

OVERVIEW

The study was conducted for CNN via telephone by SSRS, an independent research company. Interviews were conducted from **September 5-9, 2019** among a sample of **1,639** respondents, including oversamples of **307** black, non-Hispanic registered voters and **293** Hispanic/Latino registered voters. Oversamples have been weighted to represent their proper share of the adult population. The landline total respondents were **588** and there were **1,051** cell phone respondents. The margin of sampling error for total respondents is +/- **3.2** at the 95% confidence level. The design effect is **1.72**. More information about SSRS can be obtained by visiting www.ssrs.com.

Question text noted in parentheses was rotated or randomized. Unless otherwise noted, results beginning with the March 31-April 2, 2006 survey and ending with the April 22-25, 2017 survey are from surveys conducted by ORC International. Results before March 31, 2006 are from surveys conducted by Gallup.

NOTE ABOUT CROSTABS

Interviews were conducted among a representative sample of the adult population, age 18 or older, of the United States. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum n=125 unweighted cases. Results for subgroups with fewer than n=125 unweighted cases are not displayed and instead are denoted with "**SN**" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.

**EMBARGOED FOR RELEASE:
Wednesday, September 11 at 4:00 p.m.**

P9. How enthusiastic would you say you are about voting for president in next year's election -- extremely enthusiastic, very enthusiastic, somewhat enthusiastic, not too enthusiastic, or not at all enthusiastic?

**QUESTION WORDING: Do you think the Democratic party should re-nominate Barack Obama as the party's candidate for president in 2012, or do you think the Democratic party should nominate a different candidate for president in 2012?
 ***QUESTION WORDING: Do you think the Democratic party should re-nominate Bill Clinton as the party's candidate in 1996 or do you think the Democratic party should nominate a different candidate for President in 1996.

MORE ON METHODOLOGY

A total of **1,639** adults were interviewed by telephone nationwide by live interviewers calling both landline and cell phones. Interviews were conducted in English and Spanish. Among the entire sample, **31%** described themselves as Democrats, **25%** described themselves as Republicans, and **44%** described themselves as independents or members of another party.

All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect national Census figures for gender, race, age, education, region of country, and telephone usage.

Results for the full sample have a margin of sampling error of +/- 3.2 percentage points. For the sample of 1,526 registered voters it is +/- 3.2 percentage points. For the subset of 908 Democrats and Democratic-leaning independents who are registered to vote, it is +/- 4.3 percentage points. For the subset of 693 white non-Hispanic adults, it is +/- 4.3 percentage points. For the subset of 431 black non-Hispanic adults, it is +/- 7.3 percentage points. For the subset of 387 Hispanic/Latino adults, it is +/- 7.3 percentage points.

Interviews were conducted among a representative sample of the adult population, age 18 or older, of the United States. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum n=125 unweighted cases. Results for subgroups with fewer than n=125 unweighted cases are not displayed and instead are denoted with "**SN**" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.
