a record or other information pertaining to a subscriber to or customer of such service” if a governmental entity requesting such records or information “offers specific and articulable facts showing that there are reasonable grounds to believe that the . . . records or other information sought are . . . relevant and material to an ongoing criminal investigation.” 18 U.S.C. § 2703(c) and (d).

8. Pursuant to 18 U.S.C. § 2703(c) and (d), Applicant requests that the Court’s Order apply to the following entities/companies: [**Service Provider**], and any other provider of electronic communications service or remote computing service whose assistance may facilitate the execution of the Order (hereinafter “the entities/companies”). The Court should order the entities/companies to disclose to the [AGENCY], during the period of the Order, the

- (A) name;
- (B) address;
- (C) length of service (including start date) and types of service utilized; and
- (D) telephone or instrument number or other subscriber number or identity, including any temporarily assigned network address;

of a subscriber to or customer of Target Telephone, as well as for published, non-published, or unlisted dialing, routing, addressing, or signaling information captured by the Pen/Trap on Target Telephone. The Government does not seek the content of any communications.

9. In support of its request for a Pen/Trap and subscriber and other information, and based on discussions with **[Agent's Title and Name]**, Applicant sets forth the following specific and articulable facts. These facts establish that the information likely to be obtained is relevant to an ongoing criminal investigation being conducted by the **[Agency]**. They also establish reasonable grounds to believe the records and other information sought are relevant and material to an ongoing criminal investigation.

10. **[FACTUAL STATEMENT]**

11. “A governmental entity receiving records or information under [18 U.S.C. § 2703(c)] is not required to provide notice to a subscriber or customer.” 18 U.S.C. § 2703(c)(3). Therefore, pursuant to 18 U.S.C. § 2705(b), Applicant requests the Court order the entities/companies not notify any other person of the existence of the Court’s Order unless otherwise ordered by the Court. Notification of the existence of the Court’s Order may result in **[LIST ALL THAT APPLY AND STATE BRIEF REASON WHY THEY APPLY: (1) endangering the life or physical safety of an individual; (2) flight from prosecution; (3) destruction or tampering with evidence; (4) intimidation of potential witnesses; or (5) otherwise seriously jeopardizing an investigation or unduly delaying a trial.]**

ADDITIONAL REQUESTS

12. Because the assistance of the entities/companies will be necessary to accomplish the objectives of the requested Order, Applicant further requests that the Order direct the entities/companies furnish information, facilities, and technical assistance necessary to accomplish the installation of the Pen/Trap, including installation and operation of the devices unobtrusively and with a minimum of disruption of normal service. The entities/companies shall be compensated by **[Agency]** for reasonable expenses incurred in providing such facilities and

assistance in furtherance of the Order. *See* 18 U.S.C. § 3124.

13. It is further requested that the Court's Order apply to any changed telephone number(s) subsequently assigned to an instrument bearing the same cellular device as Target Telephone, or to any changed cellular device assigned to the same telephone number as Target Telephone, or to any additional changed telephone number(s) and cellular device(s), whether the changes occur consecutively or simultaneously, listed to the same subscriber and telephone account number as Target Telephone within the 60-day period authorized by the Order.

14. Applicant further requests the Court direct the entities/companies to notify agents of the [AGENCY] of any and all changes (including additions, deletions, and transfers) in service regarding Target Telephone if the [Agency] requests this information. This includes telephone numbers and subscriber information (published and non-published) associated with these service changes.

15. Applicant further requests Target Telephone remain active and in service, and if Target Telephone is targeted for deactivation due to non-payment or breach of contract, the [Agency] will incur the future billing costs at the point of deactivation and compensate the service provider for such additional billing costs beginning from the deactivation date and continuing through the time authorized by the Court's Order.

16. Applicant further requests, pursuant to 18 U.S.C. § 3123(d)(1), that this application and the Court's Order be sealed until otherwise ordered by the Court. Applicant also requests, pursuant to 18 U.S.C. § 3123(d)(2), that the Court direct the entities/companies not disclose the existence of the Pen/Trap or the existence of the investigation to the listed subscriber, or to any other person, unless or until otherwise ordered by the Court.

I declare the foregoing is true and correct to the best of my belief and knowledge.
Dated [**Month, Date, Year**].

Respectfully submitted,

WENDY J. OLSON
UNITED STATES ATTORNEY

[AUSA]
Assistant United States Attorney

UNITED STATES DISTRICT COURT
DISTRICT OF IDAHO

IN THE MATTER OF THE APPLICATION)
OF THE UNITED STATES OF AMERICA) MS _____
FOR AN ORDER AUTHORIZING THE USE OF)
A PEN REGISTER AND TRAP AND TRACE)
DEVICE FOR TELEPHONE NUMBER [Phone)
Number] AND DISCLOSURE OF RECORDS) FILED UNDER SEAL
AND OTHER INFORMATION.)

