## UMass Lowell/Boston Globe Survey of Massachusetts Voters

**Survey produced by Professor Joshua J. Dyck, Ph.D and Professor John Cluverius, Ph. D.**

Field Dates: October 1-7, 2018

N=791 Massachusetts Registered Voters

N=485 Massachusetts Likely Voters

Adjusted Margin of Error: +/- 4.4% RVs

Adjusted Margin of Error: +/- 5.6% LVs

Margins of error have been adjusted to include for design effects  
resulting from weighting and survey design features.

---

### Methodology in Brief

Data collection by live interviewers from SSRS. This is a probability sample of 791 Massachusetts Registered Voters (RVs) collected using an overlapping dual-frame random digit dial design with a 50% landline/50% cell phone target split. Using the method detailed on page 2, we classified 485 RVs as Likely Voters (LVs).

The data were first weighted to address the imbalance that occurs because some respondents have a greater probability of being included in the frame if they have multiple landlines or both a landline and a cellular number. To ensure a representative sample, we collected demographic data on all respondents who were residents of Massachusetts and at least 18 years of age (including non-registered voters) so that our overall sample can be weighted to data on age, gender, education, race and region from the 2018 American Community Survey for Massachusetts.

UMass Lowell is a public institution and releases surveys as a source of public information. We report our questionnaire in our topline document which includes likely voter model questions and wording. We offer a complete methodology report, as well an extensive set of crosstabs. Our goal is complete transparency in the reporting of our findings. If there is something you do not see here, but wish you did, please contact Professor Joshua J. Dyck ([joshua\\_dyck@uml.edu](mailto:joshua_dyck@uml.edu); [@drjjdyck](#)) or Professor John Cluverius ([john\\_cluverius@uml.edu](mailto:john_cluverius@uml.edu); [@JohnCluverius](#)).

\*indicates <.5%; some numbers do not sum to 100 due to rounding

**LIKELY VOTER CLASSIFICATION (ASKED OF ALL REGISTERED VOTERS)**

Q2 As you know, a general election will be held across the country in November which includes races for Governor and U.S. Senator in Massachusetts. How closely are you following news about candidates running for office in Massachusetts -- very closely, somewhat closely, just a bit, or haven't you really been following it much at all?

29%	Very closely
34	Somewhat closely
22	Just a bit
15	Haven't really been following it much at all
0	(DO NOT READ) Don't know/Refused

Q3 How often would you say that you vote when there's a primary election that includes offices like Massachusetts Governor, United States Senate, United States House of Representatives, and other statewide offices -- always, almost always, just sometimes, hardly ever, or never? If you have just registered to vote for the first time, please tell me.

58%	Always
21	Almost always
11	Just sometimes
5	Hardly ever
2	Never
4	Just registered to vote for the first time
.	(DO NOT READ) Don't know/Refused

Q4 Many people don't vote in elections unless the race for President is on the ballot. At this point, would you say you'll definitely NOT vote in the upcoming election for Governor of Massachusetts and U.S. Senator, PROBABLY NOT vote, may or may not vote depending upon how you feel at the time, PROBABLY vote, or DEFINITELY vote in the upcoming election?

20%	Definitely not vote
3	Probably not vote
6	May or may not vote
12	Probably vote
59	Definitely vote
59	(DO NOT READ) Already voted
.	(DO NOT READ) Don't know/Refused

Likely voters are defined as those who are following news of the election "very closely," "somewhat closely" or "just a bit" (Q2=1,2,3), "always" or "almost always" vote when there's an election (Q3=1,2), and say that they "probably will vote," or "definitely will vote," in the election (Q4=4,5). Voters who report that they "just registered" (Q3=6) were classified as likely voters if they say that they "probably will vote," or "definitely will vote," in the election (Q4=4,5).

**Among partisans (using leaned party ID), 60% of Democrats, 60% of Republicans and 45% of Independents are classified as 'Likely Voters.'**

Q5 If the election for GOVERNOR of MASSACHUSETTS was being held today, would you vote for ROTATE: (Charlie Baker, the Republican) or (Jay Gonzalez, the Democrat)?

Q5a As of TODAY, do you LEAN more toward: [READ LIST]

As you know, Massachusetts voters will decide on three ballot measures this fall.

Q7. Question 1 is about nurse staffing levels. If the election was being held today, how would you vote, YES to limit how many patients could be assigned to each nurse in hospitals and certain other health care facilities, or NO to make no changes to the existing law regarding patient-to-nurse limits?

Q7a As of TODAY, do you LEAN more toward voting: YES to limit the number of patients per nurse in hospitals and some other health care facilities, or NO to make no changes to the existing patient-to-nurse limits law?

<b>RV</b>	<b>LV</b>	
46%	43%	Yes
48	51	No

Q14 Consider two ways to elect candidates to offices like the U.S. House, State Legislature and Governor that we could use. Option 1 (is where voters select the single candidate they most prefer and the winner is the candidate with the most votes). Option 2 (is where voters rank all the candidates on the ballot in their order of preferences and the winner is the most popular candidate overall, taking into account voters' second, third, and other choices). Which would you prefer that we use in Massachusetts: Option 1 or Option 2?

61% Option 1  
35 Option 2

Q16 Dr. Christine Blasey Ford has alleged that Brett Kavanaugh sexually assaulted her when she was 15 years old and he was 17. He has said that the allegations are categorically false and no such incident took place.

Who do you think is more likely telling the truth about these events: (Brett Kavanaugh) or (Christine Blasey Ford)?

30% Brett Kavanaugh  
60 Christine Blasey Ford
