

Express Scripts mail order network

10.17.2018

In order to evolve with industry trends and better meet the needs of our members and sponsors, Express Scripts is pleased to announce that it is expanding its network offerings to include networks designed for pharmacies predominantly engaged in mail order practice. These offerings will be available in both Commercial and Medicare lines of business. As a result, Express Scripts Network Credentialing will be contacting your pharmacy in the next few months to initiate a mail order credentialing application and contracting, should it be applicable to your practice.

Questions regarding the mail order credentialing and contracting process should be directed to: PharmacyOperations@express-scripts.com.

If you need a member's specific prescription processing information or other help with a claim, please visit our Pharmacist Resource Center at <https://prc.express-scripts.com>.

Thank you,

Provider Outreach Team