**ORDER FOR PEN REGISTER/TRAP AND TRACE DEVICE AND DISCLOSURE
OF RECORDS AND OTHER INFORMATION**

This matter is before the Court by application under 18 U.S.C. §§ 3122, 3123, and 2703(c) and (d), from Assistant United States Attorney [AUSA], an “attorney for the Government” as defined by Federal Rule of Criminal Procedure 1(b)(1), and a person employed by a “governmental entity,” as defined in 18 U.S.C. § 2711(4). The Applicant requests an Order authorizing the installation and use of a pen register and trap and trace device (“Pen/Trap”) on telephone number [Phone Number] (“Target Telephone”), a [Type of Phone] issued by [Service Provider]. The Applicant has also requested the disclosure of records and other information for the numbers captured by the Pen/Trap.

The Applicant has certified, and the Court finds, that the information likely to be obtained by such use is relevant to an ongoing criminal investigation being conducted by the [Agency] into possible violations of [Crime Violation (ie, drug trafficking)] by [Target's Name], and others as yet unknown. The Court also finds that the Applicant has set forth specific and articulable facts showing there are reasonable grounds to believe the records or other information sought are relevant and material to an ongoing criminal investigation.

THE COURT THEREFORE ORDERS:

Pursuant to 18 U.S.C. § 3123, that agents of the [**Agency**] may install, or cause to be installed, and use a pen register to record or decode dialing, routing, addressing, or signaling information transmitted from Target Telephone for a period of 60 days;

Pursuant to 18 U.S.C. § 3123, that agents of the [**Agency**] may install, or cause to be installed, and use a trap and trace device to capture the incoming electronic or other impulses which identify the originating number or other dialing, routing, addressing, and signaling information reasonably likely to identify the sources of a wire or electronic communication to Target Telephone for a period of 60 days;

Pursuant to 18 U.S.C. §§ 3124, upon service of this Order, [**Service Provider**] shall furnish agents of the [**Agency**] with all information, facilities, and technical assistance necessary to accomplish the installation and use of the Pen/Trap and such installation and use shall occur unobtrusively and with minimum interference with the services accorded the persons with respect to whom the installation and use is to take place;

This authorization for the installation and use of a Pen/Trap applies not only to the telephone number listed above for the Target Telephone, but also to any changed telephone number(s) subsequently assigned to an instrument bearing the same cellular device as the Target Telephone, or any changed cellular device subsequently assigned to the same telephone number as the Target Telephone, or any additional changed telephone number(s) and/or cellular device(s), whether the changes occur simultaneously or consecutively, listed to the same subscriber and wireless telephone account as the Target Telephone within the 60-day period authorized by this Order;

That **[Service Provider]** and any other person or entity providing wire or electronic communication service in the United States whose assistance is used to facilitate the execution of this Order (hereinafter “the entities/companies”), notify agents of the **[Agency]** of any and all changes (including additions, deletions, and transfers) in service regarding Target Telephone to include telephone numbers and subscriber information (published and non-published) associated with these service changes as requested by the **[Agency]**;

Pursuant to 18 U.S.C. § 2703(c) and (d), the entities/companies shall disclose upon the request of the **[Agency]**, during the period of this Order, the

- (A) name;
- (B) address;
- (C) length of service (including start date) and types of service utilized;
- and
- (D) telephone or instrument number or other subscriber number or identity including any temporarily assigned network address;

of a subscriber to or customer of Target Telephone, as well as for published, non-published, or unlisted dialing, routing, addressing, or signaling information captured by the Pen/Trap on Target Telephone;

That Target Telephone is to remain active and in service, and if Target Telephone is targeted for deactivation due to non-payment or breach of contract, the **[Agency]** will incur the future billing costs at the point of deactivation and compensate the service provider for such additional billing costs beginning from the deactivation date and continuing through the time authorized by this Order;

That the entities/companies shall be compensated by the **[Agency]** for reasonable

expenses incurred in providing such facilities and assistance in furtherance of this Order;

Pursuant to 18 U.S.C. § 3123(d)(1), that this Order and the Application be sealed until otherwise ordered by the Court, except that a copy of this Order may be served upon the entities/companies; and

Pursuant to 18 U.S.C. § 3123(d)(2), that the entities/companies not disclose the existence of the Pen/Trap or the existence of the investigation to the listed subscriber, or to any other person, unless or until otherwise ordered by the Court.

