Engagement with 2018 Election

Just under half of Rhode Island registered voters (44%) say they are extremely interested in the 2018 general election, a third (32%) are very interested, 16% are somewhat interested, 7% are not very interested, and less than 1% don't know or are unsure.

Democrats (47%) are as likely as Republicans (44%) to say they are extremely interested while Independents (39%) are slightly less likely to say so. Rhode Island voters with a household income below \$30,000, those with a high school education or less, a..

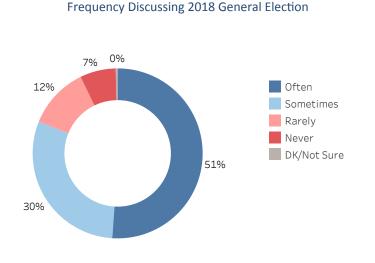

Figure 1: As you may know, there is an election in November for Governor and US Senate. How interested would you say you are in the 2018 general election?

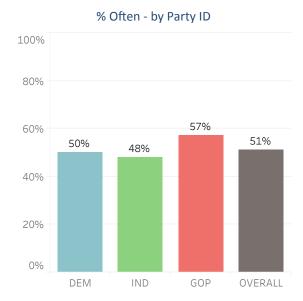

Registered voters in Rhode Island give similar responses about how frequently they discuss the upcoming election. Just over half (51%) say they often discuss the election with their friends and family members, three in ten (30%) say they do so sometimes, 12% do so only rarely, 7% never discuss the election, and less than 1% don't know or are unsure.

Republicans (57%) are slightly more likely than Democrats (50%) and Independents (48%) to say they often discuss the election. Those aged 18 to 34, those with a household income below \$30,000, and those with a high school education or less are less likely to say they often discuss the election.

Figure 2: How often would you say you discuss the election with your friends and family members?

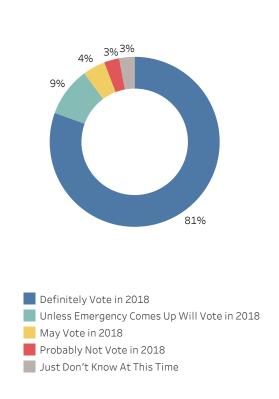

Four in five Rhode Island registered voters (81%) say they will definitely vote in 2018, 9% say they will vote unless an emergency comes up, 4% say they may vote, 3% say they will probably not vote, and another 3% just don't know at this time.

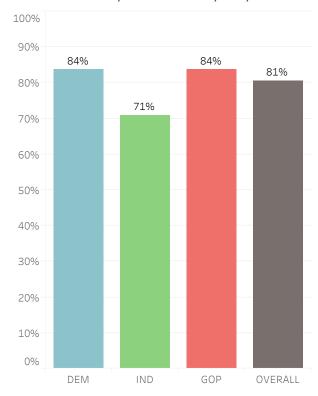

Democrats (84%) and Republicans (84%) are equally likely to say they will definitely vote in 2018, while Independents (71%) are less likely to say that they will definitely vote. Those with a household income between \$30,000-\$59,999, those with a high school education or less, those who did not vote in 2014, and those aged 18 to 34 are less likely to say they will definitely vote.

Figure 3: Thinking ahead to the 2018 general election for Governor and US Senate, which of the following statements best describes you?

% Definitely Vote in 2018 - by Party ID

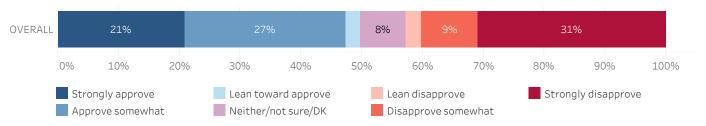

Gubernatorial Election

Registered voters in Rhode Island are divided in their assessment of Gina Raimondo's performance as Governor. Fifty percent approve of Raimondo performance, 43% disapprove, and 8% are neutral or don't know.

Self-identified Democrats, those who voted for Hillary Clinton in 2016, self-described liberals, and those who identify as non-white are more likely than others to approve of Raimondo's job performance. Self-identified Republicans and Independents, those who voted for Donald Trump or did not vote in 2016, self-described conservatives, and those who went to technical school or have some college education are less likely to approve of Raimondo's performance.

