

Polling Update: The most recent polls for five GOP-held Senate seats show Democrats LEADING by at least two points!

Team – Democrats need to defeat just FOUR Republican Senators to take back the majority, and right now, we're leading in at least FIVE races.

Mitch McConnell is panicking over the future of his majority, and he's calling on his dark-money super PACs to flood battleground races with attacks.

We must have the resources to respond, or we could see our momentum fall away.

That's why we're raising \$250,000 to our Take Back the Majority Fund before this month so we can take on GOP incumbents and take back the Senate majority.