**[SEARCH WARRANT AFFIDAVIT FOR WIRELESS PHONE
HISTORICAL AND/OR REAL TIME CELL SITE DATA]**

AFFIDAVIT OF PROBABLE CAUSE

I, **[AGENT NAME]**, hereinafter referred to as Your Affiant, hereby swear or affirm the following information is true to the best of my knowledge:

AFFIANT'S QUALIFICATIONS

Your Affiant has been employed as a **[JOB TITLE]** with the **[AGENCY]** since **[DATE]**. **[DESCRIBE TRAINING AND EXPERIENCE TO THE EXTENT IT SHOWS QUALIFICATION TO SPEAK ABOUT THIS INVESTIGATION, CELLULAR TELEPHONES, AND OTHER TECHNICAL MATTERS]**.

Purpose of Affidavit: This affidavit will establish probable cause that **[SUBJECT(S)' NAME(S)]** uses a cellular telephone, particularly described below and in Attachment A (hereinafter referred to a "Target Telephone"), during the time when alleged violations of **[statutes]** have been committed, are allegedly currently being committed, and/or may allegedly continue being committed by **[SUBJECT(S)' NAME(S)]**. This Affidavit will also establish probable cause to believe that information derived from the Target Telephone will constitute evidence of these alleged criminal violations[**[, and will lead to the identification of as yet unknown individuals who are also engaged in committing of these alleged criminal violations]]**].

Your Affiant submits this Affidavit in support of an application for a search warrant under Federal Rule of Criminal Procedure Rule 41 and 18 U.S.C. § 3103A. The search warrant seeks authorization to obtain **[historical and]** prospective location information, particularly described below and in Attachment B, about the Target Telephone. **[WIRELESS PROVIDER]**, headquartered at **[PROVIDER ADDRESS]**, provides telephone service to the Target Telephone.

The information contained herein derives from Your Affiant's personal involvement with this matter and/or information obtained from other law enforcement personnel and/or witnesses who Your Affiant know to be credible. This affidavit is intended to establish sufficient probable cause for the requested warrant and does not set forth Your Affiant's entire knowledge of this matter.

[USE THIS PARAGRAPH IF THE LOCATION INFORMATION WILL HELP TO EFFECTUATE AN ARREST AND/OR LOCATE A FUGITIVE.] Based on the facts set forth in this affidavit, there is probable cause to believe that **[Fugitive]** has violated **[statutes]**. **[Fugitive]** was charged with these crimes on **[date]** and is the subject of an arrest warrant issued on **[date]**. **[[If appropriate: There is also probable cause to believe that [Fugitive] is aware of these charges and has fled.]]** There is also probable cause to believe that the location information described in Attachment B will assist law enforcement in arresting **[Fugitive]**, who is a "person to be arrested" within the meaning of Federal Rule of Criminal Procedure 41(c)(4).

CELLULAR TELEPHONE TERMINOLOGY

Established standards within the mobile telecommunications industry provide several means to identify telephone subscribers and/or the mobile equipment used by those subscribers. Used in conjunction with one another, these standard identifiers provide highly accurate means of uniquely identifying a particular telephone handset that is used by a particular subscriber. Telecommunications industry standards also establish various method/means for processing mobile telephone traffic. Telecommunications terms pertinent to this Affidavit are defined below. Definitions are primarily from Phone Scoop LLC), an independent online resource. (<http://www.phonescoop.com/glossary>)

Global System for Mobile Communication (GSM): The dominant international digital mobile phone protocol which determines the way in which mobile phones communicate with the land-based network of towers. GSM is one of two major mobile phone technologies in the United States. Service providers AT&T and T-Mobile use GSM. The other primary protocol is CDMA which is used by Sprint and Verizon Wireless. GSM is more prevalent than CDMA in

most other parts of the world, and especially in Europe. Although GSM and CDMA provide similar basic features and services to end-users, (such as voice calling, text messaging, and data services,) they operate very differently at many technical levels. This makes GSM phones completely incompatible with CDMA networks, and vice-versa. SIM cards are the most visible differentiating feature, from a user's perspective, of GSM.

Code-Division Multiple Access (CDMA): A general type of digital wireless technology implemented in many proprietary mobile telephone technologies. CDMA is commonly used to refer to one specific family of proprietary technologies used in the United States by service providers Sprint and Verizon Wireless. This technology competes with GSM, used by AT&T and T-Mobile. CDMA is a "spread spectrum" technology, in that it spreads the information contained in a particular signal of interest over a much greater bandwidth than the original signal.

Subscriber Identity Module (SIM) card: A small, stamp-size "smart card" used in a GSM telephone. The SIM card contains a microchip which stores data identifying the subscriber to the service provider's network. The SIM can also store phone numbers and associated names. The SIM can easily be removed and placed into another telephone handset, thereby causing the new telephone to operate using the subscriber's existing phone number and account. All GSM telephones use SIM cards. CDMA telephones generally do not use SIM cards. The information is instead programmed directly into the CDMA telephone.