Figure 4: Generally speaking, do you approve or disapprove of the way Gina Raimondo is handling her job as governor?

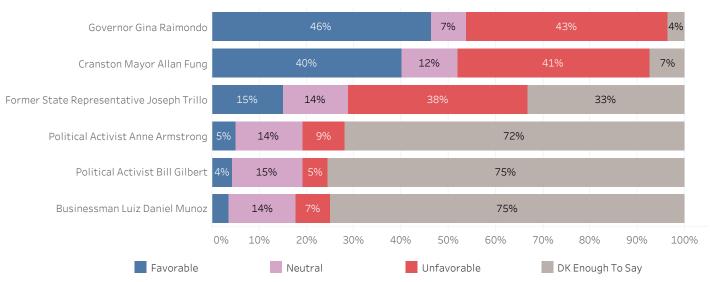

Governor Raimondo and Cranston Mayor Allan Fung have similar levels of personal favorability among likely voters in Rhode Island. Currently, 46% have a favorable view of Raimondo, 7% are neutral, 43% have an unfavorable view of her, and 4% don't know or are unsure. Forty percent have a favorable view of Fung, 12% are neutral, 41% have an unfavorable view of him, and 7% don't know enough to say.

Former State Representative Joseph Trillo is seen far less favorably by Rhode Island likely voters. Only 15% have a favorable opinion of Trillo, 14% are neutral, 38% have an unfavorable view of him, and 33% don't know enough to say. Other candidates in the gubernatorial election are largely unknown among likely voters in Rhode Island. Five percent have a favorable view of political activist Anne Armstrong, 4% have a favorable view of political activist Bill Gilbert, and 3% have a favorable view of businessman Luiz Daniel Munoz. More than seven in ten don't know enough to say about Armstrong (72%), Gilbert (75%), or Munoz (75%).

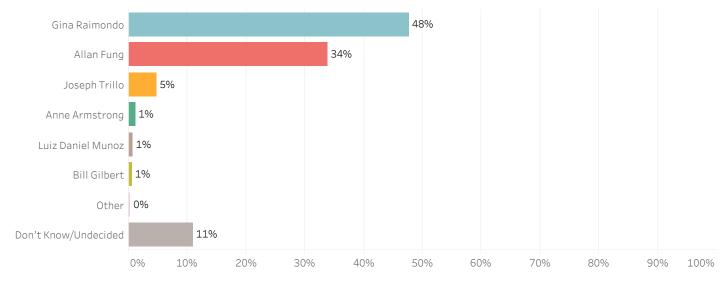

Three-quarters of Democrats (75%) have a favorable view of Raimondo but only 27% of Independents and 13% of Republicans agree. Seventy-three percent of Republicans and half of Independents (51%) have a favorable view of Fung, but only 17% of Democrats agree. Republicans (24%) and Independents (17%) are more likely than Democrats (9%) to have a favorable opinion of Trillo.

Figure 5: As I read each name, please say if you have a favorable or unfavorable opinion of this person or of you don't know enough about them to say.

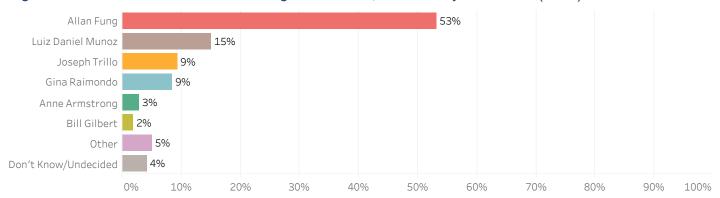

If the 2018 gubernatorial election was being held today, 48% of Rhode Islander likely voters would vote for Raimondo, 34% would vote for Fung, 5% would vote for Trillo, 1% each would vote for Armstrong, Munoz, or Gilbert, less than 1% would vote for another candidate, and 11% don't know or are undecided.

Figure 6: If the 2018 gubernatorial election was being held today, would you vote for...

