Dignity Health Statement Regarding UCSF Partnership

Attribute to: Dignity Health spokesperson

May 28, 2019 – We have heard and understand the concerns raised by UCSF faculty and others relating to the proposed partnership between Dignity Health and UCSF Health, and agree that we cannot move forward with the partnership as originally planned.

Going forward we will explore ways to work together to meet all patient needs and increase access to critical health services.

We remain committed to our existing partnership with UCSF Health, which includes many important services, such as mental health, robotic surgery, neurology, vascular podiatry, adolescent psychiatry, and several others.

Most importantly, we want to make sure that Dignity Health and UCSF Health patients understand that they will always receive respectful and compassionate care that meets their health needs.