Electronic Serial Number (ESN): A permanent 32-bit number embedded by the manufacturer that uniquely identifies a wireless communications device. ESNs are most commonly used in phones and devices using CDMA technology. GSM phones use a similar type of code called an IMEI instead.

International Mobile Equipment Identity (IMEI): A 15-digit number that uniquely identifies an individual cellular telephone handset. The IMEI is automatically transmitted by the telephone when the network asks for it during the "registration" process (defined below). IMEI is most commonly used in GSM phones. It is embedded in the phone, not the SIM card. CDMA phones use a similar type of number called an ESN.

Mobile Equipment Identifier (MEID): A number that is globally unique for each new CDMA mobile phone in the world. It identifies that phone to the network, and can be used to flag stolen or lost phones. MEID is a replacement for ESN (electronic serial number). MEID began replacing ESN in 2005. ESN numbers are 32-bit, while MEID numbers are 56-bit. The MEID can be expressed as a 14-digit hexadecimal value. A 32-bit ESN means there are only 4 billion unique ESN numbers. Combined with other constraints, enough CDMA phones were produced by the end of 2005 that the industry started to run out of unique ESNs. With 56 bits, MEID provides for over 16 million times as many unique numbers as with the ESN system, ensuring the world will not run out of numbers again. MEID is equivalent to IMEI for GSM telephones phones. MEID is also designed to be compatible with IMEI for phones that include both CDMA and GSM technology.

International Mobile Subscriber Identity (IMSI): A globally-unique code number, usually 15 digits long, which identifies a GSM subscriber to the network. The IMSI resides in a removable SIM card.

Cell Site A cell site (also commonly known as a cell tower) is a geographically specific area, defined by the service provider, wherein wireless telephone service is supported through radio signaling between a cellular telephone handset and the provider's antenna tower located at the center of the cell site. An elevated structure (tower, tall building, church steeple, water tower) and nearby support facilities typically support antennas, several transmitters and receivers, digital signal processors, system controlling devices, backup electrical power sources, and sheltering. Each major service provider has cell sites/towers located throughout the United States. Increasingly, multiple service providers co-locate their equipment at the same site. Smaller service providers lease cell site/tower space and/or call traffic processing services from major providers.

Typically cell sites are often a half mile or more apart, even in urban areas, and can be several miles apart in rural areas. Service providers design overlapping coverage among neighboring cell sites to the greatest extent possible.

Cell sites usually provide 360° coverage and are typically sub-divided into three (3) sectors of approximately 120° each. Each sector operates separately but cooperatively with other sectors within its own cell site as well as with other neighboring cell sites. Each sector within a cell site is assigned its own channel. Cell sites and their respective sectors are each uniquely identified within the service provider's network.

The cell site physically closest to a cellular handset does not necessarily process every call made to or from that device. The service provider's network control systems automatically considers several parameters, such as overall current call traffic volume, relative signal strength between the cell site and the handset, and the handset's direction of movement when processing and routing call traffic.

Registration: Cellular telephone handsets, that are powered on, without any inputs from the user, automatically and periodically register with a cell site/sector as the handset operates and/or travels within the provider's service area. The registration process enables the service provider's network to identify the subscriber, validate the subscriber's account, and determine where to route call traffic to and from a particular cellular handset/subscriber. This automatic data exchange, primarily consisting of the identifying numbers defined above (ESN, MEID, IMSI, IMEI), occurs on a dedicated control channel between the handset and nearby cell site sectors. Another separate channel operating in conjunction with that control channel is solely dedicated to processing/transmitting telephone call content. A handset typically simultaneously registers with multiple cell sites/sectors within reception range.

Cell Site Information: Also known as "tower/face information" or "cell tower/sector" records. Any and all data associated with call processing between a subscriber's cellular telephone and the service provider's network. Additionally, cell site information encompasses other network data used to establish and maintain a connection with the cellular handset. This includes which cell site/sector processed a telephone call, the cell site's physical location, (usually defined by either the latitude/longitude and/or street address of the cell tower's location, cell site/sector designator, control channel number, neighboring cell site identifiers, subscriber/equipment identification numbers (ESN, MEID, IMSI, IMEI), processing data, and parameters not pertaining to the contents of a call.

E-911 Phase II data: Also known as Global Positioning System (GPS) data or latitude/longitude data. E-911 Phase II data provides relatively precise location information about the cellular telephone handset itself, either via GPS tracking technology built into the telephone handset or by triangulating on the device's signal using data from several of the provider's cell sites obtained through the "registration" process. Accordingly, E-911 Phase II data is a more precise than basic cell site information.