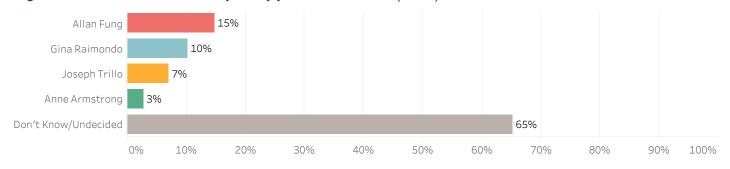

When Trillo, Gilbert, Armstrong, and Munoz supporters (N=36) were asked who they would vote for if their preferred candidate were not running for governor, 53% say they would vote for Fung, 15% would vote for Munoz, 9% each would vote for Trillo or Raimondo, 3% would vote for Armstrong, 2% would vote for Gilbert, 5% would vote for another candidate, and 4% don't know or are unsure.

Figure 7: If that candidate were not running for Governor, who would you vote for? (N=36)

When respondents who don't know or are undecided who to vote for (N=53) are asked who they are leaning towards, 15% say they are leaning toward Fung, 10% are leaning toward Raimondo, 7% are leaning toward Trillo, 3% are leaning toward Armstrong, and two-thirds (65%) remain undecided.

Figure 8: Which candidate would you say you lean towards? (N=53)

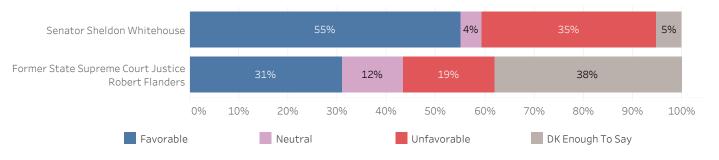

Senatorial Election

Rhode Island junior Senator Sheldon Whitehouse is broadly popular in the state. Fifty-five percent of likely voters have a favorable opinion of Whitehouse, 4% are neutral, 35% have a unfavorable opinion, and 5% don't know or are unsure. Most Democrats (85%) have a favorable opinion of Whitehouse but only 41% of Independents and 16% of Republicans agree.

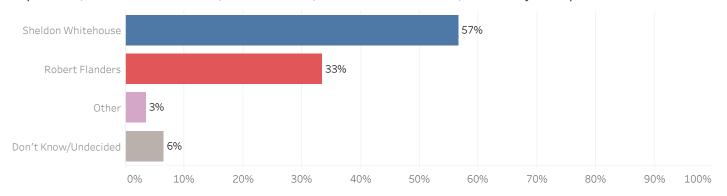

His election opponent, former State Supreme Court Justice Robert Flanders is relatively unknown in Rhode Island. Thirty-one percent of likely voters have a favorable opinion of Flanders, 12% are neutral, 19% have an unfavorable opinion, and 38% don't know enough to say. Just over half (57%) of Republicans and 43% of Independents have a favorable opinion of Flanders, but only 10% of Democrats agree.

Figure 11: As I read each name, please say if you have a favorable or unfavorable opinion of this person or of you don't know enough about them to say.

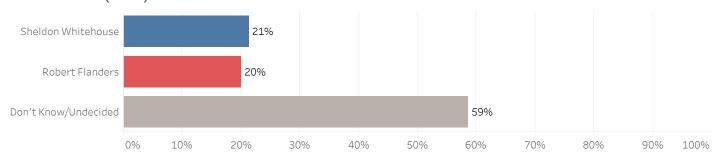

If the 2018 Senate election was being held today, 57% of Rhode Island likely voters would vote for Sheldon Whitehouse, 33% would vote for Robert Flanders, 3% would vote for another candidate, and 6% don't know or are undecided.

Figure 12: If the 2018 US Senate election was being held today, would you vote for Robert Flanders, the Republican, Sheldon Whitehouse, the Democrat, some other candidate, or would you skip this election?

When respondents who don't know or are undecided who to vote for (N=32) are asked who they are leaning towards, 21% say they are leaning toward Whitehouse, 20% are leaning toward Flanders, and 59% remain undecided.

Figure 13: Would you say you are leaning towards Robert Flanders, the Republican, or Sheldon Whitehouse, the Democrat? (N=32)

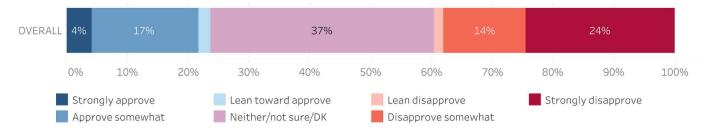

State Legislature & State Issues

Rhode Island registered voters have a negative assessment of how well Nicholas Mattiello is handling his job as House Speaker of the General Assembly. Just under a quarter (24%) of approve of his performance, 40% disapprove, 37% don't know or are unsure.

