$\Delta\%$: percent change in new cases in last 7 days compared to the previous 7 days

Daily case trend: daily three-day rolling average over last month

Categorization based on assessment of indicators and trends. Full information available in MS Excel

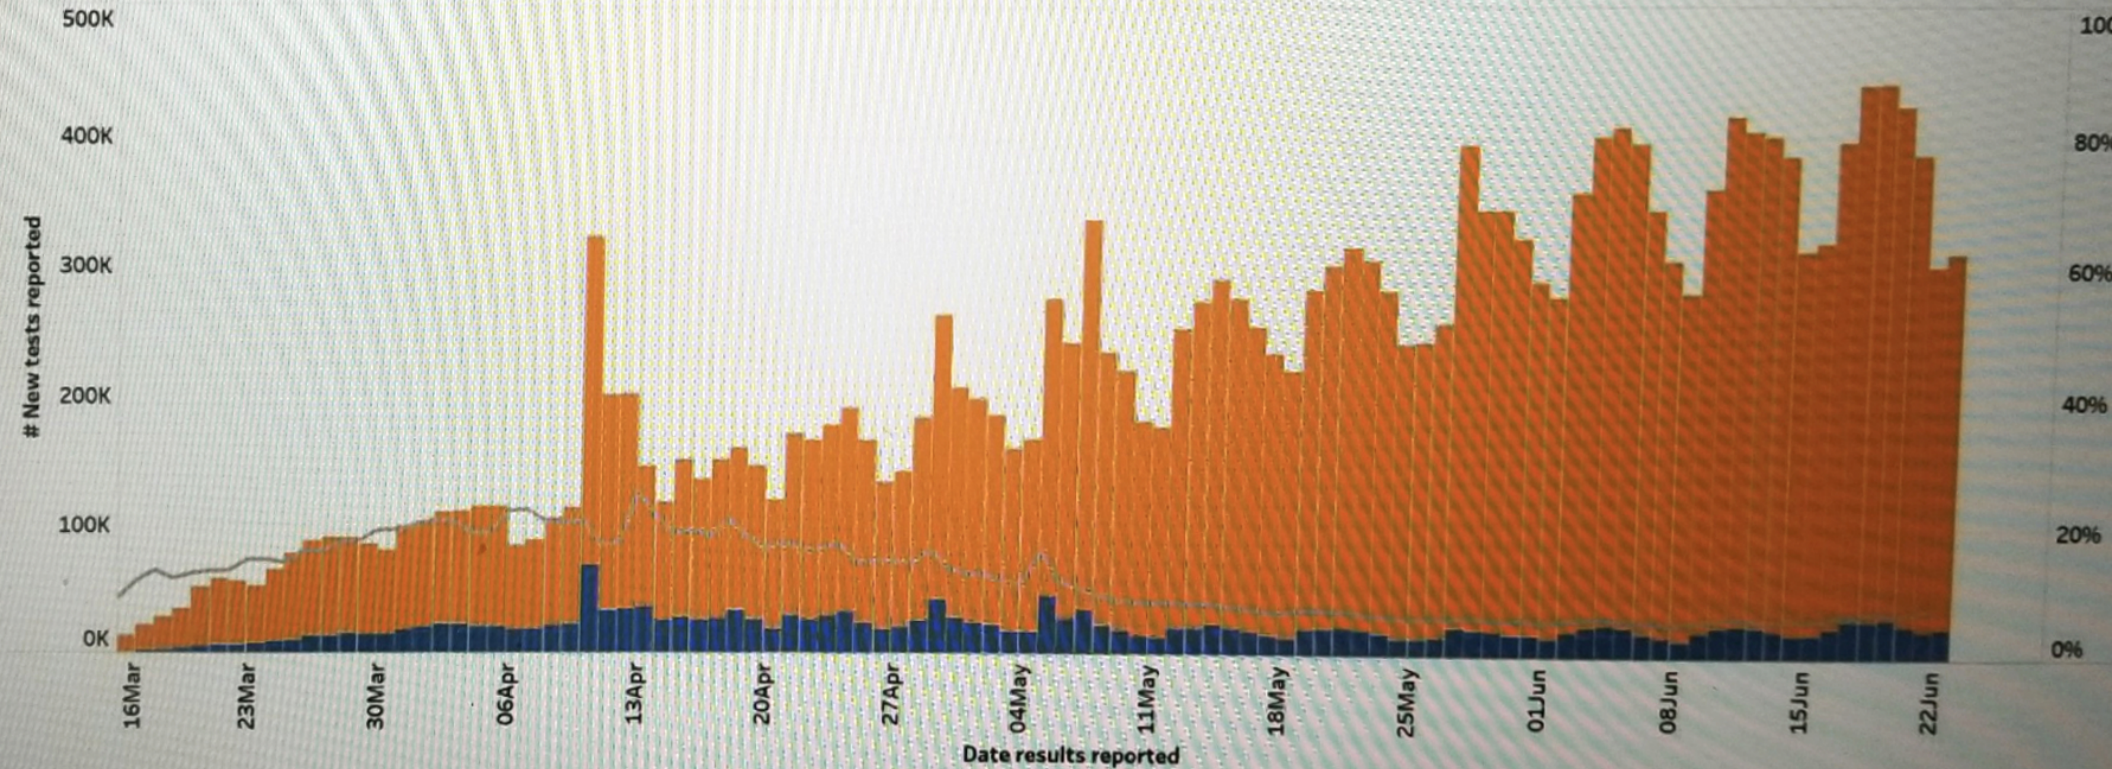

New COVID-19 cases for the United States
Total cases through = 2,338,533
Cases before 16Mar2020 are not shown (n = 3,893)
SOURCE: USAFacts and JHU (through 23Jun2020)

New COVID-19 deaths for the United States
Total deaths through = 120,540
Deaths before 16Mar2020 are not shown (n = 68)
SOURCE: USAFacts and JHU (through 23Jun2020)

Analyst notes: The charts display data since 16Mar2020. The grey lines provide the number of new cases and deaths as a smoothed average of data points up to 3 days before and after each date.

New COVID-19 tests with a reported result as either positive (bar) or negative (bar) and percent of tests positive (line)
 Total tests through 22Jun2020 = 21,917,723 (9.8% positive)
 (percent positive in last 7 days: 7.0%)
 SOURCE: Hospital, commercial, and public health labs, through 22Jun2020

Analyst note: Tests include those that had a positive or negative tests and do not include tests with an inconclusive result. Testing data may be backfilled following initial reports. Day-to-day updates to the testing data have not been found to impact summary statistics substantially.