Call detail records: Cellular telephone-specific version of toll records (i.e. historical telephone records of telephone activity, usually listing outgoing calls and date, time, and duration of each call) which pertain to hard line telephone and are made and retained in the ordinary course of business. Call detail records also include a record of incoming calls and the cell site/sector(s) used by the cellular telephone to send/receive call traffic.

Based on my training and experience, I know that **[WIRELESS PROVIDER]** that provides cellular telephone access to the general public and can collect cell-site data about the Target Cell Phone.

CASE SPECIFIC INFORMATION

Give facts establishing the probable cause described above. Among other things, this section should:

-Establish a connection between the Target Telephone and the Subject(s) and the alleged criminal violations.

-Identify the Target Telephone's subscriber name and address [typically via previously issued subpoena(s)].

-Particularly describe the Target Telephone. Identify as many of the following as possible via subpoena.

Electronic Serial Number (ESN):

Mobile Equipment Identifier (MEID):

International Mobile Subscriber Identity (IMSI):

International Mobile Equipment Identity (IMEI):

-Identify the primary user(s) of the Target Telephone, if known, and

-Explain why there is probable cause to collect Cell Site Information for the next 30 days

(or for some shorter period of time, if you amend Attachment B to cover a period less than 30 days).

-Determine if the service provider can collect E-911 Phase II data. If so include this statement: Based on my training and experience, I know that [WIRELESS PROVIDER] can collect E-911 Phase II data about the location of the Target Cell Phone, including by initiating a signal to determine the location of the Target Cell Phone on [[WIRELESS PROVIDER]]'s network or with such other reference points as may be reasonably available.]]

-Explanation of why on-going disclosure of prospective (current/future) cell site information is necessary.

-If historical cell site information is to be sought, include a statement regarding why it is pertinent.

AUTHORIZATION REQUEST

Based on the foregoing, I request that the Court issue the proposed search warrant, pursuant to Federal Rule of Criminal Procedure 41 and 18 U.S.C. § 2703(c).

I further request, pursuant to 18 U.S.C. § 3103a(b) and Federal Rule of Criminal Procedure 41(f)(3), that the Court authorize the officer executing the warrant to delay notice until 45 days after the collection authorized by the warrant has been completed. This delay is justified because there is reasonable cause to believe that providing immediate notification of the warrant may have an adverse result, as defined in 18 U.S.C. § 2705. Providing immediate notice to the subscriber or user of the Target Telephone would seriously jeopardize the ongoing investigation, as such a disclosure would give that person an opportunity to destroy evidence, change patterns of behavior, notify confederates, and/or flee from prosecution. Moreover, to the extent that the warrant authorizes the seizure of any tangible property, any wire or electronic communication (as defined in 18 U.S.C. § 2510), or any stored wire or electronic information, there is reasonable necessity for the seizure for the reasons set forth above.

I further request that the Court direct [WIRELESS PROVIDER] to disclose to the Government any information described in Attachment B that is within the possession, custody, or control of [WIRELESS PROVIDER]. I also request that the Court direct [WIRELESS PROVIDER] to furnish the Government all information, facilities, and technical assistance

necessary to accomplish the collection of the information described in Attachment B unobtrusively and with a minimum of interference with **[WIRELESS PROVIDER 's]** services, including by initiating a signal to determine the location of the Target Telephone on **[WIRELESS PROVIDER's]** network or with such other reference points as may be reasonably available, and at such intervals and times requested by the Government. The Government shall reasonably compensate **[WIRELESS PROVIDER]** for reasonable expenses incurred in furnishing such facilities or assistance.

I further request that the Court authorize execution of the warrant at any time of day or night, owing to the potential need to locate the Target Telephone outside of daytime hours.

[If your district does not have standard forms/procedures for filing under seal, you can insert this language in the affidavit:] I further request that the Court order that all papers in support of this application, including the affidavit and search warrant, be sealed until further order of the Court. These documents discuss an ongoing criminal investigation that is neither public nor known to all the investigative targets. Accordingly, good cause exists to seal these documents because their premature disclosure may seriously jeopardize that investigation.

Respectfully submitted,

UNITED STATES MAGISTRATE JUDGE

ATTACHMENT A

PLACE TO BE SEARCHED

The cellular telephone assigned call number (xxx) xxx-xxxx, (the "Target Telephone"), whose wireless service provider is [WIRELESS PROVIDER] a company headquartered at [WIRELESS PROVIDER'S ADDRESS].

