Update from the June 24th, 2020 OCBE Special Meeting:

To all of our signatories and community members,

Lyn submitted the public comment below following the OCDE’s guidelines on June 23rd, 2020 at 3:48 PM PT, and sent an updated list of over 500 signatures at 4:55 PM PT on June 24, 2020. She requested that the statement be read by a staff member in its entirety during the public comment period. She received no response from the OCBE.

During the public comment period of the meeting, 10 speakers were asked to share their comments. All of the comments were in support of the OCBE guidelines that reject mask wearing and social distancing. Several comments made factually incorrect claims on the evidence behind mask wearing and social distancing.

Afterwards, there was a panel discussion (panelists can be found on page 3 here). The panel presented viewpoints and information designed and curated to support the guidance put forward by OCBE. The information they provided cherry-picked studies and quotes that supported their claims, and we believe they were biased and deliberately misleading. The general scientific consensus of that meeting diverged greatly from the weight of existing evidence.

At around 10 PM, Lyn and Lizzy had a chance to read the public comment. Due to time, Lyn was forced to read only selections from the piece, and was stopped before completing the statement by a Trustee of the Board. Lizzy’s statement can be found here. To listen to the comments, you can listen here. Lyn begins speaking at around 3:24:30, with Lizzy immediately following.

We would like to note that there were hundreds of public comments submitted, including a comment from the American Academy of Pediatrics representing over 500 OC pediatricians that supported social distancing and mask wearing guidelines as outlined by the CDC, CADPH, and more. The lack of transparency around these messages, and the lack of intellectual balance, is a deliberate disservice to the OC community. Our parents, educators, and community members deserve to make their choices with the best information possible, not just information that suits the agenda of the OCBE. Children should have access to school, and we need to provide it safely. We will continue to speak the truth. If you’d like to join us in our continued efforts, you can find us here.

PUBLIC COMMENT:

To the OC Board of Education,

As members of the Orange County community, we write to express our concern surrounding the points outlined for your June 24, 2020 panel meeting on reopening schools in our county. We are proud to have some of the best schools in the state of California, but we cannot sit quietly while the OC Board of Education proposes policies that threaten the ability of OC students to safely receive the high quality education they deserve. We write this on behalf of the OC community, with signatures of support from over 500 OC community members, 93% of whom are registered voters.

The principles that you have outlined as guides to our school reopening policies must be critically assessed. They repeatedly state that public health policies guiding school reopening are “unacceptable.” Frankly, what is truly unacceptable is the outlined approach, one that would put our students (especially those with autism/intellectual disabilities, and people of color) and
their families at great risk. It is up to us to control Covid-19 spread within our communities, and responsible, safe school reopening is the first step.

Principle 1 states that delaying the opening of schools until a cure or vaccination is developed is unacceptable. We wholeheartedly agree. There are true developmental costs to delaying reopening, especially with the lengthy timeline that is likely for any treatment options. Preliminary evidence does indeed suggest that school closures may not reduce the transmission as much as originally believed. We should therefore move to reopen schools with the understanding that we must implement strategies that minimize the health risks we impose on our community.

Principle 2 states that children present the lowest risk of Covid-19, and therefore socially distancing them is unacceptable. While children may face lower risk of Covid-19 infection and mortality, this does not mean there is no risk. The growing number of reports of severe Multisystem Inflammatory Syndrome in Children (MIS-C) among youth in the US and Europe who tested positive is an immediate reason for concern. And while children may experience less severe symptoms, there is a lack of evidence supporting that these less severe cases are less contagious. Viral load is high even if cases may appear less severe in children, and asymptomatic or mildly symptomatic children may still pose a transmission threat to their family and community members. Overwhelmingly, biomedical literature has shown that social distancing (at a minimum of one meter) is associated with drastic and significant reductions in transmission of Covid-19. The CDC continues to recommend 6 feet of social distancing. How is it unacceptable to implement a proven intervention for a known problem?

In principle 3, you begin by claiming that requiring schoolchildren to wear masks is “impossible to implement”. This reveals an unwillingness to find solutions that will protect our children. The following claim that wearing masks is “not based in science and could be potentially harmful” is a gross misinterpretation of the available evidence. The CDC and California Department of Education recommends that everyone wear masks in public spaces. The weight of the evidence overwhelmingly falls on the side of wearing masks (a meta-review of 44 studies and systematic review of 172 studies demonstrated the protective effect). While these studies have not specifically studied children, the only reason to believe there would be different results is if children are unable to wear their masks properly. This is only applicable to our youngest students, for whom an exception to mask-wearing would be reasonable.

Principle 4 states that if a school district is “unwilling to provide that education, parents will be allowed to send their children to a district or charter school.” This qualification is unacceptable. In this statement, you imply that students with more access will be attending charter schools that have implemented safer practices than public schools. Thus, you imply that less wealthy families do not have a right to a safe, high quality education. It is the duty of our school board to provide an accessible, reliable public education option to Orange County students. By failing to do this, you will be disproportionately affecting families whose children or other family members have pre-existing conditions or learning disabilities, are low-income, and are
from communities of color. No child should forgo their right to a free, high-quality education because their school board didn’t put in the work to make their safe attendance possible. **It is your job to provide accessible education, which means supporting schools and teachers so they can safely reopen.** If you are unwilling or unable to accomplish this, you need to hire people who are.

Please find below a list of our citations. We encourage you to uphold your duty to our community, and prepare reopening principles that better reflect our students’ and families’ needs.

Signed,

**Lyn Stoler, BA, MPH; LAUSD class of 2014**