Low approval of Mattiello's performance as House Speaker is bipartisan: only 22% of Democrats, 24% of Independents, and 26% of Republicans approve of the job Mattiello is doing.

Figure 19: Generally speaking, do you approve or disapprove of the way Nicholas Mattiello is handling his job as House Speaker of the General Assembly?

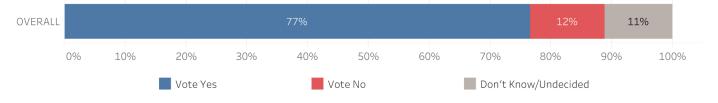

Rhode Island likely voters are overwhelmingly in favor of the \$250 million bond issue for school repairs. More than three-quarters (77%) say they would vote for the bond issue if the election were held today, 12% say they vote no, and 11%

don't know or are undecided.

Those who voted for Hillary Clinton in 2016 and those who identify as non-white are more likely than others to say they would vote yes on the bond issue. Self-identified Republicans and Independents, those who voted for Donald Trump in 2016, and

self-described conservatives and moderates are less likely than others to say they would vote yes.

Figure 23: If the 2018 election was being held today, would you vote for or against the \$250 million bond issue for school repairs or would you not vote on this question?

Technical Report

Rhode Island 2018 Election Poll Methodology Conducted for Rhode Island Public Radio, the Providence Journal, and ABC6

Conducted by the UNH Survey Center Fall 2018

Field Period: September 27 to October 6, 2018

Hours: 9 a.m. to 9 p.m.

Median Completion Time: 15 minutes

Sample Size: 561 randomly selected Rhode Island registered voters

503 randomly selected Rhode Island likely voters in the 2018 General Election

Sampling Error: +/- 4.1% (all respondents)

+/- 4.4% (likely voters)

Response Rate (AAPOR #4): 18%

These findings are based on the latest *Rhode Island 2018 Election Poll*, conducted by the University of New Hampshire Survey Center and funded by the *Rhode Island Public Radio*, the *Providence Journal*, and *ABC6*. Five hundred and sixty-one (561) randomly selected Rhode Island voters were interviewed by landline and cellular telephone between September 27 and October 6, 2018.

How the Sample Was Selected

The random sample used in the *Rhode Island 2018 Election Poll* was purchased from Aristotle International, Inc., Washington, D.C. This sample came from a list of randomly selected registered voters in the state of Rhode Island with phone numbers appended. Approximately 69% of all registered voters had a phone number appended. Only the registered voter selected could participate in the survey, no substitutions were allowed. If, for example, the randomly selected voter is not at home when the household is first contacted, the interviewer cannot substitute by selecting someone else who happens to be there at the time. Instead, he or she must make an appointment to call back when the person is home. Seventy percent of surveys were completed on cell phones, while thirty percent were completed on land lines.

When the Interviewing Was Done

Respondents were interviewed between September 27 and October 6, 2018. Each selected respondent was called by a professional UNH Survey Center interviewer from a centrally supervised facility at the UNH Survey Center. Telephone calls during the field period were made between 9:00 AM and 9:00 PM.

Weighting of Data

The data have been weighted by respondent sex, age, and voter registration to those demographic distributions in the voter sampling frame. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. Due to rounding, percentages may not sum to 100%. The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions.

Sampling Error

Like all surveys, the *Rhode Island 2018 Election Poll* is subject to sampling error due to the fact that all voters in the state were not interviewed. For those questions asked of five hundred (500) or so respondents, the error is +/-4.4%. For those questions where fewer than 500 persons responded, the sampling error can be calculated as follows:

Sampling Error =
$$\pm 1.96 \sqrt{\frac{P(1-P)}{N}}$$

Where P is the percentage of responses in the answer category being evaluated and N is the total number of persons answering the particular question.

Design Effect

These MSE's have not been adjusted for design effect. The design effect for the survey is 1.1%.

For more information about the methodology used in the *Rhode Island 2018 Election Poll*, contact Dr. Andrew Smith at (603) 862-2226 or by email at andrew.smith@unh.edu.