The Target Telephone is specifically identified as follows: [Chose all that apply]

Electronic Serial Number (ESN):

Mobile Equipment Identifier (MEID):

International Mobile Subscriber Identity (IMSI):

International Mobile Equipment Identity (IMEI):

Information about the location of the Target Telephone that is within the possession, custody, or control of [WIRELESS PROVIDER] [if needed: including information about the location of the cellular telephone if it is subsequently assigned a different call number].

ATTACHMENT B

ITEMS TO SEARCH FOR

[INCLUDE IF HISTORICAL CELL SITE INFORMATION IS REQUESTED]

Records or other information pertaining to subscriber(s), described in Attachment A, including historical cell site information and call detail records, including records for any two way radio communications features as may be incorporated into the telephone handset, for the following dates: [BEGINNING DATE] to the present. These records should not include any information pertaining to contents of the identified subscriber's communications.

All information, provided on an on-going basis, about the location of the Target Telephone described in Attachment A for a period of thirty (30) days, during all times of day and night.

Information about the location of the Target Telephone includes the following:

-All available E-911 Phase II data, GPS data, latitude/longitude data, and other precise location information, as well as all data about which "cell sites/towers" (i.e., antenna towers covering specific geographic areas) and "sectors" (sub-divisions of cell sites) received/sent a radio signal from/to the Target Telephone described in Attachment A.

-To the extent that the information described in the previous paragraph (hereinafter, "Location Information") is within the possession, custody, or control of **[WIRELESS PROVIDER, [WIRELESS PROVIDER]** is required to disclose the Location Information to the Government. In addition, **[WIRELESS PROVIDER]** must furnish the Government all information, facilities, and technical assistance necessary to accomplish the collection of the Location Information unobtrusively and with a minimum of interference with **[WIRELESS PROVIDER]** 's services, including by initiating a signal to determine the location of the Target

Telephone on **[WIRELESS PROVIDER]** 's network or with such other reference points as may be reasonably available, and at such intervals and times directed by the Government. The Government shall compensate **[WIRELESS PROVIDER]** for reasonable expenses incurred in furnishing such facilities or assistance.

To the extent that the Location Information includes tangible property, wire or electronic communications (as defined in 18 U.S.C. § 2510), or stored wire or electronic information, there is reasonable necessity for the seizure. See 18 U.S.C. § 3103a(b)(2).

_____)

A. MOTION FOR PEN REGISTER

The United States of America, by and through Wendy J. Olson, United States Attorney for the District of Idaho, and Aaron N. Lucoff, Assistant United States Attorney for said District, makes application to the Court, pursuant to 18 U.S.C. ~~§§ 11~~ 3122 and 3123, and 18 U.S.C. ~~1~~ §3127(3), for an ex parte Order authorizing [**agency**] investigators and other law enforcement officers to use a pen register to obtain identifying information including but not limited to the Electronic Serial Number (ESN), International Mobile Equipment Identity (IMEI), International Mobile Subscriber Identity (IMSI), or Mobile Equipment Identifier (MEI) of cellular telephones being used in the vicinity of **[name(s) of target(s)]** for a time period not to exceed sixty days following the effective date of this Court's Order.

Formatted: Font: Not Bold

The term “pen register” means “a device or process which records or decodes dialing, routing, addressing, or signaling information transmitted by an instrument or facility from which a wire or electronic communication is transmitted.” 18 U.S.C. ' 3127(3). Here, the government seeks to record or decode “signaling information” transmitted by **[name(s) of target(s)]** cellular telephones.

~~The type of pen register applied for here is commonly called a “stingray.” A stingray@~~

~~intercepts signals from a cellular telephone.~~ All cellular telephones are required by telecommunications industry standards to contain certain identifying information, such as an ESN, IMEI, IMSI, or MEI. This information is electronically programmed in every cellular telephone by chips and/or software. When a user turns on (powers up) a cellular telephone, ~~said telephone automatically and periodically transmits~~ its identity to the nearest cell site. ~~These periodic transmissions do not require any actions by the user in order to occur and are essentially transparent to said user~~ This transmitted information uniquely identifies a specific mobile phone handset and/or subscriber using the ESN or other number. This identifying information allows the cellular system to identify the particular telephone- ~~and route telephone traffic to/from it~~ and allows the cellular company to bill that particular telephone for the air-time charges. ~~If it is within reception range, a~~ cellular telephone that is powered up is exchanging this information with cell sites even though no call is in progress.

~~The Government's pen register equipment is mobile.~~ In order to use it to intercept cellular telephone identifying information, [agency] investigators and other law enforcement ~~personnel/officers~~ must physically be in the vicinity of the targets using the phone. ~~Once in said vicinity, the pen register equipment will, based upon unique identifying numbers, distinguish all area cellular telephone from one another.~~ Hence, it is possible that investigators and officers may intercept identifying information from telephones other than those used by the targets. This means that investigators and officers will try to intercept the identifying information when the targets are in a location away from other people or phones. ~~Once the identifying information is intercepted, investigators and officers can use that information to obtain subscriber information~~

Commented [e1]: Delete. FBI OGC guidance precludes identifying the specific equipment used for an intercept, etc. Delete associated footnote.

