#### ABOUT THE POLL

The Iowa Poll, conducted March 3-6, 2019, for *The Des Moines Register*, CNN and Mediacom by Selzer & Co. of Des Moines, is based on telephone interviews with 401 registered voters in Iowa who say they will definitely or probably attend the 2020 Democratic caucuses and 400 registered Republicans.

Interviewers with Quantel Research contacted 1,618 randomly selected active voters from the Iowa secretary of state's voter registration list by telephone. The sample was supplemented with additional phone number lookups. Interviews were administered in English. Responses for all contacts were adjusted by age and sex to reflect their proportions among active voters in the list. For the registered Republican sample, responses for the 418 registered Republican contacts were adjusted by age and sex to reflect their proportions among active registered Republicans in the voter registration list.

Questions based on the sample of 401 voters likely to attend the 2020 Iowa Democratic caucuses have a maximum margin of error of plus or minus 4.9 percentage points, as does the sample of 400 registered Republicans. This means that if this survey were repeated using the same questions and the same methodology, 19 times out of 20, the findings would not vary from the true population value by more than plus or minus 4.9 percentage points. Results based on smaller samples of respondents—such as by gender or age—have a larger margin of error.
