Reflecting on my conversation with both of you, it was stated that "Webb denied saying that I was receiving some sort of kickback."

Gentlemen, how long have you known me? Who allowed ACT to use the ND option in the first place? When have I ever not lived up to my word re: ACT and what we promised? you appear to be taking Webb's word over mine. Let alone I am the customer. And regarding the delay in ACT approval, you know darn well that is our of our hands.

For the last time, you have a very shady, dishonest lobbyist in Webb who has attacked my personal integrity and as a constitutional officer I take that very seriously. I suggest you take it seriously as well.

We have also complied tweets and social media posts where Webb has sought to discredit the WVDE. He also criticizes strongly the Common Core, something I believe you touted your alignment to as you have done sales. .

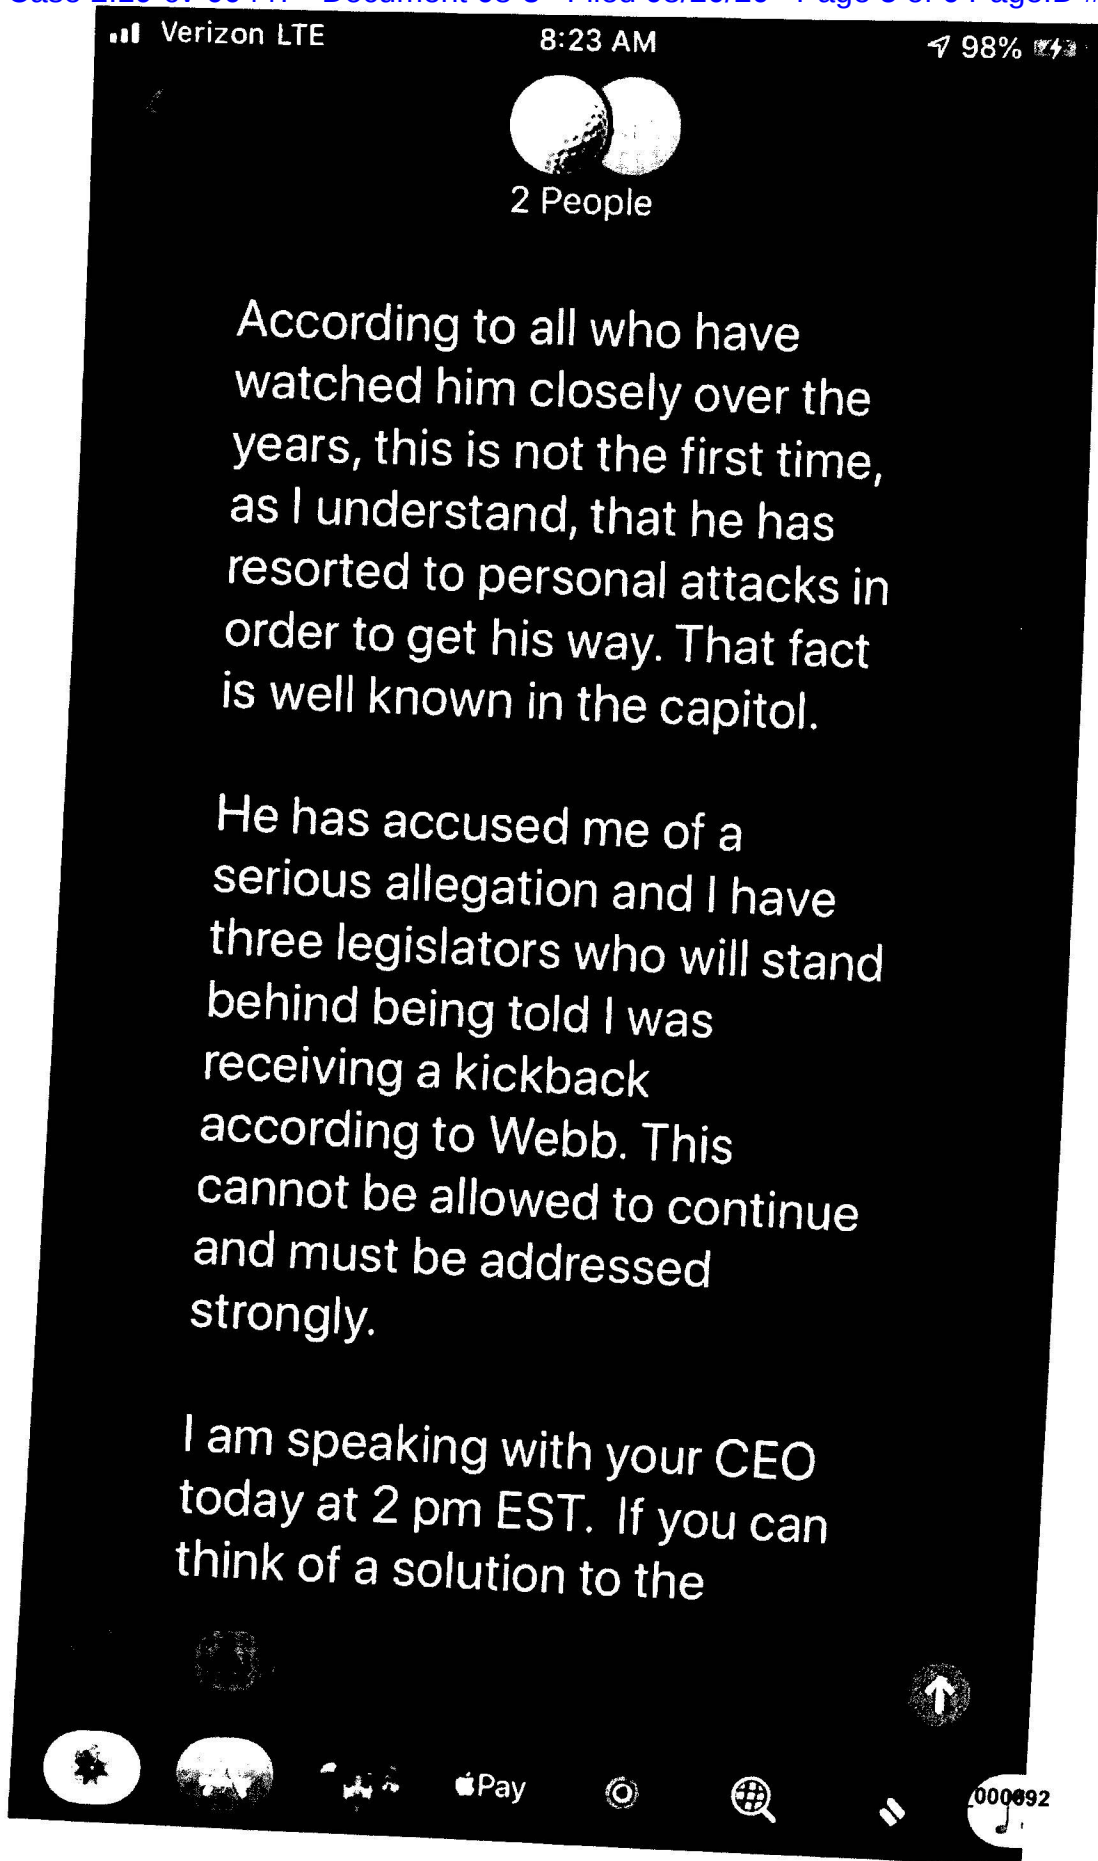

According to all who have watched him closely over the years, this is not the first time, as I understand, that he has

According to all who have watched him closely over the years, this is not the first time, as I understand, that he has resorted to personal attacks in order to get his way. That fact is well known in the capitol.

He has accused me of a serious allegation and I have three legislators who will stand behind being told I was receiving a kickback according to Webb. This cannot be allowed to continue and must be addressed strongly.

I am speaking with your CEO today at 2 pm EST. If you can think of a solution to the

I am speaking with your CEO today at 2 pm EST. If you can think of a solution to the problem ACT created before then, let me know.

On a personal level, I've had it with Webb. I have contacted my personal attorney and will sit down with him next week regarding options.

I asked you on at least two occasions to work collaboratively with us and to hold Webb in check. To date that he not happened.

I am sincere and very disappointed.