Formatted: Font: Times New Roman, 12 pt

Formatted: Font: Times New Roman, 12 pt

Commented [e2]: This may be problematically worded and invite unwanted scrutiny regarding over-collection on non-predicated persons/telephones. Note for your understanding...not to be included in court papers. The Stingray does collect all electronic signals within its reception range. This data is stored in a database file created by the system controller software. This is for analysis purposes; both during and after a mission. Bureau policy prohibits retention of data determined through analysis to be non-pertinent.

¹Older Stingray models were known as Triggerfish, digital analyzers, or Swamp boxes.

and toll records for the target telephones. This information will assist the ongoing investigation described below.

The Government's pen register equipment cannot electronically collect content of cellular telephone traffic. This application specifically seeks authorization only to intercept and read the identifying information for the target cellular telephones. The government does not seek authorization to record numbers dialed from the target cellular telephones or intercept conversation occurring over those phones. Once the government learns the identifying information for the target cellular telephones, it can obtain subscriber information and telephone toll records from the phones= service providers. If the government seeks to record the numbers dialed from the phones, then it will seek such authorization from the court in a separate application.

Commented [e3]: Note for your understanding...not to be included in court papers. No dialed digits are collected by the Stingray equipment. The PR/TT equipment used by the telephone company collects all DRAS data which is subsequently transmitted to the Bureau. This data is accessible in the Stingray vehicle via a wireless Virtual Private Network connection to Bureau PR/TT data computer servers at Quantico. This VPN connection is made by another laptop in the vehicle...not the one controlling the Stingray.

B. MOTION TO SEAL APPLICATION AND ORDER

The United States further moves this Court for an Order, pursuant to 18 U.S.C. § 3123(d), directing that this Application and the Court's Order be sealed until otherwise ordered by the Court.

C. INFORMATION IN SUPPORT OF APPLICATION

In support of this Application, the United States sets forth the following specific and articulable facts which show that the information sought in this order is relevant and material to an ongoing criminal investigation:

1. The primary investigating agency is the **[agency]**.
2. Applicant, Aaron N. Lucoff, is an Assistant United States Attorney.
3. The applicant hereby certifies that the information likely to be obtained is relevant and material to an ongoing criminal investigation of [name(s) of target(s)], and others, in

connection with possible violations of [federal statute(s)]. More specifically, applicant states as follows:

a. **[factual basis]**

b.

c. Using ~~a Astingray@mobile pen register equipment~~ would allow investigators to identify other cellular telephones used by **[name(s) of target(s)]** in furtherance of their criminal activities.

WHEREFORE, it is requested that the Court enter an order authorizing **[agency]** investigators and other law enforcement officers to use a pen register to obtain identifying information including but not limited to the Electronic Serial Number (~~ESN~~), International Mobile Equipment Identity (~~IMEI~~), International Mobile Subscriber Identity (~~IMSI~~), or Mobile Equipment Identifier (~~MEI~~) of cellular telephones being used in the vicinity of **[name(s) of target(s)]** for a time period not to exceed sixty days following the effective date of this Court's Order. The government also requests that this Application and Order be sealed until otherwise ordered by the Court.

UNITED STATES DISTRICT COURT
DISTRICT OF IDAHO

IN THE MATTER OF THE APPLICATION)
OF THE UNITED STATES OF AMERICA) No. _____
FOR AN ORDER AUTHORIZING THE)
INSTALLATION AND USE OF A PEN) ORDER
REGISTER TO OBTAIN CERTAIN)
IDENTIFYING INFORMATION FOR) FILED UNDER SEAL
CELLULAR TELEPHONES.)

Field Code Changed

A. INTRODUCTION

The United States of America has applied for an Order authorizing **[agency]** investigators and other law enforcement officer to use a pen register, ~~commonly known as a Stingray,~~ to record or decode signaling information transmitted by unknown cellular telephones. The purpose of recording or decoding this signaling information is to obtain certain identifying information, including but not limited to the Electronic Serial Number (~~AESN~~), International Mobile Equipment Identity (~~AIMEI~~), International Mobile Subscriber Identity (~~AIMSI~~), or Mobile Equipment Identifier (~~AMEI~~), of these unknown cellular telephones.

B. FINDINGS

THE COURT FINDS that there is an ongoing criminal investigation into acts which would constitute violations of **[federal statute(s)]**, and that the subjects of the investigation are **[name(s) of target(s)]** and others.

