Elon?

Nope

Met with him last week and was given this number, is this the Foundation for him?

Nope. This is a 22-year-old college students cell phone number.

Who is this? And in what context have you gotten this number? I've been getting phone calls and texts for a couple years now with people thinking that I'm Elon and I've been wondering why.

Was given your number but a friend of mine that claims to be friends with Elon Musk. But if you just search your number on Google, it shows

Sorry buddy this isn't Elon musks
number and is in way affiliated with
him. AT&T gave me this number and
must have recycled his.

Hey! How are you? :)

Hi! I'm so sorry but who is this?

Seriously I'm so sorry my phone got water damage about three weeks ago and I had to get a new one and I'm still trying to get all my contacts back

My name's [REDACTED] (Apologies for the obscure introduction- I found your contact via Google). I've been following the news re Falcon 9. I would really love to go to the moon someday. 🚀

Oh are you looking to talk to Elon musk?

Sorry - must have wrong #.

If so, I apologize but this isn't his number. Long story short: he and his

This is not Elon musks number buddy sorry. How do people keep getting this? Is he like handing this number out as his or something? Cuz this keeps happening.

C.I.A

Haha suuuure

Dont know how you got this number. But this was his Protocol Phone Number for Govt. Contract Assignments. Sorry for the disturbance

Nah it's all good. AT&T must have recycled the number or something because I got a new number like 7 years ago and this has been happening the entire time.

Elon ring me back

This is not Elon musks number and is no way connected to space x or Tesla. Sorry pal

Oh I am sorry used to reach him at this number

It's okay. He still gives this number out but it hasn't been his for like 8 years now. He hasn't removed it from contact info and stuff though so I get calls and texts for him all the time

I am so sorry I did a lot of business with him ages ago, had a business proposal for him do you have a more updated contact number for him this is [REDACTED] from back in the paypal days lol

Nope. I'm literally a random college student that AT&T recycled the number to. So I have no info on him.

Good evening. This is absolutely crazy but is this Elon Musk's number? I found it in the white pages (I even paid for the premium service, and I'm a broke college student) So if it is i would appreciate a response, because again this absolutely crazy. And if it's not I apologize . I'm not crazy , but people aspiring to be successful learn from leaders and game changers. Elon Musk is one of those people, and I'm willing to look a little crazy and contact random people with even the slightest chance of reaching him . Thanks and have an awesome evening ! @

This is not Elon musks number I'm so sorry. I'm just a college student and I've been trying to get all of them to change the listed number cuz it's not his. But they never respond. Anywho. Have a good night

Mr. Musk, if we are serious about limiting carbon footprint then the current ride sharing services are non compliant. A better solution is implementing B.O.V.'s, such as a fleet of Tesla's. Our fledging ride sharing company want to blanket cities with Tesla's to transport riders. Join us.

This is not Elon musks number I'm so sorry