THE COURT FINDS that there is reason to believe **[name(s) of target(s)]** are using cellular telephones to facilitate the above-described offenses.

THE COURT FINDS that the Application has been made in good faith in the furtherance of a pending criminal investigation, and the ~~a~~ttorney for the United States has certified to the

Court that the information likely to be obtained from the installation and use of the requested pen register is relevant to an ongoing criminal investigation. Nothing in this order shall be construed as requiring the disclosure of the ~~“A”~~ real time ~~“A”~~ location of the cellular telephones while in use in order to facilitate the ~~“A”~~ tracking ~~“A”~~ of the cellular telephone caller or user. Nor does this order authorize the government to record numbers dialed from the target cellular telephones or intercept conversations occurring over those phones.

C. ORDER DIRECTING USE

IT IS ORDERED, pursuant to 18 U.S.C. ~~“A”~~ §3123, that ~~“A”~~ **[agency investigator]**, any other ~~“A”~~ **[agency]** investigators, and other law enforcement officers may use a pen register ~~“A”~~ ~~commonly known as a ~~“A”~~ stingray,~~ to obtain identifying information including but not limited to the ESN, IMEI, IMSI, or MEI of cellular telephones being used in the vicinity of ~~“A”~~ **[name(s) of target(s)]** for a time period not to exceed sixty days following the effective date of this Order.

Formatted: Font: 12 pt, Bold

Formatted: Font: 12 pt, Bold

Formatted: Font: 12 pt, Bold

D. ORDER RESTRICTING TRACING OR PROVIDING THE LOCATION OF THE TELEPHONE WHILE IT IS IN USE

IT IS FURTHER ORDERED that this order shall be restricted to recording and decoding identifying information including but not limited to the ESN, IMEI, IMSI, or MEI of cellular telephones being used within the vicinity of ~~“A”~~ ~~Juan Salto Vivanco~~ **[Subject(s)]** and ~~“A”~~ ~~Juan Ramirez Bolanos~~ with no ~~“A”~~ geographic limitations. ~~“A”~~ ~~Nothing in this order shall be construed as requiring the disclosure of the “A”~~ real time ~~“A”~~ location of the cellular telephones while in use in order to facilitate ~~“A”~~ tracking ~~“A”~~ the whereabouts of the cellular callers. Nor does this order authorize the government to record numbers dialed from the target cellular telephones or intercept

Formatted: Font: 12 pt, Bold

conversations occurring over those phones.

E. ORDER SEALING RECORDS

IT IS FURTHER ORDERED, pursuant to 18 U.S.C. ~~+~~§3123(d), that this Order and Application be sealed until otherwise ordered by the Court.

WIDT COURT DOCUMENTS

Combined 3123 2703 Application.docx

This document is direct from the US DOJ library of go-by's. This is for a cell phone Pen Register/Trap Trace (PR/TT) with 2703 amendment which seeks authorization for Cell Site Location Information (CSLI). This is written without specific intended use of the WIDT technique in mind.

Combined 3123 2703 Order.docx

This is a companion document for Combined 3123_2703 Application.docx above.

Mobile PR motion and order swamping.docx

This was written in conjunction with AUSA Aaron Lucoff, Criminal Chief, US Attorney's Office, District of Idaho. This seeks authorization for the Government to use a PR (no trap/trace component) for cell phones being used "in the vicinity of" the Subject. Use this when you have a Subject identified by don't know or are not sure of the cell phone the Subject uses. "Swamping" is a technique where WIDT is used to register telephones near locations where the Subject is known to frequent. A comparative post mission analysis of the data is conducted to determine which numbers were common to those different collections sites/times/dates, etc.

PRTT hybrid app & order.docx

This was written in conjunction with AUSA Aaron Lucoff, Criminal Chief, US Attorney's Office, District of Idaho. This would be used when a cell phone PR/TT is envisioned without an included request for CSLI pursuant to Section 2703. Circumstances for its use would be when the WITT technique is not envisioned beforehand or the Magistrate is uncomfortable with the WIDT related language.

stingray motion and order.docx

This was written in conjunction with AUSA Aaron Lucoff, Criminal Chief, US Attorney's Office, District of Idaho. This is intended for circumstances with the WIDT technique's employment is anticipated beforehand. The 2703 amendment is not included.

Rule 41 SW affidavit for historical or real time cell site information.docx

This was written in conjunction with AUSA Aaron Lucoff, Criminal Chief, US Attorney's Office, District of Idaho. This is intended for use when a Magistrate requests/requires a Search Warrant be sought instead of a 2703 Order. This is a growing trend nationwide. This can be used either historically as a "stand-alone" precursor step to WIDT employment or proactively and simultaneously to a PR/TT order.
